159. Proto-Indo-European **thekʰ(s)-/*thokʰ(s)-* ‘to form, to fashion, to make, to create, either by using a sharp tool or by bending, weaving, joining, braiding, or plaiting together’: Sanskrit *tákṣati* ‘to form by cutting, to plane, to chisel, to chop, to fashion, to make, to create’, *tákṣan-* ‘a wood-cutter, carpenter’; Pāli *tacchati* ‘to build’, *tacchēti* ‘to do woodwork, to chip’, *tacchanī-* ‘hatchet’, *tacchaka-* ‘carpenter’; Prakrit *takkhai*, *tacchai* ‘to cut, to scrape, to peel’; Avestan *tašaiti* ‘to produce, (carpenter) to make’, *taša-* ‘axe’; Latin *texō* ‘to weave, to build’; Greek τέκτων (< *τέκστων) ‘carpenter’, τέχνη (< *τέκνῶ) ‘art, craft’; Armenian *thekʰem* ‘to bend, to shape’; Old Irish *tál* (< *tōks-lo-) ‘axe’; Old Icelandic *þexla* ‘adze’; Old High German *dehsa*, *dehsala* ‘axe, poleaxe’ (New High German *Dechsel*); Lithuanian *tašai*, *tašyti* ‘to hew’; Old Church Slavic *tešǫ*, *tesati* ‘to hew’; Russian Church Slavic *tesla* ‘carpenter’s tool, adze’; Hittite (3rd sg. pres. act.) *ták-ki-(e)-eš-zi* ‘to join, to build’.

Northwest Caucasian: Proto-Circassian **t:aq:a* ‘stump/handle, thick end of a pole’: Bžedux *t:āq:a* ‘stump/handle, thick end of a pole’; Kabardian *dāq’a* ‘stump/handle, thick end of a pole’.

160. Proto-Indo-European **therkʰwh-/*thorkʰwh-/*thykʰwh-* ‘to twist, to turn, to bend’: Latin *torqueō* ‘to twist, to bend, to wind’, *torquis* ‘twisted collar or necklace; collar of draft oxen; ring, wreath’; Sanskrit *tarkú-ḥ* ‘spindle’ (< *tark- ‘to twist, to turn’); Old Church Slavic *trakъ* ‘band, girdle’; Tocharian B *tärk-* ‘to twist around; to work (for example, wood)’, A *tark* ‘earring’; Hittite (3rd sg. pres. act.) *tar-uk-zi* ‘to dance’, (3rd pl. pres. act.) *tar-ku-an-zi*. Perhaps also Greek (Mycenaean) *to-ro-qe-jo-me-no* (**trokʰweyómenos*) (meaning unknown).

Northwest Caucasian: Common Abkhaz **cárqʷə* ‘carpenter’s cord used to mark the line of cutting’: Bzyp *a-cárqʷə* ‘carpenter’s cord used to mark the line of cutting’. For the semantics, cf. Buck 1949:§9.19 rope, cord.

Note: Common Abkhaz **c* = Proto-Indo-European **th*.

161. Proto-Indo-European **wedh-/*wodh-* ‘to strike’: Sanskrit *vadh-* ‘to strike, to slay, to kill, to put to death, to destroy, to murder’, *vadhar-* ‘a destructive weapon, the weapon or thunderbolt of Indra’; Avestan *vadar-* ‘weapon (for striking)’; Lithuanian *vedegà* ‘adz’; Tocharian B *wät-* ‘to fight’.

Northwest Caucasian: Common Abkhaz **wadǎšǎǎ* ‘(to break) into pieces’:
South Abkhaz *a-wadǎšǎǎ-ra* ‘(to break) into pieces’.

162. Proto-Indo-European **yoʔ-s-* (> **yōs-*) ‘to tie, to bind, to wrap, to gird’ (**ʔ* = **ʔ₁*): Avestan *yāsta-* ‘girt, girded’, (3rd sg. pres.) *yāñhayeiti* ‘to gird’; Greek ζώννυμι ‘to gird, to gird around the loins’, ζωστός ‘girded’, ζωστήρ ‘a warrior’s belt’, ζῶμα (< *ζωσ-μα) ‘that which is girded, a girded frock or doublet’, ζώνη (< *ζωσ-νᾱ) ‘belt, girdle’, ζώστρο ‘encircling band or ribbon’; Albanian *n-gjesh* ‘to gird, to put on (belt)’, *gjeshse* ‘ribbon, binder; tape’; Lithuanian *júosiu, júosti* ‘to gird’, *júostas* ‘girded, girt’, *júosta* ‘belt, waistband’, *juosmuõ* ‘waist, loins’, *juosėti* ‘to wear a belt or girdle’; Old Church Slavic *po-jašq, po-jasati* ‘to gird’, *po-jasъ* ‘belt’; Russian *pójas* [пояс] ‘belt’.

Northwest Caucasian: Common Abkhaz **ja* ‘burden, pack’: South Abkhaz *a-já* ‘burden, pack’ (= ‘a collection of items tied up or wrapped; a bundle’).

XV. Sense Perception

163. Proto-Indo-European **b^heh-/*b^hoh-* (> **b^hā-/*b^hō-*) ‘to be bright, shining; to bring to light, to cause to appear; to make clear’ (**h* = **ʔ₄*): Greek φαίνω ‘to bring to light, to cause to appear; to make known, to reveal, to disclose; to make clear; to show forth, to display; to set forth, to expound; to inform against one, to denounce; to give light, to shine; to come to light, to become visible, to appear; to come into being; to come about; to appear to be’, φάω ‘to give light, to shine’, φάος, φῶς ‘light, daylight; light of the eyes’ (pl. φάεα ‘eyes’), φᾶνός ‘light, bright, joyous’; Sanskrit *bhāti* ‘to shine, to be bright, to be luminous; to be splendid or beautiful; to be conspicuous or eminent; to appear, to seem; to show one’s self, to manifest any feeling; to be, to exist’; Avestan *bānu-* ‘spendor’; Old Irish *bán* ‘white’; Old English *bōnian* ‘to polish’.

Northwest Caucasian: Common Abkhaz **ba* ‘to see’: South Abkhaz *a-ba-rá* ‘to see’; Abaza / Tapanta *ba-rá* ‘to see’.

164. Proto-Indo-European **b^hel-/*b^hol-/*b^hl̥-* ‘to glitter, to gleam, to shine’ > ‘to see, to look, to glance’: Old Icelandic *blik* ‘gleam, sheen’, *blika, blikja* ‘to gleam, to twinkle’, *bligja* ‘to gaze’, *bligr* ‘staring, gazing’; Swedish *bliga* ‘to gaze (at, on, upon), to stare (at)’, *blink* ‘twinkle, twinkling, gleam, blink’; Middle English *blinken* ‘to shine; to look at; to blink’; Old Frisian *blika* ‘to

appear, to be visible'; Dutch *blikken* 'to glitter, to twinkle; to look at, to look into, to glance at', *blik* 'regard, look, glance, view, glimpse', *blinken* 'to shine, to glitter'; New High German *blicken* 'to look', *Blick* 'glance', *blinken* 'to glitter, to gleam, to shine; to flash, to blink, to twinkle, to sparkle'. Non-Germanic cognates include: Tocharian B *pilko* 'insight, view; look, glance', A/B *pālk-* 'to see, to look at; to take heed of' also 'to shine, to be highlighted; to burn'; etc. Note: There are numerous derivatives of Proto-Indo-European **b^hel-/b^hol-/b^hl-* 'to glitter, to gleam, to shine' in the Indo-European daughter languages — only a small sampling has been given here, specifically, those derivatives that deal with 'seeing, looking, glancing, etc.' For more information, the etymological dictionaries listed in the references should be consulted. See also the following entry.

Northwest Caucasian:

- A. Common Abkhaz **bla* 'eye': South Abkhaz *á-bla* 'eye'; Ashkharywa *bla* 'eye'; Abzhywa *a-bá-bla* 'eye'. Note: Chirikba (1996b:19) suggests that the following may belong here as well: Common Abkhaz **bla-q''a* 'to stagger, to shake; to fall; to be bewildered' (**bla* 'eye' [?], **q''a* 'to beat, to strike'): South Abkhaz *á-blaq''a-ra* 'to stagger, to shake; to fall; to be bewildered'. However, semantically, the following are far better comparisons: (1) Common Abkhaz **balá-* in **balá-bata* 'to move with uncertainty': South Abkhaz *a-balábata-ra* 'to move with uncertainty'; and (2) *-bla-* // *-bəl-* in South Abkhaz *a-bla-xá-c'* // *a-bəl-xá-c'* 'giddiness, dizziness'.
- B. Ubykh *blá* 'eye', *bladáq''o* 'blink', *blawá* '(someone) who has the evil eye', **blax'amḅá* 'nearsighted', *blamsá* 'eyebrow'.

165. Proto-Indo-European **b^hlend^h-/b^hlond^h-/b^hlnd^h-* 'to be or become blind': Gothic *blinds* 'blind', **gabljndjan* 'to make blind', **afblindnan* 'to become blind'; Old Icelandic *blinda* 'to blind', *blindr* 'blind', *blunda* 'to shut the eyes', *blundr* 'dozing, slumber'; Old English *blendan* 'to blind, to deceive', *blind* 'blind'; Old High German *blint* 'blind'; Lithuanian *blendžiù*, *blēsti* 'to become dark', *blandūs* 'dark, dusky, obscure, gloomy, dismal', *blañdas* 'cloudiness, obscuration of mind or eyesight, drowsiness'; Old Church Slavic *blędq*, *blęsti* 'to go blindly'.

Northwest Caucasian:

- A. (1) Common Abkhaz **bla-q''a* 'to stagger, to shake; to fall; to be bewildered': South Abkhaz *á-blaq''a-ra* 'to stagger, to shake; to fall; to be bewildered'. (2) Common Abkhaz **balá-bata* 'to move with uncertainty': South Abkhaz *a-balábata-ra* 'to move with uncertainty'. (3) South Abkhaz *a-bla-xá-c'* // *a-bəl-xá-c'* 'giddiness, dizziness'. Note also: Common Abkhaz **bla* 'eye': South Abkhaz *á-bla* 'eye'; Abzhywa *a-bá-bla* 'eye'; Ashkharywa *bla* 'eye'.
- B. Ubykh *blaỵ''á* 'blind'.

166. Proto-Indo-European **d^hes-/*d^hos-* ‘to become numb’ (?) (only in Germanic): Old Icelandic *dasast* ‘to become weary and exhausted’, *dasaðr* ‘exhausted, weary’, *dæstr* ‘exhausted, worn out’; Danish *dase* ‘to lie idle’; Swedish *dasa* ‘to lie idle’; Middle English *dasen* ‘to benumb, to stun; to be stupefied, confused, bewildered’; Dutch *daas* ‘dizzy, confused, excited’.

Northwest Caucasian: Common Abkhaz **dásə* ‘to become numb’: Bzyp *a-dás-ra* ‘to become numb’; Abzhywa *a-dás* ‘paralysis’.

167. Proto-Indo-European **hey-thro-* [**hay-thro-*] ‘bitter’ (**-thro-* is a suffix) (**h = *₂a*) (only in Lithuanian): Lithuanian *aitrūs* ‘bitter, sharp’, *aitrà* ‘tartness’.

Northwest Caucasian: Common Abkhaz **ajšá* ‘bitter’: Abaza / Tapanta *ajšá* ‘bitter’; Ashkharywa *ajšá* ‘bitter’; South Abkhaz *áša* ‘bitter’; Bzyp (indef. sg.) *(a)šá-k’* ‘bitter’.

168. Proto-Indo-European **met’-/*mot’-* ‘to be mindful of’: Greek μέδομαι ‘to provide for, to care for, to be mindful of’; Latin *meditor* ‘to think about constantly, to contemplate, to ponder; to devise, to plan; to rehearse, to practice, to go over, to say to oneself’; Old Irish *midithir* ‘to measure, to judge’, *mess* ‘judgment’; Welsh *meddwl* ‘(vb.) to think, to mean; (n.) thought, meaning, opinion’, *meddylfryd* ‘mind, affection, bent’, *meddylgar* ‘thoughtful’; Cornish *medhes* ‘to say’; Gothic *mitōn* ‘to weigh in the mind, to consider, to meditate (upon), to reason about, to think over, to ponder, to cogitate’. Note: These forms are ultimately derived from Indo-European **met’-* ‘to measure’: Gothic *ga-mitan* ‘to measure out, to mete out, to apportion’, *mitaps* ‘measure, measurement, standard of measure’; Old Icelandic *meta* ‘to estimate, to value’; Old English *metan* ‘to measure, to mete out, to mark off; to compare, to estimate’, *met* ‘measure, share, quantity; boundary, limit’; etc.

Northwest Caucasian: Common Abkhaz **mat’anájə* ‘to bow, to ask, to pray’: South Abkhaz *á-mat’anaj-ra* ‘to bow, to ask, to pray’; Bzyp *a-mat’anaj-ra* ‘to bow, to ask, to pray’, also ‘to mumble, to mutter’. Note: Assuming semantic development as in Latin *meditor* in the meanings ‘to rehearse, to practice, to go over, to say to oneself’ and Cornish *medhes* ‘to say’ cited above

169. Proto-Indo-European **mey-n-/*moy-n-/*mi-n-* ‘to think, to mean, to be of the opinion’, **mey-no-* ‘opinion, intention, view’: Old English *mænian* ‘to mean, to signify, to intend; to mention, to relate, to declare, to communicate, to say’; Old Saxon *mēnian* ‘to mean, to mention’; Dutch *menen* ‘to say’; Old High German *meinen* ‘to be of the opinion, to believe, to think, to suppose; to reckon, to assert, to say, to suggest; to mean, to intend’ (New High German *meinen*), *meina* ‘meaning, intention, opinion, view’ (New High German *Meinung*); Old Church Slavic *měnjō, mēniti* ‘to suppose, to think, to reckon, to mention’; Old Russian *mēniti* ‘to think, to suppose, to mention, to mean, to symbolize’. Note:

The original meaning of the Proto-Indo-European unextended verb stem **mey-*/**moy-/*mi-* may have been ‘to perceive, to notice, to be aware of’, preserved, for example, in Sanskrit *miṣāti* (< **mi-s-é-*) ‘to open the eyes, to have the eyes open; to look at’, *ni-meṣá-* (< **mey-s-*) ‘twinkling of the eyes’ (cf. Rix 2001:429 **mejs-* ‘to open the eyes’; Mayrhofer 1956—1980.II:641—642).

Northwest Caucasian: Common Abkhaz **majda* ‘with content, awareness of somebody’: South Abkhaz *á-majda* ‘with content, awareness of somebody’.

XVI. Food and Drink

170. Proto-Indo-European **bhes-* ‘to crush, to grind (with the teeth)’: Sanskrit (redup.) *bábhasti* ‘to chew, to masticate, to devour’; Greek ψάω ‘to rub, to grate, to scratch; to stroke, to wipe’. Note: Beekes (2010.II:1665—1666) considers the Greek forms he cites to be Pre-Greek in origin.

Northwest Caucasian: Common Abkhaz **(b)žah^oá* ‘to ruminate’: Abzhywa *á-žah^oa-ra* ‘to ruminate’, *a-žah^oá* ‘cud, chewing’; Abaza / Tapanta *žah^oa-rá* ‘to ruminate’, *žah^oa* ‘cud, chewing’; Bzyp *a-bžah^oa-rá* ‘to ruminate’.

Note: Proto-Indo-European **b^hVs-* = Common Abkhaz **bžV-*.

171. Proto-Indo-European **k^weth⁻u-* ‘glutinous secretion, viscous discharge: gum, resin, sap’ (< **k^weth⁻/*k^woth⁻* ‘to ooze [out], to seep [out]’): Sanskrit *játu-* ‘lac, gum’; Latin *bitūmen* ‘pitch, asphalt’ (borrowed from either Sabellian or Celtic); Middle Irish *beithe* ‘birch-tree’ (borrowed from Brittonic Celtic); Old Icelandic *kváða* ‘resin’; Faroese *kváða* ‘viscous fluid from a cow’s teat’; Old Danish *kvade* ‘birch sap’; Norwegian *kvaade*, *kvae* ‘resin; watery fluid from a pregnant cow’s udder’, (dial.) *kvæde* ‘birch sap’; Old English *cwidu*, *cweodo*, *cwudu* ‘resin, gum; cud, mastic’; Old High German *quiti*, *kuti* ‘glue’. Note: In view of Faroese *kváða* ‘viscous fluid from a cow’s teat’ and Norwegian *kvaade*, *kvae* ‘resin; watery fluid from a pregnant cow’s udder’, Armenian *kath^h* ‘milk’ (dialectal variants include: Sučhava *gath^h*; Tbilisi *kát^h*; Łabarał, Goris, Šamaxi *kát^hnə*; Loři *kath^h*; Agulis *kaxc^h*; Havarik *kaxs*; Areš *kaxs*; Mehri *kaxc^h*; Karčewan *kaxc^h*) may belong here as well. If so, then the traditional comparison of the Armenian form with Greek γάλα ‘milk’, Latin *lac* ‘milk’, etc. (cf. Martirosyan 2008:294—296) is to be abandoned.

Northwest Caucasian: Proto-Circassian **k^oəth(a)* ‘to pour out, to pour into’: Bžedux *γə-k^oəth(a)* ‘to pour out, to pour into’; Kabardian *γə-k^oət(a)* ‘to pour out, to pour into’ (*γə* = ‘hollow space’).

172. Proto-Indo-European **met⁻/*mot⁻* ‘(vb.) to eat; (n.) food, meal’ (Germanic only): Gothic *mats* ‘food’, *matjan* ‘to eat, to feed’; Old Icelandic *matr* ‘meat, food’, *mata* ‘to feed another’; Old English *mete* ‘food’, *metsian* ‘to feed, to

furnish with provisions’, *mettian* ‘to supply with food’; Old Saxon *meti* ‘food’; Middle Low German *met* ‘pork’; Old High German *maz* ‘food, nourishment’. Note: According to Kroonen (2013:358), Greek μεστός ‘full, filled, satiated’ belongs here as well. Kroonen derives μεστός from **med-to-s*.

Northwest Caucasian:

- A. Common Abkhaz **mác’a* ‘locust; insatiable, gluttonous’: Abaza / Tapanta *mac’a* ‘locust; insatiable, gluttonous’; South Abkhaz *a-mác’a* ‘insatiable, gluttonous; locust’.
- B. Ubykh *ma:c’á* ‘grasshopper’.
- C. Proto-Circassian **mac’a* ‘locust’: Bžedux *māc’a* ‘locust’; Kabardian *māc’a* ‘locust’.

Note: Northwest Caucasian **c’* = Proto-Indo-European **t’*.

XVII. Clothing

173. Proto-Indo-European **bhl-ekh-/*bhl-okh-* ‘covering, cloth’ (only in Germanic): Old Icelandic *blæja* (also *blægja*) ‘a fine, colored cloth; the cover of a bed; cover of an altar table; a shield; a veil’; Swedish *blår*, *blånor* ‘oakum, tow’, *blöja* ‘swaddling cloth’; Danish *ble* ‘diaper’, *blaar* ‘oakum’ (Old Danish *blaa*); Norwegian *bleie*, *blæje* ‘diaper’; Old High German *blaha* ‘coarse linen cloth’ (New High German *Blache*, *Blahe*; *Plahe*, *Plane*) (cf. Kluge—Seebold 2011:709; De Vries 1977:46).

Notes:

1. Kroonen (2013:66), Torp (1919:31), and de Vries (1977:46) reconstruct Proto-Germanic **blahjōn-* ‘cloth’, while Orël (2003:47) reconstructs Proto-Germanic **blaxōn*.
2. Assuming derivation from a Proto-Indo-European root **bhel-/*bhol-/*bhļ-* ‘to cover’, not further attested in the various Indo-European daughter languages.

Northwest Caucasian: Proto-Circassian **bəλə* ‘to hide’: Temirgoy *ğa-bəλə-n* ‘to hide (tr.)’. Note: For the semantics, cf. Old English *wrēon* ‘to cover, to clothe, to envelope; to conceal, to hide’. Cf. Buck 1949:§12.27 hide, conceal.

Note: Proto-Circassian **λ* is represented as **l* in Proto-Indo-European.

174. Proto-Indo-European **k^hem-/*k^hom-/*k^hṃ-* ‘(vb.) to cover, to conceal; (n.) covering; shirt’: Sanskrit *sāmulyà-ḥ* (Vedic *sāmūla-ḥ*) ‘thick woolen shirt’; Latin *camīsia* ‘linen shirt or night-gown’ (Gaulish loan ?); Gothic *-hamōn* in: *ana-hamōn*, *ga-hamōn* ‘to get dressed’, *af-hamōn* ‘to get undressed’, *ufar-hamōn* ‘to put on’; Old Icelandic *hamr* ‘skin, slough; shape, form’, *hams* ‘snake’s slough, husk’; Old English *hemeþ* ‘shirt’, *ham* ‘undergarment’, *-hama*

‘covering’ (only in compounds), *hemming* ‘shoe of undressed leather’; Old High German *hemidi* ‘shirt’, *-hamo* ‘covering’ (in compounds) ; Old Frisian *hemethe* ‘shirt’; Dutch *hemd* ‘shirt’.

Northwest Caucasian: Common Abkhaz **qamə* ‘fur coat’: Bzyp *a-ḡamá* ‘fur coat’; Abzhywa *a-ḡamá* ‘fur coat’; Abaza / Tapanta *qamə* ‘fur coat’.

XVIII. Qualities

175. Proto-Indo-European **b^hengh-* ‘to swell, to increase’, **b^hng^h-u-* ‘swollen, fat, thick, dense; much, many; numerous, abundant’: Sanskrit *bahú-h* ‘much, abundant; many, numerous; abounding in; frequent; large, great, mighty’, *bamhate* ‘to grow, to increase’, (causative) *bamhayati* ‘to cause to grow, to increase, to strengthen, to fix, to make firm’; Hittite (adj.; nom. sg.) *pa-an-ku-uš* ‘all (of), entire, complete; every’, (nom. sg.) *pa-an-ku-uš* ‘multitude, the people, the masses’; Greek *παχός* ‘thick, stout, massive; fat, great’; Latvian *biezs* ‘thick’.

Northwest Caucasian:

- A. Common Abkhaz **bay’á* ‘thick, dense, solid, strong’: South Abkhaz *a-bay’á* ‘thick, dense, solid, strong’; Abaza / Tapanta *bay’á* ‘hard, solid, strong; stingy (of men)’.
- B. Ubykh *by’á* ‘wide, broad’, *by’áš’* ‘width, breadth’.
- C. Proto-Circassian **bayə* ‘to swell’: Bžedux *bayə* ‘to swell’; Kabardian *bay* ‘to swell’.

Notes:

1. Chirikba (1996b:14) writes Common Abkhaz **bay’á*.
2. Kuipers (1975:12) writes Proto-Circassian **baġə*.
3. Proto-Indo-European **ŋ* is reflected as **a* in Northwest Caucasian.

176. Proto-Indo-European **b^hoso-* ‘bare, uncovered, naked’: Old Icelandic *berr* ‘bare, naked; (metaph.) uncovered, open, clear, manifest’; Old English *bær* ‘bare, uncovered; naked, unclothed’; Old High German *bar* ‘naked, bare’ (New High German *bar*); Old Church Slavonic *bosъ* ‘barefoot, unshod’; Russian *bosój* [босо́й] ‘barefooted, barelegged’; Lithuanian *bāsas* ‘barefooted’.

Northwest Caucasian: Common Abkhaz **báša* ‘simple, usual; in vain, for nothing’: South Abkhaz *a-báša* ‘simple, usual’, *báša*, (redup.) *baša-máša* ‘in vain, for nothing’; Ashkharywa *báša* ‘in vain, for nothing’; Abaza / Tapanta (redup.) *baša-máša* ‘simply, for nothing’.

Note: Common Abkhaz **š* = Proto-Indo-European **s*.

177. Proto-Indo-European **dhes-/dhos-* ‘to be or become weary, exhausted, worn out’ (Germanic only): Old Icelandic *dasask* ‘to become weary, exhausted’, *dasaðr* ‘weary, exhausted’, *dasi* ‘a lazy person’, *dæstr* ‘exhausted, worn out’; Middle English *darin* ‘to stay in one place, to remain quiet; to lurk; to be motionless, inactive; to hesitate’, *dasin* ‘to become dizzy; to stupefy, to bewilder’; Middle Dutch *dasen* ‘to rave, to be foolish’, *daes* ‘foolish’. Note: Kroonen (2013:91—92) reconstructs Proto-Germanic **dazēn-* ‘to be numbed (?)’.

Northwest Caucasian: Common Abkhaz **dāsə* ‘to become numb’: Abzhywa *a-dās* ‘paralysis’; Bzyp *a-dās-ra* ‘to become numb’.

178. Proto-Indo-European **hegh-* [**hagh-*] ‘(to be) bad, evil; to (cause) harm’ (**h = *ǵ₁*): Sanskrit *aghá-h* ‘going wrong; mishap, evil; misdeed, a fault (sin, passion, impurity, pain, suffering); evil, bad, sinful, subject to passion, miserable, unclean’, *aghávān* ‘sinful’; Vedic *aghāyati* ‘to be malicious, to sin, to threaten’; Avestan *ayō* ‘bad, evil’. Perhaps also: Gothic **agls* ‘disgraceful’, **agljan* ‘to harm’; Old English *egle* ‘troublesome; horrible, repulsive, hideous, loathsome; grievous, painful’, *eglan* ‘to trouble, to plague, to molest, to afflict’; Norwegian *egla* ‘to bait, to goad, to heckle, to molest, to offend’ *eglet(e)* ‘cantankerous, quarrelsome’.

Northwest Caucasian:

- A. (1) Common Abkhaz **ága* ‘fool’: South Abkhaz *ága* ‘fool’; (2) Common Abkhaz **ga-ǰá* ‘silly, fool’: Bzyp *a-ga-ǰá* ‘silly, fool’; Abzhywa *a-ga-ǰá* ‘silly, fool’. Note: Assuming semantic development as in Russian *duráckij* [дурацкий] ‘foolish, silly’, *durák* [дурак] ‘fool, dupe, silly person; ass; simpleton, buffoon, clown; blockhead, dunce’, *durít’* [дурить] ‘to play the fool, to be foolish’, *durét’* [дуреть] ‘to grow stupid’, *dur’* [дурь] ‘obstinacy, folly, caprice, whim, extravagance’ from the same stem found in *durnój* [дурной] ‘ugly; bad; ill; unsightly, ill-favored; vile, base, wretched; evil, depraved’; etc.
- B. Ubykh *ag’a* ‘bad, evil’.

179. Proto-Indo-European (**k’en-/k’on-/*)**k’n-* ‘knot, knob’: Old Icelandic *knappr* ‘knob’, *knútr* ‘knot’; Old English *cnop* ‘knob’, *cnotta* ‘knot’; Middle Low German *knotte* ‘knot, knob’.

Northwest Caucasian:

- A. Proto-Circassian **k’ana*: Kabardian *k’āna* ‘piece, lump’.
- B. Common Abkhaz **k’ak’ánə* ‘nut’: Abaza / Tapanta *k’ak’an* ‘nut’; South Abkhaz *a-k’ak’án* ‘walnut’; Ashkharywa *k’ak’án* ‘walnut’.

180. Proto-Indo-European **k’er-/k’or-/k’ŷ-* in **k’or-skho-* ‘lively, quick, bold, brisk, very much’ (Germanic only): Proto-Germanic **karskaz* ‘lively, quick,

bold, brisk, very much' > Old Icelandic *karskr* 'brisk, bold; hale, hearty' (*era karskr maðr sá er ...* 'he suffers much who ...'); Danish *karsk* 'quick'; Swedish *karsk* 'bold'; Middle Low German *karsch* 'lively, fresh'; Dutch *kers-vers* 'new, fresh'; Middle High German *karsch* 'lively, fresh'.

Northwest Caucasian: Common Abkhaz **k'ara* 'much, extremely' in **k'ara-ḡa* 'to be extremely tired' (**ḡa* 'to work'); South Abkhaz *a-k'ara-ḡa-ra* 'to be extremely tired'.

181. Proto-Indo-European (extended form) **k'r-um-bh-*, **k'r-u-bh-* 'coarse, thick, big': Lithuanian *grubūs* 'uneven, rough'; Russian *grúbyj* [грубый] 'rough, coarse'; Czech *hrubý* 'big, coarse, rough'; Slovak *hrubý* 'thick, big, coarse'; Polish *gruby* 'thick, big, coarse'. Note also: Sanskrit *grathnāmi*, *grantháyati* 'to fasten, to tie or string together', *grathna-h* 'bunch, tuft', *granthi-h* 'a knot, tie, knot of a cord; bunch or protuberance'; Latin *grūmus* 'a little heap, hillock (of earth)'; Old Irish *grinne* 'bundle'; Old Icelandic *kring* 'round'; etc. Note: According to Pokorny (1959:385—390), all of the above forms are ultimately derived from Proto-Indo-European **k'er-/*k'or-/*k'ṛ-* (traditional **ger-/*gor-/*gr-*) 'to twist, to turn'.

Northwest Caucasian: Proto-Circassian **k'ərə* 'thick, dense (of wool, beard, etc.), long (of hair), high (of grass)'; Bžedux *č'ərə* 'thick, dense (of wool, beard, etc.), long (of hair), high (of grass)'; Kabardian *k'ər* 'thick, dense (of wool, beard, etc.), long (of hair), high (of grass)'.

182. Proto-Indo-European **k'wṛH-u-* 'heavy, weighty; great, large, extended, long; grievous, serious; important, elevated': Sanskrit *gurú-h* 'heavy, weighty; great, large, extended, long; high in degree, vehement, violent, excessive, deep, much; difficult, hard; grievous; important, serious, momentous; valuable, highly prized; dear, beloved; haughty, proud; venerable, respectable; best, excellent'; Latin *gravis* 'heavy, weighty, burdensome; important, elevated, dignified; grievous, painful, hard, harsh, severe, unpleasant'; Greek βάρυς 'heavy, weighty; impressive; difficult, wearisome, troublesome, oppressive'; Tocharian A *krāmārts*, B *kramartse* 'heavy', B *krāmār* 'weight, heaviness'.

Note: Proto-Indo-European **bhVs-* = Proto-Circassian **PzV-*; Ubykh *bzV-*; Common Abkhaz **bVz-*, **bzV-*.

197. Proto-Indo-European **gher-/g^hor-/g^hyr-* 'to growl, to wail, to weep, to cry (out)' (onomatopoeic): Latin *hirriō* 'to growl'; Armenian *ger* 'to wail'; Gothic *grētan* 'to weep, to lament', *grēts* 'weeping'; Old Icelandic *gráta* 'to weep, to bewail', *grátr* 'weeping'; Swedish *gráta* 'to weep', *grát* 'weeping'; Old English *grætan* 'to weep', *grædan* 'to cry out, to call out'; Old Saxon *grātan* 'to weep'; Middle High German *grazen* 'to cry out, to rage, to storm'.

Northwest Caucasian: Common Abkhaz (reduplicated) **γ'arə-γ'arə* (onomatopoeic) 'to rattle, to jingle; sound of beating or striking (against something); rattle, clapper': South Abkhaz *a-γ'ar-γ'ár-ra* 'to rattle, to jingle; sound of beating or striking (against something)', *a-γ'ar-γ'ár* 'rattle, clapper'; Abaza / Tapanta *γ'ar-γ'ár* 'rattle, clapper; description of the sound produced by moving transport'.

Note: Common Abkhaz **γ* = Proto-Indo-European **g^h*.

198. Proto-Indo-European **g^{wh}rem-/g^{wh}rom-/g^{wh}rṃ-* 'to roar, to growl, to howl, to rage': Latin *fremō* 'to roar, to murmur, to growl, to rage, to snort, to howl'; Old English *grimman* 'to rage, to fret, to roar, to cry out, to grunt'; Old Saxon *grimman* 'to rage'; Old High German *grimmen* 'to rage, to yell'. Note: The Latin form could be from Proto-Indo-European **b^hrem-/b^hrom-/b^hrṃ-* 'to roar, to growl, to howl' instead (derivative of **b^her-/b^hor-/b^hyr-* 'to make a sound, to hum, to buzz, to mutter' listed above).

Northwest Caucasian:

- A. Common Abkhaz **g^o(ə)rəmə* 'to groan, to grumble': South Abkhaz *a-g^orəm-ra* 'to grumble, to mumble'; Abaza / Tapanta *g^orəm* 'moan, groan', *g^orəm-ra* 'to moan, to groan; to moo, to bellow (of animals)'.

B. Ubykh (reduplicated) *g^oərg^oərg^o ‘the sound made by the rustling of water or the rumble of wheels’.

199. Proto-Indo-European *k^heh-y- [*k^hah-y-] (> *k^hāy-) ‘to caw, to croak’ (*h = *₂): Sanskrit *gāyati* ‘to sing’, *gāya-h* ‘song’, *gāthā* ‘song, verse’; Lithuanian *giedóti* ‘to sing’; Old Russian *gajati* ‘to caw, to croak’.

Northwest Caucasian: Common Northwest Caucasian *k^h’əjə ‘to shriek, to howl, to mew, to caw’ (cf. Chirikba 1996a:203):

A. Common Abkhaz *k^h’əjə ‘to mew; to caw (of some birds, for example, of raven)’; South Abkhaz *a-k^h’əj-ra* ‘to mew; to caw (of some birds, for example, of raven)’

B. Proto-Circassian *k^h’əyə ‘to shriek, to howl’: Kabardian *k’əy* ‘to shriek, to howl’; Bžedux *č’əyə* ‘to shriek, to howl’.

200. Proto-Indo-European *k^h’er-/*k^h’or-/*k^h’r- ‘to cry out, to call, to screech’: Sanskrit *járate* ‘to call out to, to address, to invoke; to crackle (fire)’; Crimean Gothic *criten* ‘to cry’; Old Icelandic *krutr* ‘murmur’, *krytja* ‘to murmur, to grumble’, *krytr* ‘noise, murmur’; Old English *ceorran* ‘to creak’, *ceorian* ‘to murmur, to grumble’, *ceorcian* ‘to complain’, *cracian* ‘to resound’, *crācettan* ‘to croak’, *crāwian* ‘to crow’; Old Saxon **krāian* ‘to crow’; Old High German *crāen*, *krāhen*, *chrāen*, *khraen* ‘to crow’; Old Church Slavonic *grajō*, *grajati* ‘to crow, to caw’.

Northwest Caucasian:

A. Proto-Circassian *k^h’ə(r)ǵə ‘to squeak, to creak’: Bžedux *č’ərgə* ‘to squeak, to creak’; Kabardian *k’əǵ* ‘to squeak, to creak’.

B. Common Abkhaz (reduplicated) *k^h’ar-k’arə ‘to crackle’: South Abkhaz *á-k’ark’ar-ra* ‘to cackle’. Note: The Indo-European forms may also be compared with Common Abkhaz *q’arə ‘to croak, to caw’ (see below).

Northwest Caucasian: Common Abkhaz *q’arə ‘to croak, to caw’: South Abkhaz *a-q’ər-ra* ‘to croak, to caw’, (reduplicated) *á-q’ər-q’ər-ha* description of loud laughter; Bzyp *a-q’rə* ‘a kind of bird’. Note: The Indo-European forms may also be compared with Proto-Circassian *k^h’ə(r)ǵə ‘to squeak, to creak’ and Common Abkhaz (reduplicated) *k^h’ar-k’arə ‘to cackle’ (see above).

201. Proto-Indo-European *k^weth-/*k^woth- ‘to say, to speak, to call: Armenian *kočem* (< *k^woth-y-) ‘to call, to invite, to invoke, to name’, *koč* ‘call, invitation’; Gothic *qīþan* ‘to say’; Old Icelandic *kveða* ‘to say’; Old English *cweþan* ‘to say, to speak’; Old Frisian *quetha* ‘to speak’; Old Saxon *quedan* ‘to speak’; Old High German *quedan* ‘to speak’.

Northwest Caucasian: Proto-Circassian **q'atʰa* ‘to tell, to report; to announce, to make known’: Bžedux *ʔatʰa* ‘to tell, to report’; Kabardian *ʔata* ‘to announce, to make known’.

202. Proto-Indo-European (reduplicated) (onomatopoeic) **p'ar-p'ar-* ‘(vb.) to babble, to prattle, to chatter, to jabber; (n.) unclear speech, gibberish’: Sanskrit *barbara-h* ‘a blockhead, fool, barbarian, anyone not a Sanskrit speaker, not an Aryan’; Greek βάρβαρος ‘barbarous, that is, not Greek, foreign’, βαρβαρίζω ‘to behave like a barbarian, to speak like one; to speak broken Greek, to speak gibberish’, βαρβαρικός ‘barbaric, foreign; like a foreigner’; Latin *barbarus* (Greek loan) ‘of or belonging to a foreign country or region, foreign (from a Greek point of view)’.

Northwest Caucasian: Common Abkhaz (reduplicated) **p'ar-p'arə* ‘to chatter, to jabber’ (onomatopoeic): South Abkhaz *a-p'ar-p'ar-rá* ‘to chatter, to jabber’, *a-p'ar-p'ar-jə* ‘chatterer’; Abaza / Tapanta *p'ar-p'ar* ‘endless chatter’.

XXI. Numerals

205. Proto-Indo-European **ǵoy-no-* ‘single, alone, solitary; one’ (with non-apophonic *-o-*) (**ǵ* = **ǵ₁*): Latin *ūnus* ‘one’ [Old Latin *oinos*]; Umbrian *unu* ‘one’; Old Irish *óen, óin* ‘one’; Welsh *un* ‘one’; Gothic *ains* ‘one’; Old Icelandic *einn* ‘one’; Faroese *ein* ‘one’; Danish *en* ‘one’; Norwegian *ein* ‘one’; Old Swedish *en* ‘one’; Old English *ān* ‘one; alone, sole, lonely; singular, unique’; Old Frisian *ān, ēn* ‘one’; Old Saxon *ēn* ‘one’; Dutch *een* ‘one’; Old High German *ein* ‘one’ (New High German *ein*); Albanian *një* ‘one’; Lithuanian *vienas* (with unexplained initial *v-*) ‘one; alone’; Latvian *viēns* ‘one’; Old Prussian *ains* ‘one’; Old Church Slavic *инъ* ‘some(one), other’; Russian Church Slavic *инokyj* ‘only, sole, solitary’; Russian *инóй* [инóй] ‘different, other’. It is also found in Greek οἷνη, οἰνός ‘roll of one (in dice)’.

Northwest Caucasian:

- A. Common Abkhaz **ja-nə-* ‘all, whole’: Abaza / Tapanta *ján-la* ‘whole (of time term)’; Bzyp *jan-g’* ‘always, all the time’.
- B. Proto-Circassian **yanə* ‘whole’: Kabardian *yan* ‘whole (for example, day)’.

Note: No doubt, the original semantic range was as follows in Northwest Caucasian: (sg.) ‘one, every one’ ~ (pl.) ‘all’ ~ (coll.) ‘whole’. Eventually, the connotations ‘one, every one’ were lost. For a discussion of the semantic developments among forms with the meanings ‘whole’ ~ ‘one, every one’ ~ ‘all’ in the Indo-European daughter languages, cf. Buck 1949:§13.13 whole and §13.14 every; all (pl.).

Discussion: In Proto-Indo-European, there were three extended forms of the basic stem **ǵoy-* ‘single, alone, solitary; one’:

1. **ǵoy-no-*: see above for examples.
2. **ǵoy-wo-*: Avestan *aēva-* ‘one’; Old Persian *aiva-* ‘one’; Greek οἷος ‘alone, lone, lonely’ (Cyprian οἷφος).
3. **ǵoy-k^ho-*: Sanskrit *éka-h* ‘one’; Mitanni (“Proto-Indic”) *aika-* ‘one’.

Now, as it happens, the basic stem **ǵoy-* ‘single, alone, solitary; one’ extracted from the three extended forms given above has a solid Nostratic etymology (cf. Bomhard 2018.3:800—801, no. 681, for details). Related forms are found in Afroasiatic (specifically, Semitic [Arabic] and Berber), Uralic (specifically,

Samoyed), and Altaic/Transeurasian (specifically, Tungus [Oroch]). This indicates that the stem was ancient in Proto-Indo-European and that, therefore, Proto-Indo-European must have been the source language from which the term was borrowed by Northwest Caucasian.

As an aside, it may be noted that there must have been a certain amount of fluidity in early Proto-Indo-European in the expression of the number ‘one’. This is based upon the fact that there are competing terms attested in the various Indo-European daughter languages. First, there are the derivatives of the stem **ḡoy-*, discussed above. Then, there was the stem **sem-*, which served as the basis for the following Greek and Armenian forms: Attic (nom. sg. m.) εἷς ‘one’, Doric ἦς ‘one, Cretan ἔνς (< *ἔνς < *ἔμς < *sems) ‘one’; Attic (f.) μία (< *σμ-ια) ‘one’; Armenian *mi* ‘one’. Next, there was the stem **pher-*, which served as the basis for the ordinal number in the daughter languages, thus: **pher-/p̥h̥r-* ‘first’ (extended forms: **p̥h̥rH-wo-*, **p̥h̥rH-mo-*, **p̥h̥rey-mo-*, **p̥h̥rey-wo-*, **p̥h̥roH-tho-*, **p̥h̥roH-mo-*, etc.). Finally, there was the stem **si-H*, **sy-o-*, which served as the basis for: Hittite **šia-* ‘one’ (nom. sg. c. 1-*iš*, 1-*aš*; acc. sg. 1-*an*; etc.); Greek (Homeric) (f.) ἴα ‘one’ (cf. Kloekhorst 2008:750—751) (see below).

206. Proto-Indo-European **si-H*, **sy-o-* ‘one’: Hittite **šia-* ‘one’ (nom. sg. c. 1-*iš*, 1-*aš*; acc. sg. 1-*an*; etc.); Greek (Homeric) (f.) ἴα ‘one’.

Northwest Caucasian: Proto-Circassian **šh'ə-* in **šh'əp̥ha* ‘first, for the first time’: Bžedux *šh'əp̥ha* ‘first, for the first time’; Kabardian *šəpa* ‘first, for the first time’.

Note: Proto-Circassian *šh'* is represented as **s* in Proto-Indo-European.

207. Proto-Indo-European (**t'uḡw-o-*, **t'uḡw-i-* >) **t'(u)wo-*, **t'(u)wi-* ‘two’ (**ḡw = *ḡ₁w*): Sanskrit (m.) *dváu*, *dvā* (Vedic also *duváu*, *duvā*), (f./n.) *dvé* (Vedic also *duvé*), *dvi-* (in composition) ‘two’, *dviká-h* ‘consisting of two’, *dviḥ* ‘twice’; Avestan (m.) *dva*, (f./n.) *baē* ‘two’, *biš* ‘twice’; Greek δύω ‘two’ (uninflected δύο), δίς ‘twice, doubly’; Latin *duo*, (f.) *duae* ‘two’, *bīnī* ‘twofold, twice’, *bis* ‘twice’; Old Irish *dáu*, *dóu*, *dó* ‘two’, *dé-* (in composition) ‘two-, double’; Old Welsh *dou* ‘two’; Albanian (Gheg) (m.) *dy*, (f.) *dÿ* ‘two’; Gothic (m.) *twai*, (f.) *twōs*, (n.) *twa* ‘two’; Old Icelandic (m.) *tveir*, (f.) *tvær*, (n.) *tvau* ‘two’, *tvennr*, *tvinnr* ‘consisting of two different things or kinds, twofold, in pairs’, *tví-* (in compounds) ‘twice, double’, *tvísvar*, *tysvar* ‘twice’; Old English (m.) *twēgen*, (f./n.) *twā*, (n.) *tū* ‘two’, *twi-* (prefix) ‘two’, *twinn* ‘double’, *twiwa* ‘twice’; Old Frisian (m.) *twēne*, *tvēne*, (f./n.) *tva* ‘two’, *twi-* (prefix) ‘twice, double’, *twia* (adv.) ‘twice, double’; Old High German (m.) *zwēne*, (f.) *zwā*, *zwō*, (n.) *zwei* ‘two’, *zwi-* (prefix) ‘twice, double’; Lithuanian (m.) *dù*, (f.) *dvi* ‘two’; Latvian (m./f.) *divi* ‘two’; Old Prussian (m./f.) *dwai* ‘two’; Old Church Slavic (m.) *dъva*, (f./n.) *dъvě* ‘two’; Hieroglyphic Luwian *tuwa-* ‘two’; Lycian *kbi-* (Milyan) *tbi-* ‘two’.

Northwest Caucasian:

- A. Proto-Circassian **Tq'(a)* ‘two’: Kabardian *t'ʔə* ‘two (twice)”; Bžedux *t'(a)* ‘two (twice)”; Temirgoy *t'ə* ‘two’; Ubykh *t'q'a* ‘two’. Note: In his 2007 review of Chirikba’s monograph *Common West Caucasian*, Sergej Starostin reconstructs Proto-Circassian **tʔwə* ‘two’.
- B. Abkhaz *ʕə* (< **tʕə* < **t'q'ə*) ‘two’ (personal communication from John Colarusso).
- C. Ubykh *t'q'á* ‘two’.

XXI. Measurement

208. Proto-Indo-European **k^han-d^h-* (*/*k^hη-d^h-*) ‘corner, edge, border’: Albanian *kënd*, *kand* (m. pl. *kënde*, *kande*) ‘corner, angle; seam, edge, border’; Greek *κανθός* ‘corner of the eye’.

Notes:

1. According to Orël (1998:178), Albanian *kënd*, *kand* ‘corner, angle; seam, edge, border’ is an early borrowing from Proto-Slavic **kǫtь* ‘corner’ (cf. Russian *kut* [кѹт] ‘corner, blind alley’; Serbo-Croatian *kūt* ‘corner, angle’; Slovenian *kǫt* ‘corner’; Bulgarian *kāt* ‘corner, angle’; Czech *kout* ‘corner’; Polish *kąt* ‘corner’), while Meyer (1891:174) derives it from Italian *canto* ‘corner, angle’. However, Derksen (2008:244) derives Proto-Slavic **kǫtь* from Balto-Slavic **komp-* and compares Lithuanian *kaĩpas* ‘corner, angle; nook’, thus invalidating the comparison with Proto-Slavic **kǫtь*.
2. The comparison of Albanian *kënd*, *kand* with Greek *κανθός* was suggested by Mann (1984—1987:470), who reconstructs Proto-Indo-European **kanthos*, *-us*; **kant-* ‘side, edge, corner’. Mann reconstructs **-th-* to accommodate the Celtic and Balto-Slavic forms he includes in his etymology.
3. According to Beekes (2010.I:635—636) and Frisk (1970—1973.I:776—777), there is no Indo-European etymology for Greek *κανθός* ‘corner of the eye’. Beekes assumes that it is Pre-Greek in origin. Boisacq (1950:406) reconstructs Proto-Indo-European **qanth-* and also compares Proto-Slavic **kǫtь*, in addition to Welsh *cant* ‘circle; rim, border, edge, boundary; tire, belt, girdle, girth’ and Breton *kant* ‘circle, disk’, but this is questioned by Chantraine (1968—1980.I:492). Chantraine also mentions the possibility that Greek *κανθός* may be Pre-Greek in origin.
4. The comparison of Greek *κανθός* with the Celtic forms mentioned above has been rightly rejected. Thus, we are left with the Albanian and Greek forms as the only two possible candidates for inclusion here. Substrate origin cannot be ruled out for Greek *κανθός*, while Albanian *kënd*, *kand* may ultimately be a loanword after all, though none of the theories advanced so far are convincing.
5. Relationship to the following (no. 209) (Proto-Indo-European **k^han-th-* [**k^hη-th-*]) unknown.

Northwest Caucasian: Common Abkhaz *káda ‘side(s)’: South Abkhaz *a-káda* ‘side(s)’.

Note: Proto-Indo-European **h₂* is reflected as **a* in Northwest Caucasian.

209. Proto-Indo-European **k^han-t^h*-(/**k^hh₂-t^h*-) ‘rim, border, edge, boundary’ (Celtic only): Welsh *cant* ‘circle; rim, border, edge, boundary; tire, belt, girdle, girth’ and Breton *kant* ‘circle, disk’.

Notes:

1. Relationship to the preceding (no. 208) (Proto-Indo-European **k^han-d^h*- [/**k^hh₂-d^h*-]) unknown.
2. Not in Falileyev 2000 or Matasović 2009.

Northwest Caucasian: Common Abkhaz **qata* ‘side, edge’: Abaza / Tapanta *qata* ‘side, edge’.

Note: Proto-Indo-European **h₂* is reflected as **a* in Northwest Caucasian.

210. Proto-Indo-European **met^h*-/**mot^h*- ‘(vb.) to measure; (n.) measure, quantity’ (Baltic only): Lithuanian *mātas* ‘measure, index; (dial.) size, quantity’, *mētas* ‘time, period; (pl.) year’, *matúoju*, *matúoti* ‘to measure’; Latvian *mēts* ‘time, period’; Old Prussian *mattei* ‘measure’, *mettan*, *metthe*, *mette* ‘year’.

Notes:

1. Greek μέτρον (< **met^h-ro-*) ‘measure, goal, length, size, limit; meter’ (Greek loanword in Latin *metrum* ‘poetic rhythm, meter’) may belong here as well, assuming that it is derived from a different Proto-Indo-European root than that preserved in μήτρα ‘areal measure’ (cf. Sanskrit *mā-tra-m* ‘measure, quantity, sum, size, duration, etc.’) (< Proto-Indo-European **meE-* ‘to measure’).
2. It appears that there were several different roots for ‘to measure’ in Proto-Indo-European: (1) **met-* (traditional **med-*); (2) **meʔ-* (traditional **mē-*; **meʔ₁-*; **meh₁-*; **mey-*; etc.); (3) **met^h*- (traditional **met-*). Cf. Derksen 2015:307.

Northwest Caucasian: Proto-Circassian **ma(r)t:a* ‘quantity, measure’: Temirgoy *māta* ‘quantity, measure’; Kabardian *mārda* ‘quantity, measure’. Note: Possible metathesis in Kabardian, in which case the Proto-Circassian form would have been **mat:(r)a*. This would be more compatible with the Indo-European forms cited above, especially Greek μέτρον.

XXII. Verb Stems

211. Proto-Indo-European **ǵem-* ‘to grab, to grip, to take; to get, to obtain’ (**ǵ* = **ǵ₁*): Latin *emō* ‘to buy, to purchase; to take’; Lithuanian *im̃ti* ‘to take’; Old Church Slavic *jęti* ‘to take’, *imati* ‘to take, to gather’, *imęti* ‘to have’; Russian *imát’* [ИМАТЬ] (dial.) ‘to have, to possess’, *imét’* [ИМЕТЬ] ‘to have, to possess, to own; to get, to obtain’; Czech *jímati* ‘to take, to seize’; Serbo-Croatian *jéti* ‘to take’, *imati*, *imjeti* ‘to have’.

Northwest Caucasian: Common Abkhaz **ámfia* ‘handle, grip’: South Abkhaz *ámaa* ‘handle, grip’; Abaza / Tapanta *ámfia* ‘handle, grip’ (indef. sg. *ámfia-k*’).

Note: According to Chirikba (1996b:9), Common Abkhaz **ámfia* is a derivative of **ma* ‘hand’ and is to be analyzed as **a-ma-fia*.

212. Proto-Indo-European **ǵep^h-*/**ǵop^h-* ‘to take, to grab’ (**ǵ* = **ǵ₁*): Latin *apīscor* ‘to seize, to grasp; to get, to obtain’, *apiō* ‘to tie, to fasten’; Hittite (3rd sg. pres. act.) *e-ep-zi* ‘to take, to seize, to grab, to pick, to capture’; Sanskrit *āpnóti* ‘to reach, to overtake’.

Northwest Caucasian: Common Abkhaz **apə-š’š* ‘to connect, to bind’: Bzyp *apə-š’-ra* ‘to connect, to bind’; Abaza / Tapanta *ap-š’ə-l-ra* ‘to connect, to bind’ (*j-apə-l-š’ə-l-d* ‘she connected it’).

213. Proto-Indo-European **ǵes-/ǵs-* ‘to be’ (**ǵ* = **ǵ₁*): Hittite (3rd sg. pres. act.) *e-eš-zi* ‘he/she/it is’; Sanskrit (sg.) *ásmi* ‘I am’, *ási* ‘you are’, *ásti* ‘he/she/it is’, (pl.) *smás* ‘we are’, *sthá* ‘you are’, *sánti* ‘they are’; Avestan *asti* ‘he/she/it is’; Greek (Homeric) *εἰμί* ‘I am’; Latin *est* ‘he/she/it is’; Umbrian *est* ‘he/she/it is’; Venetic *est* ‘he/she/it is’; Old Irish *is* ‘he/she/it is’; Gothic *ist* ‘he/she/it is’; Old Icelandic *es* ‘he/she/it is’; Old Lithuanian *ęsti* ‘he/she/it is’; Old Church Slavic *jestb* ‘he/she/it is’.

Northwest Caucasian: Common Northwest Caucasian **š’ə-* ‘to be, to become’ (cf. Chirikba 1996a:264): Ubykh *š’-* ‘to be, to become’ (*səš’ən* ‘I am’, etc.). Perhaps also found in the following Ubykh forms: (1) *ɣə-š’-* ‘to do, to make’ (*áyš’ən* ‘I do it’, *áyňš’ən* ‘he does it’, *áyš’š’ən* ‘we do it’, etc.); (2) *məš’š* ‘that which is not ripe’, *š’ayən* ‘ripening, ripe’.

Notes:

1. Starostin—Nikolayev (1994: 663) compare Ubykh *š’ə-* ‘to be, to become’ with the following: Abkhaz *-χa-* ‘to be, to become’, Abaza / Tapanta *-χa-* ‘to be, to become’, used in compounds. However, this proposal seems unlikely in view of the sound correspondences established by Chirikba (1996a: 174—178), according to which Common Northwest Caucasian **š’*

becomes Common Abkhaz *š', Common Circassian *šʰ/*š:ʰ, Ubykh š'. It is Chirikba's views that are followed in this chapter.

2. Chirikba (1996a:264) also compares Common Circassian *šʰə-šʰə 'to be from, to belong to, to be part of' (*šʰə- locative prefix). Not in Kuipers 1975.

Note: Ubykh š' is represented as *s in Proto-Indo-European.

214. Proto-Indo-European *ǵey-/ǵoy-/ǵi- 'to go' (*ǵ = *ǵ₁): Greek (1st sg. pres.) εἶμι 'I go', (1st pl. pres.) ἴμεν 'we go'; Sanskrit (1st sg. pres.) émi 'I go', (3rd sg. pres.) éti 'goes', (1st pl. pres.) imáh 'we go', (3rd pl. pres.) yánti 'they go', (3rd sg. pres.) yáti 'goes, moves, rides'; Latin (1st sg. pres.) eō 'I go'; Old Lithuanian (3rd sg. pres.) eīti 'goes'; Old Prussian (3rd sg. pres.) ēit 'goes', per-ēit 'comes'; Old Church Slavic idǫ, iti 'to go'; Luwian (3rd sg. pres.) i-ti 'goes'; Hittite (imptv.) i-it 'go!'; Tocharian A (1st pl.) ymās 'we go', B (1st sg.) yam, yam 'I go'.

Northwest Caucasian: Common Abkhaz *jə 'to come, to go': Abaza / Tapanta há-j-ra 'to come', na-j-ra 'to go' (na- 'thither'); South Abkhaz áá-j-ra 'to come', a-ná-j-ra 'to go'.

215. Proto-Indo-European *bʰeǵ-/bʰoǵ- (> *bʰē-/bʰō-) 'to warm, to roast, to toast, to parch' (*ǵ = *ǵ₁): Greek φάγω (< *bʰō-k- < *bʰoǵ-k-) 'to roast, to toast, to parch'; Old High German bāen, bājan 'to warm by poultices, to foment, to toast (bread)'.

Northwest Caucasian: Common Abkhaz *ba 'dry': South Abkhaz a-ba-rá 'to dry up'; Abaza / Tapanta a-ba-rá // bá-š-ra 'to dry up', ba-š, ba-p 'dry'.

216. Proto-Indo-European *bʰek'-/bʰok'- 'to cut or split apart, to break apart', (with nasal infix) *bʰenk'-/bʰonk'-: Sanskrit bhanákti 'to break, to shatter', bhagna-h 'broken, broken down, broken to pieces, shattered; etc.>'; Armenian bekanem 'to break'; Old Irish bongid 'to break, to reap'. Note: A slightly different root with a similar semantic range can be reconstructed as well: Proto-Indo-European *bʰak'- 'to divide into parts, to apportion, to distribute': Sanskrit bhájati 'to divide, to distribute; to receive; to enjoy'; Avestan bag- (bažat) 'to distribute'; Greek φαγεῖν 'to eat, to devour'; Tocharian A pāk, B pāke 'part, portion'. For details, cf. Rix 2001:65 and 66—67.

Northwest Caucasian: Common Northwest Caucasian *bək'ə 'to press, to squeeze, to pinch' (cf. Chirikba 1996a:202 and 353):

- A. Common Abkhaz *bək'ə 'to pinch; to pinch the edge of patties, cookies while preparing them'.
- B. Proto-Circassian *Pk'a 'to trample down, to beat (a road); to stamp leather; to sharpen (a sickle)'; Temirgoy pč'ə 'to trample down, to beat (a

road), *pč'a* 'to jump'; Šapsegh *pšk'a* 'to jump'; Kabardian *pk'ə* 'to stamp leather; to sharpen (a sickle); to jump, to fly off', *pk'a* 'to jump; to trample'. Note: Chirikba (1996a:202) writes Common Circassian **p'k'ə* 'to cut dough; to trample down, to beat (a road); to stamp leather'.

- C. Ubykh *bak'*- 'to press, to squeeze, to pinch' (*azbak''ən* 'I press, squeeze, or pinch it').

Note: For the semantics, cf. Old Icelandic *þrúga* 'to press', probably from the same stem found in Welsh *trychu* 'to cut, to hew, to pierce, to lop'; Lithuanian *trúkstu*, *trúkti* 'to rend, to break, to burst', *trūkis* 'crack, cleft, gap' (cf. Orël 2003:427 Proto-Germanic **þrūzanan*). Cf. also Buck 1949:§9.342 press (vb.).

217. Proto-Indo-European **b^hel-/b^hol-* 'to burn, to blaze': (1) Proto-Indo-European (extended form) **b^hlek'-/b^hlok'-/b^hlk'-*, **b^helk'-/b^holk'-/b^hlk'-* 'to burn, to blaze, to glow': Sanskrit *bhārgas-* 'splendor, radiance'; Greek φλέγω 'to burn, to blaze'; Latin *fulgor* 'lightning', *flagrō* 'to blaze, to burn, to glow'; Old Icelandic *blakkr* 'dusky, black, dun'; Old English *blæc* 'black', *blæcern*, *blācern* 'lantern'; Old High German *blah-*, *blach-* 'black' (in compounds); Old Church Slavic *blagъ* 'good'. (2) Proto-Indo-European (extended form) **b^hlu-*, **b^hlu-H-* (> **b^hlū-*) 'to burn, to blaze, to light up': Old Icelandic *blys* 'torch'; Old High German *bluhhen* 'to burn, to light up'; Old English *blysa* 'torch, fire'; Middle Irish *blosc* 'clear, evident', *bloscad* 'radiance'; Czech *blčeti* 'to flash, to blaze', *blýskati* 'to lighten, to flash'; Polish *blysk* 'lightning'.

Northwest Caucasian:

- A. Proto-Circassian **Pla* 'to burn, to shine (intr.)': Bžedux *bla* 'to burn, to shine (intr.)'; Kabardian *bla* 'to burn, to shine (intr.)'.
 B. Common Abkhaz **bəlá* 'to burn': Abaza / Tapanta *bəl-rá* 'to burn, to put into fire', *blábəl* 'very hot', (reduplicated) *blábəl-ra* 'to be (very) hot; to burn (of a burn)', *a-blá-ra* 'the place of burn, fire'; Bzyp *a-blá-ra* 'the place of burn, fire'; South Abkhaz *a-bəl-t'ə* 'firewood', *a-bəl-rá* 'to burn, to put into fire'; Ashkharywa *a-bəl-t'á* 'firewood'.

218. Proto-Indo-European **b^hel-/b^hol-/b^hl-* 'to glitter, to gleam, to shine': Greek φλέγω '(trans.) to burn, to scorch; (pass.) to become hot, to blaze up; (metaph.) to kindle, to inflame; to make to blaze up, to rouse up, to excite; (intr.) to flame, to blaze, to flash; to burst or break forth; to shine forth'; Latin *fulgeō* 'to lighten; to shine, to gleam, to glitter', *fulgur* 'lightning, thunderbolt'; Lithuanian *bālas* 'white', *bálnas* 'white', *báltas* 'white', (dial.) *blizgas* 'shine, glimmer', *blizgėti* 'to shine, to sparkle', *blyškėti* 'to shine'; Old Church Slavic *bělъ* 'white'; Russian *bélyj* [белый] 'white, clean', *belít'* [белить] 'to whiten; to bleach, to blanch; to whitewash'. Note: For additional derivatives of Proto-Indo-European **b^hel-/b^hol-/b^hl-* 'to glitter, to gleam, to shine', see the preceding entries.

Northwest Caucasian: Kabardian *blan* [блэн] ‘to shine’ (cf. Djahukyan 1967:103). Note: For additional Northwest Caucasian cognates, see the preceding entries.

219. Proto-Indo-European **b^hen-* ‘to slay, to wound’: Gothic *banja* ‘strike, blow, wound’; Old Icelandic (f.) *ben* ‘mortal wound; small bleeding wound’; Old English *bana* ‘killer, slayer, murderer’, *benn* ‘wound, mortal injury’; Old High German *bano* ‘death, destruction’; Avestan *bān-* ‘to make ill, to afflict’.

Northwest Caucasian: Proto-Circassian **ban(a)* ‘to fight’: Bžedux *ya-ban* ‘to fight’; Kabardian *bāna, ya-ban* ‘to fight’.

220. Proto-Indo-European **b^her-/ *b^hor-/ *b^hṛ-* ‘to fall, to fall down’ (extended form **b^hrek^h-/ *b^hrok^h-/ *b^hṛk^h-*) (only in Sanskrit): Sanskrit *bhr̥śyati* ‘to fall, to fall down’, *bhraśyate, bhr̥ám̐sate* ‘to fall, to tumble, to drop or fall down, to fall out’.

Northwest Caucasian:

- A. Common Abkhaz **b̄ər(tə)* ‘to reel, to stagger; to be confused, bewildered’; South Abkhaz *á-b̄ər-ra* ‘to stagger, to reel; to be confused, bewildered’; Abaza / Tapanta *b̄ər-t-rá* ‘to reel, to stagger’.

- B. Ubykh *bar-* ‘to stumble, to slip’.

221. Proto-Indo-European **b^hes-/ *b^hos-* ‘to breathe, to blow’: Sanskrit *bhas-* ‘to breathe, to blow’ in: *bhásma-ḥ, bhásman-* ‘ashes’, *bhāsmāna-ḥ* ‘made of or consisting of ashes, ashy’, *bhasita-ḥ* ‘reduced to ashes’, *bhastrā* ‘leather bag, bellows’.

Northwest Caucasian: Common Abkhaz **bza* ‘alive, life’: South Abkhaz *a-bzá* ‘alive’, *a-bzá-za-ra* ‘life’; Abaza / Tapanta *bza* ‘alive’, *bzá-za-ra* ‘life’.

Note: Proto-Indo-European **b^hVs-* = Common Abkhaz **bzV-*.

222. Proto-Indo-European **b^hewH-/ *b^howH-/ *b^huH-* (> **b^hū-*) ‘to come into being, to become, to arise’: Sanskrit *bhávati* ‘to become, to be, to arise, to come into being, to exist’, *bhūti-ḥ, bhūtí-ḥ* ‘well-being, prosperity, wealth, fortune’; Greek *φύω* ‘to bring forth, to produce, to put forth; to grow, to increase, to spring up, to arise’; Latin (perfect) *fuī* ‘to be, to exist’; Old English *bēon* ‘to be, to exist, to become, to happen’; Old Frisian (1st sg. pres.) *bim* ‘(I) am’; Old Saxon (1st sg. pres.) *bium, biom* ‘(I) am’; Old High German (1st sg. pres.) *bim* ‘(I) am’; Lithuanian *būti* ‘to be, to exist’, *būvis* ‘existence’; Russian *byt’* [быть] ‘to be’; Old Church Slavic *byti* ‘to be’; Serbo-Croatian *bīti* ‘to be’.

Northwest Caucasian: Proto-Circassian **baw(a)* ‘to kiss, to breathe’: Bžedux *ya-bawə/bāwa*, *ya-baw* ‘to kiss, to breathe’; Temirgoy *bawa-n* ‘to kiss, to breathe’.

223. Proto-Indo-European **bhit-* ‘to split, to cleave’ (also, with *n*-infix, **bhint-*): Sanskrit (1st sg.) *bhinádmī* ‘to split, to cleave, to pierce’ (3rd pl. *bhindánti*); Latin *findō* ‘to split, to cleave, to separate, to divide’. Full-grade (**bhey-*) in: Gothic **beitan* ‘to bite’; Old English *bītan* ‘to bite; to cut, to wound’.

Northwest Caucasian: Common Abkhaz **bč’a* ‘to reap, to crop’: Abzhywa *a-bc’a-rá* ‘to reap, to crop’; Bzyp *a-bč’a-rá* ‘to reap, to crop’. Perhaps also: Common Abkhaz **bəč’ə* ‘to crumble, to crumple, to rumple’: Abaza / Tapanta *r-bc’-rá* ‘to crumble, to crumple, to rumple’; Bzyp *a-r-bč’-rá* ‘to crumble, to crumple, to rumple’; Abzhywa *a-r-bəč’-rá* ‘to crumble, to crumple, to rumple’.

Note: Common Abkhaz **č’* = Proto-Indo-European **t’*.

224. Proto-Indo-European **bhugh-* ‘curve, bend, corner, angle’ (only in Germanic): Old Icelandic *bugr* ‘a bowing, winding’; Norwegian *bug* ‘lengthy curve’; Old English *byge* ‘curve, bend, corner, angle’. Verb: Proto-Indo-European **bheugh-* / **bhowgh-* / **bhugh-* ‘to bend, to curve’: Gothic *biugan* ‘to bend, to bow’; Old English *bīegan* ‘to bend, to turn, to turn back, to incline’; Dutch *buigen* ‘to bend, to bow; to submit’; Old High German *biogan* ‘to bend, to curve’ (New High German *biegen*).

Northwest Caucasian: Common Northwest Caucasian **by’a* ‘curved shape’ (?) (cf. Chirikba 1996a:283 — Chirikba writes **by’a*).

- A. (?) Common Abkhaz **by’a-* in **by’a-t’a* ‘to shovel (of hen, or like a hen), to scratch’ (**t’a* ‘to ladle out, to scoop out’): South Abkhaz *a-by’át-ra*, *a-by’áta-ra* ‘to shovel (of hen, or like a hen), to scratch’; Abaza / Tapanta *by’at’a-rá* ‘to shovel (of hen, or like a hen), to scratch’
- B. Proto-Circassian **bya* ‘breast’ (also used as preverb): Bžedux *bya* ‘breast’; Kabardian *bya* ‘breast’. Note: Kuipers (1975:70) writes **bġa* ‘breast’.
- C. Ubykh *by’á* ‘upper part; cap, top; cover’ (also used as preverb), *ác’əya by’á* ‘roof’.

Note: For the semantics of the Northwest Caucasian forms, cf. Buck 1949: §4.40 breast (front of chest); §4.41 breast (of woman); §12.33 top.

225. Proto-Indo-European **dhe₂-/dho₂-* (> **dhē-/dhō-*) ‘to put, to place’ (**₂* = **₂₁*): Sanskrit (reduplicated) *dadhāti* ‘to put, to place, to set, to lay’; Greek (reduplicated) τίθημι ‘to set, to put, to place’; Latin *faciō* ‘to make, to build, to construct (from parts, raw materials, etc.)’; Old English *dōn* ‘to make, to act, to perform; to cause’; Old High German *tuon* ‘to do, to make’; Lithuanian *dedù*,

240. Proto-Indo-European **hep^h-* [**hap^h-*]/**hop^h-* ‘to embark upon, to undertake, to start doing something’ (**h* = **₂₄*): Old Icelandic *efna* (< Proto-Germanic **abnjanan*) ‘to perform, to fulfill’, *efni* ‘material, stuff’; Old English *efnan*, *æfnan* ‘to carry out, to perform, to fulfill’, *efne* ‘material’; Old High German *uoben* ‘to start to work, to practice, to worship’; Sanskrit *āpas-* ‘work, action; sacred act, sacrificial act’, *āpas-* ‘religious ceremony’, *āpnas-* ‘work, sacrificial act’; Latin *opus* ‘work’, *opera* ‘effort, activity’.

Notes:

1. The material from the daughter languages pointing to a Proto-Indo-European root meaning ‘wealth, riches’, though often compared with the above forms, appears to belong to a different root: **Hop^h-* (**H* = a laryngeal preserved in Hittite, most likely **₂₃*, here [cf. Hittite (adj.) *happina-* ‘rich’; Latin *ops* ‘wealth, power’, *opulentus* ‘rich, wealthy; powerful, mighty’; Sanskrit *āpnas-* ‘possession, property’ (same form as given above, but with a different meaning); Avestan *afnah-vant-* ‘rich in property’]) (cf. Kloekhorst 2008b:296—297; Mayrhofer 1986—2001.I:88; De Vaan 2008:431).
2. Greek ἄφρονος ‘riches, wealth, plenty’ is best explained as a borrowing.

Northwest Caucasian: Common Abkhaz **ápsʻə/a-* ‘to venture, to undertake, to start doing something; to decide, to resolve’: Abzhywa *ápsʻ-ga-ra* ‘to venture, to undertake, to start doing something’; Bzyp *ápsʻa-ga-ra* ‘to venture, to undertake, to start doing something; to decide, to resolve’ (~ **ga* ‘to bring, to carry’).

241. Proto-Indo-European **hew-* [**haw-*] ‘to grow, to increase (in quantity or size)’ (only in extended stems: I **hew-kʻ(s)-* [**haw-kʻ(s)-*] and II **hw-ekʻ(s)-*) (**h* = **ǵ₁*): Sanskrit *vakṣáyati* ‘to grow, to increase, to become tall; to accumulate, to be great or strong, to be powerful’, *ójas-* ‘bodily strength, vigor, energy, ability’, *ojmán-* ‘strength’, *ukṣá-h* ‘large’; Greek *αὔξω* (= *αὐξάνω*) ‘to make to grow, to increase’, (poetic) *ἀ(φ)έξω* ‘to make to grow, to increase, to foster, to strengthen; to heighten, to multiply’, *αὔξησις* ‘growth, increase’; Latin *augeō* ‘to increase in quantity or size, to make greater, to enlarge, to extend, to swell’, *auctus* ‘an increasing, augmenting; increase, growth, abundance’, *augmentum* ‘the process of increasing’; Gothic *aukan* ‘to increase’, *wahsjan* ‘to grow’; Lithuanian *áugu*, *áugti* ‘to grow, to increase’, *áukštas* ‘high, tall, lofty’; Tocharian A *ok-* ‘to grow, to increase’, B *auk-* ‘to grow, to increase’, *auki* ‘increase’, *auks-* ‘to sprout, to grow up’.

(2) Common Abkhaz **awə́*: South Abkhaz *aw* (indef. sg. *awə́-kʻ*) ‘long’; Abaza / Tapanta *awə́* (indef. sg. *awə́-kʻ*) ‘long’.

242. (1) Proto-Indo-European **hey-* [**hay-*] ‘to give, to divide, to distribute’ (**h* = **ǵ₁*): Hittite (3rd pres. sg.) *pa-a-i* ‘to give’ (< **pe-+ai-*); Tocharian A (inf.) *essi*, B (inf.) *aitsi* ‘to give’; Greek (poet.) *αἴνωμαι* ‘to take’. (2) Proto-Indo-European **hey-tho-* [**hay-tho-*], **hey-thi-* [**hay-thi-*] ‘part, portion, share’ (**h* = **ǵ₁*): Avestan *aēta-* ‘the appropriate part’; Greek *αἶσα* (< **ai-ti-a*) ‘a share in a thing; one’s lot, destiny; the decree, dispensation of a god’; Oscan (gen. sg.) *aeteis* ‘part’.

Northwest Caucasian: Common Abkhaz **aj-gʻ(-)zə́* ‘to share, to be stingy’: Bzyp *áj-g-za-ra* ‘to share, to be stingy’; Abaza / Tapanta *aj-gʻ-za-ra* ‘to share, to be stingy’.

243. Proto-Indo-European **Hyeǵ-* (> **yē-*) ‘to throw, to hurl, to send forth’ (**ǵ* = **ǵ₁*): Greek *ἵημι* (< **Hi-Hyeǵ-mi*) ‘to send forth, to throw, to hurl; to release, to let go’; Latin *iaceō* ‘to lie down, to recline’, *iaciō*, *iēcī* ‘to propel through the air, to throw, to cast; to toss, to fling, to hurl; to throw down or onto the ground; to throw off; to throw away’; Hittite **yezzi* ‘to send’ in: (3rd sg. pres. act.)

pé-i-e-ez-zi ‘to send there’, (3rd sg. pres. act.) *u-i-e-ez-zi* ‘to send here’. Note: The Hittite forms contain preverbs: *pe-* ‘thither, there’, *u-* ‘hither, here’.

Northwest Caucasian: Common Abkhaz **ja* ‘to lie (down)’: South Abkhaz *a-ja-rá* ‘to lie (down)’. Note: Assuming semantic development as in Latin *iaceō* ‘to lie down, to recline’ cited above (cf. Buck 1949:§12.14 lie).

244. Proto-Indo-European **k^heh-m-* [**k^hah-m-*] > **k^hām-* ‘to wish, to desire, to long for’ (**h* = **₂₄*): Sanskrit *kam-* (causative *kāmáyati*, *-te*) ‘to wish, to desire, to long for; to love, to be in love with; to have sexual intercourse with’, *kamála-h* ‘desirous, lustful’, *kāma-h* ‘wish, desire, longing; affection, love; having a desire for, desiring’; Avestan *kāma-* ‘wish, desire’; Old Persian *kāma-* ‘wish, desire’; Latvian *kāmēt* ‘to hunger, to be hungry’.

Northwest Caucasian: Common Abkhaz (reduplicated) **kəmə-kəmá* ‘to be greedy’; South Abkhaz *a-kəmkəm-ra* ‘to be greedy’.

245. Proto-Indo-European **k^her-/*k^hor-/*k^hγ-* ‘to make a rasping sound, to be hoarse; to creak, to croak’: Greek κρώζω ‘to cry like a crow, to caw; (of a wagon) to creak, to groan’; Latin *crōciō* ‘to caw like a crow’; Old English *hrace*, *hracu* ‘throat’, *hræcan* ‘to clear the throat, to spit’; Middle Low German *rake* ‘throat’; Old High German *rahho* (**hrahho*) ‘jaws, mouth (of beast); throat, cavity of mouth’, *rāhhisōn* ‘to clear one’s throat’; Lithuanian *krokūti*, *krōkti* ‘to grunt’.

Northwest Caucasian:

- A. Proto-Circassian **thə* ‘to stand’: Bžedux *thə* ‘to stand’; Kabardian *tə* ‘to stand’ (only with local prefixes).
 B. Common Abkhaz **ta* ‘stand, place of, home’: South Abkhaz *a-tá-zaa-ra*, *a-ta-rá* ‘to be inside’, *a-t-rá* ‘place of something’, *ta-* (preverb) ‘inside’; Abaza / Tapanta *tá-z-la-ra* ‘to be inside’, *ta-rá* ‘place of something’, *ta-* (preverb) ‘inside’, *ta* ‘stand, place of, home’.

273. Proto-Indo-European **thekh-/thokh-* ‘to seek, to ask for’ (only in Germanic): Old Icelandic *þiggja* ‘to receive, to accept’; Danish *tigge* ‘to beg’; Swedish *tigga* ‘to beg, to beg for’; Norwegian *tigge* ‘to beg (*om* for), to beseech, to implore; to solicit’; Old English *þicgan* ‘to take, to receive, to accept’; Old Saxon *thiggian* ‘to ask, to request; to endure’; Old High German *dicken*, *digen* ‘to beg for, to request’. Note: Old Irish and Lithuanian cognates have been proposed, but these are questionable and, therefore, are not included here.

Northwest Caucasian: Common Abkhaz **taqə* ‘to wish, to desire’: Abzhywa *a-tax-rá* ‘(to) wish, (to) desire’; Abaza / Tapanta *taqə-ra* ‘(to) wish, (to) desire’; Bzyp *a-tax-rá* ‘(to) wish, (to) desire’.

274. Proto-Indo-European **thekh-/thokh-* ‘to thrive, to flourish, to succeed, to prosper’, (with nasal infix) **thenkh-/thonkh-*: Proto-Germanic **þenġan-* or **þinġan-* ‘to thrive, to prosper’ > Gothic *þeiġan* ‘to prosper, to succeed, to thrive’; Old English *þēon* ‘to thrive, to prosper, to flourish, to grow, to increase, to ripen’; Old Saxon *thīhan* ‘to thrive, to prosper, to flourish’; Dutch *gedijen* ‘to thrive, to prosper, to flourish’; Old High German *dīhan* ‘to thrive, to prosper, to increase, to develop, to grow, to succeed’ (New High German *gedeihen*). These forms have been compared with the following, though there is substantial disagreement among different scholars here: Lithuanian *tenkù*, *tèkti* ‘to fall to, to fall on, to suffice, to happen, to have to’; *tinkù*, *tikti* ‘to suit, to match, to please’; (dial.) ‘to agree, to meet, to find, to reach, to happen, to suffice’; Latvian *tikt* ‘to become, to attain, to arrive (at), to reach’; Ukrainian *t’aknuty* ‘to be helpful’; Old Irish *tocad* ‘fortune, chance, good luck’; Middle Welsh *tynghet*

‘destiny, fate’. Cf. Orël 2003:421; Kroonen 2013:542; Fraenkel 1962—1965.II:1077 and II:1092—1093; Derksen 2015:462 and 465; Smoczyński 2007.I:668 and I:676—677; Hock (ed.) 2019:1257 and 1275—1277; etc.

Northwest Caucasian: Common Northwest Caucasian **tqa* ‘to prosper, to live in abundance; to eat much and tasty’ (cf. Chirikba 1996a:212).

- A. Proto-Circassian **Tḡa* ‘to prosper, to live in abundance’: Bžedux *tḡa* ‘to prosper, to live in abundance’; Kabardian *tḡa* ‘to prosper, to live in abundance’.
- B. Common Abkhaz **qa-ḥá* ‘sweet, tasty’ (**-ḥa* suffix): Abzhywa *á-ḡaa* ‘sweet, tasty’; Bzyp *á-ḡaa* ‘sweet, tasty’; Ashkharywa *á-q(a)ḥa* ‘sweet, tasty’; Abaza / Tapanta *q(a)ḥá* ‘sweet, tasty’.

Note: Common Northwest Caucasian **q* is represented as **k^h* in Proto-Indo-European.

275. Proto-Indo-European **thek^{wh-}* (with nasal infix: **the-n-k^{wh-}*) ‘to stretch out, to reach out’ > ‘to reach, to arrive at, to come up to, etc.’ (Baltic only): Lithuanian *tenkù, tekaũ, tèkti* ‘to come up to, to approach, to reach; to fall to one’s lot; to be allotted, apportioned; to come into one’s possession; to have enough; to extend out, to stretch out, to reach out’; Latvian *tikt* ‘to become, to attain, to arrive (at), to reach’. For the semantics, cf. Buck 1949:§9.55 arrive (intr.) and arrive at, reach (trans.).

Notes:

- Probably not related to the following Germanic forms: Old Icelandic *þiggja* ‘to receive, to accept’; Danish *tigge* ‘to beg’; Swedish *tigga* ‘to beg, to beg for’; Norwegian *tigge* ‘to beg (*om* for), to beseech, to implore; to solicit’; Old English *þicgan* ‘to take, to receive, to accept’; Old Saxon *thiggian* ‘to ask, to request; to endure’; Old High German *dicken, digen* ‘to beg for, to request’.
- Also probably not related to Old Irish *ad-teich* ‘to find refuge with someone, to entreat, to pray to’, which Matasović (2009:26) convincingly derives from Proto-Celtic **ad-tek^{w-o-}* ‘to run to, to approach’, itself a derivative of Proto-Celtic **tek^{w-o-}* ‘to run, to flee’ (cf. Matasović 2009:377). Strong support for Matasović’s position is provided by the Middle Welsh cognate (1st sg.) *athechaf* ‘to flee from, to avoid’, which Matasović (2009:26) derives from Proto-Celtic **ab-tek^{w-o-}* instead of the Proto-Celtic **ad-tek^{w-o-}* needed to explain the Old Irish form.
- Hittite (3rd sg. pres. act.) *te-ek-ku-uš-ši-[ez-zi]* ‘to show, to present (oneself)’, (2nd sg. pres. act.) *te-ek-ku-uš-ša-nu-ši* ‘to (make) show, to reveal, to (make) present someone’, (3rd sg. pres. act.) *te-ek-ku-uš-še-eš-ta* ‘to become visible’, etc. are usually compared with Avestan *daxš-* ‘to teach’, *daxšta-* ‘sign’ (cf. Kloekhorst 2008:864—865). However, it seems more likely that the Hittite forms are derivatives of Proto-Indo-European

**thek^{wh}*- ‘to stretch out, to reach out’ (> **thek^{wh}-s-ye/o-* ‘to point out, to show, to reveal; to be revealed, to become visible, etc.’) and that they are to be compared with the Baltic forms cited above rather than with Avestan *daxš-* ‘to teach’, *daxšta-* ‘sign’.

Northwest Caucasian: Proto-Circassian **taq:^o(a)* ‘to strew, to pour out’: Temirgoy *tāq^o(a)* ‘to strew, to pour dry substances’, *ǵa-taq^oa-n* ‘to pour out of (a container)’: Kabardian *tāq^oa* ‘to strew, to pour dry substances’ (with local prefixes, *yə-*, *xa-* ‘into’). For the semantics, cf. Buck 1949:§9.34 spread out; strew.

276. Proto-Indo-European **thel-kh-/thol-kh-/thl-kh-* ‘to push, to thrust, to knock, to strike’: Welsh *talch* ‘fragment, flake’; Old Irish *tolc*, *tulc* ‘blow, strike’; Old Church Slavic *tlъkъ*, *tlěšti* ‘to knock’; Russian *tolkat’* [толкать] ‘to push, to shove’, *tolkač* [толкач] ‘stamp; pusher’; Czech *tlak* ‘pressure’.

Northwest Caucasian: Proto-Circassian **t:ala* ‘to splash, to threaten; to shake (fist), to wave threateningly; to rattle (the saber)’: Temirgoy *tāla* ‘to splash, to threaten’, *ǵa-tala-n* ‘to shake (fist), to wave threateningly; to rattle (the saber)’: Kabardian *dāla* ‘to splash, to threaten’, *ǵa-dāla* ‘to shake (fist), to wave threateningly; to rattle (the saber)’.

277. Proto-Indo-European **ther-s-*, **thr-es-* ‘to tremble, to shake’: Sanskrit *trásati* ‘to tremble, to quiver’; Avestan *tarəs-* ‘to be afraid’; Greek *τρέω* ‘to tremble, to quiver’; Latin *terreō* ‘to frighten, to terrify’, *terror* ‘fright, fear, terror, alarm, dread’. Note also Proto-Indo-European **thr-em-/thr-om-/thr-ṃ-* ‘to tremble, to shake’: Greek *τρέμω* ‘to tremble, to quiver’, *τρόμος* ‘a trembling, quaking, quivering (especially with fear)’; Latin *tremō* ‘to tremble, to quake’; Old Church Slavic *tręsq*, *tręsti* ‘to shake’; Tocharian A *träm-* ‘to be furious’, B *tremi* ‘anger’.

Northwest Caucasian: Common Abkhaz **trásə* ‘to startle’: Bzyp *á-trás-ra* ‘to startle’, Abzhywa *a-trás-ra* ‘to startle’; Abaza / Tapanta *trás-ra* ‘to rush, to throw oneself towards something; to attack’.

278. Proto-Indo-European **t'eA^w-* [**t'aA^w-*] (> **t'āw-*) ‘to burn, to blaze’: Sanskrit *dāvá-h* ‘forest fire’, *dāváyati* ‘to burn, to consume by fire’; Greek *δαίω* (< **δαῖ-ιω*) ‘to light up, to make to burn, to kindle; to blaze, to burn fiercely’, *δαίς* ‘firebrand, pine-torch’, (Homeric) *δαός* ‘torch’.

Northwest Caucasian: Common Abkhaz **t'ǵh^oa* ‘monster swallowing sun or moon (during eclipse)’: South Abkhaz *a-t'ǵj^o* ‘monster swallowing sun or moon (during eclipse)’, *a-t'ǵj^o-k'-ra* ‘solar/lunar eclipse’; Bzyp *a-t'ǵj^o*, *a-t'ǵja* ‘monster swallowing sun or moon (during eclipse)’: Ahchypsy *a-t'ǵj^o* ‘monster

swallowing sun or moon (during eclipse)’. Note: Labialization in Bzyp and Ahchypsy may be secondary.

279. Proto-Indo-European **t'em-/*t'om-/*t'ṃ-* ‘to grow, to increase’: Tocharian B *tsamo* ‘growing’, *tsmotstse* ‘growing, increasing’, *tsmoññe* ‘growth, increase’, *tsām-* ‘to grow (in size or number)’. Perhaps also in Iranian (if from Proto-Indo-European **t'ṃH-s-* or **t'ṃH-kh-* ‘to grow, to increase; to heap up, to accumulate, to collect’ > Proto-Iranian **dās-* >): Ossetic *dasun*, *dast* ‘to collect, to heap up’; Khotan Saka *dāsa-* ‘collection, heap’. Note: Adams (2013:804) derives the Tocharian forms from Proto-Indo-European **t'em(H)-/*t'om(H)-/*t'ṃ(H)-* ‘to build’.

Northwest Caucasian: Common Abkhaz (reduplicated) **t'am-t'ámə* ‘plump, soft’: South Abkhaz *á-t'amt'am* ‘plump, soft’, *jə-t'amt'am-wa* ‘soft (of dough, ripe fruit)”; Abaza / Tapanta *t'am-t'am* ‘stout, corpulent, plump; ripe (of soft, juicy fruit)’.

280. Proto-Indo-European (extended form) **t'er-bh-/*t'or-bh-/*t'ṛ-bh-* ‘to bend, to twist (together)’: Sanskrit *ḍṛbhāti* ‘to string together, to arrange, to tie, to fasten’; Old English *tearflian* ‘to turn, to roll, to wallow’; Old High German *zerben* ‘to be twisted’.

Northwest Caucasian: (1) Common Abkhaz **t'arə* ‘to be flexible, viscous, bending’: South Abkhaz *á-t'ar-ra* ‘to be flexible, viscous, bending’. (2) Common Abkhaz (reduplicated) **t'ərə-t'ərə* ‘tall and lithe, elegant (of man)’: Abzhywa (reduplicated) *á-t'ar-t'ar-ra* ‘tall and lithe, elegant (of man)”; Bzyp *á-t'ər-t'ər-ra* ‘tall and lithe, elegant (of man)’.

281. Proto-Indo-European **t'ew-/*t'ow-/*t'u-* ‘to hit, to strike’: Old Irish *dorn* ‘fist’, *durni* ‘to strike with fists’; Welsh *dwrn* ‘fist’; Breton *dourn* ‘hand’; Old Icelandic *tjón* ‘damage, loss’, *týna* ‘to lose, to destroy, to put to death’, (reflexive) *týnast* ‘to perish’, *týning* ‘destruction’; Old English *tēona* ‘injury, suffering, injustice, wrong, insult, contumely, quarrel’, *tēonian* ‘to irritate’, *tīenan* ‘to annoy, to irritate’; Old Saxon *tiono* ‘evil, harm, injury, wrong, hostility, enmity’, *gitiunian* ‘to do wrong’; Latvian *dūre*, *dūris* ‘fist’, *duŗu*, *dūru*, *duŗt* ‘to sting, to thrust’.

Northwest Caucasian: Proto-Circassian **t'awə* ‘to bump (one’s head)’: Temirgoy *ya-t'awə* ‘to bump (one’s head)’.

282. Proto-Indo-European (**t'er-/*t'or-/*t'r-* ‘to run, to flow’ (unattested); (extended forms) (1) **t'r-eA-* [**t'r-aA-*] > **t'rā-*; (2) **t'r-em-/*t'r-om-/*t'r-ṃ-*; (3) **t'r-ew-/*t'r-ow-/*t'r-u-* ‘to run, to flow’: Sanskrit *drāti* ‘to run, to hasten’, *drāmati* ‘to run about, to roam, to wander’, *drāvati* ‘to run, to hasten’, *dravá-h* ‘running, flowing’, *dravantī* ‘river’, *druta-h* ‘speedy, swift’; Greek *δρησμός*

‘flight, running away’, (aor.) ἔδραμον ‘to run, to move quickly’, δρόμος ‘course, running, race’; Gothic *trudan* ‘to tread, to step’; Old Icelandic *troða* ‘to tread’; Old English *tredan*, ‘to tread, to step on, to trample’, *treddian* ‘to tread, to walk’, *trod* (f. *trodu*) ‘track, trace’; Old Frisian *treda* ‘to tread’; Old Saxon *tredan* ‘to tread’; Old High German *tretan* ‘to tread’, *trottōn* ‘to run’.

Northwest Caucasian: (1) Proto-Circassian **t’ərza* ‘to sport, to gambol (of a horse)’; Temirgoy *t’ərza* ‘to sport, to gambol (of a horse)’. (2) Proto-Circassian **t’ara* ‘to sport, to gambol (of a horse)’; Temirgoy *t’ara-n* ‘to sport, to gambol (of a horse)’.

283. Proto-Indo-European **wel-/wol-/wǵ-* ‘to turn, to roll, to revolve’: Sanskrit *válati*, *válate* ‘to turn, to turn around, to turn to’; Armenian *gelum* ‘to twist, to press’, *glem* ‘to roll’, *glor* ‘round’; Greek εἰλέω (< *Fελ-v-έω) ‘to roll up, to pack close, to wind, to turn around, to revolve’, εἰλύω ‘to enfold, to enwrap’; Latin *volvō* ‘to roll, to wind, to turn around, to twist around’; Old Irish *fillid* ‘to fold, to bend’; Gothic *agwalwjan* ‘to roll away’, *at-walwjan* ‘to roll to’; Old Icelandic *valr* ‘round’, *velta* ‘to roll’, *válka* ‘to toss to and fro, to drag with oneself’, *válk* ‘tossing to and fro (especially at sea)’; Old English *wielwan* ‘to roll’, *wealwian* ‘to roll’, *wealte* ‘a ring’, *wealcan* ‘to roll, to fluctuate (intr.); to roll, to whirl, to turn, to twist (tr.)’, *wealcian* ‘to roll (intr.)’, *gewealc* ‘rolling’, *welung* ‘revolution (of a wheel)’; Middle English *walken* ‘to walk, to roll, to toss’, *walkien* ‘to walk’; Middle Dutch *welteren* ‘to roll’, *walken* ‘to knead, to press’; Old High German *walzan* ‘to roll, to rotate, to turn about’, *walken*, *walchen* ‘to knead, to roll paste’; Tocharian B *wäl-* ‘to curl’.

Northwest Caucasian: Proto-Circassian **wala* ‘to totter, to reel’: Bžedux *wāla* ‘to totter, to reel’; Temirgoy *wāla* ‘wave; to undulate’.

284. (1) Proto-Indo-European **wer-/wor-/wǵ-* in: **wer-th-/wor-th-/wǵ-th-* ‘to twist, to turn’: Sanskrit *vártate* ‘to turn, to to turn one’s self, to turn round, to roll, to revolve; to move, to go’, *vártana-h* ‘spindle, distaff; the act of turning or moving, revolving; rolling on, moving forward, moving about’; Latin *vertō* ‘to turn, to turn round; to turn oneself’, *versus* ‘row, line, furrow’; Gothic *wairþan* ‘to become’; Old Icelandic *verða* ‘to become, to happen, to come to pass’; Old English *weorþan* ‘to become, to come into being, to arise; to happen’, (suffix) *-weard* indicating direction to or from a point: ‘towards, to’; Old Saxon *werðan* ‘to become’; Dutch *worden* ‘to be, to become’; Old High German *werdan* ‘to become’ (New High German *werden*); Lithuanian *veĩsti* ‘to turn over’, *vaĩstas* ‘the turn of a plow’, *vartĩti* ‘to turn, to turn over’; Old Church Slavic *vrěĩti* ‘to turn around’; Czech *vrátiti* ‘to return, to send back’, *vřeteno* ‘spindle’; Russian *vertét’* [вертеть] ‘to twirl, to turn round and round’, *veretenó* [веретено] ‘spindle, pivot, axle’; Tocharian A/B *wärt-* ‘to turn’, B **wrete* ‘circle, turning’.
- (2) Proto-Indo-European **wer-/wor-/wǵ-* in: **wer-k’-/wor-k’-/wǵ-k’-* ‘to bend, to twist, to turn’: Sanskrit *vrñákti* ‘to bend, to turn; to turn away, to

avert'. (3) Proto-Indo-European **wer-/*wor-/*wǵ-* in: **wr-ey-kʰ-/*wr-oy-kʰ-/*wr-i-kʰ-* 'to bend, to twist, to turn; to make crooked', **wr-oy-kʰo-* 'turn, curvature': Greek *ῥοικός* 'crooked; curvature', *ῥικνός* 'withered, shriveled, crooked'; Old English *wrēon* (< Proto-Germanic **wriχan*) 'to cover, to clothe, to envelope; to conceal, to hide'. (4) Proto-Indo-European **wer-/*wor-/*wǵ-* in: **wr-ey-kʷ-/*wr-oy-kʷ-/*wr-i-kʷ-* 'to bend, to twist, to turn, to make crooked': Gothic **wraigs* 'curved, winding, twisting (of roads)'; Old Frisian *wrāk* 'crooked'; (?) Greek *ῥαίβός* 'crooked, bent'.

Northwest Caucasian: (?) Common Abkhaz (reduplicated) **vər-vər-* 'the sound of swiftly turning round': South Abkhaz (reduplicated) *á-vər-vər-ḥ^oa* 'the sound of swiftly turning round'; Abaza / Tapanta (reduplicated) *vər-vər-ḥ^oa* 'the sound of swiftly turning round'. Cf. Chirikba 1996a:63 and 68.

285. Proto-Indo-European **yeǵ-/*yoǵ-* (> **yē-/*yō-*) 'to do, to make' (**ǵ = *ǵ₁*): Hittite (3rd sg. pres. act.) *i-e-z-zi* 'to do, to make'; Luwian (2nd sg. pres. act.) *a-a-ya-ši* 'to do, to make', (3rd sg. pres. act.) *a-ti*; Hieroglyphic Luwian (3rd sg. pres. act.) *á-ia-ti-i* 'to do, to make'; Lycian (3rd sg. pres. act.) *adi, edi* 'to do, to make'. Perhaps also: Tocharian B *yām-* 'to do, to make, to commit, to effect, to handle, to act; to treat as' (cf. Puhvel 1984— .1/2:335—347; not in Kloekhorst 2008).

Northwest Caucasian:

- A. Common Abkhaz **jə* 'to be born; birth': Bzyp *a-j-rá // a-jə-ra* 'to be born; birth'; Abzhywa *a-j-rá* 'to be born; birth'; Abaza / Tapanta (archaic) *j-ra* 'to be born; birth; to heal, to close (of wound)', *ḥa-r-jə-ra* 'to give birth to'; Ashkharywa *ā-r-jə-ra* 'to give birth to'; South Abkhaz *a-r-jə-ra* 'to give birth to (of animals)'. Note: Assuming semantic development from 'to make, to produce, to create' (cf. Buck 1949:§4.71 *beget* [of father] and §4.72 *bear* [of mother]).
- B. Ubykh verb stem *yə-da-* 'to do, to make'; *yə-š'-* 'to do, to make' (*áysš'an* 'I do it', *áynš'an* 'he does it', *áysš'an* 'we do it', etc.), *yəš'la* 'the manner or way in which something is made or done'.

286. Proto-Indo-European **yeth-/*yoth-* 'to exert oneself, to endeavor, to strive': Sanskrit *yátati, yátate* 'to exert oneself, to endeavor; to make, to produce', *yáti-ḥ* 'a sage of subdued passions', *yatná-ḥ* 'effort, endeavor, exertion, energy, diligence, perseverance'; Avestan *yateiti, yatayeiti* 'to strive after; to place in order'; Tocharian B *yāt-* 'to be capable of; to have power over, to tame'.

Northwest Caucasian: Proto-Circassian **yatha* 'to rage (of storm), to swell (of wound); to let oneself go, to become insolent': Temirgoy *yāta* 'to rage (of storm), to swell (of wound); to let oneself go, to become insolent'; Kabardian *yāta* 'to rage (of storm), to swell (of wound); to let oneself go, to become insolent'.

XXIII. Northwest Caucasian Lexical Parallels to Proto-Indo-European
Roots Subject to Root Structure Constraint Laws

Now, as noted in Chapter 4, Proto-Indo-European had constraints on permissible root structure sequences. In terms of the Glottalic Model of Proto-Indo-European consonantism, these root structure constraint rules may be stated as follows:

1. Each root had to contain at least one non-glottalic consonant.
2. When both obstruents were non-glottalic, they had to agree in voicing.

The Proto-Indo-European root structure constraint laws thus become merely a voicing agreement rule with the corollary that two glottalics cannot cooccur in a root. Comparison with the other Nostratic languages indicates, however, that the forbidden root types must have once existed. Two rules may be formulated to account for the elimination of the forbidden types:

1. A rule of progressive voicing assimilation may be set up to account for the elimination of roots whose consonantal elements originally did not agree in voicing: $*T \sim *B > *T \sim *P$, $*B \sim *T > *B \sim *D$, etc.
2. A rule of regressive deglottalization may be set up to account for the elimination of roots containing two glottalics: $*C'VC' > *CVC'$, etc.

The question then naturally arises as to precisely when these constraints first appeared in Proto-Indo-European. The contact between Proto-Indo-European with Northwest Caucasian that we have been exploring in this chapter may provide an answer to this question. Northwest Caucasian has the forbidden sequences, though, it should be noted that there are sporadic examples of regressive deglottalization in Northwest Caucasian as well, such as, for instance, Ashkharywa $k^{\text{h}}t^{\text{h}}\text{'}\partial w$ 'hen' and Abaza / Tapanta $k^{\text{h}}t^{\text{h}}\text{'}\partial w$ 'hen', with regressive deglottalization, as opposed to South Abkhaz $a-k^{\text{h}}t^{\text{h}}\text{'}\partial$ 'hen' and Sadz $a-k^{\text{h}}\text{'}\partial t^{\text{h}}t^{\text{h}}\text{'}\acute{e}$ 'hen', without deglottalization. If lexical comparisons exist between Proto-Indo-European and Northwest Caucasian in which the forbidden root types are found, it would indicate that the root structure constraints must have developed in Proto-Indo-European after the period of contact between Proto-Indo-European and Northwest Caucasian but before the individual Indo-European daughter languages began to develop. Specifically, this would be the Phonemic Pitch Stage of Proto-Indo-European (see the Appendix to Chapter 4 as well as Chapter 20 for details about the different stages of development in Proto-Indo-European). The following are possible lexical comparisons indicating that this is indeed the case:

A. Examples of regressive deglottalization ($*C'VC' \rightarrow *CVC'$):

287. Proto-Indo-European $*k^{\text{h}}at^{\text{h}}\text{'}$ \rightarrow (with regressive deglottalization) $*k^{\text{h}}at^{\text{h}}\text{'}$ 'to totter, to fall': Sanskrit *śad-* 'to fall, to perish; to wither, to decay'; Latin *cadō* 'to fall; to fall down, to drop; to perish (especially in death)'. For the semantics,

cf. Buck 1949:§10.23 fall (vb.). Note: Distinct from Proto-Indo-European **k'et'/*k'ot'-* > (with regressive deglottalization) **k^{het'}/*k^{hot'}*- ‘to strive, to make strenuous effort; to succeed, to triumph’: Sanskrit *śad-* (perfect *śāśadūh*, participle *śāśadāna-h*) ‘to cause to go, to impel, to drive on; to excel, to distinguish oneself, to triumph’. Perhaps also Old Icelandic *hetja* ‘a hero, champion, gallant man’ (cf. Bomhard 2019a:103, no. 185).

Northwest Caucasian: Common Northwest Caucasian **k''at'/da* ‘to tremble, to rock, to shake, to swing’ (cf. Chirikba 1996a:204):

- A. Common Abkhaz (reduplicated) **k''at'a-k''ata* ‘to rock, to swing (of a thin top of some-thing, for example, of tree)’: South Abkhaz *á-k''at'k''at'a-ra* ‘to rock, to swing (of a thin top of something, for example, of tree)’: Bzyp *á-k'ó'° a-k''at'k''at'-ra* ‘top of tree’. Cf. also Common Abkhaz **k''ant'/da* ‘to swing, to rock, to bend’: Abaza / Tapanta *k''ant'a* ‘elastic, resilient’, *k''ant'a-ra* ‘to bend’; South Abkhaz *a-k''ant'a-rá*, *a-k''anda-rá* ‘to swing, to rock, to bend’.
- B. Ubykh *k''āda-* ‘to tremble, to rock, to shake, to swing’.

288. Proto-Indo-European **k'et'/*k'ot'-* > (with regressive deglottalization) **k^{het'}/*k^{hot'}*- ‘to strive, to make strenuous effort; to succeed, to triumph’: Sanskrit *śad-* (perfect *śāśadūh*, participle *śāśadāna-h*) ‘to cause to go, to impel, to drive on; to excel, to distinguish oneself, to triumph’. Perhaps also Old Icelandic *hetja* ‘a hero, champion, gallant man’. Notes: (1) Distinct from *śad-* ‘to fall, to fall off, to fall out’ (cf. Mayrhofer 1956—1980.II:204—205). (2) Not related to Greek *κέκασμαι* (< *-καδ-) ‘to surpass, to excel, to overcome’ (cf. Kümmel 2000:512—514; Rix 2001:325 ? **kēnd-*, but **kēd-* is also possible).

Northwest Caucasian: Common Abkhaz **k'at'á* ‘incessantly, without stop’: South Abkhaz *a-k'at'á-h'á* ‘incessantly, without stop’.

289. Proto-Indo-European **k'wat'-* > (with regressive deglottalization) **k^{what'}*- ‘to cackle, to cluck’: Lithuanian *kadù*, *kadėti* ‘to cackle, to cluck’; Irish *cadhan* ‘a wild goose, a barnacle-goose’. Note: Mann (1984—1987:1017) reconstructs Proto-Indo-European **quad-* ‘to cackle, to cluck’.

Northwest Caucasian: Common Abkhaz **k'°at'á(w)* ‘hen’: Ashkharywa *k'°t'aw* ‘hen’; South Abkhaz *a-k'°t'á* ‘hen’; Sadz *a-k'°at't'á* ‘hen’; Abaza / Tapanta *k'°t'aw* ‘hen’. Note: Regressive deglottalization in Ashkharywa and Abaza / Tapanta.

290. Proto-Indo-European **k'wek'/*k'wok'-* > (with regressive deglottalization) **k^{wek'}/*k^{wok'}*- ‘to disappear, to vanish, to wither’: Common Slavic **čěznōti* ‘to disappear, to vanish’ > Russian (dial.) *čěznut'* [чезнуть] ‘to disappear, to vanish, to perish’; Polish *częznąć* (obs.) ‘to wither, to disappear, to vanish’; Bulgarian *čězna* ‘to disappear, to vanish’. Perhaps also Old Icelandic *hvika* ‘to

quail, to shrink, to waver’, *hvikan* ‘a quaking, vavering’, *hvikr* ‘quaking’, *hvikull* ‘shifty, changeable’.

Northwest Caucasian: Proto-Circassian **k’ak’ə* ‘to change, to get spoiled’: Bžedux *za-k’ac’ə* ‘to change, to get spoiled’; Kabardian *za-k’ak’* ‘to change, to get spoiled’. (*za-* ‘to oneself’.)

291. Proto-Indo-European **p’ek’-/*p’ok’-* > (with regressive deglottalization) **p^hek’-/*p^hok’-* ‘to be sleepy, tired’ (only in Germanic): Proto-West Germanic **fakan-* ‘to be sleepy, tired’, **fak(k)a-* ‘sleepy, tired’ > Middle Dutch *vaken* ‘to sleep’, *vake*, *vaec* ‘sleepiness’; Old Low Franconian *facon* ‘to sleep’; Middle Low German *vāk* ‘sleepiness’; Low German *fakk* ‘tired, weak’. Note: Kroonen (2013:124—125) reconstructs Proto-Germanic **fakk/gōn-* ‘to become sleepy’ and includes Modern English (*to*) *fag* ‘to tire, to become weary’, (obsolete) ‘to hang loose, to flap’ and Scottish English (*to*) *faik* ‘to fail from weariness; to cease moving’. However, English (*to*) *fag* is usually taken to be “of unknown origin. Weekley (1921:543), on the other hand, takes *fag* ‘drudge, weariness’ to be a “schoolboy perversion of *fatigue*”. However, this is rejected outright by Lieberman (2008:67—70) as “a product of etymological despair”. Lieberman further notes that the meanings ‘drudge’ and ‘weary’ are “late senses”. Thus, it appears that the English forms cited by Kroonen really do not belong here.

Northwest Caucasian: Proto-Circassian **Pq’a* ‘bed, bedding’: Bžedux *p’a* ‘bed, bedding’; Šapsegh *pq’a*, *p’a* ‘bed, bedding’.

292. Proto-Indo-European **p’ek’-/*p’ok’-* > (with regressive deglottalization) **p^hek’-/*p^hok’-* ‘interval, section, compartment, partition. division’ (only in Germanic): Proto-West Germanic **faka-* > Old English *fæc* ‘space of time, division, interval’; Old Frisian *fek*, *fak* ‘part of house, niche’; Middle Dutch *vac* ‘compartment, section’; Old High German *fah* ‘wall, compartment’. Note: Assuming derivation from an unattested verb **p^hek’-/*p^hok’-* ‘to strike, to split (apart), to break (apart), to divide’.

Northwest Caucasian: Common Abkhaz **p’q’a* ‘to beat, to strike’: Abzhywa *á-p’q’a-ra* ‘to beat, to strike’; Abaza / Tapanta *p’q’a-rá*, *bq’a-rá* ‘to beat, to strike, to slap; to thresh’, *bq’á-ga*, *p’q’á-ga* ‘thresher’; Bzyp *á-pq’a-ra* ‘to beat, to strike’.

293. Proto-Indo-European **p’et’-/*p’ot’-* > (with regressive deglottalization) **p^het’-/*p^hot’-* ‘to twist, to turn, to bend’: Old Icelandic *fattr* ‘(easily) bent backwards’, *fetta* ‘to bend back’; Greek *πέδησις* ‘a bending’. Perhaps also Tocharian B *peti* ‘flattery’ (if not an Iranian loanword [cf. Adams 2013:423—424]), assuming semantic development as in South Abkhaz cited below.

Northwest Caucasian: Common Abkhaz **p'at'á* 'to entangle, to mat (of thread); to make confused (in the room); to intermix things': Abaza / Tapanta *la-r-p'at'a-rá* 'to entangle, to mat (of thread); to make confused (in the room); to intermix things'; South Abkhaz *a-p'at'a-rá* 'to be delirious, to talk nonsense, to mix truth with lies, to lie'.

294. Proto-Indo-European **p'et'-/p'ot'-* > (with regressive deglottalization) **p^het'-/p^hot'-* '(vb.) to constrain, to restrain; to bind tight; to fetter, to shackle; (n.) fetter, shackle': Greek (f.) πέδη 'fetter, shackle', (denominative) πεδάω 'to bind with fetters; to shackle, to trammel, to constrain', πεδόομαι 'to be impeded'; Latin *pedica* 'fetter, shackle; snare', *impediō* 'to hinder, to impede, to obstruct; to restrict the movement of (by hobbling, binding, entangling, etc.)'; Old Icelandic *ffōtra* 'to fetter', *fföttur* 'fetter, shackle'; Old English *feter*, *fetor* 'fetter, shackle', *feterian* 'to fetter, to bind'; Old High German *fezzara* 'fetter'; Hittite *patalli(ya)-* 'fetter (?), tether (?)'; Luwian *patalha(i)-* 'to fetter'. Note: Thus, not derived from or related to Proto-Indo-European **p^het'-/p^hot'-* 'foot' as has sometimes been suggested.

Northwest Caucasian: Proto-Circassian **p'ət'a* 'to jam, to press, to pinch': Bžedux *p'ət'a* 'to crush, to press', *da-p'ət'a* 'to jam, to pinch'; Kabardian *p'ət'* 'to crush, to press', *da-p'ət'a* 'to jam, to pinch'.

For the semantics, cf. Modern Greek σφίγγω 'to bind tight' also sometimes 'to press, to squeeze (especially the hand)' (cf. Buck 1949:9.342 press [vb.]).

295. Proto-Indo-European **p'et'-/p'ot'-* > (with regressive deglottalization) **p^het'-/p^hot'-* 'to go, to move; to fall': Sanskrit *pádyati*, *-te* 'to fall down or drop with fatigue; to perish; to go, to go to; to attain, to obtain'; Old Icelandic *feta* 'to step'; Old English *fetan* 'to fall'; Old High German *fezzan*, *gi-fezzan* 'to fall'; Old Church Slavic *padō*, *pasti* / *padajō*, *padati* 'to fall'; Russian *pádat'* [падать], *past'* [пасть] 'to fall; to fall down, into, on, from; to drop, to drop down; to be degraded, ruined'. Note: Thus, not derived from or related to Proto-Indo-European **p^het'-/p^hot'-* 'foot' as is sometimes suggested.

Northwest Caucasian:

- A. Circassian: Kabardian *p'ət'əwǎ* 'to stir, to move'. Kabardian loanwords in: Ashkharywa *p'at'áw(a)-ra* 'to stir, to move'; Abaza / Tapanta *p'at'áw-ra* 'to stir, to move'; Abzhywa *a-p'at'áw-ra* 'to stir, to move'.
- B. Ubykh *p'at'awa-* 'to wriggle (about), to fidget'.

296. Proto-Indo-European (**t'ek'-/t'ok'-* > (with regressive deglottalization) **t^hek'-/t^hok'-* 'to knock, to beat, to strike': Proto-Germanic **pek-/pak-* 'to knock, to beat, to strike' > Old Icelandic *bjaka* 'to thwack, to thump, to smite', *bjakaðr* 'worn, fainting, exhausted', *bjökka* 'to thwack, to thump, to beat, to chastise', *þykk* (< **þjökk-* < **pekk-*) 'a thwack, thump, blow, a hurt'; Old

English *paccian* ‘to clap, to pat, to stroke, to touch gently, to smack, to beat’; Middle English *pakken* ‘to pat, to stroke’. Perhaps also: Sanskrit *tāják*, *tāját* ‘suddenly, abruptly’; Tocharian B (adv.) *tetekā* ~ *tetekāk* ~ *tetkāk* ‘suddenly, immediately’; assuming semantic development as in Bzyp *á-t’əq’-h̄^oa* ‘quickly, instantly’ cited below.

Northwest Caucasian:

- A. Common Abkhaz **t’əq’ə* ‘to knock, to beat’: South Abkhaz *a’t’əq’-ra* ‘to beat unmercifully’; Bzyp *á-t’əq’-h̄^oa* ‘quickly, instantly’; Abaza / Tapanta *t’əq’-t’əq’* ‘descriptive of a hollow knock, a tap’.
- B. Ubykh *t’q’ada-* ‘to strike, to hit’.

B. Examples of progressive voicing assimilation
(**T* ~ **B* > **T* ~ **P*, **B* ~ **T* > **B* ~ **D*, etc.):

297. Proto-Indo-European **b^het^h-/*b^hot^h-* > (with progressive voicing assimilation) **b^hed^h-/*b^hod^h-* ‘to strike, to pierce; to fight’, **b^hod^h-wo-* ‘battle, fight(ing), strife, war’: Old Icelandic (poet.) *böð* ‘battle’, *böðull* ‘executioner’; Norwegian *bøddel* ‘executioner, hangman’; Old English *beadu*, *beado* ‘battle, fighting, strife, war’; Old Saxon *badu-* ‘battle’; Old High German *batu* ‘battle’; Middle Irish *bodb*, *badb* ‘crow; goddess of war’.

Northwest Caucasian: Proto-Circassian **wəbat^ha* ‘to break’: Bžedux *wəbat^ha-n* ‘to break (for example, a plate) (tr.)’.

298. Proto-Indo-European **b^het^h-/*b^hot^h-* > (with progressive voicing assimilation) **b^hed^h-/*b^hod^h-* ‘hip, haunch, thigh’: Old Church Slavic *bedra* ‘thigh’; Russian *bedró* [бедро] ‘hip, haunch; (medical) femur, thigh-bone’; Czech *bedra* (pl.) ‘loins, hips’; Serbo-Croatian *bědro* ‘thigh’. Perhaps also Sanskrit (Vedic) *bādh-* in *jñu-bādh-* ‘bending the knees’. Note: The original meaning of Proto-Indo-European **b^hed^h-/*b^hod^h-* may have been ‘to be or become bent, crooked, twisted; to bend, to twist’.

Northwest Caucasian: Proto-Circassian **bat:ə* ‘hunchbacked’: Bžedux *bat:ə* ‘hunchbacked’.

299. Proto-Indo-European **k^heb^h-/*k^hob^h-* > (with progressive voicing assimilation) **k^hep^h-/*k^hop^h-* ‘stem, stalk, halm; grass, hay, straw’ (only in Lithuanian): Lithuanian *šāpas* ‘stem, stalk, halm, blade (of grass), straw; mote’, *šāpauti* ‘to gather straw’. Derksen (2015:440) compares Sanskrit *śāpa-h* ‘driftwood, drift, floating’ here but prudently notes that this is “[a]n old, but highly uncertain etymology” (see also Mayrhofer 1956—1980.II:324 and 1986—2001.II:629 Proto-Indo-European **kóp-o-*).

Northwest Caucasian: Common Abkhaz **qǎ-bə* ‘roof, thatch’: Bžedux *a-ǰǎb* ‘roof, roofing’, *a-ǰǎb-ra* ‘to roof, to thatch’; Abzhywa *a-ǰǎb-ra* ‘to roof, to thatch’; Abaza / Tapanta *qǎb* ‘roofing (material); hay roof’, *qǎb-ra* ‘to roof, to thatch’.

300. Proto-Indo-European **p^hegh-/p^hogh-* > (with progressive voicing assimilation) **p^hekh-/p^hokh-* ‘to hit, to beat, to strike’: Old English *feohtan* ‘to fight’, *feoht* ‘fighting, battle’; Old Frisian *fiuchta* ‘to fight’; Old High German *fehthan* ‘to fight’ (New High German *fechten*); Tocharian B *pyāk-* ‘to strike (downwards), to batter; to beat (a drum); to penetrate (as a result of a downward blow)’; Albanian *-pjek* in *përpijek* ‘to hit, to knock, to strike’.

Northwest Caucasian: Proto-Circassian **p^həg(a)* ‘to butt, to gore’: Bžedux *p^həǰ’a*, *ya-p^həǰ’a* ‘to butt, to gore’; Kabardian *pəga*, *ya-pəg* ‘to butt, to gore’.

301. Proto-Indo-European **p^hegh-/p^hogh-* > (with progressive voicing assimilation) **p^hekh-/p^hokh-*, (adj.) **p^hokh-ró-s* ‘fair, beautiful’ (only in Germanic): Proto-Germanic **fazraz* ‘fair, beautiful’ > Gothic **fagrs* ‘fitting, proper, suitable’; Old Icelandic *fagr* ‘fair, fine, beautiful’, *fegrð* ‘beauty’, *fegra* ‘to embellish, to beautify’; Modern Icelandic *fagur* ‘proud’; Norwegian (poet.) *fager* ‘beautiful, fair, handsome’, *fagna* ‘excellent, worthy’; Swedish *fager* ‘fair, pretty, fine, beautiful’; Old English *fæger* ‘fair, lovely, beautiful; pleasant, agreeable; attractive’; Old High German *fagar* ‘fair, beautiful’.

Northwest Caucasian:

- A. Proto-Circassian **p^haya* ‘proud, arrogant, haughty’: Bžedux *p^hāya* ‘proud, arrogant, haughty’; Kabardian *pāya* ‘proud, arrogant, haughty’. Circassian loanwords in Abkhaz: South Abkhaz *a-pág’a* ‘proud, arrogant, haughty’; Abaza / Tapanta *pág’a* ‘proud, arrogant, haughty’. Note: Kuipers (1975:10) writes Proto-Circassian **p^haǰa*.
- B. Ubykh *paǰá* or *pa:ǰá* ‘proud’.

Note: Proto-Circassian **y* = Proto-Indo-European **g^h* (> **k^h* in the above example, due to progressive voicing assimilation).

302. Proto-Indo-European **p^hegh-/p^hogh-* > (with progressive voicing assimilation) **p^hekh-/p^hokh-* ‘to satisfy, to please; to be joyful, happy, pleased, satisfied; to rejoice’ (only in Germanic): Gothic *faginōn* ‘to rejoice’, *fulla-fahjan* ‘to satisfy, to serve’, *fahēpa* ‘gladness, joy’, *ga-fēhaba* ‘satisfactorily, properly’ (?); Old Icelandic *fagna* ‘to rejoice’, *fagnaðr* ‘joy’, *feginn* ‘glad, joyful’; Old English *fægen* ‘glad, joyful, rejoicing’, *ge-fēon*, *ge-feohan* ‘to be glad, to rejoice, to exult’; Old High German *gi-fehan* ‘to rejoice’, *gi-feho* ‘joy’.

Northwest Caucasian: Common Abkhaz **pə-gá-la* ‘to bring something for somebody who is going to be met’: South Abkhaz *a-p-gá-la-ra* ‘to bring

something for somebody who is going to be met’, *a-p-gá-la* ‘luck, success’; Abaza / Tapanta *p-ga-l-ra* ‘to bring something for somebody who is going to be met’.

303. Proto-Indo-European **theg^{wh}-* > (with progressive voicing assimilation) **thek^{wh}-* in **thek^{wh}-mén-* ‘a kind of disease’ (Sanskrit only): Sanskrit *takmán-* (-*ā*) ‘a kind of disease, or probably, a whole class of diseases, accompanied by eruptions of the skin’. Note: Tocharian B *teki* ‘disease, illness’, *tekiññe* ‘sick, diseased’, *tekīta* ‘a sufferer, patient, sick person (?)’ may belong here as well, assuming development from Proto-Indo-European **thok^{wh}-*.

Northwest Caucasian: Common Abkhaz **tág^o* ‘swelling of neck’s glandule’: Bzyp *a-tág^o* ‘swelling of neck’s glandule’.

Note: The Abkhaz forms cited above are taken from Chirikba 1996b, and the Circassian forms are from Kuipers 1975. Several other works have also been consulted (such as Tuite—Schulze 1998). The Indo-European material is taken from the standard etymological dictionaries listed in the references (volume 4), with heavy reliance on the etymological work currently being done by a group of scholars in Leiden, The Netherlands (Beekes 2010; Boutkan—Siebinga 2005; Cheung 2007; De Vaan 2008; Derksen 2008 and 2015; Kloekhorst 2008b; Kroonen 2013; Martirosyan 2008; and Matisović 2009; also Bomhard 2008e as part of the same series).

21.6. THE ORIGIN OF THE HETEROCLITIC NOMINAL DECLENSION IN PROTO-INDO-EUROPEAN

In Proto-Indo-European, there was a special, and rather unusual, type of declension in which the nom.-acc. sg. was characterized by **-r-*, while the remaining cases were characterized by an **-n-*, which replaced the **-r-* and which was found between the stem and the case endings. Nouns exhibiting this patterning are known as “heteroclitic stems”. Though common in Hittite, this declensional type was in decline in the other daughter languages (cf. Fortson 2010:123 and 181—182; Kloekhorst 2008b:108—109). For details on heteroclitic nominal stems, cf. Burrow 1973:226—229; Szemerényi 1996:173. The following table illustrates the general patterning of these stems, citing just the nominative and genitive cases (here, the traditional transcription of Proto-Indo-European has been retained as opposed to the Glottalic Model of Proto-Indo-European consonantism used throughout this book):

	Nominative Singular	Genitive Singular
Hittite	<i>wa-a-tar</i> ‘water’ <i>pa-aḫ-ḫur, pa-aḫ-ḫu-wa-ar</i> ‘fire’ <i>e-eš-ḫar, e-eš-ḫa-ar, iš-ḫar</i> ‘blood’	<i>ú-i-te-na-aš</i> <i>pa-aḫ-ḫu-e-na-aš</i> <i>iš-ḫa-na-aš</i>

	<i>ut-tar</i> ‘word, affair’	<i>ud-da-na-aš</i>
	<i>me-ḥur</i> ‘time’	<i>me-(e-)ḥu-na-aš</i>
Sanskrit	<i>yákr̥t</i> ‘liver’	<i>yaknás</i>
	<i>áhar</i> ‘day’	<i>ahnás</i>
	<i>údh̥ar</i> ‘udder’	<i>údhnas</i>
	<i>ásrk̥</i> ‘blood’	<i>asnás</i>
	<i>śák̥rt</i> ‘dung’	<i>śaknás</i>
Greek	ὔδωρ ‘water’	ὔδατος (< * <i>ud-ḡ-to-s</i>)
	οὔθηρ ‘udder, breast’	οὔθατος (< * <i>ūd̥h-ḡ-to-s</i>)
Latin	<i>femur</i> ‘thigh’	<i>feminis</i> (also <i>femoris</i>)
	<i>iecur</i> ‘liver’	<i>iocineris</i> (also <i>iecoris</i>)

Notes:

1. The *-t* and *-k* that have been added to the nom. sg. in Sanskrit are innovations.
2. In Greek, *-to-* has been added to the “oblique-*n*”, which is in the reduced-grade (**-ḡ- > -α-*).
3. Heteroclitic stems are neuter in gender (cf. Schindler 1975).

That this is an ancient declensional type has long been recognized (cf. Kapović 2017c:77—78), though its origin has heretofore not found an acceptable explanation, some previous attempts notwithstanding. Perhaps, the prehistoric language contact between Northwest Caucasian and Proto-Indo-European that we have been exploring in this chapter may provide clues concerning the origin of the heteroclitic nominal declension in Proto-Indo-European. Let us take a look.

Compared to the complex declension system found in Proto-Indo-European, nominal declension was relatively simple in Northwest Caucasian.

According to Arkadiev—Lander (to appear, pp. 17—25), gender is found only in Abkhaz and Abaza, with the main distinguishing feature being between human as opposed to non-human. Moreover, there is no gender agreement of noun modifiers in these languages.

Two numbers are differentiated in Northwest Caucasian, an unmarked singular and a marked plural. There is no dual. Abkhaz and Abaza also have collective suffixes. In Kabardian, the plural is consistently marked with the suffix *-xe* (see the table of grammatical case markers, as well as note 4, on the following page).

Another feature common to all of the Northwest Caucasian languages is the use of personal prefixes on nouns to express adnominal possession. The possessive prefixes found in Abaza, Ubykh, and West Circassian are listed in a table (4.2) in Arkadiev—Lander (to appear, p. 18).

Grammatical cases are missing in Abkhaz and Abaza, while only two cases are distinguished in Ubykh and Circassian, namely, (1) the absolutive and (2) the oblique. The absolutive case is often called “ergative”, though Arkadiev—Lander (to appear, p. 22) point out that this term is misleading. In Ubykh, the absolutive case is unmarked in both singular and plural. However, both West Circassian and

Kabardian mark the absolutive singular by the suffix *-r*, while, in the plural, the *-r* is appended after the suffix *-xe*, yielding *-xe-r*. Ubykh marks the oblique case by *-n* in the singular and *-ne* in the plural. Finally, West Circassian and Kabardian mark the oblique case by *-m* in the singular, while, in the plural, the *-m* is appended after the suffix *-xe*, yielding *-xe-m* (West Circassian also has *-me* and *-xe-me*, which are clearly innovations).

The following table summarizes the Ubykh, West Circassian, and Kabardian grammatical case markers (this table is adapted from table 4.3 in Arkadiev—Lander to appear, p. 22; see also Hewitt 2005b:103):

		Ubykh	West Circassian	Kabardian
Singular	Absolutive	∅	<i>-r</i>	<i>-r</i>
	Oblique	<i>-n</i>	<i>-m</i>	<i>-m</i>
Plural	Absolutive	∅	<i>-xe-r</i>	<i>-xe-r</i>
	Oblique	<i>-ne</i>	<i>-xe-m, -me, -xe-me</i>	<i>-xe-m</i>

Notes:

1. According to Chirikba (1996a:368), the Ubykh oblique marker *-n* is related to the Common Abkhaz locative suffix **-nə*. Chirikba (2016:19) further compares the Proto-Northwest Caucasian locative suffix **-na/ə* with the Proto-Northeast Caucasian genitive suffix **-n*.
2. Chirikba (2016:19) compares the oblique marker *-m* found in West Circassian and Kabardian with the Proto-Northeast Caucasian oblique marker **-m*.
3. For more information about noun morphology in Northwest Caucasian, cf. Hewitt 2005b:102—103. On ergativity in Northwest Caucasian, cf. Matasović 2012b:15—17.
4. The /x/ found in the Kabardian plural forms in the above table is actually /h/ (personal communication from John Colarusso).

As mentioned above, in the Proto-Indo-European heteroclitic declension, the nom.-acc. sg. was characterized by **-r-*, while the oblique cases in the singular were characterized by **-n-*, which replaced the **-r-* and which was found between the stem and the case endings. Quite interestingly, the oblique marker **-n-* found in the Proto-Indo-European heteroclitic declension matches the oblique marker **-n* found in Ubykh in both form and (partially) function, while the **-r-* found in the nom.-acc. sg. in the Proto-Indo-European heteroclitic declension matches the absolutive marker *-r* found in West Circassian and Kabardian in both form and (partially) function. Concerning the functions of the absolutive and oblique cases in Northwest Caucasian, Arkadiev—Lander (to appear, p. 22) state:

On the functional side, there is considerable asymmetry in the distribution of the grammatical cases. The absolutive is restricted to marking the S of intransitive verbs (4.17a) and P of transitive verbs (4.17b). The oblique, by contrast, covers a very wide range of grammatical roles, including the ergative

A of transitive verbs (4.18a), indirect objects introduced by specialized applicative prefixes (4.18d), adnominal possessors (4.18e) and objects of postpositions (4.18f), and certain locative and temporal adjuncts (4.18g).

Thus, considering that there is already strong evidence for prehistoric language contact between Proto-Indo-European and Northwest Caucasian in the form of the 275 lexical parallels listed in this chapter, we can speculate that the underlying pattern of **-r-* in the nom.-acc. sg. and **-n-* in the singular oblique cases in the Proto-Indo-European heteroclitic declension was borrowed by Proto-Indo-European from Northwest Caucasian. The regular oblique case endings found in Proto-Indo-European (cf. Chapter 19, §19.4, for details) were eventually appended after the oblique marker **-n-*, thus yielding the heteroclitic declension of traditional Proto-Indo-European grammar.

Here, it is worth quoting Matasović's (2012b:19–20) remarks regarding the heteroclitic declensions in Proto-Indo-European and *Northeast* Caucasian:

One of the most salient features of NE Caucasian inflection, attested in all branches of that family, is the two-stem inflection of nouns. One stem is used for the nominative (absolutive) case, whereas the other is used for the ergative and other oblique cases (Kibrik 1991). This is strongly reminiscent of the 'heteroclitic' inflection of the PIE neuters, which form the nominative and accusative singular with the stem ending in **-r*, and the oblique cases with the stem ending in **-n*, cf., e.g., PIE **yēk^wr* (NOM and ACC SG) vs. **yek^wns* (GEN SG) 'liver', cf. Gr. *hēpar*, *hēpatos*, Lat. *iecur*, *iecinis*, IEW 504. Although heteroclitic stems are an archaism in most IE languages, in Anatolian they are quite productive, which testifies that, at least in Early PIE, they were quite common.

This type of inflection is otherwise rare in the languages of North and Northeastern Eurasia, so its occurrence in PIE and NE Caucasian appears even more important. Note that it is at present impossible to reconstruct complete nominal paradigms in Proto-NE Caucasian, and that formal means of expression of the two-stem opposition differ in various languages (Alekseev 2003), but several different suffixes used to form the oblique stem can be posited; in Chechen, for example, the oblique stem can be formed with the nasal suffix. Thus, we have Chechen *buhʃa* 'owl' (Absolutive SG) vs. *buhʃ-an-uo* (Ergative), *buhʃ-an-ash* (Absolutive Plural), or Dargi *neš* 'mother', oblique *neš-li* (dative *neš-li-s*), plural *neš-ani*, oblique plural *neš-an-a-* (dative *neš-an-a-s*). After discussing the evidence, Alekseev (2003: 34) concludes that the heteroclitic inflection of this type is original in the NE Caucasian family.

The fact that two-stem inflection is a trait shared exclusively by PIE and NE Caucasian is areally highly significant. However, one has to bear in mind that in PIE only neuters showed this feature, while in NE Caucasian it is attested across the lexicon.

But there is more. As opposed to Ubykh, the West Circassian and Kabardian oblique marker is *-m*. In Proto-Indo-European, the accusative singular case ending is **-m* (**-o-m* in thematic stems, **-m̥/-m* in athematic stems). Here, we can speculate

that the borrowing was in the opposite direction, namely, from Proto-Indo-European into Northwest Caucasian. From there, it passed into Northeast Caucasian as well.

One additional point needs to be made: Syntactic alignment is not considered in this section. Later Proto-Indo-European unquestionably had nominative-accusative alignment, while modern Northwest Caucasian languages have ergative alignment. According to some scholars, Proto-Indo-European may also have had ergative alignment at an earlier stage of development, while, according to other scholars, Proto-Indo-European may have had active alignment instead at an earlier stage of development. Regarding ergativity in Northwest Caucasian, Matasović (2012:17) notes: “The ergative case marking on nouns in Ubykh and Circassian is a clear innovation”.

A particularly noteworthy example here of borrowing by Proto-Indo-European from Northwest Caucasian involving a heteroclitic nominal stem in Proto-Indo-European is the word for ‘blood’:

Proto-Indo-European (nom.-acc. sg.) **ǵés-ǵh-ǵ*; (gen. sg.) **ǵs-ǵh-én-s*, **ǵs-ǵh-n-és* (**ǵ* = **ǵ₁*; **ǵh* = **ǵ₂*): Hittite (nom.-acc. sg.) *e-eš-ḫar*, *e-eš-ḫa-ar*, *iš-ḫar* ‘blood’, (gen. sg.) *iš-ḫa-na-a-aš*, *iš-ḫa-a-na-aš*, *iš-ḫa-na-aš*, *e-eš-ḫa-na-aš*, etc.; Cuneiform Luwian (nom.-acc. sg.) *a-aš-ḫar-ša*, [*a-*]*aš-ḫa-ar* ‘blood’, (nom. sg.) *a-aš-ḫa-nu-wa-an-ti-iš* ‘bloody’; Hieroglyphic Luwian (nom.-acc. sg.) *á-sa-ha-na-ti-sa-za* ‘blood-offering’; Sanskrit (nom.-acc. sg.) *ásṛk* ‘blood’, (gen. sg.) *asnás*; Greek *ἔαρ*, *εἶαρ* (Hesychius *ἦαρ*) ‘blood’; Armenian *ariun* ‘blood’; Old Latin *as(s)er* ‘blood’; Latvian *asins* ‘blood’; Tocharian A *ysār*, B *yasar* ‘blood’. The Proto-Indo-European root is obviously **ǵes-/*ǵs-*, which has been extended by a suffix **-ǵh-* (cf. the *-ǵ-* in the Ubykh forms cited below), yielding the stem **ǵes-ǵh-*. The nom.-acc. sg. ends in **-r*, while the oblique cases contain an oblique marker in **-n-*, thus: Proto-Indo-European (nom.-acc. sg.) **ǵés-ǵh-ǵ*; (gen. sg.) **ǵs-ǵh-én-s*, **ǵs-ǵh-n-és*. This is exactly what we would expect had this word been borrowed by Proto-Indo-European from Northwest Caucasian.

Northwest Caucasian:

- A. Common Abkhaz **š’a* ‘blood’: South Abkhaz *a-š’á* ‘blood’, *a-š’a-rá* ‘bleeding, bloody flux’, *a-š’a-ba-rá* ‘to bleed heavily’; Ashkharywa *š’a* ‘blood’; Abaza / Tapanta *š’a* ‘blood’. No doubt related to: Common Abkhaz **š’ə* ‘to kill’: South Abkhaz *a-š’-rá* ‘to kill’; Abaza / Tapanta *š’-ra* ‘to kill (imper. *d-š’ə* ‘kill him/her!’ [human])
- B. Ubykh *š’χa-* ‘to wound’ (*asš’χán* ‘I wound him’), *š’χaq’á* (def. *á-*) ‘wound; wounded’.

Note: The *š’* found in the Abkhaz and Ubykh forms cited above is represented as **s* in Proto-Indo-European.

Other examples of Proto-Indo-European heteroclitic noun stems with possible lexical parallels in Northwest Caucasian include the following:

1. Proto-Indo-European (nom.-acc. sg.) **yék^{wh}-ɣ* ‘liver’, (gen. sg.) **yek^{wh}-n-és*, **yok^{wh}-én-s*, **yék^{wh}-ŋ-s*, etc. (cf. Wodtko—Irslinger—Schneider 2008:393) (< *‘entrails’, as in Old Church Slavic *jetro* ‘liver’ ~ Greek ἔντερα ‘entrails’ [cf. Buck 1949:§4.45 liver]): Sanskrit (nom.-acc. sg.) *yákr̥t* ‘liver’, (gen. sg.) *yaknás*; Avestan (nom.-acc. sg.) *yākarə* ‘liver’; Greek (nom.-acc. sg.) ἥπαρ ‘liver’, (gen. sg.) ἥπατος; Latin (nom.-acc. sg.) *iecur* ‘liver’, (gen. sg.) *iecuris*, *iecinoris*; Lithuanian (dial.) (pl.) *jėknos* ‘liver’.

Northwest Caucasian: Proto-Circassian **yaq^hə* ‘cud, entrails’: Bžedux *yaq^hə* ‘cud, entrails’; Kabardian *yaq^o* ‘cud, entrails’.

2. Proto-Indo-European (nom.-acc. sg.) **phét^h-ɣ* ‘wing, feather’, (gen. sg.) **pheth-n-és* (only in Hittite as a productive heteroclitic stem): Hittite (nom.-acc. sg.) *pát-tar* ‘wing’, (dat.-loc. pl.) *pad-da-na-aš* (OH/NS), *pat-ta-na-aš* (NH). For more information, cf. Kloekhorst 2008b:658—659. Related noun forms include: Sanskrit *pátram* ‘wing, feather’; Greek πτερόν ‘feather, bird’s wing’; Old Icelandic *fjöðr* ‘feather, quill’; Old English *feþer* ‘feather’, (pl.) *feþra* ‘wings’; Old Frisian *fethere* ‘feather’; Old Saxon *fethara* ‘feather’; Old High German *fedara* ‘feather’, *fettāh* ‘wing’. Verb forms include: Hittite (3rd pl. pres.) *pít-ti-(ya-)an-zi* ‘to flee, to fly, to hasten’; Sanskrit *pátati* ‘to fly, to soar, to rush on; to fall down or off; to set in motion, to set out on foot; to rush on, to hasten’, (causative) *patáyati* ‘to fly or move rapidly along, to speed’; etc.

Northwest Caucasian: Common Abkhaz (reduplicated) **pat-pátə*: South Abkhaz *a-pat-pát-ra* ‘to flutter, to quiver (of bird); to flounder, to wallow’; Bžyp *a-pat-mát-ra* ‘to flutter, to quiver (of bird); to flounder, to wallow’.

3. Proto-Indo-European (nom.-acc. sg.) **ǵyéǵ-ɣ* ‘year’, (gen. sg.) **ǵyeǵ-én-s* (**ǵ* = **ǵ₁*): Gothic *jēr* ‘year’; Old Icelandic *ár* ‘year’; Old English *ǵēar* ‘year’; Old Frisian *jēr* ‘year’; Old High German *jār* ‘year’; Avestan (nom.-acc. sg.) *yārə* ‘year’, (gen. sg.) *yā* (< **ǵyeǵ-én-s*). Note: Heteroclitic declension is only attested in Avestan. Related verb forms include: Greek (1st sg. pres.) εἶμι ‘I go’, (1st pl. pres.) ἴμεν ‘we go’; Sanskrit (1st sg. pres.) *émi* ‘I go’, (3rd sg. pres.) *éti* ‘goes’, (1st pl. pres.) *imáh* ‘we go’, (3rd pl. pres.) *yánti* ‘they go’, (3rd sg. pres.) *yáti* ‘goes, moves, rides’; Latin (1st sg. pres.) *eō* ‘I go’; Old Lithuanian (3rd sg. pres.) *eīti* ‘goes’; Old Prussian (3rd sg. pres.) *ēit* ‘goes’, *per-ēit* ‘comes’; Old Church Slavic *idǫ, iti* ‘to go’; Luwian (3rd sg. pres.) *i-ti* ‘goes’; Hittite (imptv.) *i-it* ‘go!’; Tocharian A (1st pl.) *ymäs* ‘we go’, B (1st sg.) *yam, yam* ‘I go’.

Northwest Caucasian: Common Abkhaz **jə*: South Abkhaz *aá-j-ra* ‘to come’, *a-ná-j-ra* ‘to go’; Abaza / Tapanta *há-j-ra* ‘to come’, *na-j-ra* ‘to go’ (*na* ‘thither’).

4. Proto-Indo-European (nom.-acc. sg.) **p^hé^hh-ur-* [**p^há^hh-ur-*], **p^he^hh-wór-* [**p^ha^hh-wór-*] ‘fire’, (gen. sg.) **p^he^hh-w-én-s* [**p^ha^hh-w-en-s*], etc. (**^hh* = **₂*) (cf. Wodtko—Irslinger—Schneider 2008:540—545): Hittite (nom.-acc. sg.) *pa-aḫ-ḫu-ur*, *pa-aḫ-ḫu-wa-ar*, *pa-aḫ-ḫur* ‘fire’, (gen. sg.) *pa-aḫ-ḫu-e-na-aš*; Luwian (nom. sg.) *pa-a-ḫu-u-ur* ‘fire’; Greek πῦρ ‘fire’; Umbrian *pir* ‘fire’; Gothic *fōn* ‘fire’, (gen. sg.) *funins*; Old Icelandic *fúrr* ‘fire’, *funi* ‘flame’; Old English *fȳr* ‘fire’; Old Saxon *fiur* ‘fire’; Old High German *fiur*, *fuir* ‘fire’; Tocharian A *por*, B *puwar* ‘fire’; Old Czech *púř* ‘glowing ashes, embers’; Armenian *hur* ‘fire’.

Northwest Caucasian:

- A. Proto-Circassian **P̄x̄aq:ʷa* ‘torch’: Kabardian *p̄x̄āqʷa* ‘torch’.
 B. (1) Common Abkhaz **p̄x̄a*: Abaza / Tapanta *p̄x̄a-rá* ‘to warm up, to become warm’; South Abkhaz *a-p̄x̄á* ‘warm’, *a-p̄x̄a-ra* ‘to warm up, to become warm; to shine (of sun, moon)’. (2) Common Abkhaz **p̄x̄-ʒá* (< **p̄x̄a* ‘warm’, **ʒá* ‘water’): South Abkhaz *a-p̄x̄-ʒá* ‘sweat’; Abaza / Tapanta *p̄x̄-ʒá* ‘sweat’. (3) Common Abkhaz **p̄x̄ə-ná* (< **p̄x̄a* ‘warm’, **-nə* ‘season, time of’): Ashkharywa *a-p̄x̄ə-n-ra* ‘summer’; Abaza / Tapanta *p̄x̄-nə* ‘summer’, *p̄x̄ən-č’ál’a* ‘July; middle of summer’; South Abkhaz *a-p̄x̄ə-n* ‘summer’.

Note: Proto-Indo-European **p^hV^hh-* = Common Abkhaz **p̄x̄V-*.

One of the tests of the validity of any theory is its ability to explain, in a straightforward and convincing manner, problems that have previously resisted all attempts at explanation. Here, we have just such a case — the possible explanation of the origin of the Proto-Indo-European heteroclitic nominal declension on the basis of prehistoric language contact between Proto-Indo-European and Northwest Caucasian.

21.7. CONCLUDING REMARKS

I believe that Colarusso’s work has great merit, though, as pointed out above, not all of his proposals are convincing. However, rather than view these similarities as evidence of genetic relationship, I prefer to see them as evidence that there was prolonged and substantial contact between Proto-Indo-European and Northwest Caucasian. As a result of the socio-cultural interaction with and resultant borrowing from Caucasian languages, especially primordial Northwest Caucasian languages, Proto-Indo-European developed unique characteristics that set it apart from the other Eurasiatic languages. Though Proto-Indo-European remained a Eurasiatic language at its core (cf. Collinder 1934, 1954, 1967, and 1970; Čop 1970a and 1975; Greenberg 2000—2002; Hyllested 2009; J. C. Kerns 1967; Kloekhorst 2008a; Kortlandt 2010a [various papers]; Pisani 1967; Ringe 1998a; Rosenkranz 1966; Uesson 1970; etc.), the interaction with Northwest Caucasian had a profound impact

on the phonology, morphology, and lexicon of Proto-Indo-European (technically, this is known as “contact-induced language change”) and gave it a distinctive, Caucasian-like appearance (Kortlandt 2010f expresses a similar view).

But, there is more. One of the most significant byproducts of the comparison of Proto-Indo-European with Northwest Caucasian is that it provides empirical support for the Glottalic Model of Proto-Indo-European consonantism as well as the interpretation of the traditional plain voiceless stops as voiceless aspirates. Though we cannot say for certain on the basis of this comparison whether voiced aspirates existed in Proto-Indo-European at the time of contact with primordial Northwest Caucasian languages, there is nothing to indicate that they did. Indeed, the most straightforward explanation is that voiced aspirates arose at a later date in the Disintegrating Indo-European dialects that gave rise to Indo-Iranian, Armenian, Greek, and Italic.

Another important insight that can be gleaned from this comparison is that the Pre-Proto-Indo-European morphological system changed dramatically as a result of contact with Northwest Caucasian languages — in certain respects, it became more complicated. At the same time, some of the earlier morphology must have been lost. In his 2002 book entitled *Pre-Indo-European*, Winfred P. Lehmann suggested that three endings represented the most ancient layer of the Proto-Indo-European case system — these endings were: **-s*, **-m*, and **-H*. According to Lehmann, **-s* indicated an individual and, when used in clauses, identified the agent; **-m* used in clauses indicated the target; and **-H* (= **₂₄* [see Chapter 19, §19.6]) supplied a collective meaning. Lehmann further maintains that the remaining case endings were based upon earlier adverbial particles that came to be incorporated into the case system over time. That this has indeed taken place is especially clear in the case of the dual and plural endings in **-bʰi-* and **-mo-*, which were incorporated into the Proto-Indo-European case system after Hittite and the other Anatolian daughter languages had split from the main speech community. The comparison with Northwest Caucasian indirectly corroborates Lehmann’s views, though details of how and when the individual case endings traditionally reconstructed for Proto-Indo-European arose still need to be fully worked out — it may be noted that a good start has recently been made in this direction by the Czech scholar Václav Blažek (2014) and, before him, by Balles (2004), Beekes (1985), Haudry (1982), Ronald Kim (2012), Kulikov (2011), Kuryłowicz (1964a), Shields (1982), and Specht (1944), among others. See also Pooth 2018b for a radical reinterpretation of the case-marking system of Proto-Indo-European.

For corroborating evidence from archeology and genetics for language contact on the steppes, cf. Shishlina 2013 and Wang et al. 2019.

No doubt, as pointed out by Polomé (1990b), the Indo-Europeans must have come into contact with and replaced other non-Indo-European languages as they moved into and conquered central, southern, and western Europe. Basque is the sole non-Indo-European language to have survived from before the arrival of the Indo-Europeans to the present day (cf. Tovar 1970). On contacts between Proto-Indo-European and Proto-Uralic/Proto-Finno-Ugrian, cf. Kronasser 1948; Carpelan—Pärpola—Koskikallio 2002; Jacobsohn 1980; Joki 1973; Kudzinowski 1983; Rédei

1983 and 1988c; Szemerényi 1988. For Kartvelian contacts, cf. Fähnrich 1988; Klimov 1985, 1991, and 1994a; Djahukyan 1967. Mention should also be made here of the theories advanced by Theo Vennemann (2003), according to which Indo-European speakers came into contact with and either substantially reduced or outright replaced Vasconic (that is, Pre-Basque) and Semitic languages in Western Europe. For remarks on substrate influence on the vocabulary of Northwest Indo-European, cf. Salmons 1992a. For an excellent overview of language contact in general, cf. Henning Andersen (ed.) 2003, the first section of which is devoted to Indo-European. Andersen's own contribution to the volume (pp. 45–76) deals with early contacts between Slavic and other Indo-European dialects, while that of Mees (pp. 11–44) deals with the substrata that underlie the Western branches of Indo-European. Farther afield, Forest (1965:136) even lists several possible Indo-European loanwords in Chinese.

Next, it should be mentioned that Arnaud Fournet has brought to my attention a large number of non-Indo-Iranian Indo-European elements in Hurro-Urartian.

Finally, as made clear by Vajda in his review (2003) of Angela Marcantonio's book *The Uralic Language Family: Facts, Myths and Statistics* (2002), language contact ("extensive areal contact mutually as well as with non-Uralic languages") also appears to have played a significant role in the development of both Proto-Uralic itself as well as the various Uralic branches and sub-branches. However, unlike Marcantonio, Vajda considers Uralic to be a valid genetic grouping. To a large extent, it is the contact-induced language change that both Proto-Uralic and Proto-Indo-European have undergone that has made it so difficult to establish a convincing genetic relationship between these two language families.

COMPARATIVE VOCABULARY
(FIRST HALF)

CHAPTER TWENTY-TWO
COMPARATIVE VOCABULARY OF THE
NOSTRATIC LANGUAGES

22.1. INTRODUCTION

In comparing the lexical material from the various Nostratic daughter languages, I have tried to be very careful about the issue of semantic plausibility. Where there is either a one-to-one or an extremely close semantic correspondence, there is, of course, no problem. Unfortunately, things are not always this straightforward. Quite often, there is not a one-to-one semantic correspondence — in such cases, we must be able to derive the proposed cognates from the postulated ancestor form by widely-attested semantic shifts and not by mere speculation. Therefore, in attempting to determine whether or not particular lexical items from the various language families under consideration might be related, I have made extensive use of Carl Darling Buck's *A Dictionary of Selected Synonyms in the Principal Indo-European Languages* as a control for the semantic development of the proposed lexical parallels, and references to the appropriate sections of this work are given at the end of each proposed Nostratic etymology. It may be noted that, in examining the lexicons of Kartvelian, Afrasian, Uralic-Yukaghir, Elamo-Dravidian, Altaic, and Eskimo-Aleut, semantic shifts similar to those described by Buck for the Indo-European languages are found over and over again in these other language families as well (on the regularity of semantic change, cf. Geeraerts 1985 and 1992; Traugott—Dasher 2001). I cannot emphasize strongly enough that, in order to gain a complete understanding of how I arrived at my proposals, Buck's dictionary must be consulted. However, in a number of instances, where I felt it was warranted due to the wide semantic differences found among the forms cited from the daughter languages, I have given brief explanations within the etymologies themselves.

As valuable as Buck's dictionary is, however, it is not without its shortcomings. In the first place, as noted by Buck himself (1949:xii), the dictionary is not complete — due to the nature of the material involved, Buck and his assistants had to be selective in choosing what to include. Next, the research upon which the dictionary is based is now well over half a century old. Therefore, Buck's dictionary must be supplemented by more recent scholarship. Unfortunately, however, this work is spread throughout so many journal articles, dissertations, and books that it is virtually impossible to consult all of it, especially when one is dealing with multiple language families.

It is not enough, moreover, simply to compare dictionary forms. Rather, when working with the lexical data from the various Nostratic daughter languages, one must strive to ascertain the underlying semantics, that is to say, the fundamental meaning or meanings from which the full set of semantic nuances are derived, based

upon actual usage, wherever this is possible, and one must be cognizant of the interrelationship between social, cultural, and conceptual factors on the one hand and semantic structures on the other (cf. Birnbaum 1977:41—51). It goes without saying that this is neither a simple nor an easy undertaking.

The approach that I have followed thus leads to the establishment of what may be called “families of words” in the tradition of the great Indo-European comparative dictionaries such as Pokorny (1959) and Walde (1927—1932). The starting point is always the reconstructed Nostratic forms. The material cited from the individual Nostratic daughter languages is then to be judged primarily by whether or not it can be convincingly derived from the antecedent Nostratic forms either directly or through widely-attested semantic shifts.

The difficulties involved in dealing with semantic change in unattested languages have been clearly articulated by Winter (2003:206—207) (also important is the study done by Dubossarsky—Weinshall—Grossman 2016):

The difficulties encountered by the etymologist reaching out toward unattested and hence textless languages are deep-rooted and virtually insurmountable. When one reads an intelligently written, richly documented book such as Blank 1997, one cannot help being impressed with the fact that it is relatively easy to describe and classify semantic changes such as metonymy and metaphor that occurred in the course of the history of an individual language or a group of closely related languages, but that there is a near total absence of what one might call determinacy and hence predictability as to the kind and direction of the changes that can be shown to have taken place and therefore can be expected to occur again under comparable circumstances. The applicability of a form may remain unchanged, it may be extended to cover additional meaning configurations, it may be narrowed, it may be eliminated altogether; new denotations added may concern closely related items, as in the case of metonymy, or seemingly very different ones, as when metaphors are used. As long as one limits oneself to a retrospective analysis of data from historically well-attested languages, the lack of regularity will not affect the descriptive adequacy of one’s findings; if, however, one turns to the study of prehistoric stages of a language or a group of languages, one is left with hardly any well-defined criteria by which to evaluate one’s hypotheses (and those of others). The only criterion that seems to be operationally usable derives from the assumption made above: if both phonetic and semantic change occurred in relatively small steps, feature by feature, component by component, then the likelihood that a hypothesis might be correct can be said to be supported in a more than subjective way. This does not eliminate the difficulty that observable change can occur in all possible directions and that to complicate matters even further, in the course of a historical development, the direction may change at any time. If that is the case, it follows that in the absence of observable data — that is, under conditions normal for reconstructional linguists — no objectifiable criteria can be called upon by the etymologist, and his proposals will always reflect his personal preferences.

Another important point that needs to be reiterated concerns how I segment the reconstructed forms I am dealing with. Comparison of the various Nostratic daughter languages indicates that the rules governing the structural patterning of roots and stems in Proto-Nostratic were most likely as follows (this is repeated from Chapter 12, §12.3):

1. There were no initial vowels in Proto-Nostratic. Therefore, every root began with a consonant.
2. There were no initial consonant clusters either. Consequently, every root began with one and only one consonant. Medial clusters were permitted, however.
3. Two basic root types existed: (A) **CV* and (B) **CVC*, where *C* = any non-syllabic, and *V* = any vowel. Permissible root forms coincided exactly with these two syllable types.
4. A stem could either be identical with a root or it could consist of a root plus a single derivational morpheme added as a suffix to the root: **CVC+C-*. Any consonant could serve as a suffix. Note: In nominal stems, this derivational suffix was added directly to the root: **CVC+C-*. In verbal stems, it was added after the formative vowel: **CVC+V_{FV}+C-*. (*FV* = formative vowel.)
5. A stem could thus assume any one of the following shapes: (A) **CV-*, (B) **CVC-*, (C) **CVC+C-*, or (D) (reduplicated) **CVC-CVC-*. As in Proto-Altaic, the undifferentiated stems were real forms in themselves and could be used without additional suffixes or grammatical endings. However, when so used, a vowel had to be added to the stem: (A) **CV-* > **CV* (no change), (B) **CVC-* > **CVC+V*, (C) **CVC+C-* > **CVC+C+V*, or (D) (reduplicated) **CVC-CVC-* > **CVC-CVC+V*. Following Afrasian terminology, this vowel may be called a “terminal vowel” (TV). Not only did terminal vowels exist in Proto-Afrasian, they are also found in Dravidian, where they are called “enunciative vowels”, and in Elamite, where they are called “thematic vowels”. In Proto-Dravidian, the enunciative vowel was only required in stems ending in obstruents, which could not occur in final position.

The original root structure patterning was maintained longer in Afrasian, Dravidian, and Altaic than in the other branches, while the patterning found in Proto-Indo-European and Proto-Kartvelian has been modified by developments specific to each of these branches. The root structure constraints found in Proto-Indo-European were an innovation. In Proto-Uralic, the rule requiring that all words end in a vowel was an innovation and arose from the incorporation of the so-called “terminal vowel” into the stem. It should be mentioned here that reduplication was a widespread phenomenon.

On the basis of the evidence of Proto-Indo-European, Proto-Kartvelian, Proto-Afrasian, Proto-Dravidian, and Proto-Altaic, it may be assumed that there were three fundamental stem types: (A) verbal stems, (B) nominal (and adjectival) stems, and (C) pronominal and indeclinable stems. Some stems were exclusively nominal. In the majority of cases, however, both verbal stems and nominal stems could be built from the same root. In Proto-Nostratic, only pronominal and indeclinable

stems could end in a vowel. Verbal and nominal stems, on the other hand, had to end in a consonant, though, as noted above, when the undifferentiated stems were used as real words in themselves, a “terminal vowel” had to be added to the stem. As explained in Chapter 17, the terminal vowels were morphologically significant (as were the “formative vowels”).

For Indo-European, the main etymological dictionaries consulted include: Buck 1949; Delamarre 1984; Mallory—Adams (eds.) 1997 and 2006; Mann 1984—1987; Pokorny 1959; Rix 1998a and 2001; Walde 1927—1932; Watkins 1985, 1992, 2000, and 2011; Wodtko—Irslinger—Schneider 2008. The Proto-Indo-European reconstructions are made in accordance with the glottalic model of Proto-Indo-European consonantism proposed by Gamkrelidze—Ivanov (especially 1984 and 1995) and Hopper (1973) (except where noted otherwise).

For Kartvelian, the principal sources are: Klimov 1964 and 1998; Fähnrich 1994 and 2007; Fähnrich—Sardshweladse 1995; Gamkrelidze—Mačavariani 1962; K. H. Schmidt 1962.

The two main Afrasian comparative dictionaries are: Ehret 1995 and Orël—Stolbova 1995, both of which must be used with caution. Another Afrasian comparative dictionary was published in parts between 1994 and 1997 in Russia under the title “Historical-Comparative Vocabulary of Afrasian” by Anna Belova, Igor Diakonoff, Alexander Militarëv, Viktor Porxomovsky, and Olga Stolbova. Unfortunately, I have not been able to consult this work. Also of value are the following: Appleyard 2006; Černý 1976; D. Cohen 1970— ; Ehret 1980 and 1985; Heine 1978; Hudson 1989; Jungraithmayr—Ibriszimow 1994; Klein 1987; Leslau 1963, 1979, and 1987; Militarëv 2010, 2011, and 2012; Murtonen 1989; Newman 1977; Sasse 1979 and 1982; Takács 2011a; Tomback 1978; Vycichl 1983. It should be noted that Gábor Takács is currently preparing a comprehensive etymological dictionary of Egyptian. For Berber, cf. Haddadou 2006—2007.

There are two etymological dictionaries of Uralic: Collinder 1955 (2nd edition 1977) and Rédei (ed.) 1986—1988. Ante Aikio is currently preparing a new Uralic etymological dictionary, the first fascicle of which (A—C) he made available online in January 2020. Aikio’s dictionary reflects current scholarship and is a marked improvement over Collinder and Rédei, especially in its treatment of the vowels. Also of value are: Joki 1973, Janhunen 1977b, Décsy 1990, and Sammallahti 1988. For Yukaghir, cf. Nikolaeva 2006.

For Dravidian, the standard (and only) etymological dictionary is Burrow—Emeneau 1984 (does not contain reconstructions). See also Krishnamurti 2003.

For Altaic, the major works are: Ramstedt 1952—1957; Robbeets 2005; Poppe 1960; Street 1974; Miller 1971; and Starostin—Dybo—Mudrak 2003. The works of Ramstedt and Poppe are now seriously out of date, while that of Starostin—Dybo—Mudrak must be used with caution (cf. the rather critical reviews by Georg 2004, Kempf 2008, Norman 2009, and Vovin 2005; more positive is the review by Roy Andrew Miller 2003—2004). Even taking into consideration the problem areas identified in these reviews, the Altaic dictionary of Starostin—Dybo—Mudrak is clearly an improvement over previous endeavors (as noted by Václav Blažek in his review [2005], not to mention Sergej Starostin’s rebuttal [2005] of Georg’s review

and the lengthy rebuttal [2008] of Vovin's review by Anna Dybo and George Starostin). Consequently, I have mostly accepted their proposals, at least for those items that have been included in this book. However, there are a handful of cases in which I prefer etymologies proposed by other scholars over those proposed by Starostin—Dybo—Mudrak or when I reject parts of their etymologies. These differences of opinion are noted in the individual etymologies.

Tsintsius (Cincius [Цинциус]) 1975—1977 is the standard (Manchu-)Tungus comparative dictionary (does not contain reconstructions). For Turkic, cf. Clauson 1972 and Tenishev—Dybo 2001—2006, volume I. For Mongolian, cf. Poppe 1955.

The principal Eskimo etymological dictionary is Fortescue—Jacobson—Kaplan 1994, and the primary Chukchi-Kamchatkan etymological dictionaries are Fortescue 2005 and Mudrak 2000.

For Gilyak / Nivkh, the only etymological dictionary is Fortescue 2016.

Sumerian forms are cited from Hübner—Reizammer 1985—1986. Delitzsch's *Sumerisches Glossar [Sumerian Glossary]* (1914) is seriously out-of-date. On the other hand, Simo Parpola's *Etymological Dictionary of the Sumerian Language* (2016) is useful for the English meanings, though I do not accept the premise that Sumerian is a Uralic language.

Etymological (where they exist) and non-etymological dictionaries for individual languages have also been heavily consulted, as have journal articles and papers beyond count — a complete list can be found in the references. The volumes in the Leiden Indo-European Etymological Dictionary Series under the editorship of Alexander Lubotsky and published by E. J. Brill have been particularly helpful, though, in some cases, I prefer older or alternative etymologies.

The reconstructed forms for each proto-language conform to a uniform method of transcription — deviations from traditional transcriptions are explained in the chapters on phonology (volume 1 of this book). The works cited at the end of each entry always give the traditional reconstructions, as written by the individual authors. In the case of Proto-Uralic and Proto-Finno-Ugrian, I have kept the symbol /ɜ/, which is traditionally used in Uralic studies as a cover symbol to indicate a vowel of unknown quality.

In the case of both Uralic and Altaic, a certain amount of standardization has been done in the transcription of the forms cited from the individual daughter languages. For Altaic, the system of transcription is close to that used in Starostin—Dybo—Mudrak 2003, though, occasionally, Poppe's transcription is used instead. In both cases, I have allowed a certain degree of latitude due to the wide variations found in the literature.

Inasmuch as the Proto-Indo-European reconstructions included in this book are in accordance with the glottalic model of Indo-European consonantism proposed by Thomas V. Gamkrelidze, Vjačeslav V. Ivanov, and Paul J. Hopper (see Chapter 3 of this book for details), traditional reconstructions are also given for comparison at the end of each Indo-European etymology as part of the references.

It must also be noted that I have been selective in the forms cited from the various Nostratic daughter languages. My goal has been to give a representative sampling, in part to illustrate the semantics involved, and not to cite all known

cognates — nonetheless, the documentation is quite extensive. For additional information, the works cited at the end of each etymology should be consulted, as should other works listed in the references but not necessarily cited after individual etymologies.

Even though I have made extensive use of the works of other scholars (especially V. M. Illič-Svityč, A. Dolgopolsky, and V. Blažek) doing research on the comparative vocabulary of the Nostratic languages, I have sometimes purposely excluded material that they have cited. This does not necessarily mean that I reject their suggestions (though in many cases it does). Rather, I have endeavored to verify all of the data cited by other scholars on the basis of works available to me. In those cases where I have been unable to verify the data cited, I have usually not included their proposals. In those cases where I have included data that I was not able to verify, I have added comments to that effect. The major exception to this rule involves the Chadic data cited by Orël—Stolbova in their joint Afrasian etymological dictionary (1995), most of which I have not been able to verify independently. Finally, in those instances where I have intentionally rejected, either fully or in part, the proposals made by others, I have not given references to their work nor have I discussed the reasons for rejection (almost always because the semantics are not plausible and/or because there are problems with the phonology).

Proto-Nostratic verbs are cited in their root/stem form, nouns in the “*status indeterminatus*” form (that is, **-a*) (see Chapter 17 for details).

As noted in Chapter 17, adjectives did not exist as an independent grammatical category in Proto-Nostratic. Intransitive verbs could function as “adjectives”. Also, “adjectives” were differentiated from nouns mainly by syntactical means — a noun placed before another noun functioned as an attribute to the latter. To illustrate the different semantic functions of nominal words, Proto-Nostratic **bar-a* could mean: (n) ‘goodness, kindness’; (adj.) ‘good, kind’; (adv.) ‘goodly, kindly, well’.

Some final points:

- All language names have been fully spelled out rather than abbreviated. Moreover, since different spellings are sometimes found in the literature, the language names have been mostly standardized to agree with what is found in Ruhlen 1987. In those cases where a particular language is referred to by two different names, both are given, separated by a slash. Where languages are referred to in the literature by more than two names, I have tried to choose only the two most common names.
- In the case of many modern Afrasian languages, the names found in the literature, especially when dialects and subdialects are taken into consideration, are varied and confusing. Here, I mostly left unchanged what was used in the sources I consulted.
- Since the break-up of the former Yugoslavia, the language formerly called “Serbo-Croatian” has been treated as four separate languages, mainly on political grounds: Croatian, Serbian, Montenegrin, and Bosnian. The older term is retained in this book.

TO SUMMARIZE: It should now be clear that I have tried to eliminate the arbitrary nature of much of the previous work, as well as some current work, in distant lexical comparison by relying heavily on proven, widely-attested semantic shifts as found in the daughter languages, especially Indo-European, Semitic, and Dravidian, which, due to having written records of sufficient time depth to be able to follow how words have changed meaning over time, as well as due to having voluminous data with which to work, are particularly valuable. My approach is thus positivistic, that is, data-oriented, rather than impressionistic. To further ensure that my views are firmly grounded in the attested data and not derived from purely theoretical assumptions, I supply a large amount of cited forms from the daughter languages to illustrate the types of changes that have occurred, I give explanations where needed, I supply voluminous references to the standard etymological dictionaries and other relevant literature, I set rather narrow limits on the meanings of the terms selected for comparison, and I stay well within the bounds of established scholarship within each language family.

5. Proto-Nostratic root **bad-* (~ **bəd-*):
- (vb.) **bad-* ‘to split, to cleave, to separate, to divide’;
- (n.) **bad-a* ‘split, crack, breach, opening’
- A. Proto-Afrasian **bad-* ‘to split, to cleave, to separate’: Proto-Semitic **bad-ak-* ‘to split, to cleave’ > Hebrew *beḏek* [בִּדְקַ] ‘breach, fissure’; Aramaic *bəḏak* ‘to penetrate, to break through’, *biḏkā* ‘breach (of a dike, etc.)’; Akkadian *badāku* ‘to cleave, to split’; Ugaritic *bdk-t* ‘openings, sluices’ (?); Geez / Ethiopic *bedek* [ቤደቅ], *bedak* [ቤደቅ] ‘cracks in a wall, wall about to collapse’ (Hebrew loan [cf. Leslau 1987:87]). Klein 1987:64; Murtonen 1989:106; D. Cohen 1970— :46. Proto-Semitic **bad-ad-* ‘to split, to divide, to separate’ > Hebrew *bāḏaḏ* [בָּדָד] ‘to be separated, isolated, alone’, *baḏ* [בָּד] ‘part, piece, portion’; Phoenician *bdd* ‘to be separate’; Arabic *badda* ‘to divide, to separate, to spread’; Sabaean *bdd* ‘to distribute, to share out’; Ḥarsūsi *abdōd* ‘to separate, to sever’; Mehri *abdēd* ‘to separate’; Šheri / Jibbāli *bedd* ‘to separate’; Geez / Ethiopic *badada* [ቤደደ], *badda* [ቤደ] ‘to detach, to separate, to make single’. D. Cohen 1970— :44—45; Klein 1987:63; Murtonen 1989:105; Leslau 1987:86; Tomback 1978:44. Cushitic: Bilin *bid-* ‘to open’; Beja / Beḏawye *bādo* ‘furrow’; Sidamo *bad-* ‘to differentiate, to separate’, *bad-am-* ‘to be different’. Hudson 1989:351; Leslau 1987:86. Proto-Omotiic **bad-* ‘to split, to cut (wood)’ > Kefa *bad* ‘to split, to cut (wood)’; Mocha *badda-* ‘to split, to cut (wood)’ (Leslau 1987:86 gives the Mocha form as *bādda(ye)* ‘to split wood’). Orël—Stolbova 1995:43, no. 171, **bad-* ‘to separate’.
- B. Dravidian: Gondi *para han-* ‘to break (intr.)’; Konḍa *paḍ-* ‘to burst out, to be broken with a crackling sound’, *paṭ-* ‘to break’; Pengo *paḍ-* (*paṭṭ-*) ‘to break (intr.)’, *paṭ-* ‘to break (tr.)’; Maṇḍa *paḍ-* ‘to break (intr.)’; Kuwi *paḍ-* ‘to break, to split, to crack (intr.)’, *paṭ-* ‘to smash’. Burrow—Emeneau 1984:345, no. 3854.
- C. Proto-Indo-European **b^hedh-/b^hodh-* ‘to prick, to pierce, to dig’: Hittite (3rd sg.) *pīd-da-i*, *pād-da-i* ‘to dig’; Latin *fodiō* ‘to dig’; Gaulish *bedo-* ‘canal, ditch’; Welsh *bedd* ‘grave’; Lithuanian *bedù*, *bèsti* ‘to dig, to bury’, *badaũ*, *badýti* ‘to pierce, to gore’; Old Church Slavic *bodō*, *bosti* ‘to stick, to prick’. Rix 1998a:51—52 **b^hedh-* ‘to stab, to dig’; Pokorny 1959:113—114 **b^hedh-* ‘to stab, to dig’; Walde 1927—1932.II:188 **b^hodh-*; Mann 1984—1987:67 **b^hedō*, *-iō* ‘to stab, to dig, to bury’, 88 **b^hod-* ‘to stab; point, probe’; Gamkrelidze—Ivanov 1984.I:154 **b^[h]ed^[h]-/b^[h]od^[h]-* and 1995.I:133 **b^hedh-/b^hodh-* ‘to dig’; Watkins 1985:6 **b^hedh-* (*o*-grade

form **bhodh-*) and 2000:8 **bhedh-* ‘to dig’ (*o*-grade form **bhodh-*); De Vaan 2008:229; Mallory—Adams 1997:159 **bhedh-* ‘to dig, to burrow’; Ernout—Meillet 1979:243; Walde—Hofmann 1965—1972.I:521—522; Fraenkel 1962—1965.I:41; Smoczyński 2007.1:57 **b^hed^hh₂-e-*; Puhvel 1984—.9:66—69 **bhedh-*; Kloekhorst 2008b:624—626.

- D. Proto-Eskimo **paðə* ‘opening or entrance’: Alutiiq Alaskan Yupik *pai* ‘opening, mouth (of thing)’; Central Alaskan Yupik *pai* ‘opening, mouth (of thing)’; Naukan Siberian Yupik *payə* ‘opening, mouth (of thing)’; Central Siberian Yupik *paya* (pl. *payət*) ‘opening, mouth (of thing)’; Sirenik *paca* ‘opening, mouth (of thing)’; Seward Peninsula Inuit *paa* ‘entrance, opening, mouth’; North Alaskan Inuit *paa* ‘entrance, opening, mouth’; Western Canadian Inuit *paa* ‘entrance, opening, mouth’; Eastern Canadian Inuit *paa* ‘entrance, opening, mouth’; Greenlandic Inuit *paag* ‘opening, entrance, mouth, manhole of kayak’. Cf. Aleut *haðy-iX* ‘channel, narrow entrance to bay’, *haðya* ‘its channel’. Fortescue—Jacobson—Kaplan 1994:245.
- E. Chukchi-Kamchatkan: Proto-Chukotian **pətkə(ɲtæt)-* ‘to burst’ > Chukchi *pətkəntet-* ‘to burst, to explode’, *rə-pətk-ew-* ‘to hit the target, to plunge in (something sharp)’, *pətk-ew-* ‘to burst, to be pierced by something sharp’; Kerek *pəttəntaat-* ‘to burst, to explode’; Koryak *pətkəntat-* ‘to burst, to explode’; Alyutor *pətk-at-* ‘to shoot’. D. Cohen 1970— :83; Murtonen 1989:120—121; Klein 1987:84; Tomback 1974:55; Zammit 2002:91—92; Leslau 1987:104—105. Proto-Southern Cushitic *bariy- ‘to travel’ > Ma’a *-bāri* ‘to travel’; Dahalo *barij-* ‘to go out, to depart’. Ehret 1980:135. West Chadic: Angas *bar-* ‘to escape’; Tangale *bar-* ‘to go out’; Warji *var-* ‘to go out’; Ngizim *vərú* ‘to leave, to go out and leave a place; to escape, to get out of a dangerous situation’. Jungrathmayr—Ibrizimow 1994.II:164. Orël—Stolbova 1995:58, no. 230, *bariḥ- ‘to run, to go’.
- B. Proto-Kartvelian *berq- ‘step’: Old Georgian *berq-*, *perq-* (< *berq- through assimilation) ‘foot’ (Modern Georgian *pex-i* [< *perq-, with loss of the *r* before *x*] ‘foot’); Mingrelian *bax-* (< *barx- < *barq-) in *la-bax-u* ‘passage in a wattle-fence’; Svan *bērq*, *bä(r)q*, *bāq* ‘step’, *na-barq-* ‘track, foot-print’, (Upper Bal) *li-bāq-i* ‘to step over something’. Klimov 1964:50 *berq- ‘foot, step’ and 1998:12 *berq- ‘leg, step’; Schmidt 1962:135; Fähnrich—Sardshweladse 1995:52—53 *berq-; Fähnrich 1994:221 and 2007:61—62 *berq-.
- C. Altaic: Proto-Turkic *bar- ‘to walk, to go (away); to come, to reach’ > Old Turkic (Orkhon, Old Uighur) *bar-* ‘to walk, to go (away)’; Karakhanide Turkic *bar-* ‘to walk, to go (away)’; Turkish *var-* ‘to go towards; to arrive; to reach, to attain; to approach; to result, to end in’, *varış* ‘arrival’; Gagauz *var-* ‘to walk, to go (away); to come, to reach’; Azerbaijani *var-* ‘to walk, to go (away)’; Turkmenian *bar-* ‘to walk, to go (away)’; Uzbek *bər-* ‘to walk, to go (away); to come, to reach’; Uighur *ba(r)-* ‘to walk, to go (away)’; Karaim *bar-* ‘to walk, to go (away)’; Tatar *bar-* ‘to walk, to go (away)’; Bashkir *bar-* ‘to walk, to go (away)’; Kirghiz *bar-* ‘to walk, to go (away)’; Kazakh *bar-* ‘to walk, to go (away)’; Noghay *bar-* ‘to walk, to go

(away)'; Sary-Uighur *par-* 'to walk, to go (away)'; Oyrot (Mountain Altai) *bar-* 'to walk, to go (away); to come, to reach'; Tuva *bar-* 'to walk, to go (away)'; Chuvash *p̄ir-* 'to walk, to go (away)'; Yakut *bar-* 'to walk, to go (away)'; Dolgan *bar-* 'to walk, to go (away)'. Note: Starostin—Dybo—Mudrak (2003:930) derive the above Turkic forms from Proto-Altaic **m̄jori* 'road, track; to follow'. Here, I follow Dolgopolsky in deriving them from Proto-Nostratic **bar-* (~ **b̄ar-*) 'to walk, to go (away)' instead.

Buck 1949:4.37 foot; 10.45 walk (vb.); 10.47 go; 10.49 go away, depart. Dolgopolsky 2008, no. 238, **barqV* (~ **barXV*) 'to go, to go away, to step'. The Dravidian forms included by Dolgopolsky do not belong here.

38. Proto-Nostratic root **bar^y-* (~ **b̄ar^y-*):
- (vb.) **bar^y-* 'to be or become barren, desolate, useless, unfruitful';
- (n.) **bar^y-a* 'open, fallow, or barren land'; (adj.) 'barren, desolate, useless, unfruitful'
- A. Proto-Afrasian **bar-* 'open, fallow, barren, or uncultivated land': Proto-Semitic **barr-* 'open country, field' > Akkadian *barru*, *bāru* 'open country'; Hebrew *bar* [בַּר] 'field, open country' (a hapax legomenon in the Bible); Syriac *barrā* 'open field'; Arabic *barr* 'land, mainland, open country', *barrīya* 'open country, steppe, desert'; Sabaeen *barr* 'open country'; Šheri / Jibbāli *ēbrór* 'far away desert'. D. Cohen 1970— :87; Klein 1987:82; Murtonen 1989:119; Zammit 2002:92. Proto-Semitic **ba/wa/r-* 'fallow, uncultivated; wasteland' > Syriac *būrā* 'uncultivated land', *bayyirā* 'barren, fallow, uncultivated'; Arabic *būr* 'uncultivated, fallow' (Syriac loan). D. Cohen 1970— :53. (Orël—Stolbova 1995:82—83 connect the preceding Semitic forms with words meaning 'earth, sand'; however, the primary meaning in Semitic appears to be 'open, fallow, barren, or uncultivated land'). Semitic: Arabic *barāḥ* 'a wide, empty tract of land, vast expanse, vastness'; Geez / Ethiopic *baraḥā* [በረሐ] 'wilderness, uninhabited place' (Amharic loan); Tigrinya *bārāka* 'desert'; Tigre *bārāka* 'desert'; Gurage *bārāha* 'uncultivated land, uncultivated pasture land'; Amharic *bārāha* 'wild region, wilderness', *bārāhamma* 'deserted'. D. Cohen 1970— :83; Leslau 1979:153 and 1987:104—105. East Chadic **bar-H-* 'field' > Kwan *koo-baraa* 'field'.
- B. Dravidian: Tamil *pār* '(vb.) to go to ruin, to be laid waste, to become useless, to be accursed (as a place or house); (n.) desolation, ruin, damage, loss, corruption, baseness, evil, emptiness, barrenness, barren or waste land', *pāri* 'desolation', *paṛutu* 'unprofitableness, damage, ruin'; Malayalam *pār* 'an empty place, void, desolation, waste; vain, useless', *pārān* 'one good for nothing, wicked, scamp; left uncultivated'; Kannada *pār* 'ruin, desolation, a waste', *pārtana* 'a ruined state'; Tuḷu *pālḷu*, *hālḷu* 'ruin, destruction, desolation; desolate, waste, ruined, destroyed', (?)

paḍily ‘waste, barren, unfruitful; wasteland’; Telugu *pāḍu* ‘ruin, destruction, dilapidated condition; ruined, dilapidated, desolate, waste, dreary, bad, wicked, evil’; Gondi *pār* ‘desert’, *pār* ‘a deserted village site’; Konda *pār* ‘old, devastated’, *pāru* ‘neglected, spoiled’. Burrow—Emeneau 1984:365, no. 4110.

- C. Proto-Kartvelian **barč̣’-* ‘barren, infertile’: Old Georgian *berc’i* ‘barren, infertile (of a woman)’; Mingrelian *burč̣’i* ‘barren, infertile (of a cow)’. 44. Proto-Nostratic (n.) **b[e]r-a* 'knee':

- A. Afrasian: Proto-Semitic **birak-* ‘knee’ > Hebrew *bereḥ* [בִּרְחַ] ‘knee’, *bāraḥ* [בִּרְחַ] ‘to kneel, to bless’ (denominative); Aramaic *birkā* ‘knee’; Syriac *burkā* ‘knee’; Akkadian *birku*, *burku* ‘knee’; Arabic *baraka* ‘to kneel down’ (denominative), (metathesis in) *rukba* ‘knee’; Šheri / Jibbāli *berk* ‘knee’, *bérók* ‘(camels) to kneel’ (denominative); Mehri *bark* ‘knee’, *bārōk* ‘(camels) to kneel’ (denominative); Ḥarsūsi *bark* ‘knee’, *berōk* ‘to kneel’ (denominative); Ugaritic *brk* ‘knee’; Geez / Ethiopic *bærk* [ቦርክ] ‘knee’, (denominative) *baraka* [ቦረክ] ‘to kneel, to kneel down, to bend the knee, to genuflect’; Tigre *bærk* ‘knee’, (denominative) *bārāka* ‘to kneel, to lie down’; Tigrinya *bærki* ‘knee’; Gurage *bærk* ‘knee, elbow, joint of finger’; Amharic *bærk* ‘knee’ (loan from Geez); Harari *bærxi*, *bæxri* ‘the unit between two joints (in a finger, sugar-cane, etc.)’, from the term for ‘knee’. D. Cohen 1970—:84; Murtonen 1989:121; Klein 1987:85; Leslau 1963:41, 45—46, 1979:153, and 1987:105; Militarëv 2011:79 Proto-Semitic **bi/ark*.
- B. Kartvelian: Mingrelian (Zugdidian) *birgul-*, (Senakian) *burgul-* ‘knee’; Laz (Atinuri) *burgul-*, (Xopuri) *burgil-* ‘knee’.

Buck 1949:4.36 knee. Illič-Svityč 1971—1984.I:194, no. 31, **barKa* ‘knee’; Dolgopolsky 2008, no. 244, **b[E]RV[k]V* ‘knee’. If we are not dealing with loanwords here, then the Proto-Nostratic root is to be reconstructed as **b[e]r-* (the root vowel is uncertain), to which different derivational suffixes have been added in Afrasian, on the one hand, and Kartvelian, on the other.

45. Proto-Nostratic (n.) **bey-a* ‘spirit, soul, self’:

- A. Afrasian: Egyptian *b3* ‘soul’ (Demotic *by*); Coptic *bai* [𐩧𐩢𐩠] ‘soul’. Hannig 1995:237; Faulkner 1962:77; Erman—Grapow 1921:44 and 1926—1963.1:411—412; Gardiner 1957:563; Vycichl 1983:25; Černý 1976:20.
- B. Dravidian: Tamil *pēy* ‘devil, goblin, fiend; madness (as of a dog), frenzy; wildness (as of vegetation)’, *pēyan* ‘demoniac, madmen’, *pēytti*, *pēycci*, *pēcci* demoness, woman under possession of a demon’; Malayalam *pē*, *pēyi* ‘demon; rage, madness, viciousness’, *pēna* ‘ghost, spirit’, *pē-nāyi* ‘mad dog’; Kota *pe-n*, *pe-nm* ‘possession of a woman by spirit of the dead’, *pe-y* ‘demon’; Toda *ō-n* ‘the god of the dead’; Kannada *pē*, *hē* ‘madness, rage, viciousness; growing wild (as plants); worthlessness’, *pētu*, *hētu* ‘demon’, *pēṅkuṇi*, *pēṅkuḷi*, *hēkuḷi* ‘demon; madness, fury’, *hēga* ‘a mad, foolish man’; Tuḷu *pēyi* ‘demon’; Gondi *pēn*, *pen*, *ven*, *pēnu* ‘god’, *peṅ* ‘idol, god’, *pēnvor* ‘priest’; Pengo *pen* ‘god’; Kui *pēnu*, *vēnu* ‘a god, a spirit’; Kuwi *pēnū*, *pēnu* ‘god’, *pēnu* ‘devil’, *pēne?esi* ‘deceased person’; (?) Malto *peypeyre* ‘to feel fervent or animated’. Burrow—Emeneau 1984:393, no. 4438; Krishnamurti 2003:7 **pē(y)/*pēṅ* ‘devil’, 11.
- C. Proto-Altaic **bēye* ‘person, self, body’: Proto-Tungus **beye* ‘person, man’ > Evenki *beye* ‘person, man’; Lamut / Even *bey* ‘person, man’; Negidal

beye ‘person, man’; Nanay / Gold *beye* ‘person’; Solon *bei*, *beye* ‘person, man’. Proto-Mongolian **beye* ‘body, person, self’ > Written Mongolian *beye* ‘body, physique, organism; health’; Khalkha *biye* ‘body, physique, stature’; Buriat *beye* ‘body, person; self’; Kalmyk *bī*, *bīyā* ‘body, person; self’; Ordos *biye*, *beye* ‘body, person; self’; Dagur *bey(e)* ‘body, person; self’; Dongxiang *beije* ‘body, person; self’; Shira-Yughur *bai* ‘body, person; self’; Monguor *bīye*, *buye* ‘body, person; self’. Poppe 1955:47. Poppe 1960:66 and 126; Street 1974:9 **beye* ‘body, person’; Starostin—Dybo—Mudrak 2003:335 **bėje* ‘man; self, body’.

Buck 1949:4.11 body; 16.11 soul, spirit; 22.34 devil; 22.35 demon (evil spirit); 22.45 ghost, specter, phantom. Dolgopolsky 2008, no. 274, **beɣyV* ‘body, self’ ([in descendant languages] → ‘soul’). The semantic development is more likely to have been from ‘spirit, soul, self’ (= ‘life force, vital energy; living being’ [same semantic range as Latin *anima*]) to ‘body, person’ rather than the other way around.

77. Proto-Nostratic root **bur-* (~ **bor-*):

(vb.) **bur-* ‘to cover, to wrap up’;

(n.) **bur-a* ‘cover, covering’

A. Afrasian: Berber: Kabyle *sburr* ‘to cover, to wrap up’.

B. Dravidian: Tamil *pōr* ‘to wear, to wrap oneself in, to cover, to envelope, to surround’, *pōrvai* ‘covering, wrapping, upper garment, cloak, rug’; Malayalam *pōrkkuka* ‘to wrap, to cloak’; Telugu *pōruva* ‘cloth’; Kodagu *porad-* (*poraduv-*, *poraṭ-*) ‘to dress (well)’; Kolami *porkip-* ‘to cover, to close’; Naikri *porkip-* ‘to cover, to close’; Gadba *porege* ‘loincloth’; Gondi *poriyā* ‘loincloth’; Konḍa *porpa-* ‘to cover the body with a garment, to put on an upper garment’; Pengo *por-* ‘to put on an upper garment, to wear round the shoulders’; Maṇḍa *pur-* ‘to put on an upper garment’; Kui *porpa* (*port-*) ‘to wrap around the body, to put on an upper cloth’; Kuwi *por-* ‘to wrap around myself, to wear (cloak)’, *porbi ki-* ‘to cover another’, *porvu* ‘a cover’. Burrow—Emeneau 1984:406, no. 4590.

C. Proto-Kartvelian **bur-* ‘to muffle up, to wrap up, to darken’: Georgian *bur-* in *da-bur-va* ‘to muffle up, to darken’; Mingrelian *bur-* in *burua-* ‘to patch, to mend’; Laz *bur-* in *o-bur-u* ‘to patch, to mend’; Svan *bur-* ‘to darken’, *huri* ‘dark’ in *rəhijhuri* (idiomatic) ‘life’ (that is, ‘light and dark’: *rəhi* ‘clear [light]’), *bi-bwr-e* ‘to darken something, to get dark’, *libwṛāl* ‘to become dark’, *mubwir* ‘dark; darkness’ (semantics as in Latin *obscurus* ‘dark’, originally ‘covered’). Fähnrich—Sardshweladse 1995:67 **bur-*; Klimov 1964:55 **bur-* and 1998:20 **bur-* ‘to muffle up, to wrap up, to darken’; Fähnrich 1994:230 and 2007:82 **bur-*.

D. Proto-Altaiic **būri-* (~ *-jū-*, *-e*) ‘(vb.) to cover; (n.) shade’: Proto-Tungus **bū-* ‘to shade (light)’ > Evenki *bū-* ‘to shade (light)’. Perhaps also Evenki *boro* ‘dusk’; Manchu *boro* ‘hat (made of straw)’. Proto-Mongolian **bürü-* ‘(vb.) to cover; (n.) dusk, darkening’ > Written Mongolian *bürüy*, *bürüg* ‘dark, darkness’; Khalkha *büre-* ‘to cover’, *bürül*, *bürüy* ‘dusk, darkening’; Buriat *būri-* ‘to cover’, *bürül*, *bürür* ‘dusk, darkening’; Kalmyk *būr-* ‘to cover’, *bürü* ‘dusk, darkening’; Ordos *būri-* ‘to cover’; Dagur *burī*, *burgiēn* ‘dusk, darkening’; Monguor *burə-*, *huri-* ‘to cover’. Poppe 1955:50—51. Proto-Turkic **bürü-*, **bür-ke-* ‘to cover up’ > Karakhanide Turkic *bürün-* ‘to be covered’, *bürkek* ‘cloudy’, *bürkür-* ‘to become cloudy’; Turkish *bürü-* ‘to wrap, to enfold, to cover up’, *bürülü* ‘wrapped up, enfolded’, *bürüm* ‘a wrapping up, folding; fold’; Gagauz *bürü-* ‘to cover up’; Azerbaijani *bürü-* ‘to cover up’; Turkmenian *büre-* ‘to cover up’; Uzbek *burka-* ‘to cover up’; Uighur *pū(r)kä-* ‘to cover up’; Tatar *börke-* ‘to cover

Poppe 1960:111 and 135; Street 1974:10 **bür-* 'to cover, to enclose'; Starostin—Dybo—Mudrak 2003:374 **börk'i* 'to cover; cover' and 385—386 **būri* (~-*jū-*, -*e*) 'to cover; shade'.

Sumerian *bur* 'to spread (out), to cover over (with a garment)'.

Buck 1949:1.62 darkness; 12.25 shut, close (vb.); 12.26 cover (vb.). Illič-Svityč 1971—1984.I:191—192, no. 26, **būri* 'to cover'; Dolgopolsky 2008, no. 239, **būryi* 'to cover'; Bomhard—Kerns 1994:225, no. 30.

78. Proto-Nostratic (n.) **bur-a* 'fine, soft) feathers, fur, wool, (body) hair':

- A. Afrasian: Egyptian *br* in *br n sd* 'tuft of hair on [the end of] the tail' (*sd* = 'tail'). Hannig 1995:256.
- B. Dravidian: Malayalam *pūta* 'down of birds, wool, fine hair'; Kota *kam bu* (*kam-* < *kaṇ* 'eye') 'eyebrow'; Tuḷu *puḷle* 'plume, feather'; Kolami *bu-r* 'eyelash, eyebrow', *būr* 'fur'; Naiki *būr* 'down, fine feathers'; Parji (pl.) *būḍul* 'hair, fine feathers, down'; Gadba (pl.) *burgul* 'eyebrows'; Gondi *būrā*, *bura* 'down', *burā* 'feather', *būiyā* 'down', *buiyā* 'hair, feathers'; Konḍa *bulus* 'pubic hair, feathers, hair (on legs and chest)', *buṛus* 'feathers, down'; Pengo *būra* 'small feathers, down, wool, pubic hair'; Maṇḍa *būriṅ* 'pubic hair'; Kui *būri*, *būru* 'hair, fur, feather, wool', *pṛuma* 'feather'; Kuwi *kanu būru* 'eyebrow', (pl.) *būrka* 'down'; Malto *purgu* 'hair on the body'; Brahui *puṭ* 'hair'. Burrow—Emeneau 1984:385, no. 4358. Dolgopolsky (2008, no. 231) has identified three distinct Proto-Dravidian roots that have been lumped together by Burrow—Emeneau in this etymology: (1) **pūt-* 'down, fine hair'; (2) **pūr-* 'hair, fur, feathers'; and (3) **pur/rV-* 'eyelash, eyebrow'. In accordance with Dolgopolsky's views, the forms for 'eyelash, eyebrow' are to be removed from this etymology and compared instead with Proto-Indo-European **b^hr-uH-* 'eyelash, eyebrow' (see below).
- C. Kartvelian: Proto-Georgian-Zan **burdga-* 'down, plumage' > Georgian *burḍya-* 'down, plumage'; Mingrelian *burḍya-* 'down; shaggy'; Laz *bunḍya-* 'down, plumage'. Klimov 1964:55 **burḍya-* and 1998:20—21 **burḍya-* 'down, plumage'; Fähnrich 2007:84 **burḍy-*. Proto-Georgian-Zan **burt'q'ł-* 'down and plumage' > Georgian *burt'q'ł-* 'down and plumage'; Mingrelian *but'q'u-* 'soft'. Svan *bint'q'-il-* 'down' appears to be a loan. Klimov 1964:55 **burtq'ł-* and 1998:21 **burtq'ł-* 'down and plumage'; Fähnrich—Sardshweladse 1995:68 **burtq'ł-*; Fähnrich 2007:85 **burtq'ł-*.

Buck 1949:4.14 hair; 4.393 feather; 6.22 wool; 6.28 fur. Dolgopolsky 2008, no. 231, *bū|ur[?]V ‘lock of hair, down’.

79. Proto-Nostratic (n.) *bur-a ‘eyelash, eyebrow’:

- A. Dravidian: Kota *kam bu* (*kam-* < *kaṇ* ‘eye’) ‘eyebrow’; Kolami *bu-r* ‘eyelash, eyebrow’; Gadba (pl.) *burgul* ‘eyebrows’; Kuwi *kanu būru* ‘eyebrow’. Burrow—Emeneau 1984:385, no. 4358 (see above for the complete entry from Burrow—Emeneau).
- B. Proto-Indo-European *b^hr-uH- (> *b^hrū-) ‘eyelash, eyebrow’: Sanskrit *bhrū-ḥ* ‘an eyebrow, the brow’; Pāli *bhamu-*, *bhamuka-*, *bhamukha-* (< *b^hrāmu- < *b^hrūmu- [cf. Gray 1902:29, §57] ‘eyebrow’; Khowār *brū* ‘eyebrow’; Avestan (f. dual) *brvat-* ‘eyebrows’; Greek ὀ-φρῶς ‘the brow, eyebrow’; Middle Irish (gen. dual) *brúad* ‘eyebrow’; Old Icelandic *brún* (< *b^hruwōn-) (pl. *brynn*) ‘eyebrow’; Faroese *brún* ‘eyebrow’; Norwegian *brūn* ‘eyebrow’; Swedish (properly a plural form) *bryn* ‘eyebrow’; Danish (properly a plural form) *bryn* ‘eyebrow’; Old English *brū* ‘eyebrow; eyelid, eyelash’ (Modern English *brow*); Lithuanian *brūvis* ‘eyebrow’; Old Church Slavonic *brъвь* ‘eyebrow’; Serbo-Croatian *öbrva* ‘eyebrow’; Polish *brwi* ‘eyebrow’; Russian *brov’* [бровь] ‘eyebrow’; Tocharian A *pärwān-*, B (dual) *pärwāne* ‘eyebrows’. The following Germanic forms may belong here as well: Old Icelandic *brá* ‘eyelash’; Faroese *brá* ‘eyelash’; Norwegian (dial.) *braa* ‘eyelash’; Old Swedish *brā* ‘eyelash’; Old Danish *brå* ‘eyelash’; Old English *bræw*, *brēaw* ‘eyelid’ (Middle English *brēu* ‘eyelid, eyebrow; bank, river-side’, Modern English [dial.] *brae* ‘steep bank’); Old Frisian *brē* ‘eyebrow’; Old Saxon *brāha*, *brāwa* ‘eyebrow’, *slegi-brāwa* ‘eyelid’; Dutch *brauw* in

wenkbrauw ‘eyebrow’; Old High German *brāwa* ‘eyebrow’ (New High German *Braue*), *wint-prāwa* ‘eyelash’. Orël 2003:57 Proto-Germanic **brēxwō* ~ **braxwan*; Kroonen 2013:76 Proto-Germanic **brēwō*- ‘eyebrow’; De Vries 1977:51—52; Onions 1966:113; Klein 1971:92; Boutkan—Siebinga 2005:59; Kluge—Mitzka 1967:96; Kluge—Seebold 1989:103. Opinions differ on the origin of the above forms. Some scholars consider them to be derived from the full-grade variant of the Proto-Indo-European stem underlying **b^{hr}-uH-* ‘eyelash, eyebrow’ through laryngeal metathesis, **b^{hr}-ewH-* > **b^{hr}-eHw-* (cf. Lehmann 1952:47—48, §5.3a, **bhreXw-*; Polomé 1965:39, fn. 171, Old English *bræw* < **bhreHw-*, Tocharian *pärwā* < **bhrwH-*), while others compare them with Gothic **brahv* (< **brah+wa-* [cf. Orël 2003:57; Feist 1939:103; Lehmann 1986:78]) ‘glance’, found only in the phrase *in brahva augins* ‘in the twinkling of an eye’ (translates Greek ἐν ῥιπῇ ὀφθαλμοῦ), and derive the lot from Proto-Indo-European **b^{hr}-eE-k^h-* ‘to shine, to gleam, to glitter’ (cf. Pokorny 1959:141—142 **bherək-*, **bhrēk-* ‘to shine, to gleam, to glitter’; Walde 1927—1932.II:169 **bherek-*; Feist 1939:103—104 Proto-Germanic base forms **brēhwō*, **brēgwō*, **brēhwī*, root **brēh-* ‘to light up, to sparkle’; Lehmann 1986:78—79 **bhrēk-* ‘to gleam’; Kluge—Mitzka 1967:96 **bherek-* ‘to shine, to gleam, to glitter’ [but not Kluge—Seebold 1989:103]). According to De Vries (1977:51—52), however, two different stems are involved here: (1) Old Icelandic *brá* ‘eyelash’, related to Sanskrit *bhrū-ḥ* ‘an eyebrow, the brow’, Old Icelandic *brún* ‘eyebrow’, Old English *brū* ‘eyebrow; eyelid, eyelash’, etc. (see above), and (2) Old Icelandic *brá* ‘beam (of light)’, as in, for example, *brá-máni* ‘moonbeam’, *brá-sól* ‘sunbeam’, related to Gothic **brahv*, both of which are, in turn, derived from the same stem found in Old Icelandic *brjá* ‘to sparkle, to glitter, to gleam’, Middle High German *brehen* ‘to light up, to sparkle’, etc. (< Proto-Germanic **brēxan* [cf. Orël 2003:55; De Vries 1977:57]).

95. Proto-Nostratic root **p^halv-* (~ **p^həlv-*):

(vb.) **p^halv-* ‘to burn, to be warm; to smart, to be painful’;

(n.) **p^halv-a* ‘burn, burning sensation, pain’

- A. Proto-Kartvelian **o-pʃ-* ‘sweat, perspiration’: Georgian *opli* ‘sweat’; Mingrelian *upu, up-i* ‘sweat’; Laz *upi* ‘sweat’; Svan *wop, wep* (< **wöp-* < **opi*) ‘sweat’. Orël—Stolbova 1995:186, no. 821, reconstruct Proto-Afrasian **fos[i]ʔ-* ‘to breathe’ on the basis of a comparison of Akkadian *pašū* ‘to breathe out, to expire’ with the following Highland East Cushitic forms: Hadiyya *fooš-eʔ-* ‘to breathe’, *fooša* ‘odor, smell’; Kambata *fooš-eeʔ-* ‘to breathe’, *fošša* ‘odor, smell’, *fooš-eek-fuucc-* ‘to pant’. However, these forms are to be derived from Proto-Highland East Cushitic **fool-* ‘to breathe’, **foole* ‘breath, odor, smell’ (cf. Hudson 1989:31), and are thus not related to the Semitic forms cited above as proposed by Orël—Stolbova.

Greenberg 2000:41, no. 76; Dolgopolsky 2008, no. 1679, *pākō ‘to heat (on fire), to be hot’ (→ ‘to cook, to bake; to dry’); Illič-Svityč 1965:337—338 *pā[k]λ [‘горячий’] ‘hot, warm’. The Kartvelian forms cited by Dolgopolsky are not included here — the original meaning appears to have been ‘to blow (air, wind, breeze), to dry in the air’ (cf. Fähnrich—Sardshweladse 1995:362 *puk-; Fähnrich 2007:443—444 *puk-: Georgian *puk’-v-a* ‘to let the air out’; Svan [Lower Bal] *li-pk’w-e* ‘to dry [something] in the air’, *puk’wi* ‘dry’). The Afrasian forms cited by Dolgopolsky and the Eskimo-Aleut and Chukchi-Kamchatkan forms cited by Greenberg are not included here due to problems with both the semantics and the phonology. Finally, the Uralic forms cited by Illič-Svityč and Dolgopolsky appear to be loanwords from North Germanic (cf. de Vries 1977:23; Falk—Torp 1903—1906.I:31—32: Old Icelandic *baka* ‘to bake; to warm and rub the body and limbs’, *bakstr* ‘baking; baked bread, especially communion bread; poultice, fermentation; warming, rubbing [of the

121. Proto-Nostratic root **phir-* (~ **pher-*):

(vb.) **phir-* ‘to twist, to turn’;

(n.) **phir-a* ‘twist, twining, turn; twine, string, rope, cord’

- A. Dravidian: Tamil *piri* ‘twist, strand, wisp’, *puri* ‘to be twisted, to curl, to turn’, *puri* ‘cord, twine, rope, strand, twist (as of straw), curl, spiral, conch’; Malayalam *piri* ‘a twist, twining’, *piriyuka* ‘to be twisted, warped’, *pirikka* ‘to twist’, *puri* ‘twisting, string’; Kannada *puri* ‘twisting, twist, twine, string’; Tuḷu *piri* ‘twist, spiral thread (as of a screw)’, *piripuni* ‘to twist (as a rope)’, *piripāvuni* ‘to turn, to twist’; Telugu *piri*, *puri* ‘twist, strand, twisting’, *pirigonu* ‘to be twisted, to twist’. - B. Proto-Indo-European **pheri* ‘around’: Sanskrit *pāri* ‘around’; Avestan *pairi* ‘around’; Old Persian *pariy* ‘around, about’; Greek περί ‘around’. Pokorny 1959:810 **per*, **peri*; Walde 1927—1932.II:29—32 **per*, **peri*; Mann 1984—1987:922—923 **peri* (**per*, **per-*) ‘through, over, around’; Watkins 1985:49—50 **per* and 2000:65 **per-* base of prepositions and preverbs with the basic meaning ‘forward, through’ and a wide range of extended senses such as ‘in front of, before, early, first, chief, toward, against, near, at, around’; Mallory—Adams 1997:581 **per-* ‘over, through, about’; Mayrhofer 1956—1980.II:216—217 **peri*, **per-*; Boisacq 1950:772—773 **peri* (**per*); Hofmann 1966:264 **peri* (**per*); Frisk 1970—1973.II:512—513 **péri*; Chantraine 1968—1980.II:886; Beekes

2010.II:1176 **per-*. For possible additional cognates, cf. Proto-Indo-European **pher-/p^hor-/p^hy-* base of prepositions and preverbs with a wide range of meanings such as ‘in front of, forward, before, first, chief, forth, foremost, beyond’, which is listed above under Proto-Nostratic **phar-* (~ **phər-*) ‘(vb.) to press forward, to precede, to hasten in advance, to overtake, to surpass, to outstrip; (adj.) chief, foremost, first’.

- C. Proto-Uralic **pire* ‘round; any round object; around, round about’: Finnish *piiri* ‘circumference, periphery; extent; compass, circle; department, district’; Lapp / Saami *birrâ* ‘round, all around; close (densely) round; round about, around; concerning, about’; Mordvin (Erza) *pire*, (Moksha) *pere* ‘fenced place’; Selkup Samoyed *pör*, *pür* ‘ring; round; wheel, circle’, *pöruŋ*, *püruŋ* ‘round, round about’; Kamassian *pjeeri* ‘about, around, round about’. Collinder 1955:49, 1960:408 **pirz*, and 1977:67; Rédei 1986—1988:384 **pire*; Décsy 1990:106 **pirä* ‘circle’.
- D. Proto-Altaic **pherkV-* ‘to tie round, to surround’: Proto-Tungus **perke-* ‘to bind, to tie round’ > Evenki *herke-* ‘to bind, to tie round’; Lamut / Even *herkь-* ‘to wrap, to envelop’; Negidal *χeyke-* ‘to bind, to tie round’; Orok *pitu-* ‘man’s girdle’; Solon *ekke-* ‘to bind, to tie round’. Proto-Mongolian **hergi-* ‘to go round’ > Written Mongolian *erge-*, *ergi-* ‘to turn, to move around, to revolve’; Dagur *ergi-* ‘to turn, to rotate’; Ordos *erge-* ‘to turn, to rotate’; Khalkha *ergi-* ‘to turn, to rotate’; Buriat *erye-* ‘to turn, to rotate’; Monguor *χərgi-* ‘to turn, to rotate’; Kalmyk *ergi-* ‘to turn, to move around’; Moghol *irga-* ‘to spin a spindle’. Poppe 1955:46 and 153, 1960:104; Street 1974:23 **perki-* ‘to turn, to revolve, to go around’; Starostin—Dybo—Mudrak 2003:1137 **p^herkV* ‘to tie round, to surround’.
- E. Proto-Gilyak / Nivkh **pirk-* ‘to turn’: Amur *phirk-č* ‘to turn’; North Sakhalin *phirk-t* ‘to turn’; East Sakhalin (reduplicated) *phirpir-d* ‘to turn, to spin’; South Sakhalin (reduplicated) *peřkařpeřkař-nt* ‘to turn, to spin’. Fortescue 2016: 134—135.
- F. Proto-Eskimo **pirðar-* ‘to braid or weave’: Naukan Siberian Yupik *piiXə-* ‘to braid, to weave’; Central Siberian Yupik *piiXə-* ‘to braid’; Sirenik *pircəR-* ‘to braid, to weave’; Seward Peninsula Inuit *pirlaq-* ‘to braid’; North Alaskan Inuit *pilvraq-* ‘to braid’; West Canadian Inuit *pilraq-* ‘to braid’; East Canadian Inuit *pirrai-* ‘to plait’; Greenlandic Inuit *pirłar-* ‘to twist’, *pirłaa-* ‘to braid hair’. Fortescue—Jacobson—Kaplan 1994:263. Proto-Eskimo **pirðarar* ‘braid or woven thing’: Alutiiq Alaskan Yupik *piiXaq* ‘woven mat’; Central Alaskan Yupik *piiXaq* ‘two-ply cordage, string or interlaced fish’; Naukan Siberian Yupik *piiXaq* ‘braided hair’; [Sirenik *piržasaq* ‘braided hair’]; Seward Peninsula Inuit *pirłaaq* ‘something braided (sinew, yarn, hair)’; Western Canadian Inuit *pilraqtat* ‘braids’; Eastern Canadian Inuit *pirraaq* ‘plait of hair, whale ligament, thread’; Greenlandic Inuit *pirłaaq* ‘twisted sinew thread’. Fortescue—Jacobson—Kaplan 1995:263—264.

Sumerian *pir* ‘to wrinkle, to crumple; to be rolled up, contracted’. For the semantics, cf. Old English *wrincl* ‘a wrinkle’, *wrinclian* ‘to wrinkle’, diminutives formed from *wrencan* ‘to twist, to turn’ (cf. Klein 1971:832; Onions 1966:1015; Watkins 1985:76—77).

Buck 1949:10.12 turn (vb.); 10.13 turn around (vb.); 10.14 wind, wrap (vb.); 10.15 roll (vb.); 12.81 round; 12.82 circle. Bomhard—Kerns 1994:257, no. 66; Hakola 2000:139—140, no. 609; Dolgopolsky 2008, no. 1771, **pi[h|X]QJRE* ‘around’ (the alleged Egyptian and Coptic cognates included by Dolgopolsky do not belong here and must be removed; furthermore, there is no evidence from the daughter languages to suggest that an initial **p-* is to be reconstructed at the Proto-Nostratic level).

122. Proto-Nostratic root **phir-* (~ **pher-*):

(vb.) **phir-* ‘to tremble, to shake; to be afraid, to fear’;

(n.) **phir-a* ‘trembling, fear’

- A. Afrasian: Proto-Semitic **par-ah-* ‘to be afraid, to fear’ > Geez / Ethiopic *farha* [ፈርሀ], *farḥa* [ፈርሐ] ‘to be afraid, to fear, to revere’, *fərhat* [ፋርሐት] ‘fear, fright, terror, dread, awe, reverence’; Tigre *fārha* ‘to fear, to be afraid’; Tigrinya *fārhe* ‘to fear, to be afraid’; Amharic *fārra* ‘to fear, to be afraid’, *fəračča* ‘fear’; Harari *fāra* ‘to fear, to be afraid’; Gurage *färe* ‘to fear, to be afraid’, *fārī* ‘fear’. Leslau 1987:165—166. Proto-Semitic **par-ak-* ‘to be terrified, afraid, frightened’ > Arabic *fariqa* ‘to be terrified, to be dismayed, to be afraid’; Harsūsi *ferōk* ‘to fear, to be afraid’, *fāyrek* ‘to be afraid, to fear’, *frōk* ‘to frighten’; Šheri / Jibbāli *fērək* ‘to be afraid, frightened’, *efürk* ‘to frighten’, *efrək* ‘to frighten’, *šəfrək* ‘to be frightened’, *fərket* ‘fear’, *fərkin* ‘fearful’; Mehri *fīrək* ‘to be afraid, timorous’, *frōk* ‘to frighten’. Zammit 2002:320. Note: Orël—Stolbova (1995:188, no. 833) reconstruct Proto-Afrasian **furVh-* ‘to fear’ on the basis of a comparison of the Ethiopian Semitic forms cited above and Lowland East Cushitic **fuur-* ‘to fear’, represented in, for example, Konso *fuur-* ‘to fear’ and Gidole *huur-* ‘to fear’. They assume that **fuur-* comes from earlier **fuHVR-*. They then claim that **fuHVR-* is to be derived from a still earlier **furVH-* through metathesis. This explanation is highly speculative and cannot be supported on the basis of the evidence they cite.
- B. Dravidian: Tamil *pirar* ‘to tremble’, *pirarcci*, *pirarvu* ‘shivering, trembling’, *pirakkam* ‘awe, fear’, *pirappu* ‘fear, alarm’; Kannada *piriki* ‘coward’; Telugu *piriki* ‘coward; timid, cowardly’. Burrow—Emeneau 1984:372, no. 4200(a).
- C. Proto-Kartvelian **pertx-* ‘to shake’: Georgian *pertx-* ‘to shake, to shake out, to beat out’; Mingrelian *partx-* ‘to clean, to scrub, to clean oneself’; Laz *patx-* ‘to shake, to shake out, to beat out’. Klimov 1964:188 **pertx-* and 1998:200 **pertx-* ‘to shake’; Fähnrich—Sardshweladse 1995:354—

355 **pertx-*; Fähnrich 2007:433 **pertx-*. Proto-Kartvelian **prtx-* ‘to tremble, to quiver’: Georgian *prtx-* ‘to rouse oneself, to take care’, *prtx-il-* ‘careful’; Mingrelian (*p*)*ntx-* ‘to rouse oneself, to take care’; Laz *putx-* ‘to flutter about, to fly’; Svan *pə(r)tx-ən-*, *bərdγ-ən-* ‘to tremble, to quiver’. Klimov 1964:190 **prtx-* and 1998:204 **prtx-* ‘to tremble, to rouse oneself’; Fähnrich 1994:235; Fähnrich—Sardshweladse 1995:359 **prtx-*; Fähnrich 2007:440—441 **prtx-*.

- D. Proto-Indo-European **pherkh-/p̥h₂rk̥h-* (secondary *o*-grade form: **ph₂orkh-*) ‘to be afraid, to fear’: Gothic *faurh₂tei* ‘fear’, *faurh₂ts* ‘fearful, afraid’, *faurhtjan* ‘to be afraid’; Old English *fyrhto* (Northumbrian *fryhto*) ‘fear, fright’, (*ge*)*fyrht* ‘afraid’, *fyrhtan* ‘to frighten’, *forht* ‘fearful, afraid’, *forhtian* ‘to be afraid, to fear’; Old Frisian *fruchte* ‘fear’, *fruhtia* ‘to fear’; Old Saxon *foroht*, *foraht* ‘fear’, *forahtian* ‘to fear’; Old High German *furhten* ‘to fear’ (New High German *fürchten*), *forhta* ‘fear’ (New High German *Furcht*); Tocharian A *pärsk-*, *prask-*, B *pärsk-*, *präsk-* ‘to be afraid, to fear’, A *praski*, B *prosko*, *proskiye* or *proskye* ‘fear’. Rix 1998a:443 **preK-* ‘to be afraid’; Pokorny 1959:820 **perg-* ‘fear’; Walde 1927—1932.II:48—49 **perg-*; Mallory—Adams 1997:198 **perk-* ‘to fear’; Orël 2003:120 Proto-Germanic **furxtaz*, 120 **furxtin*, 120 **furxtjanan*; Kroonen 2013:161 Proto-Germanic **furhta-* ‘fearful’, **furhtjan-* ‘to fear’, **furhtō-* ‘fright’; Feist 1939:146—147; Lehmann 1986:111; Onions 1966:377; Klein 1971:296 **prk-* ‘(vb.) to fear; (n.) fright’; Kluge—Mitzka 1967:225; Kluge—Seebold 1989:237 **perk-*; Van Windekens 1976—1982.I:366 **prq-* and I:388; Adams 1999:375—376 **p(e)rK-* and 422.
- E. Proto-Altaiic **ph₂iuri-* ‘to be afraid, to be angry’: Proto-Tungus **purkē-* ‘to be bored, to be angry’ > Manchu *fuče-* ‘to get angry, mad, enraged’; Evenki *hurkē-* ‘to be bored’; Lamut / Even *hörken-* ‘to be bored’. Proto-Mongolian **hurin* ‘anger’ > Written Mongolian *urin* ‘ardent passion, anger, dislike’; Khalkha *urin* ‘anger’; Buriat *uri gari bološohon* ‘to be in bad spirits’; Kalmyk *urṅ* ‘anger’. Starostin—Dybo—Mudrak 2003:1162 **p₂iuri* ‘to be afraid, to be angry’. Different etymology in Poppe 1960:80, 83, 87, and 111 and Street 1974:24 (**pürk-* ‘to be afraid’).

Buck 1949:16.53 fear, fright. Bomhard—Kerns 1994:258—260, no. 68; Dolgopolsky 2008, no. 1793, **pürVKV* (or **pirVKV*) ‘to be startled, to be scared, to fear’.

123. Proto-Nostratic root **ph₂it^y-* (~ **ph₂et^y-*):

(vb.) **ph₂it^y-* ‘to give birth to’;

(n.) **ph₂it^y-a* ‘genitals (male or female); birth, origin’

- A. Proto-Afrasian **pit^y-* ‘(vb.) to give birth to; (n.) genitals (male or female)’: Semitic: Arabic *faza*, *fazan* ‘womb’. Central Chadic **pičur-in-*

‘testicles’ > Fali Jilvu *fčerin* ‘testicles’; Fali Mubi *fučuru* ‘testicles’. Orël—Stolbova 1995:70, no. 279, **bičur-*/**pičur-* ‘pudenda’ (according to Orël—Stolbova, the original Central Chadic stem seems to have been **pičur-*). The Semitic material cited by Orël—Stolbova is too divergent phonetically and semantically to be related to the Chadic forms. On the other hand, though not without problems of its own, the following may belong here: Egyptian *pzd* ‘testicles (of the god Seth)’.

- B. Dravidian: Tuḷu *picci* ‘the testicles of an animal’; Telugu *picca* ‘testicle’. Burrow—Emeneau 1984:367, no. 4140.
- C. Proto-Indo-European **p^hit-* ‘(vb.) to give birth to; (n.) birth; vulva, womb’: Gothic *fitan* ‘to be in labor, to give birth to’; Danish (Jutland) *fitte* ‘vulva’; Old Irish *idu*, (gen. sg.) *idan*, (nom. pl.) *idain* ‘birth pains, pains’. Feist 1939:155—156; Lehmann 1986:118.
- D. Proto-Altaic **p^hioži* (~ *p-*, *-ju-*) ‘root, origin’: Proto-Tungus **pužuri* ‘root, beginning’ > Manchu *fužuri* ‘foundation, basis, origin’. Proto-Mongolian **hižayur* ‘root, origin’ > Written Mongolian *užuyur*, *ižayur* ‘root, origin’; Khalkha *yožōr* ‘root’; Dagur *ožōr* ‘root, origin’; Monguor *sžūr* ‘root, origin’; Ordos *ižūr* ‘root, origin’; Buriat (Alar) *uzūr* ‘root, origin’; Kalmyk *yožūr* ‘root, origin’. Poppe 1955:42 and 119. Poppe 1960:12, 64, 121, and 139; Street 1974:24 **puža-gūr(i)* ‘origin’; Starostin—Dybo—Mudrak 2003:1098 **piōži* (~ *p-*, *-ju-*) ‘root’.

Buck 1949:4.47 womb; 4.49 testicle. Bomhard 1996a:226—227, no. 640.

124. Proto-Nostratic root **p^huʔ-* (~ **p^hoʔ-*):

(vb.) **p^huʔ-* ‘to swell, to fatten’;

(n.) **p^huʔ-a* ‘swelling, fullness, fat(ness)’

- A. Proto-Afrasian **puʔ-* ‘to swell, to fatten’: Proto-Semitic **paʔ-am-* ‘to be or become full, to be fat’ > Hebrew *pīmāh* [פִּמְאָה] ‘superabundance, fat’ (a hapax legomenon in the Bible); Arabic *faʔama* ‘to quench one’s thirst with water; to be full’, *faʔima* ‘to be fat’; Akkadian *piāmu* ‘robust’; Geez / Ethiopic *ʔafʔama* [አፋአመ] ‘to put a morsel of food in another’s mouth, to give bread to a beggar’; Gafat (*tä*)*famä* ‘to take a mouthful’; Amharic *fämma* (< **fmʔ*) ‘to eat’. Klein 1987:505; Leslau 1987:154. Proto-Southern Cushitic **puʔ-* ‘clump of hair’ > Iraqw *puʔumpuʔay* ‘clump of hair’; Ma’a *kipupú* ‘vulva’. Ehret 1980:146. Proto-Southern Cushitic **puʔus-* ‘to swell, to rise’ > K’wadza *puʔus-* ‘to swell, to rise’; Ma’a *-puʔú* ‘to rise (of the sun)’. Ehret 1980:146. According to Ehret, “[**puʔus-* ‘to swell, to rise’] appears to be a verb derivative of the noun stem in [**puʔ-* ‘clump of hair’]; a pre-Southern Cushitic root with the meaning ‘clump, lump, mound, swelling’ would thus seem to underlie both [**puʔ-* ‘clump of hair’] and [**puʔus-* ‘to swell, to rise’].”

- B. Proto-Indo-European **p^hoʔ(i/y)-* ‘to swell, to fatten’: Sanskrit *páyate* ‘to swell, to fatten, to overflow, to abound’, *pívan-* ‘swelling, full, fat’, *páyas-* ‘milk’; Greek *πῖον* ‘fat, rich’, *πῖον* ‘fat; any fatty substance, cream’; Old Icelandic *feit* (< Proto-Germanic **fai^taz*) ‘fat’, *feita* ‘to fatten’, *feiti* ‘fatness’; Norwegian *feit* ‘fat’; Swedish *fet* ‘fat’; Danish *fed* ‘fat’; Old English *fætt* ‘fat’; Old Frisian *fatt, fett* ‘fat’; Old Saxon *feit* ‘fat’; Dutch *vet* ‘fat’; New High German *feist* ‘fat, stout’, *fett* ‘fatty, greasy’; Lithuanian *píenas* ‘milk’. 140. Proto-Nostratic root *p'ul- (~ *p'ol-):

(vb.) *p'ul- 'to swell';

(n.) *p'ul-a 'swelling, hump, lump, bulge'; (adj.) 'swollen, round, bulbous'

- A. Proto-Afrasian *p'ul- 'to swell', (reduplicated) *p'ul-p'ul- '(vb.) to swell; (adj.) swollen, round': Omotic: Welamo p'up'ule 'egg'; Dache bubule 'egg'; Dorze bu:bulé 'egg'; Oyda bubule 'egg'; Male bu:la 'egg'; Kachama p'up'ule 'egg'; Koyra bubu:le 'egg'; Gidicho bubu:le 'egg'; Zergula bubile 'egg'; Zayse bubile 'egg'. Omotic loan in Burji bulbul-ée ~ bulbul-ée 'egg'. Sasse 1982:43. Ehret 1995:116, no. 109, *p'ul- 'shell'. Ehret considers the Omotic forms cited above to be loans from East Cushitic — he reconstructs Proto-East Cushitic *b'ulb'ul- 'shell' (> Yaaku bolboli 'egg'; Somali bulbul 'thick hair'). Assuming semantic development as in Lithuanian paūtas 'egg' from the same root found in Lithuanian pūsti 'to blow, to swell up' and Latvian pūte 'blister, pustule'.
- B. Proto-Indo-European *p'ul-, *p'ol- 'swollen, round', (reduplicated) *p'ulp'ul-, *p'olp'ol- (dissimilated to *p'ump'ul-, *p'omp'ol-, *p'omp'ul-): Sanskrit buli-h 'buttocks, vulva'; Greek βολβός 'a bulb', (reduplicated) βομβυλίς 'bubble'; Latin bulla 'a round swelling', bulbus 'a bulb; an

173. Proto-Nostratic root **dul-* (~ **dol-*):

(vb.) **dul-* ‘to disturb, to perplex, to bewilder, to confuse, to ruffle, to upset, to baffle, to stir up trouble, to agitate; to be disturbed, perplexed, bewildered, confused, ruffled, upset, baffled, troubled, agitated’ (> ‘to drive someone crazy, mad, insane; to be crazy, mad, insane; to be dumb, stupid’);

(n.) **dul-a* ‘confusion, disturbance, trouble, agitation, perplexity’ (> ‘madness, craziness, insanity; stupidity’)

Note also:

(vb.) **dal-* ‘to stir up, to disturb, to roil (water), to agitate; to be disturbed, confused, agitated, troubled’;

(n.) **dal-a* ‘disturbance, agitation’

- A. Afrasian: Semitic: Arabic *daliha* ‘to rob someone of his senses, to drive someone crazy (love); to go out of one’s mind, to go crazy (with love); to be stunned, perplexed’, *mudallah* ‘madly in love’; Ḥarsūsi *déleh* ‘foolish,

- silly'. D. Cohen 1970— :262. Arabic *daliya* 'to be stunned, perplexed, bewildered'; Arabic (Eastern) (?) *dālī* 'crazy'; Arabic (Maghrebi) *būdālī* 'insane, stupid; to relapse to second childhood'. D. Cohen 1970— :264. Arabic *dali*^o 'stupid, insipid, flat (of taste)'. D. Cohen 1970— :267.
- B. (?) Dravidian: Tamil *tollai* 'trouble, perplexity, difficulty, work'; Malayalam *tolla* 'trouble, vexation, danger'. Burrow—Emeneau 1984: 309, no. 3521.
- C. Proto-Indo-European **dhul-* '(vb.) to be disturbed, confused, perplexed, troubled; (adj.) mad, raving, crazy, insane' (secondary full-grade forms: **dhwel-/dhwol-*): Gothic *dwals* 'foolish'; Old Icelandic *dulinn*, *dularfullr*, *dulsamr* 'self-conceited', *dulnaðr*, *dulremmi* 'conceit, self-conceit'; Old English *dol* '(adj.) foolish, presumptuous; dim-witted, stupid; (n.) folly, conceit', *dwelian* 'to lead astray, to lead into error, to lead into wrongdoing; to deceive, to prevent, to thwart, to afflict', *dwellan* 'to lead astray, to deceive', *dwolung* 'insanity', *dwolma* 'chaos, confusion', *gedwolen* 'perverse, wrong', *gedwol* 'heretical', *dwolian* 'to stray, to err', *gedwield*, *dwild* 'error, heresy'; Old Saxon *dol* 'mad, raving, crazy', *farwolan* 'confused'; Old High German *tol* 'mad, furious' (New High German *toll* 'mad, raving, crazy, insane'), *gitwelan* 'to be perplexed', *twalm* 'confusion'. As noted by Kluge—Seebold (1989:731), this particular range of meanings seems only to occur in the Germanic languages, and further cognates are uncertain. Consequently, the suggestion that **dhwel-* is an extended form of the Proto-Indo-European root **dhew-* 'to rise in a cloud (dust, vapor, smoke, etc.)' needs to be seriously re-evaluated and even abandoned in light of the cognates adduced here from other Nostratic languages. Pokorny 1959:265—266 **dh(e)uel-* 'to whirl about; to be disturbed'; Walde 1927—1932.I:842—843 **dh(e)uel-*; Mann 1984—1987:218 **dhulos* (**dhul-*) 'dull, dim, numbstruck' — "A variant: a true z-gde of type **dhuel-*, **dhul-* occurs in OE *dwol* 'heretical'", 229 (**dhul-*) "O-gde forms only in Gmc."; Watkins 1985:14 **dhwel-* and 2000:19 **dhwel-*; Orël 2003:81 Proto-Germanic **ðwalaz*, 81 **ðwaljanan*, 81 **ðwalō(n)*, 81 **ðwalanan*, 81 **ðwulaz*; Feist 1939:130 **dhuel-* 'confused, perplexed, bewildered; to be disturbed, ruffled, upset, troubled'; Lehmann 1986:98; Kroonen 2013:108 Proto-Germanic **dula-* 'foolish, crazy', 110—111 **dwaljan-* 'to delay, to hinder', and 112 **dwelan-* 'to err'; Klein 1971:231 **dhwel-* 'muddy, gloomy, dim, dull'; Barnhart 1995:225 Proto-Germanic **dulaz*; Onions 1966:293; Kluge—Mitzka 1967:780—781 **dh(e)uel-* 'disturbed, ruffled, upset, troubled'; Kluge—Seebold 1989:731 Proto-Germanic **dwel-a-* 'to be disturbed, ruffled, upset, troubled'.
- D. Uralic: Ob-Ugric: Ostyak / Xanty (Vah, Vasyugan, Tremyugan) *tul'*, (Yugan) *tul*, (Demyanka) *tül*, (Nizyam) *tül* 'mad'.
- E. Proto-Altaic **dūli* 'mad, crazy': Proto-Tungus **dulbu-* 'stupid, dumb; deaf' > Evenki *dulbu-n* 'stupid, dumb'; Lamut / Even *dulbur* 'stupid, dumb'; Manchu *dulba* 'careless, inexperienced, foolish (because of lack of

experience); Nanay / Gold *dulbi* ‘deaf’; Orok *dul-dul* ‘stupid, dumb’. Proto-Mongolian **dülei* ‘deaf’ > Written Mongolian *dülei* ‘deaf; dull, lusterless, not transparent, clouded’, *dülei balai* ‘dunce, blockhead, numbskull’; Khalkha *düliy* ‘dull, dim’; Buriat *düliy* ‘deaf’; Kalmyk *dülē* ‘deaf’; Ordos *düli* ‘deaf’; Dagur *dulī* ‘deaf’; Dongxiang *dulei* ‘deaf’; Shira-Yughur *delī-* ‘deaf’; Monguor *dulī* ‘deaf’. (vb.) *t'ab- 'to be or become warm; to make warm, to heat up; to cook';

(n.) *t'ab-a 'heat, warmth'; (adj.) 'hot, warm; cooked, baked'

Note also:

(vb.) *t^hep^h- 'to warm, to burn';

(n.) *t^hep^h-a 'heat, warmth'

- A. Proto-Afrasian *t'ab- 'to be or become warm; to make warm, to heat up': Proto-Semitic *t'ab-ax- 'to cook, to bake' > Arabic *ṭabaḥa* 'to cook; to be or get cooked'; Hebrew *ṭabbāḥ* [ṭḇḇ] 'a cook'; Syriac *ṭəbaḥ* 'to be parched, broiled; to roast, to bake, to scorch'; Phoenician *ṭbh* 'to cook'; Ugaritic *ṭbh* 'to cook'; Epigraphic South Arabian *ṭbh* 'meat (that which is cooked)'; Mehri (rare) *táwbəx* 'to cook'; Šheri / Jibbāli *ṭəbxún* 'baked', *təx* 'to wrap *bəḏəḥ* (edible corms) in cow pats and bake'; Ḥarsūsi *ṭəbōx* 'to cook, to boil'. Klein 1987:239; Murtonen 1989:202—203. In Semitic, this stem has fallen together with *t'ab-ax- 'to slay, to kill, to slaughter, to sacrifice'. Proto-Semitic *t'ab-as- 'to roast, to fry, to broil' > Geez / Ethiopic *ṭabasa* [ṭḇḇ], *ṭabsa* [ṭḇḇ] 'to roast, to parch, to broil'; Tigrinya *ṭābāsā* 'to fry'; Tigre *ṭābsa* 'to roast'; Amharic *ṭābbāsā* 'to fry, to roast (meat, corn), to toast, to scorch, to broil, to bake (clay), to fire (clay)'; Gurage *ṭābāsā* 'to fry, to roast'. Leslau 1979:611 and 1987:586.
- B. Proto-Kartvelian *t'eb-/*t'b- 'to warm, to heat; to warm oneself': Georgian *tb-* 'to warm, to heat; to warm oneself' (Old Georgian *t'ep-/t'p-* < *t'eb-/*t'b-); Svan *li-t'b-ide* 'to heat somebody or something; to be heated, to heat up', *t'ebid*, *t'ebedi*, *t'ebdi* 'warm'; Mingrelian *t'ib-*, *t'ub-*, *t'əb-* 'to warm, to heat; to warm oneself'; Laz *t'ub-*, *t'ib-* 'to warm, to heat; to warm oneself'. According to Klimov (1998:192), the Svan forms may have been borrowed from Ossetic. Schmidt 1962:112—113 *t'ep-; Klimov 1964:179 (**ṭab-*/**ṭb-* and 1998:186 *t'ep-/*t'p- (Klimov suggests that the Kartvelian forms may have been borrowed from Indo-European); Fähnrich 2007:396—397 *t'ep-/*t'p-; Gamkrelidze—Ivanov 1984.II:879 *t'ep-/*t'p- and 1995.I:226 *t'ep-/*t'p- 'to get warm'; Fähnrich—Sardshweladse 1995:326—327 *t'ep-/*t'p-. Proto-Kartvelian *t'b-il- 'warm': Georgian *tbil-* (Old Georgian *t'pil-* < *t'epil- < *t'ebil-) 'warm'; Mingrelian *t'ibu-*, *t'əbu-* 'warm'; Laz *t'ibu-*, *t'ubu-* 'warm'. Klimov 1964:180 *t'bid- and 1998:192 *t'p-il-. Comparison with Afrasian supports the older Proto-Kartvelian

reconstruction **t'eb-/*t'b-* ‘to warm, to heat; to warm oneself’ (as in Klimov 1964:179) as opposed to **t'ep-/*t'p-*.

226. Proto-Nostratic root *t'an- (~ *t'an-):

(vb.) *t'an- ‘to fill, to stuff, to pack or load tightly together’;

(n.) *t'an-a ‘closeness, thickness, density; load, burden’; (adj.) ‘tightly packed or pressed together; close, thick, dense’

A. Afrasian: Egyptian *dns* ‘to be loaded heavily’, *dns* ‘weight, load, burden; heavy’, *dnsw* ‘weights’. Hannig 1995:982; Faulkner 1962:314; Gardiner 1957:602; Erman—Grapow 1921:215 and 1926—1963.5:468—469.

B. Proto-Kartvelian *t'en- ‘to fill, to stuff, to pack (tight) with’: Georgian *t'en-* ‘to fill, to stuff, to pack (tight) with’; Mingrelian *t'in-* ‘to fill, to stuff, to pack (tight) with’. Klimov 1964:183 *t'en- and 1998:186 *t'en- ‘to fill, to stuff, to pack (tight) with’; Fähnrich—Sardshweladse 1995:325—326 *t'en-; Fähnrich 2007:394—395 *t'en-. Common Kartvelian (reduplication of the simple verbal stem *t'en-) *t'it'in- ‘to stuff, to fill tight’: Mingrelian *t'it'in-* ‘to fill, to stuff (tight)’; Svan *t'ət'an-*, *t't'an-* ‘to fill to the brim’. Klimov 1998:188 *t'it'in-.

C. Proto-Indo-European *t'ns-u- ‘closely packed or pressed together; thick, dense’: Greek *δασύς* ‘thick with hair, hairy, shaggy, rough’; Latin *dēnsus* ‘thick, dense, close, compact, set close together’, *dēnsēō* ‘to make thick, to press together, to thicken’; (?) Hittite *daššuš* ‘massive, mighty’ (according to Melchert 1994a:163, Proto-Anatolian *-VnsV- > Hittite -VssV-). Pokorny 1959:202—203 *dens- ‘thick’; Walde 1927—1932.I:793—794 *dens-; Mann 1984—1987:151—152 *dḡs-, *dḡt- ‘close, thick’; Watkins 1985:11 *dens- and 2000:16 *dens- ‘dense, thick’; Mallory—Adams 1997:574 (?) *dēnsus, *dḡsós ‘thick’; Gamkrelidze—Ivanov 1984.I:175 *t'ens-, (zero-grade) *t'ns- and 1995.I:150 *t'ens- ‘dense, solid’, (zero-grade) *t'ns-, I:173 *t'ns-u-; Hofmann 1966:52 *dḡsús; Chantraine 1968—1980.I:253 *dḡs-; Frisk 1970—1973.I:351 *dens-os, *dḡs-os, *densuos, *dḡt-tos (?); Boisacq 1950:167 *den-: *den-t-, *den-s-; Beekes 2010.I:305; Walde—Hofmann 1965—1972.I:341—342 *dḡsús, *dens-os, *dḡs-os; Ernout—Meillet 1979:169—170; De Vaan 2008:167 *d(ē)ns-o- ‘thick’. Note: This etymology is rejected by Kloekhorst (2008b:853—855) — Kloekhorst compares Hittite *daššu-*, *daššau-* (adj.) ‘strong, powerful, heavy; well-fed; difficult, important’ with Sanskrit *dāmsas-* ‘miraculous power’, *dāms-* ‘to have miraculous power’ and Greek *διδάσκω* ‘to learn’ instead.

267. Proto-Nostratic root *t'yam- (~ *t'yəm-):

(vb.) *t'yam- 'to be sour, bitter';

(n.) *t'yam-a 'that which is sour, bitter, rotten, or spoiled'

- A. Proto-Afrasian *t'yam- 'to be sour, bitter': North Omotic: Wolaitta / Wellamo *č'am-* 'bitter'; Kefa / Kaffa *č'āmm-* 'to be bitter'; Mocha *č'ammo* 'bitter'; Anfillo / Southern Mao *s'āmo* 'bile'.
- B. Dravidian: Naiki (of Chanda) *sam-* 'to be rotten'; Parji *cam-* 'to go bad, to become rotten', *camip-* (*camit-*) 'to make to go rotten'; Gadba (Ollari) *sam-* 'to become rotten', (Salur) *cammi cen-* 'to rot (as fruit)'. Burrow—Emeneau 1984:206, no. 2341. Note: Burrow—Emeneau also list forms such as Tamil *avi* 'to ferment (as decayed fruit, vegetable matter, manure heaps)', *avical* 'that which is decayed'; Malayalam *aviyuka* 'to rot, to spoil (as fruits laid on a heap)'; Kannada *avi* 'to rot, to be spoiled or damaged'; Telugu *aviyu* 'to rot'; etc. Dolgopolsky (2008, no. 423) does not include these forms. Kuṛux *canxnā* 'to turn stale (of cooked things, meat or

vegetables), to turn moldy (bread)'; Malto *cange* 'to be or become rotten (of cooked food)', *cangro* 'rotten'. Burrow—Emeneau 1984:212, no. 2424.

- C. Proto-Kartvelian *č'k'max- 'sour' (> *m-č'k'max- > Georgian-Zan *mč'k'axe-): Georgian *mč'ax-e* 'very sour'; Laz *mč'ox-a* 'sour'. Klimov 1998:133 *mčaxe- 'sour'; Fähnrich—Sardshweladse 1995:254 *mčax-; Fähnrich 2007:305—306 *mčax-. Note: In Zan, -č'k'- > -č'- when followed by a velar consonant in the word — in this case, -x-.

Illič-Svityč 1971—1984.I:209—210, no. 54, *čämа 'bitter'; Dolgopolsky 2008, no. 423, *čäm[V]χV 'sour, bitter'. Illič-Svityč and Dolgopolsky include Uralic (Finno-Ugrian) forms in this etymology as well. However, the initial affricate of the reconstructed Proto-Finno-Ugrian form (*čemэ 'sour; to become sour' [cf. Rédei 1986—1988:56—57]) is not what would be expected (*č-) on the basis of the forms from the other Nostratic daughter languages cited above. The vowel of the initial syllable (*e) is also problematic. Consequently, the Uralic forms are not included here. A better comparison would be with Proto-Kartvelian *žm- 'salt', *žm-ar- 'vinegar', with both the Uralic and Kartvelian forms going back to Proto-Nostratic *žem- 'sour, bitter, pungent, sharp'.

268. Proto-Nostratic root *t'yar- (~ *t'yər-):

- (vb.) *t'yar- 'to be or become stuck, joined, or bound together; to be firmly or strongly attached';

 (vb.) *t'yar- 'to be rough, coarse, rigid, stiff, hard';
 (n.) *t'yar-a 'that which is rough, coarse, rigid, stiff, hard'; (adj.) 'rough, coarse, rigid, stiff, hard'

- A. Proto-Afrasian *t'yar- 'to be or become stuck, joined, or bound together; to be firmly or strongly attached': Proto-Semitic *t'yar-ab- 'to be or become stuck, joined, or bound together; to be firmly or strongly attached' > Arabic *zariba* 'to stick, to adhere', *zurriba* 'to become hard, strong; to be firm, solid'. Proto-Semitic *t'yar- 'to be strong, firm, powerful' > Gurage (Selṭi) *ṭirāññe* 'to be strong, powerful, vigorous, firm, resistant, courageous, brave', (Chaha) *ṭārānā* 'strong, powerful, vigorous'; Amharic *ṭāṭṭārā* 'to be strong'; Gafat *šāwwārā* 'to be strong, rigid'; Argobba *ṭeṭṭārā* 'to be strong'. Leslau 1979:631—632. Egyptian *qri* 'hard, firm'; Coptic *gro* [xpo], *cro* [cpo] 'to become strong, firm, victorious', *gōōre* [xowpe] 'strength; to be strong'. Hannig 1995:1012; Faulkner 1962:323; Erman—Grapow 1921:221; Vycichl 1983:330; Černý 1976:319.
- B. Proto-Indo-European *t'er-w/u-; *t'r-ew-/*t'r-u-, *t'r-ew-H-/*t'r-u-H- (> *t'r-ū-) 'to be firm, solid, strong, steadfast': Gothic *triggws* 'true', *trauan* 'to trust'; Old Icelandic *tryggr* 'trustworthy, faithful', *trú* 'faith, belief', *trúa* 'to believe; to believe in, to trust'; Old English *trēow* 'truth', *trīewan*

Proto-Turkic **yarik* 'armor' > Old Turkic *yariq* 'armor'; Karakhanide Turkic *yariq* 'armor'. As noted by Starostin—Dybo—Mudrak (2003:1534): "Modern languages widely reflect **jarak* 'weapon, armour' (Kirgh[iz] *žaraq*, Uygh[ur] *jaraq*, etc., see ЭСТЯ 4, 139). This seems to be a contamination of the earlier attested **jarag* 'readiness, opportunity' (derived from **jara-* 'to be fit, suitable' q.v. sub **žāra*; see EDT *ibid.*) and **jarik* 'armour'." Starostin—Dybo—Mudrak 2003:1534—1535 **žere* (~ **žaro*, -*a*) 'armor, weapon'.

Buck 1949:20.21 weapons, arms; 20.26 spear (sb.).

301. Proto-Nostratic root **zum-* (~ **zom-*) or **žum-* (~ **žom-*):

(vb.) **zum-* or **žum-* ‘to take, to seize’;

(n.) **zum-a* or **žum-a* ‘the act of taking or seizing’; (adj.) ‘taking, seizing’

A. Proto-Afrasian **zum-* ‘to take, to seize’: Semitic: Akkadian *zummū* ‘to lack, to miss, to be deprived of; to cause to miss, to deprive of’. Central Chadic **zum-* ‘to rob’ > Logone *zum* ‘to rob’. Orël—Stolbova 1995:547, no. 2632, **zum-* ‘to rob’.

B. Dravidian: Kolami *sum-* (*sumt-*) ‘to catch, to seize, to buy’; Naikri *sum-* ‘to catch, to seize, to buy; to lay’; Naiki (of Chanda) *sum-* ‘to buy, to catch, to hold’; Parji *cumm-* ‘to seize, to catch hold of’. Burrow—Emeneau 1984:232, no. 2679.

Buck 1949:11.58 rob, robber; 11.13 take; 11.14 seize, grasp, take hold of.

302. Proto-Nostratic (reduplicated) (n.) **zuz-a* (< **zu-zu-*) ‘tip, point’ (> ‘nipple, breast’):

A. (?) Afrasian: Semitic: Hebrew *zīz* [זִיז] ‘nipple, full breast’ (a hapax legomenon in the Bible, occurring in Isaiah 66:11); Arabic *zīza* ‘udder (breast, teat)’ (vulgar); Akkadian *zīzu* ‘teat’. Klein 1987:197; Koehler—Baumgartner 1958:254.

B. Dravidian: Proto-Dravidian **cu-kkay* ‘spot, dot, point’ (> ‘star’): Tamil *cukkai* ‘star’ (Telugu loan); Kannaḍa *cukke* ‘small mark, dot’; Telugu *cukka* ‘star, spot, dot, drop’; Kolami *sukka* ‘star’; Naiki (of Chanda) *cukkin* ‘star’; Naikri *cukka* ‘star’; Parji *cukka* ‘star’; Gadba *cukka* ‘drop of rain’, *sukka* ‘star’; Gondi *sukkum* ‘star’; Konḍa *suka* ‘star’; Pengo *huka* ‘star’; Maṇḍa *hukerij* ‘star’; Kui *suka* ‘star’; Kuwi *hūka*, *kukka* ‘star’. Burrow—Emeneau 1984:229, no. 2646; Krishnamurti 2003:13 **cukk-V* ‘star’.

C. Proto-Kartvelian (reduplicated) **zuzu-* ‘breast (female)’: Georgian *zuzu-* ‘breast (female)’, Mingrelian *zuzu-* ‘breast (female)’, Laz *bu3-* ‘breast (female)’ (perhaps a loan from or influenced by Modern Greek βυζί ‘breast’ or Northwest Caucasian (Circassian): Bžedux *bə3ə* ‘woman’s breast’; Kabardian *bə3* ‘woman’s breast’). Fähnrich—Sardshweladse 1995:481 **zu-*; Fähnrich 1994:223 and 2007:598 **zu-*; Schmidt 1962:153; Klimov 1964:235 **zuzu-* and 1998:281—282 **zuzu-* ‘breast (female)’.

D. Proto-Indo-European (reduplicated) **d^hud^hd^h-o-* ‘nipple’ (> ‘anything having the size or shape of a nipple: lump, knot, dot, etc.’): Late Latin

dudda ‘nurse, nanny’ (loan from unknown source); Old High German *tutto, tutta* ‘nipple’ (New High German [dial.] *Tütte*); Middle High German (dim.) *tüttel* ‘nipple’ (New High German *Tüttel* ‘point, dot, jot’); Dutch *dot* ‘lump, small knot’; Old English *dott* ‘speck, head (of a boil)’; East Frisian *dotte, dot* ‘lump, clump’. Mann 1984—1987:215 **dhuddhlom* ‘pendant; penis’, 215 **dhuddhos, -ā, -jos* ‘tiny; tiny tot’; Kluge—Mitzka 1967:799; Vercoullie 1898:61; Koolman 1879—1884.I:323—324; Onions 1966:285; Klein 1971:226; Walshe 1951:232. Possibly also the following Greek forms: τυτθός ‘(of children) little, small, young’, (pl.) τυτθά (in Homeric only: τυτθά διατημίξας ‘cut small’), (adv.) τυτθόν ‘a little, a bit’, (Doric) τυννός ‘small, little’. For discussion, cf. Boisacq 1950:993; Hofmann 1966:379; Chantraine 1968—1980.II:1147; Frisk 1970—1973.II:949; Beekes 2010.II:1518 and II:1521.

Buck 1949:1,54 star; 4.41 breast (of woman); 12.352 point (sb. = sharp end). Different etymology in Dolgopolsky 2008, no. 2767, **žüžV* ~ **žüňZA* ‘teat, female breast’.

308. Proto-Nostratic root *c'al- (~ *c'əl-) or *č'al- (~ *č'əl-):

(vb.) *c'al- or *č'al- 'to stretch out, to extend, to exceed; to be wealthy, to prosper, to do well';

(n.) *c'al-a or *č'al-a 'wealth, prosperity, abundance'

- A. Proto-Afrasian *c'al- '(vb.) to stretch out, to extend, to exceed; to be wealthy, to prosper, to do well; (n.) wealth, prosperity': Proto-Semitic *c'al-ah- 'to stretch out, to extend, to exceed; to be wealthy, to prosper, to do well' > Hebrew *šālah* [שָׁלַח] 'to advance, to prosper'; Aramaic *šalah* 'to prosper'; Arabic *šalaha* 'to be in good or perfect condition', *šilh* 'in good condition, perfect', *šalāh* 'soundness, good or healthy condition; beautiful order; peace; good actions, justice'; Sabaean *šlh* 'to make successful, to prosper'; Harsūsi *šayleh* 'to be fat'; Šheri / Jibbāli *šelah* 'to be suitable, fine', *ešlāh* 'to do well'; Mehri *šayläh* 'to be fat'. Murtonen 1989:360; Klein 1987:548; Zammit 2002:256—257. Proto-Semitic *c'al-at- 'to stretch, to extend' > Arabic *šaltah* 'wide, broad', *šulātih* 'spacious, roomy, wide'. Egyptian *dʒi* '(arm) to stretch out, to extend'. Hannig 1995:992—993; Faulkner 1962:318; Erman—Grapow 1921:218 and 1926—1963.5:514; Gardiner 1957:603 (*dʒ*). Berber: Tuareg *əzzəl* 'to make right, to rectify one thing, to be made right, to go right, to rectify, to be rectified, to go right, to be right, to extend, to expand', *zənnəzzəl* 'to stretch'; Siwa *əzzəl* 'to extend the hand'; Ghadames *əzzəl* 'to offer, to extend, to be extended'; Mzab *zzəl* 'to offer, to extend, to lengthen'; Tamazight *zzəl* 'to extend, to be extended'; Tachelhiyt / Shilha *əzzəl* 'to stretch, to extend'; Riff *əzzəl*, *əzzər* 'to stretch, to extend'; Kabyle *əzzəl* 'to offer, to extend, to be extended'. Proto-East Cushitic *d₁aal- 'to exceed, to be long(er)' > Saho *del-* 'to be long'; Gidole *c'aal-* 'to be better, wealthier, taller'; Konso *ʃaal-* 'to exceed, to be bigger, to be longer'; Galla / Oromo *c'aal-* 'to exceed'. Sasse 1979:27.
- B. Dravidian: Tamil *cāl* (*cālv-*, *cānr-*) 'to be abundant, full; to be suitable, fitting; to be great, noble; to be sufficient', *cāl* 'fullness, abundance', *cālpu* 'excellence, nobility'; Malayalam *cāla* 'richly, fully'; Kannaḍa *sāl*, *sālu* 'to be sufficient or enough, to suffice'; Telugu *cālu* 'to be able, capable; to bear, to endure; to be enough, sufficient', *cālu* 'sufficiency', *cāلامي* 'insufficiency, inability', *cālika* 'ability', *cāla* 'abundant; abundantly'; Kolami *sāl* 'to be able'; Gondī *hāl* 'completely'; Konda *sāl* 'to be capable

- of, to be suitable'; Kuwi *hāl* 'to suffice, to be enough to'. Burrow—Emeneau 1984:216, no. 2470.
- C. Indo-European: Hittite (3rd sg. pres. act.) *za-lu-ga-nu-zi* 'to postpone, to delay', (verbal noun) *za-lu-ga-nu-mar* 'postponement, delay'; (derivative) (3rd sg. pret. act.) *za-lu-ki-iš-ta* 'to take long'. Friedrich 1961:258—259; Melchert 1994a:67, 110, 172, and 175; Kloekhorst 2008b:1027—1028. These may be relic forms in which an original initial dental affricate has been preserved in Hittite. Though Kloekhorst considers these forms to be derived from Proto-Indo-European **dlugh-* (cf. Hittite [pl.] *da-lu-ga-e-eš* 'long'; Sanskrit *dīrghá-h* 'long'; Greek *δολιχός* 'long'; Old Church Slavic *dlъgъ* 'long'; Russian *dólgij* [долгий] 'long'; etc.), the consensus (Eichner, Laroche, Melchert, etc.) seems to be that two separate stems are involved here: (1) *daluki-* and (2) **zaluki-*.
- D. Proto-Altaic **čālo* 'full, abundant': Proto-Tungus **žalu-* 'to fill, to be filled', **žalu(m)* 'full' > Manchu *žalu-* 'to be full, to be fulfilled, to fulfill', *žalu* 'full; fullness', *žalun* 'fullness', *žalukiya-* 'to fill out, to fill up, to fill a quota', *žalukan* 'somewhat full'; Spoken Manchu (Sibo) *žalū* 'full'; Evenki *žalum* 'full'; Lamut / Even *žalu-* 'full'; Negidal *žalum* 'full'; Jurchen *žaw-lu-χα* 'full'; Ulch *žalu(n)* 'full'; Orok *dahumžī* 'full'; Nanay / Gold *zalo* 'full'; Oroch *žalu-* 'full'; Solon *žalū* 'full'. Proto-Mongolian **del-* '(vb.) to expand; (adj.) full, abundant; wide, broad' > Mongolian *delge-* 'to spread, to display, to lay out, to unroll, to unwrap; to open, to stretch, to elongate; to propagate', *delger* 'extensive, vast; full, abundant; flourishing', *delgere-* 'to unfold, to grow, to increase, to expand, to spread, to become extensive; to develop, to bloom, to blossom', *delgerel* 'spreading, propagation, development', *deli-* 'to stretch', *delimel* 'stretched, extended', *delbeg* 'large, wide; plentiful(ly), abundant(ly), bountiful(ly)', *delbeger* 'wide, broad, large', *delbei-* 'to be or become wide or broad (usually of objects)', *delegüü* 'large, vast, spacious, wide extensive'; Khalkha *delger* 'full, abundant; wide', *delge-*, *dele-* 'to expand', *delxiy*, *delū* 'wide, broad'; Buriat *delger* 'full, abundant; wide'; Kalmyk *delgr* 'full, abundant; wide', *del-* 'to expand'; Ordos *delger* 'full, abundant; wide'; Dagur *delgere-*, *delgē-* 'to develop'; Monguor *derge-* 'to unwrap, to unfold'. Poppe 1955:157. Proto-Turkic **dōl-* 'full' > Old Turkic (Old Uighur) *tolu* 'full'; Karakhanide Turkic *tolu* 'full'; Turkish *dolu* 'full'; Gagauz *dolu* 'full'; Azerbaijani *dolu* 'full'; Turkmenian *dōli* 'full'; Tatar *tulī* 'full'; Bashkir *tulī* 'full'; Karaim *toli* 'full'; Kirghiz *tolo* 'full'; Kazakh *toli* 'full'; Uzbek *tuła* 'full'; Uighur *tola*, *tolyan* 'full'; Noghay *toli* 'full'; Tuva *dolu* 'full'; Khakas *tol-* 'to fill'; Chuvash *tol-* 'to fill', *tollī* 'full'; Yakut *tuol-* 'to fill', *toloru* 'full'; Oyrot (Mountain Altai) *tolo* 'full'; Dolgan *tuol-* 'to fill', *toloru* 'full'. Starostin—Dybo—Mudrak 2003:390—391 **čālo* 'full; to fill'.

Sumerian *zal* 'to become wide'.

Buck 1949:11.42 wealth, riches; 11.51 rich; 12.57 long; 12.58 tall; 12.61 wide, broad.

309. Proto-Nostratic root **c'ar-* (~ **c'ər-*) stem indicating downward motion:

335. Proto-Nostratic root *čʰal- (~ *čʰəl-):

(vb.) *čʰal- ‘to leave, to leave behind, to abandon, to get rid of, to empty; to set free, to release, to let go’;

(n.) *čʰal-a ‘freedom, leisure, emptiness’; (adj.) ‘empty, abandoned, released, freed (from), at leisure’

Semantics as in Sanskrit *ric-* and its derivatives: *ric-* ‘to empty, to evacuate, to leave, to give up, to resign; to release, to set free; to leave behind; to separate, to remove from’, *ricyáte* ‘to be emptied, to be deprived of or freed from’, *riktá-h* ‘emptied, empty, void’.

- A. Proto-Afrasian *cal- ‘to empty, to get rid of’: Proto-Semitic *cal-ay- ‘to empty, to get rid of’ > Hebrew *sālāh* [סָלַח] ‘to make light of, to toss aside, to treat as worthless’; Aramaic *sālā* ‘to throw away, to despise, to reject’; Arabic *salā*, *saliya* ‘to get rid of the memory of, to forget; to comfort, to console, to cheer up; to distract, to divert; to amuse, to entertain; to alleviate, to dispel; to take delight, to take pleasure, to have a good time, to have fun’; Šheri / Jibbāli *essōli* ‘to amuse, to entertain’, *eslé* ‘to amuse’; Mehri *sōli* ‘to amuse, to entertain’; (?) Akkadian *salū* (also *šalū*, *šalāʔu*) ‘to reject, to throw away’ (also ‘to whirl up, to kick up dust, to toss, to sprinkle, to spit blood or spittle; to shoot arrows, to hurl weapons’). Klein 1987:447. (?) Egyptian: Coptic (Sahidic, Bohairic) *sōl* [ⲥⲟⲗ], (Bohairic) *sol-* [ⲥⲟⲗⲉ], (Sahidic) *sēl* [ⲥⲏⲗ] ‘to dissipate, to pervert’. Černý 1976:151 — according to Černý (1976:160—161), *sōl* [ⲥⲟⲗ] is “probably identical with ⲥⲟⲗⲉ”; Crum 1939:330. On the other hand, *sōl* [ⲥⲟⲗ] is not listed in Vycichl 1983.
- B. (?) Dravidian: Kannaḍa *calla*, *cella* ‘great mirth, fun, jest, smiling, laughter’, *callavāḍu* ‘to frolic, to sport, to gambol’, *callāṭa*, *cellāṭa* ‘sport, fun’; Telugu *cellāṭamu* ‘sport, play, toying’, *cellāḍu* ‘to sport, to play, to frolic’, *ceral-āḍu* ‘to sport, to play, to roam about for pleasure’, *ceral-āṭamu* ‘sport, play, roaming for pleasure’. Burrow—Emeneau 1984:209, no. 2378. Semantic development as in the Arabic and South Arabian forms cited above.
- C. Proto-Kartvelian *čal-/*čl- ‘to empty’: Georgian *cal-/cl-* ‘to empty; to have spare time’, *cal-ier-i* ‘empty’; Mingrelian *čol-* ‘to empty’; Laz [čol-]. Schmidt 1962:148; Klimov 1964:227 **c₁al-* and 1998:269 **c₁al-* ‘to

376. Proto-Nostratic root **gat’-* (~ **gət’-*):

(vb.) **gat’-* ‘to take (with the hand), to grasp’;

(n.) **gat’-a* ‘hand’

- A. Proto-Afrasian **gat’-*, **get’-* ‘to take’: Highland East Cushitic: Burji *gad-* ‘to take’. According to Sasse, the original meaning was probably something like ‘to possess’. Sasse compares Eastern Galla / Oromo *gad diis-* ‘to set free, to let go’. Sasse 1982:75; Hudson 1989:148 and 192. Proto-Southern Cushitic **ged-* ‘to take’ > Alagwa *geger-* ‘to carry’; Iraqw *gagar-* ‘to carry’; K’wadza *gel-* ‘to choose’; Ma’a *-géra* ‘to bring’; Dahalo *gettokum-* ‘to carry’. Ehret 1980:237.
- B. Dravidian: Tamil *katuvu* (*katuvi-*) ‘to seize, to grasp, to take more than a proper share’; Kannada *kadubu* ‘to seize or hold firmly’, *kadi* ‘to steal’, *kadaka* ‘a thievish, deceitful man’ (f. *kadiki*); Tuḷu *kadipu*, *kadupu*, *kadpu* ‘stealing, theft’; Telugu *kadumu* ‘to seize’. Burrow—Emeneau 1984:112, no. 1200. Proto-Dravidian **ketkā* > **kekkā* > **khekkhā* ‘hand’: Kurux *xekkhā* ‘hand, arm’; Malto *qeqe* ‘hand’. Burrow 1946:87.
- C. Proto-Indo-European **g^{het}-*/**g^{hot}-*, (with nasal infix) **g^{he-n-t}-* ‘to take (with the hand)’: Greek *χαρδάνω* ‘to take in, to hold, to comprise, to contain’; Latin *prehendō* ‘to seize’; Gothic *bigitan* ‘to find’; Old Icelandic *geta* ‘to get’; Old English *begietan* ‘to get, to obtain, to attain’; Old Saxon *bigetan* ‘to seize’; Old High German *pigezzan* ‘to get, to obtain, to receive’; Albanian *gjindem* ~ *gjëndem* ‘to be found’. 377. Proto-Nostratic (n.) **gen-a* ‘jaw, cheek’:

- A. Proto-Afrasian **gen-* ‘jaw, cheek’: Proto-Semitic **ʔa-gan-*, **wa-gan-* ‘cheek’ > Arabic *ʔa-ğna-t*, *ʔi-ğna-t*, *ʔu-ğna-t* ‘fullest part of the cheek’, *wa-ğnāʔ* ‘having strong cheeks (strong she-camel)’, *wa-ğna-t*, *wi-ğna-t*, *wu-ğna-t*, *wa-ğana-t* ‘cheek’; Šheri / Jibbāli *ōgən* ‘to have prominent cheekbones’, *égənt* ‘cheekbone’; Mehri *wəgnēt* ‘cheekbone’; Harsūsi *wegnēt* ‘cheek’. D. Cohen 1970— :7 and 493—494. Chadic: Sura *gén* ‘cheek’; Dera *gōngá* ‘cheek’; Pa’a *gāncóka* ‘cheek’; Zime-Dari *gin* ‘cheek’; Zime-Batna *gīn* ‘cheek’. Jungraithmayr—Ibrizimow 1994.II: 68—69.
- B. Dravidian: Tamil *cenni*, *cennai* ‘cheek’; Malayalam *cennam* ‘jaw, cheek’; Kota *keyṇ* ‘cheek just in front of the ear’; Kannaḍa *kenne* ‘the upper cheek’; Tuḷu *kenni*, *kennē* ‘cheek’. Burrow—Emeneau 1984:181, no. 1989.
- C. Proto-Indo-European **g^henu-* ‘jaw, cheek’: Sanskrit (f.) *hānu-ḥ* (also *hānū*) ‘jaw, cheek’; Avestan *zānu-* ‘jaw’. Pokorny 1959:381—382 **genu-* and (**genadh-* :) **gonadh-* ‘jaw, cheek’; Walde 1927—1932.I:587 **ḡ(h)enu-s*; Mann 1984—1987:393—394 **ḡenus* (**ḡenuṁ*, **ḡenuṁ*, **ḡenə*) ‘jaw, jowl, angle of the face, angle, wedge’; Watkins 1985:19 **genu-* and 2000:26 *genu-* ‘jawbone, chin’ (variant form **g(h)enu-*); Gamkrelidze—Ivanov 1984.I:183 **k’enu-s*, II:815 **k’enu-* and 1995.I:157 **k’enu-s*, I:715 **k’enu-* ‘jaw, chin’; Mallory—Adams 1997:322 **ḡénu-* ‘jaw’ and 2006:174 **ḡénu-* ‘jaw’, 176 **ḡénu-*. Note: It appears that there were two variants in Proto-Indo-European: (1) **g^henu-* and (2) **k’enu-*. The first is found only in Indo-Iranian, while the second is found in the remaining daughter languages. It is only the first variant (provided it is not an Indo-Iranian innovation) that belongs here.

378. Proto-Nostratic (n.) *g[e]n-d-a ‘virility, strength; a male (human or animal)’:

- A. Dravidian: Tamil *kaṇṭaṇ* ‘warrior, husband’, *kaṇṭi* ‘buffalo bull’, *kaṇavaṇ* ‘husband’, *keṇṭaṇ* ‘robust, stout man’, *kiṇṭaṇ* ‘fat man, strong person’; Malayalam *kaṇṭan* ‘the male, especially of cat’, *kaṇavan* ‘husband’, *kiṇṭan* ‘big; a stout, bulky fellow’; Kota *gaṇḍ* ‘male’; Kannaḍa *gaṇḍu* ‘strength, manliness, bravery; the male sex, a male, man’, *gaṇḍa* ‘a strong, manly male person, a husband; strength, greatness’, *gaṇḍiga* ‘a valiant man’, *gaṇḍasa*, *gaṇḍasu*, *gaṇḍusa*, *gaṇḍusu* ‘male person’, *gaṇḍike* ‘prowess’, *geṇḍā* ‘husband’, *geṇḍu* ‘male’; Koḍagu *kaṇḍē* ‘male (of dogs and other animals, mostly wild; not of cats)’; Tuḷu *gaṇḍu* ‘male, valiant, stout’, *gaṇḍusu* ‘husband’, *gaṇḍukāvi*, *gaṇḍustana*, *gaṇḍastana* ‘manliness’, *kaṇḍaṇi*, *kaṇḍaṇye* ‘husband’, *gaṇṭē*, *gaṇṭapuccē* ‘male cat’; Telugu *gaṇḍu* ‘bravery, strength, the male of the lower animals’, *gaṇḍūdu*, *gaṇḍādu* ‘a brave, strong man’; Malto *geṇḍa* ‘male’. Krishnamurti 2003:11 **kaṇṭ-a-* ‘male’, 169 **kaṇ-ṭV-* ‘warrior’, and 525 **kaṇṭ-anṭu* ‘husband, warrior’; Burrow—Emeneau 1984:111, no 1173. Dravidian loanword in Sanskrit *gaṇḍā-*, *gaṇḍīra-* ‘hero’ (cf. Mayrhofer 1956—1980.I:318). Perhaps also: Kota *geṇḍ kaṭ-* (*kac-*) ‘dog’s penis becomes stuck in copulation’; Kannaḍa *keṇḍa* ‘penis’; Gondi *geṭānā*, *gēṭ-* ‘to have sexual intercourse’, *gēṭ* ‘sexual intercourse’. Burrow—Emeneau 1984:177, no. 1949.
- B. Proto-Altaic **gendV* (~ **k-*) ‘male, self’: Proto-Mongolian **gendü* ‘male of animals’ > Written Mongolian *gendü(n)* ‘small male panther; male of animals in general; male tiger’; Khalkha *gendü* ‘a male tiger or leopard’; Buriat *gende* ‘male sable’; Kalmyk *gendṇ* ‘male of animals’. Proto-Turkic *[g]entü (-nd-) ‘self’ > Old Turkish (Orkhon, Old Uighur) *kentü* ‘self’; Karakhanide Turkic *kendü* ‘self’; Turkish *kendi* ‘self’; Azerbaijani *gendi* ‘self’; Yakut *kini* ‘he’; Dolgon *gini* ‘he’. Starostin—Dybo—Mudrak 2003: 541 **gentV* (~ **k-*) ‘male, self’; Poppe 1960:25; Street 1974:13 **gendü(n)* ‘male; self’.

Buck 1949:2.23 male; 3.12 male (of animals); 4.492 penis. Illič-Svityč 1965:362 **gändλ* [‘cameц’] and 1971—1984.I:226—227, no. 79, **gändu* ‘male’ (Proto-Dravidian **kaṇṭ-*; Proto-Altaic **gändü*); Dolgopolsky 2008, no. 643, **gændü* ‘male’. Note: The Afrasian forms cited by Dolgopolsky are problematic from a semantic perspective. Consequently, they are not included here. Semantically, this is a very attractive etymology. However, the lack of agreement between Dravidian and Altaic in the stem vowels is problematic. Both Illič-Svityč and Dolgopolsky try to get around this problem by positing a stem vowel **æ* (Illič-Svityč writes **ä*) in the Proto-Nostratic form. Rather, I think it more likely that one or the other of the branches has innovated — most likely Dravidian. Particularly telling are forms in Dravidian such as Tamil *keṇṭaṇ* ‘robust, stout man’, *kiṇṭaṇ* ‘fat man, strong person’, etc. If the Dravidian

words for ‘penis’ cited above are, indeed, related, they would provide further evidence that the original stem vowel was *e.

379. Proto-Nostratic pronominal base of unclear deictic function *gi- (~ *ge-):

- A. Proto-Kartvelian *-g- pronominal base of unclear deictic function in *e-g-, *i-g-: Georgian *e-g-e* ‘this, he, she, it’, *i-g-i* ‘he, she, it, that’; Svan [e-ǰ-] in the dialectal variants *e-ǰ-i*, *e-ǰ-e*, *e-ǰ-ä* ‘he, she, it, that’. 391. Proto-Nostratic root **gub-* (~ **gob-*):

(vb.) **gub-* ‘to cook, to roast, to burn’;

(n.) **gub-a* ‘the act of cooking; that which is used for cooking: pot, pan; stove, furnace’

- A. Proto-Afrasian **gub-* ‘to cook, to roast, to burn’: Semitic: Akkadian *gubbubu* ‘to roast’, *gabbubu* ‘roasted’, **gubibtu* (pl. *gubibāte*) ‘parched barley’. Proto-East Cushitic **gub-* ‘to burn’ > Somali *gub-* ‘to burn’; Rendille *gub-* ‘to burn’; Boni *kub-* ‘to burn’; Galla / Oromo *gub-* ‘to burn’; Konso *kup-* ‘to burn’; Yaaku *kup-* ‘to rot’. Sasse 1979:17. Highland East Cushitic: Gedeo / Darasa (transitive) *gub-* ‘to burn, to burn the mouth (food)’, (intransitive) *gub-at-* ‘to burn’; Burji (transitive) *gub-*, *gub-ad-* ‘to burn’. Hudson 1989:33—34, 195, and 243. The Highland East Cushitic forms may be loanwords from Galla / Oromo. Orël—Stolbova 1995:219, no. 971, **gub-* ‘to burn’. Orël—Stolbova include Dahalo *guβ-* ‘to burn’. However, Ehret (1980:238) derives the Dahalo form from Proto-Southern Cushitic **guf-* ‘to burn (something)’.
- B. (?) Indo-European: Old Lithuanian *gabija*, *gubija* ‘fire’, *Gubija* name of the fire-goddess.
- C. Proto-Altaic **giūbe* ‘to smoke, to roast’: Proto-Tungus **gūb-* ‘(vb.) to fume, to smoke; (n.) furnace, stove’ > Evenki *gī-* ‘to fume, to smoke’, *gīwun* ‘furnace, stove’; Manchu *gūwa-γīyan* ‘a hole for cooking used by

soldiers in the field; a tripod used for supporting a cooking pot over a hole'. Proto-Turkic **gübeč* 'frying pan; earthenware cooking pot' > Karakhanide Turkic *küveč* 'frying pan; earthenware cooking pot'; Turkish *güvec* 'earthenware cooking pot; casserole'; Gagauz *güveč* 'frying pan; earthenware cooking pot'; Azerbaijani *güväž* 'frying pan; earthenware cooking pot'; Turkmenian *göweč* 'frying pan; earthenware cooking pot'; Uzbek (dialectal) *köväs* 'frying pan; earthenware cooking pot'; Oyrot (Mountain Altai) *kös* 'skull'. Starostin—Dybo—Mudrak 2003:558 **giübe* 'to smoke, to roast'.

Buck 1949:1.85 burn (vb.); 5.21 cook; 5.23 roast, fry. Dolgopolsky 2008, no. 592, **g[uy]bV* 'to heat' (→ 'to cook, to roast, to burn, to dry'). Blažek (1991a:362, no. 8) compares several Kartvelian forms with those given above, and Dolgopolsky includes these as well in his *Nostratic Dictionary*. However, these forms are suspect inasmuch as the root vowel of the reconstructed Kartvelian proto-form (**gab-/gb-* 'to cook, to boil') does not agree with what is found in the putative cognates in other Nostratic languages. Consequently, the Kartvelian material is not included here.

392. Proto-Nostratic root **gud-* (~ **god-*):

(vb.) **gud-* 'to throw, to toss, to shake';

(n.) **gud-a* 'that which is thrown or tossed off or aside: rubbish, refuse, cast-out things'

- A. Proto-Afrasian **g[u]d-* 'to throw, to cast': Proto-Semitic **gad-ap-* 'to throw (away), to cast (away)' > Arabic *ğadafa* 'to cut off, to throw, to move the hands about in walking fast', *ğadaf* 'dregs, dirt'; Geez / Ethiopic *gadafa* [ገደፈ] 'to throw away, to thrust, to reject, to cast away, to discard, to cast down, to cast aside, to retrench, to give up, to abandon, to omit, to repudiate, to despise, to lose, to avoid, to deduct, to forget', *g^wədf* [ገደፍ] 'sweepings, rubbish, refuse'; Tigre *gädfa* 'to throw away', *gədf*, *g^wədəf* 'cast-out things'; Tigrinya *gädäfä* 'to abandon, to throw away', *g^wäduf* 'rubbish'; Amharic *gäddäfa* 'to forget something one has learned, to skip a line'; Gurage *gädäfä* 'to break a fast', *guduf* 'dirt'; Harari *guduf* 'place where rubbish is placed'. D. Cohen 1970— :102; Leslau 1979:262 and 1987:181.
- B. Dravidian: Malayalam *kuṭayuka* 'to throw out, to fling away, to shake extremities'; Kannaḍa *koḍapu*, *koḍavu* 'to scatter or throw in different directions with the hand, to shake or toss about'; Koḍagu *koḍa-* (*koḍap-*, *koḍand-*) 'to shake'; Tuḷu *kuḍpuni* 'to shiver (as from ague); to dust, to shake off (as the dust from a cloth)'. Burrow—Emeneau 1984:152—153, no. 1662.
- C. Proto-Kartvelian **gd-* 'to throw, to cast, to fling, to toss': Georgian *a-gd-eb-a* 'to throw, to cast, to fling, to toss', *da-gd-eb-a* 'to throw, to hurl';

Svan *li-gd-ur-i* ‘to seize, to clutch, to grasp, to hold’. Schmidt 1962:100; Fähnrich 2007:98 **gd-*.

393. Proto-Nostratic (n.) **gul-a* (~ **gol-a*) ‘enclosed space’:

- A. Afrasian: Proto-East Cushitic **gol-* ‘enclosed space: shed, pen, stable’ > Somali *gol-a* ‘enclosed space, pen, stable’; Burji *gola* ‘wall (of house); shed for animals’; Gedeo / Darasa *gola* ‘shed for animals’; Sidamo *golo*, *goló* ‘fence, wall; cattle-pen outside house’. Hudson 1987:194, 242. and 366. Cushitic loans in: Geez / Ethiopic *gol* [ጎል] ‘stable, crib, manger, cave’, *golāmḥəsā* [ጎላምኡሳ] ‘old pen for cattle’; Tigre *gol* ‘stable’; Gurage *gʷāla* ‘pen for mules or horses inside the house’. Leslau 1979:271 and 1987:189, 191.
- B. Uralic: Proto-Finno-Ugrian **külä* ‘dwelling’ > Finnish *kylä* ‘village’; Estonian *küla* ‘village’; Lapp / Saami (Northern) *gal’li-* ‘to visit, to pay a visit to’; Vogul / Mansi *kül*, *kwäl* ‘house, dwelling’. Collinder 1955:93, 1960:412 **külä*, and 1977:109; Rédei 1986—1988:155—156 **kilä* (**külä*).
- C. Proto-Altaic **gūli* ‘dwelling, cottage’: Proto-Tungus **gūle* ‘hut, dwelling-place’ > Evenki *gūle* ‘hut, dwelling-place’. Proto-Turkic **gūl* ‘house, home, dwelling’ > Turkish *-gil* suffix meaning ‘belonging to the family of’ (dial. ‘home, dwelling-place’); Azerbaijani *-gil* suffix meaning ‘belonging to the family of’; Chuvash *kil*, *kül* ‘dwelling, hut’; Yakut *külä* ‘vestibule, inner porch’. Starostin—Dybo—Mudrak 2002:570—571 **gūli* ‘dwelling, cottage’.

Buck 1949:7.12 house; 7.13 hut; 19.16 village. Dolgopolsky 2008, no. 617, **gūlA* ‘dwelling, house’.

394. Proto-Nostratic root **gun-* (~ **gon-*):

(vb.) **gun-* ‘to perceive, to notice’;

(n.) **gun-a* ‘notice, memory, mind, perception, remembrance, recollection’

- A. Afrasian: Egyptian *gnt* ‘memory, remembrance, recollection’. Hannig 1995:901; Erman—Grapow 1926—1963.5:173.
- B. Proto-Kartvelian **gon-* ‘to think, to remember’: Georgian *gon-* ‘to think, to remember’, *gon-eb-a* ‘reason, mind’; Mingrelian *gon-* ‘to think, to remember’; Laz (*n*)*gon-* ‘to think, to remember’; Svan *gon-/gn-* (*li-gn-ew-i*) ‘to think up, to inspire’. Fähnrich—Sardshweladse 1995:87—88 **gon-*; Fähnrich 2007:109—110 **gon-*; Klimov 1964:63—64 **gon-* and 1998:31 **gon-* ‘to think, to remember’.

- C. Uralic: Proto-Finno-Ugrian **kunta-* ‘to perceive’ > Finnish *kuuntele-* ‘to listen’; Karelian *kuntele-*, *kuundele-* ‘to listen’; Veps (Northern) *kund'l'e-* ‘to listen, to obey’; Vogul / Mansi *qont-* ‘to find; to perceive, to see’, *kontaml-* ‘to hear (to perceive, to notice)’, *koontl-* ‘to notice’; Ostyak / Xanty *kunhəl-* (< **kuntəhəl-*), (Tremyugan) *kuntəgɸ-*, (Southern) *huntt-*, *hunttət-* ‘to hear, to perceive, to notice’; Hungarian *hall-* ‘to hear’. Collinder 1955:28 and 1977:48; Rédei 1986—1988:207—208 **kunta-lɜ* ‘to listen, to hear’; Sammallahti 1988:544 Proto-Finno-Ugrian **kuntå* ‘to perceive; to catch’; Décsy 1990:101 **kunta* ‘to catch, to find; to receive booty’. Finnish *kuuntele-* may have been influenced by *kuule-* ‘to hear’.
- D. Proto-Altaic **gūno-* ‘to think’: Proto-Tungus **gūn-* ‘to say, to think’ > Manchu *gūni-* ‘to think’, *gūnin* ‘intention, thought, opinion, feeling, sense; mind, spirit’; Spoken Manchu (Sibo) *goni-* ‘to think’; Evenki *gūn-* ‘to say’; Lamut / Even *gōn-* ‘to say’; Negidal *gūn-* ‘to say’; Oroch *gun-* ‘to say’; Nanay / Gold *un(de)-* ‘to say’; Orok *un-* ‘to say’; Udihe *gun-* ‘to say’; Solon *gun-* ‘to say’. Berber: -k in, for example: Tuareg *nək*, *nəkkunan* 1st person independent pronoun ‘I, me’; Kabyle *nəkk*, *nəkki*, *nəkkini* 1st person independent pronoun ‘me’; Tamazight *nəkk*, *nəç* 1st person independent pronoun ‘me’; Tashelhiyt / Shilha *nki* 1st person independent pronoun ‘me’, 1st person suffixed personal subject pronoun -aγ (< *-ā-kV; cf. Diakonoff 1988:80—81, table and note c); Ghadames *nəc*, *nəccan* 1st person independent pronoun ‘me’; Mزاب *nəcc*, *nəcci*, *nəccin* 1st person independent pronoun ‘me’. Note also Ongota *ka/-k* ‘I, me’ (cf. Fleming 2002b:50).
- B. Elamo-Dravidian: David McAlpin (1981:119—120, §542.1) reconstructs a 1st person singular appellative personal ending *-kə for Proto-Elamo-Dravidian, and this undoubtedly belongs here. Note the 1st person personal possessive pronominal enclitic in Brahui: -ka; note also the locutive -k in Elamite in, for example, *u...sunki-k* ‘I am king’ or *huttah halen-k* ‘I made it at great pains’ (*hutta-h*, predicate; *halen-k*, included form, locutive). For Proto-Dravidian, Zvelebil (1990:35—36) reconstructs a 1st person singular non-past personal ending *-N-ku, found, for example, in Old Tamil (archaic non-past) -Ø-ku and in Gondi (future) -k-ā, while the 1st person plural exclusive non-past personal ending was *-N-kum, found, for example, in Old Tamil (archaic non-past) 1st person plural exclusive -Ø-kum and in Gondi (future) 1st person plural exclusive -k-em, 1st person plural inclusive -k-āt. See also Krishnamurti 2003:290 and 301—304.

- C. Indo-European: Greek has a unique formation, the so-called “first perfect”, which would be better named the “κ-perfect”. As noted by Sihler (1995:576): “Its inception must belong to prehistoric G[reek], for it is already established, within limits, in Hom[er] and in the earliest records of other dialects.” Moreover, Sihler notes (1995:576): “In Hom[er] the formation is found in some 20 roots, all ending in long vowel (from the G[reek] standpoint), and in all of them the κ-stem is virtually limited to the SINGULAR stems which actually contain a long vowel... Later the formation, by now more accurately a κ α -perfect, spreads to other stems ending in a long vowel, then to stems ending in any vowel (including denominatives), and finally to stems ending in consonants, and to all persons and numbers.” This is very important, for Sihler here traces the expansion of this stem type within the history of Greek itself. Thus, we are dealing with developments specific to Greek. Buck (1933:289—290) agrees with Sihler. In Latin, we find 1st singular perfect forms *fēcī* ‘I did’ and *iēcī* ‘I threw’ (N.B. *faciō* and *iaciō* are “secondary elaborations based on these” [Sihler 1995:562]). As in Greek, the *-c-* [k] is found in all persons (cf. third singular *fecit*), and, as in Greek, the *-c-* [k] has given rise to secondary formations. The *-k-* forms are also found in Tocharian, as in 1st singular preterit active *tākā-* ‘I was’, and, as in Greek and Latin, the *-k-* is found in all persons and has given rise to secondary formations. Van Windekens (1976.I:495—496) goes so far as to posit Proto-Indo-European **dhēq-*, **dh₁q-*, as does Rix (1998a:120—121). On the basis of the evidence from Greek, Latin, and Tocharian, we may assume that a “suffix” **-k-* is to be reconstructed for late-stage Proto-Indo-European — what I have referred to as “Disintegrating Indo-European”. This “suffix” originally had a very limited distribution — it seems to have appeared only in the perfect (< stative) singular of verbs that ended in a long vowel, when the long vowel originated from earlier short vowel plus laryngeal. All of the other formations found in Greek, Italic, and Tocharian are secondary elaborations. But, we can go back even farther — it is my contention that the *-k-* originally characterized the 1st person exclusively, from which it spread to other persons. Of course, this suggestion is not new. Sturtevant (1942:87—88) suggested that **-k-* developed in the 1st person singular when a root-final laryngeal was followed by the ending **-xe* (that is, **-H₂e* [Kuryłowicz would write **-₂e*]). Though a laryngeal explanation along these lines has not been generally accepted (cf. Messing 1947:202—203), the suggestion that the *-k-* was originally confined to the 1st person singular is still worthy of consideration, especially in view of the evidence from other Nostratic languages.
- D. Uralic: Hungarian 1st person subjective ending *-k*; Selkup Samoyed 1st person subjective ending *-k*. The 1st person ending *-k* may also survive in the Permian languages in the negative verb: Zyrian / Komi *o-g* ‘I am not’,

e-g ‘I was not’; Votyak / Udmurt *u-g* ‘I am not’. Greenberg 2000:67—68; Collinder 1960:309, §996.

- E. Etruscan: First person singular passive preterite ending *-χe*, as in: *mi arathiale zixuxē* ‘I was written for Araθ’, *mi titasi cver menaxē* ‘I was offered as a gift to Tita’ or ‘I was offered as a gift by Tita’ (cf. Bonfante—Bonfante 2002:101). This ending is also found in Raetic: *tina-χe* ‘I have given, I gave’ (cf. Sverdrup 2002:98).

434. Proto-Nostratic root *k^hat^h-:

(vb.) *k^hat^h- ‘to fall down, to set down, to drop down’;

(n.) *k^hat^h-a ‘lower part, lower place, lower thing’; (adj.) ‘lower, inferior’;

(particle) *k^hat^h- ‘down’

- A. Afrasian: Semitic: Akkadian *katātu* ‘to be low or short; to suffer physical collapse; to descend to the horizon’.
- B. Proto-Indo-European *k^hat^h- ‘down, below, under, beneath; along, downwards’: Hittite *kat-ta*, *ka-at-ta*, *kat-ta-an* (adverb and preverb) ‘down, below, under; along; down the line, subsequently’, (postposition with dat.-loc. or gen.) ‘beneath, below, under, down (along), alongside, by, (along) with, on the side of’, (with abl.) ‘(from) beneath; down from’, *kat-ta-an-da* ‘downwards, along’, (adj.) *kat-te-ra*, *kat-te-ir-ra* ‘lower, inferior; nether, infernal; along, close(r)’; Hieroglyphic Luwian *kata* ‘down, under’, *katanta* ‘below’; Lydian (preverb) *kat-*, *kat-*; Greek κατά, κάτω ‘down, along, according to, against’, (Homeric) κάτωτα ‘downhill’; Tocharian B *kätk-* ‘to lower, to set (down)’, *kätkare* ‘(adj.) deep, far (of height); (adv.) deep, far’. Pokorny 1959:612—613 **kom*; Walde 1927—1932.I:458—459 *kom*; Mann 1984—1987:516 **kmt-* (**kmtm*, **kmtō*, **kmti*) ‘together, combined, total’; Watkins 1985:27 **kat-* ‘something thrown down; offspring’ and 2000:37 **kat-* ‘down’; Mallory—Adams 1997:169 **kat-h_ae* ‘down’ and 2006:290, 292 **kat-h_ae* ‘down’; Puhvel 1984— .4:125—130 and 4:131—133; Kloekhorst 2008b:463—464 and 465; Chantraine 1968—1980.I:504—505; Frisk 1970—1973.I:800; Boisacq 1950:420—421; Hofmann 1966:135 **kmta*; Beekes 2010.I:656 **kmt-*; Adams 1999:159 — according to Adams, Tocharian B *kätk-* ‘to lower, to set (down)’ is based upon a Proto-Indo-European verb stem **kat-ske/o-*, built on the preposition **kat-a* ‘down(ward)’. Note: In view of the Tocharian cognate proposed by Adams, the traditional comparison of the Anatolian and Greek forms cited

above with Old Irish (preposition) *cét-* ‘with’, Old Welsh *cant* ‘with’, and Latin *cum* ‘with’ is to be abandoned (so also Puhvel 1984— .4:130).

- C. Proto-Eskimo **katay-* ‘to fall or drop’: Alutiiq Alaskan Yupik *katay-* ‘to dump or pour out, to fall’; Central Alaskan Yupik *katay-* ‘to fall out or off, to drop’; Naukan Siberian Yupik *katə-, kataXtur-* ‘to pour out, to drop, to fall out’; Central Siberian Yupik *katay-* ‘to dump, to empty’; Sirenik *katəy-* ‘to drop, to pour out’; Seward Peninsula Inuit *katak-* ‘to fall, to drop’; North Alaskan Inuit *katak-* ‘to fall, to drop’; Western Canadian Inuit *katak-* ‘to fall, to drop’; Eastern Canadian Inuit *katak-* ‘to fall, to drop, to go downwards’; Greenlandic Inuit *katay-* ‘to drop, to fall, to shed hair (animal), to be loosened’. Fortescue—Jacobson—Kaplan 1994:160.

Buck 1949:10.23 fall (vb.). Greenberg 2002:53, no. 107.

435. Proto-Nostratic root **k^hath-*:

- (vb.) **k^hath-* ‘to make a harsh, shrill screech or sound: to cackle, to caw, to screech, to cry, to yelp’;
 (n.) **k^hath-a* ‘cackling, cawing, screeching, crying, yelping’; (adj.) ‘harsh, shrill, sharp, piercing (of sounds)’

- A. Afrasian: Semitic: Arabic *katkūt* ‘chicken, chick’.
 B. Dravidian: Tamil *kattu* (*katti-*) ‘(vb.) to caw, to screech, to chatter, to yelp, to growl, to bray, to bleat, to croak, to cry, to scream, to babble, to roar; (n.) crying, brawling, chattering’; Kannaḍa *kattu* ‘to cry, to croak, to caw, to bray, etc.’. Burrow—Emeneau 1964:113, no. 1206.
 C. Proto-Kartvelian **kat-* ‘hen’: Georgian *kat-am-i* ‘hen’; Laz *kot-um-e* ‘hen’; Mingrelian *kot-om-i* ‘hen’; Svan *kat-al* ‘hen’. Klimov 1964:195—196 **katam-* and 1998:211—212 **katam-* ‘hen’; Fähnrich—Sardshweladse 1995:369—370 **kat-*; Fähnrich 2007:455 **kat-*; Schmidt 1962:137.
 D. Proto-Indo-European **k^hath-o-s* ‘harsh, shrill, sharp, piercing (of sounds)’: Latin *catus* ‘sharp to the hearing, clear-sounding, shrill’, transferred to intellectual objects in a good and bad sense: (a) good sense: ‘clear-sighted, intelligent, sagacious, wise’; (b) bad sense: ‘sly, crafty, cunning, artful’. Of dialectal origin (Sabine). Thus, not related to Latin *cōs* ‘any hard stone, flintstone’. Same semantic development in Middle Irish *cath* ‘wise; a sage’. Pokorny 1959:541—542; Walde 1927—1932.I:454—455; Mann 1984—1987:479 **katos* ‘shrewd’; Walde—Hofmann 1965—1972.I:183—184; Ernout—Meillet 1979:106; Lindsay 1894:541; De Vaan 2008:99. Note: Mann stands alone in reconstructing a separate Proto-Indo-European form, preserved only in Latin and Middle Irish.

Buck 1949:3.51 hen, chicken (generic); 3.54 hen. Note: The words for ‘hen, chicken’ (Semitic and Kartvelian) may be Wanderwörter.

449. Proto-Nostratic root **k^hul-* (~ **k^hol-*):

- (vb.) **k^hul-* ‘to tell’;
 (n.) **k^hul-a* ‘story, tale’
 Perhaps a derivative of:
 (vb.) **k^hul-* ‘to hear, to listen’;
 (n.) **k^hul-a* ‘renown, fame; ear’

Assuming semantic development as in Greek κλέω ‘to tell of, to make famous, to celebrate’; or Pāli (causative) *sāvēti* (also *sunāpēti*) ‘to cause to hear, to tell, to declare, to announce’ (*suñāti* ‘to hear’); or Romany (Palestinian) *snaiūr* ‘to inform’ — all ultimately from Proto-Indo-European **k^hl-ew-*/**k^hl-ow-*/**k^hl-u-* ‘to hear’.

- B. Dravidian: Malayalam *kāḷuka* ‘to burn, to flame’, *kāḷal* ‘high flame, love-fever’; Telugu *kālu* ‘to burn; to be burnt, scalded, scorched, baked’, *kāḷupu* ‘burning, setting on fire, roasting, baking’, *kāḷcu* ‘to burn (tr.), to set fire to, to scald, to singe, to scorch, to char, to bake’; Parji *kāl*- ‘to smart’. Burrow—Emeneau 1984:139, no. 1500; Krishnamurti 2003:181 **kā-l* ‘(vb.) to burn; (n.) flame’.
- C. Proto-Indo-European **k’el(H)*-/**k’ol(H)*-/**k’l(H)*- ‘to burn, to scorch, to char’: Common Germanic **kulan* ‘coal, charcoal’ > Old Icelandic *kol* ‘coals, charcoal’, *kola* ‘a small flat open lamp’; Swedish (dial.) *kola* ‘to burn slowly’; Old English *col* ‘(live) coal, piece of charcoal’; Old Frisian *kole* ‘coal’; Middle Low German *kol(e)* ‘coal’; Dutch *kool* ‘coal’; Old High German *kol, kolo* ‘coal’ (New High German *Kohle*); Alemannic *chollen* ‘to glimmer, to glow, to smolder’. Orël 2003:223 Proto-Germanic **kulan*; Kroonen 2013:309 Proto-Germanic **kula*- ‘coal, charcoal’; De Vries 1977:324; Onions 1966:185; Klein 1971:144; Kluge—Mitzka 1967:388; Kluge—Seebold 1989:388. Not, according to Walde (1927—1932.I:563), related to Sanskrit *jvālati* ‘to burn brightly, to blaze, to glow, to shine’, *jvāراتि* ‘to be feverish’, which are assumed to be from a Proto-Indo-European **g^wer*- (see also Mayrhofer 1956—1980.I:450, who notes that the outside connections of *jvāراتि* are uncertain). Problematic, from a phonological standpoint, is the comparison with Old Irish *gúal* ‘coal’, which is usually taken to be from **goulo*- or **geulo*-, and Welsh *glo* ‘coal’, which, according to Morris Jones (1913:108), stands for **g^wloe* < Brit. **g^wlāw^{is}* < **g^wel(ā)*-. However, these may be brought in as well if the Old Irish form is derived from a reduplicated **go-gl-o*- (< **k’o-k’l-o*-) or the like, with the Welsh representing unreduplicated **gl-o*- (< **k’l-o*-).
- D. Yukaghir (Northern / Tundra) *qaal’e*- ‘to get burnt’, *qaal’es*- ‘to fry’, *qaal’idere* ‘coal’, *qaal’e* ‘partly burnt place’. Nikolaeva 2006:375.

VOLUME ONE

PART ONE: INTRODUCTION,
COMPARATIVE PHONOLOGY, HOMELANDS, ETC.

Preface	xvii
1. Introduction, History of Research, and Methodology	1
1.1. Introduction	1
1.2. History of Research	1
1.3. Methodology	8
1.4. The Comparative Method	14
1.5. Critique of Moscovite Views on Nostratic	22
1.6. Evidence for Nostratic	26
2. A Survey of the Nostratic Languages	33
2.1. Indo-European	33
2.2. Kartvelian	35
2.3. Afrasian	37
2.4. Uralic-Yukaghir	38
2.5. Elamo-Dravidian	38
2.6. Altaic	40
2.7. Chukchi-Kamchatkan	41
2.8. Gilyak	41
2.9. Eskimo-Aleut	42
2.10. Etruscan	42
2.11. Sumerian	43
3. A Brief History of the Reconstruction of the Proto-Indo-European Phonological System	45
3.1. August Schleicher	45
3.2. The Neogrammarian Period	45
3.3. The Twentieth Century to 1970	49
3.4. The Glottalic Theory	55

4.	The Reconstruction of the Proto-Indo-European Phonological System	65
4.1	The Proto-Indo-European Laryngeals	65
4.2.	The Anatolian Evidence	77
4.2.1.	Hittite	78
4.2.2.	Palaic	80
4.2.3.	Cuneiform Luwian	80
4.2.4.	Hieroglyphic Luwian	81
4.2.5.	Lycian and Milyan	82
4.2.6.	Lydian	83
4.2.7.	Carian	83
4.2.8.	Proto-Anatolian	85
4.2.9.	Examples	86
4.2.10.	Labialized Laryngeals	103
4.2.11.	Old Letters, New Values	104
4.3.	The Traditional Voiceless Aspirates	106
4.4.	The Traditional Plain (Unaspirated) Voiceless Stops	108
4.5.	The Traditional Voiced Aspirates	112
4.6.	The Traditional Plain (Unaspirated) Voiced Stops	113
4.7.	The Gutturals (Tectals)	117
4.8.	Resonants	120
4.9.	The Vowels and Diphthongs	121
4.10.	Accentuation and Ablaut in Proto-Indo-European	132
4.11.	Root Structure Patterning in Proto-Indo-European	135
	Appendix: The Prehistoric Development of the Proto-Indo-European Phonological System	139
5.	An Outline of the Development of the PIE Stop System in the Indo-European Daughter Languages	147
5.1.	Anatolian	147
5.1.1.	Double Writing of Medial Stops in Hittite	147
5.1.2.	The Reconstruction of the PIE Stop System	149
5.1.3.	From Proto-Indo-European to Proto-Anatolian	152
5.1.4.	Hittite	153
5.1.5.	Conclusions	156
5.2.	Disintegrating Indo-European	156
5.3.	Tocharian	158
5.4.	Germanic	159

5.5.	Celtic	161
5.6.	Slavic	163
5.7.	Baltic	164
5.8.	Armenian	165
5.9.	Indo-Iranian	168

5.13.	Phrygian and Thracian	177
5.14.	Accentuation in the Daughter Languages	178
5.15.	Meter	189
6.	A Sketch of Proto-Kartvelian Phonology	191
6.1.	Stops, Affricates, and Fricatives	191
6.2.	Resonants	193
6.3.	Vowels	193
6.4.	Root Structure Patterning	194
6.5.	Georgian Alphabet (Mxedruli)	196
6.6.	Correspondences	197
	Appendix: The Phonological System of Modern Georgian	199
	The Phonological System of Modern Svan	200
7.	A Sketch of Proto-Afrasian Phonology	201
7.1.	The Proto-Afrasian Phonological System	201
7.2.	The Emphatics	203
7.3.	Bilabials	206
7.4.	Dentals	208
7.5.	Dental Affricates	208
7.6.	Palatalized Alveolars	211
7.7.	Sibilants	212
7.8.	Fricative Laterals/Lateralized Affricates	214
7.9.	Gutturals	216
7.10.	Glides and Liquids	218
7.11.	Glottal Stop and Glottal, Velar, and Pharyngeal Fricatives	220
7.12.	Vowels	222
7.13.	Root Structure Patterning in Afrasian	225
7.14.	Phonological Systems of the Individual Branches	228
7.15.	Subgrouping	235

8.	A Sketch of Proto-Uralic Phonology	243
8.1.	Introduction	243
8.2.	The Proto-Uralic Consonant System	244
8.3.	Vowels	245
8.4.	Accentuation	247
8.5.	Root Structure Patterning	248
8.6.	The Position of Yukaghir	248
8.7.	Correspondences	250
	Appendix: Proto-Yukaghir Phonology	255
9.	A Sketch of Proto-Dravidian Phonology	257
9.1.	Introduction	257
9.2.	Consonants	257
9.3.	Vowels	260
9.4.	Accentuation	261
9.5.	Root Structure Patterning	261
9.6.	Elamite Phonology	262
9.7.	Correspondences	263
	Appendix: Selected Phonological Systems	269
	Old Tamil	269
	Modern Tamil	269
	Modern Standard Kannada	272
	Modern Standard Telugu	272
10.	A Sketch of Proto-Altaic Phonology	273
10.1.	Introduction	273
10.2.	Older Views on the Proto-Altaic Phonological System	275
10.3.	New Thoughts on the Reconstruction of the Proto-Altaic Phonological System	277
10.4.	Root Structure Patterning in Proto-Altaic	279

15.3. Sumerian Phonology	363
15.4. Clues about the Origin of Sumerian	364
15.5. Conclusions	370

PART TWO: COMPARATIVE MORPHOLOGY

16. Nostratic Morphology I: The Evidence	371
16.1. Introduction	371
16.2. General Comment	371
I. Pronominal, Anaphoric, and Deictic Stems	372
16.3. First Person Singular <i>*mi</i> (~ <i>*me</i>), First Person Plural (Inclusive) <i>*ma</i> (~ <i>*mā</i>)	372
16.4. First Person <i>*k^ha</i> (~ <i>*k^hā</i>)	375
16.5. First Person <i>*h^a</i> (~ <i>*h^ā</i>)	378
16.6. First Person Singular <i>*na</i> (~ <i>*nā</i>)	379
16.7. First Person Plural Exclusive <i>*na</i> (~ <i>*nā</i>)	381
16.8. First Person (Postnominal Possessive/Preverbal Agentive) <i>*ḡiya</i>	382
16.9. Second Person <i>*thi</i> (~ <i>*thā</i>), (Oblique Forms) <i>*th^a</i> (~ <i>*th^ā</i>)	383
16.10. Second Person <i>*si</i> (~ <i>*se</i>)	386
16.11. Second Person <i>*ni</i> (~ <i>*ne</i>) and/or <i>*na</i> (~ <i>*nā</i>)	387
16.12. Pronominal Stem of Unclear Deictic Function <i>*-gi</i> (~ <i>*-ge</i>)	388
16.13. Deictic Particle (A) <i>*ḡa</i> (~ <i>*ḡā</i>) (Distant), (B) <i>*ḡi</i> (~ <i>*ḡe</i>) (Proximate), and (C) <i>*ḡu</i> (~ <i>*ḡo</i>) (Intermediate)	389
16.14. Deictic Particle (A) <i>*k^ha</i> (~ <i>*k^hā</i>) (Proximate), (B) <i>*k^hu</i> (~ <i>*k^ho</i>) (Distant), and (C) <i>*k^hi</i> (~ <i>*k^he</i>) (Intermediate)	393
16.15. Deictic Particle (A) <i>*th^a</i> (~ <i>*th^ā</i>) (Proximate), (B) <i>*th^u</i> (~ <i>*th^o</i>) (Distant), and (C) <i>*thⁱ</i> (~ <i>*th^e</i>) (Intermediate)	395
16.16. Deictic Particle <i>*š^a</i> (~ <i>*š^ā</i>)	397
16.17. Anaphoric Pronoun Stem <i>*si</i> (~ <i>*se</i>)	398
16.18. Deictic Particle <i>*na</i> (~ <i>*nā</i>), <i>*ni</i> (~ <i>*ne</i>)	400
16.19. Deictic Particle <i>*v^ha</i> (~ <i>*v^hā</i>)	401
II. Dual and Plural Markers	401
16.20. Dual <i>*k^hi(-nV)</i>	401

16.21.	Plural <i>*-t^ha</i>	403
16.22.	Plural <i>*-ri</i>	406
16.23.	Plural <i>*-k^hu</i>	407
16.24.	Plural <i>*-s^ya</i>	408
16.25.	Plural/Collective <i>*-la</i>	409
16.26.	Plural <i>*-nV</i>	411
III. Relational Markers		413
16.27.	Direct Object <i>*-ma, *-na</i>	413
16.28.	Genitive <i>*-nu</i>	416
16.29.	Locative <i>*-ni</i>	419
16.30.	Dative <i>*-na</i>	422
16.31.	Directive <i>*-k^ha</i>	423
16.32.	Locative <i>*-ma</i> (variant <i>*-mi</i>) and Locative <i>*-bi</i>	424
16.33.	Directive(-Locative) <i>*-ri</i>	427
16.34.	Locative <i>*-i</i>	429
16.35.	Comitative-Locative Particle <i>*-da</i>	429
16.36.	Oblique <i>*-t^ha</i>	431
16.37.	Possessive <i>*-lV</i>	433
IV. Derivational Suffixes		434
16.38.	Nominalizer <i>*-r-</i>	434
16.39.	Nominalizer <i>*-m-</i>	436
16.40.	Nominalizer <i>*-y-</i>	440
16.41.	Nominalizer <i>*-t^h-</i>	443
16.42.	Nominalizer <i>*-n-</i>	445
16.43.	Nominalizer <i>*-l-</i>	448
16.44.	Nominalizer <i>*-k^h-</i>	451
16.45.	Nominalizer <i>*-k'-</i>	453
V. Verbs: Non-finite Forms		453
16.46.	Participle <i>*-n-</i>	453
16.47.	Participle <i>*-t^h-</i>	455
16.48.	Participle <i>*-nt^h-</i>	455
16.49.	Gerundive/Participle <i>*-l-</i>	457
VI. Verbs: Finite Forms		459
16.50.	Imperative <i>*-k^hV</i>	459
16.51.	Conditional <i>*-ba</i>	461
16.52.	Hortatory-Precative <i>*-li</i>	465

16.53.	Causative *-sV	465
16.54.	Inchoative *-na	467
VII. Negative/Prohibitive Particles		469
16.55.	Negative *na (~ *nə), *ni (~ *ne), *nu (~ *no)	469
16.56.	Prohibitive Particle *ma(?) (~ *mə(?))	470
16.57.	Negative Particle *ʔal- (~ *ʔəl-) (perhaps also *ʔel-, *ʔul-)	471
16.58.	Negative Particle *ʔe	473
VIII. Interrogative, Relative, and Indefinite Stems		473
16.59.	Relative *kwhi- (~ *kwe-), Interrogative *kwha- (~ *kwe-)	473
16.60.	Interrogative-Relative Stem *ʔay-, *ʔya-	475
16.61.	Interrogative *mi- (~ *me-), Relative *ma- (~ *mə-)	478
16.62.	Interrogative-Relative *na- (~ *nə-)	480
16.63.	Indefinite *ma- (~ *mə-), *mi- (~ *me-), *mu- (~ *mo-)	482
16.64.	Indefinite *dʷa- (~ *dʷə-) ‘this one, that one’	483
IX. Indeclinables		484
16.65.	Post-Positional Intensifying and Conjoining Particle *kwha- (~ *kwe-)	484
16.66.	Particle *kwhay- ‘when, as, though, also’	484
16.67.	Particle *ħarʷ-: (1) Particle Introducing an Alternative: ‘or’	485
	(2) Conjoining Particle: ‘with, and’	485
	(3) Inferential Particle: ‘then, therefore’	485
16.68.	Particle *ʔin- (~ *ʔen-), *(-)ni ‘in, into, towards, besides, moreover’	485
16.69.	Sentence Particle *wa (~ *wə) ‘and, also, but; like, as’	486
16.70.	Coordinating Conjunction *ʔaw-, *ʔwa- (~ *ʔwə-) ‘or’	486
17. Nostratic Morphology II: Reconstructions		487
17.1.	Introduction	487
17.2.	Proto-Nostratic as an Active Language	487
17.3.	Ablaut in Proto-Nostratic	496
17.4.	Root Structure Patterning in Proto-Nostratic	496
17.5.	Prehistory of Root Structure Patterning and the Development of Terminal Vowels	499
17.6.	Rules of Proto-Nostratic Syntax	503

17.7.	Pronominal, Deictic, and Anaphoric Stems	504
17.7.1.	First Person Stems	504
17.7.2.	Second Person Stems	505
17.7.3.	Anaphoric and Deictic Stems	505
17.7.4.	Interrogative, Relative, and Indefinite Stems	505
17.7.5.	Summary	505
17.8.	Nominal Morphology	507

528. Proto-Nostratic relative pronoun stem **kwhi-* (~ **kwhē-*); interrogative pronoun stem **kwha-* (~ **kwhə-*):

- A. Proto-Afrasian **kwa-* interrogative stem: This stem is not widespread in Afrasian. It is preserved in relic forms in several Semitic languages: Proto-Semitic **ka-m* ‘how much?, how many?’ > Arabic *kam* ‘how much?, how many’; Ḥarsūsi *kem* ‘how much?, how many?’; Mehri *kəm* ‘how much?’; Soqotri *kəm* ‘how much?’. Zammit 2002:358—359. It also occurs in Cushitic: Rendille interrogative suffix *-koh* ‘which?’; Arbore *kaakó* ‘how much?, how many?’; Galla / Oromo interrogative pronoun *kam(i)* ‘which?’ (cf. Ali—Zaborski 1990:139; Praetorius 1893:96—97). Finally, it occurs in the Kefoid branch of Omotic (cf. *kon(n)e*, *koonni*, *ko* ‘who?’) and in the Dizoid branch as well (cf. *yiki* ‘who?’). Bender 2000:209 and 226.
