Proto-Southern Cushitic *k'wāh- or *k'ooḥ- 'to throw down and club' > Iraqw *kwaḥ-* 'to throw'; Burunge *kwaḥ-* 'to throw'; Alagwa *kwaḥ-* 'to throw'; Dahalo *k'ook'oh-* 'to club'. Ehret 1980:269 *k'wāh- or *k'ooḥ- 'to wield, to swing'. Ehret 1995:244, no. 441, *k'wah- 'to pound'.
- B. Proto-Kartvelian *k'wex- 'to push in, to fill in': Georgian *k'vex-* 'to push in, to fill in'; Mingrelian *k'vax-* 'to push in, to fill in'. Klimov 1998:94 **kwex-* 'to push, to fill in'; Fähnrich—Sardshweladse 1995:201 **kwex-*; Fähnrich 2007:242 **kwex-*.
- C. Proto-Indo-European *k'wēh₂-dh₂- [*k'wāh₂-dh₂-] (> *k'wād₂-) 'to push or press in, to dive or plunge into': Sanskrit *gāhate* 'to dive into, to bathe in, to plunge into; to penetrate, to enter deeply into', *gādha-h* 'pressed together, close, fast, strong, thick, firm'; Prakrit *gāhadi* 'to dive into, to seek'; Sindhi *gāhanu* 'to tread out grain'; Punjabi *gāhnā* 'to tread out, to tread under foot, to travel about'; Hindi *gāhnā* 'to tread out, to caulk'; Serbo-Croatian *gāziti* 'to wade, to tread', *gaz* 'ford'. Mann 1984—

1987:351 **gūādh-* ‘deep; depth; to plunge, to immerse’, 351 **gūādhs-* ‘to squeeze; tight, close’; Mayrhofer 1956—1980.I:333 and I:334—335.

Buck 1949:10.65 drive (vb. tr.); 10.67 push, shove (vb.).

535. Proto-Nostratic root **kʷal-* (~ **kʷəl-*):

(vb.) **kʷal-* ‘to go: to go away from, to go after or behind’;

(n.) **kʷal-a* ‘track, way’

- A. Afrasian: Proto-Southern Cushitic **kʷaal-* ‘to come from’ > Iraqw *qwal-* ‘to come along’; Kʷadza *kʷalas-* ‘to send (person)’; Maʿa *kwa* ‘from’. Ehret 1980:268.
- B. Proto-Kartvelian **kʷal-* ‘track, trace’: Old Georgian *kʷalad* ‘then, again’, *kʷalta* ‘after, following’; Georgian *kʷal-* ‘track, trace’, *kʷal-da-kʷal* ‘right behind’; Mingrelian [*kʷul-*] in *u-kʷul-i* ‘after, then’; Laz [*kʷul-*] in *o-kʷul-e* ‘after’, (postposition) *-kʷule* ‘after’. - C. Indo-European: Tocharian A *kälk-*, *kalk-* used to form the non-present tenses of *i-* ‘to go’, B *kälak-* ‘to follow’. Assuming development from Proto-Indo-European **kʷel-/kʷol-/kʷl-* ‘to go, to follow’, attested only in Tocharian (cf. Adams 1999:147 and 2013:155—156). Van Windekens (1976—1982.I:625—626), on the other hand, assumes that the Tocharian forms are loans from Uralic. However, this proposal is rejected by Adams.

Buck 1949:10.49 go away, depart; 10.52 follow; 10.63 send.

536. Proto-Nostratic root **kʷaly-* (~ **kʷəly-*):

564. Proto-Nostratic root **gat*^y- (~ **gət*^y-):

(vb.) **gat*^y- ‘to bite’;

(n.) **gat*^y-*a* ‘bite’; (adj.) ‘biting, sharp, bitter’

Derivative:

(n.) **gat*^y-*a* ‘jaw, chin’

- A. Proto-Afrasian **gat*^y- ‘to bite’: Semitic: Akkadian *gašāšu* ‘to gnash the teeth, to bare the teeth, to rage’. Though the phonetics are problematic, the following may ultimately belong here as well: Tigre *gāhaṭa* ‘to nibble’; Tigrinya *gahašä* ‘to nibble’, *gāhaṭä* ‘to eat a lot, to carry away’; Gurage *gaṭä* ‘to nibble, to gnaw, *to pluck out grass’; Amharic *gaṭä* ‘to nibble’; Gafat *gašä* ‘to nibble’; Argobba *gāhaṭä* ‘to nibble’; Harari *gēhaṭa* ‘to

nibble the meat from the bone or the flesh of the fruit from the stone'. Leslau 1963:70 and 1979:301. We may reconstruct a Proto-Ethiopian Semitic **gaḥ-aṣ-* 'to nibble' (< ? Proto-Semitic **gat'y-aḥ-* through metathesis). Note also Aramaic *gūṣ* 'to gnaw (of mice)', with *w* infix.

- B. 604. Proto-Nostratic root **t^hhiç-* (~ **t^hheç-*):
 Extended form:
 (vb.) **t^hhiç-V-r-* ‘to comb’;
 (n) **t^hhiç-r-a* ‘hair’:

Note: The original meaning of the stem *tʰiʃ- (~ *tʰheʃ-) may have been ‘to scratch, to scrape’ (> ‘to comb’ > ‘hair’); this stem may be preserved in Cushitic: Proto-Cushitic *ʔaʃf-/ʔiʃf- or *laʃf-/liʃf- ‘to claw, to scratch’ (cf. Ehret 1995:429, no. 891). For derivation of the word for ‘hair’ from a stem with the meaning ‘to scratch, to scrape’, cf. Old Church Slavic *kosa* ‘hair’, Serbo-Croatian *kòsa* ‘hair, wool’, etc., *o*-grade of the root found in Common Slavic *česati ‘to scratch, to comb’ > Russian *česát’* [чесать] ‘to scratch, to comb’ (cf. Derksen 2008:86 and 238).

(vb.) **tʰhil-* or (?) **tʰhidʒ-* ‘to see’;

(n.) **tʰhil-a* or (?) **tʰhidʒ-a* ‘eye’

A. Afrasian: Proto-Highland East Cushitic **lell-* ‘to appear, to be seen’ > Gedeo / Darasa *lell-* ‘to appear, to be seen’, *lell-iš-* ‘to show, to uncover, to reveal’; Kambata *lall-* ‘to appear, to be seen’; Sidamo *lell-* ‘to appear, to be seen’, *lell-iš-* ‘to show’. Hudson 1989:21.

B. Proto-Kartvelian **xel-/xil-* ‘to open the eyes, to see’: Georgian *xil-* ‘to see’ (also *xed-* ‘to see’), *xel-/xil-* ‘to open the eyes’; Mingrelian *xil-* ‘to open the eyes’. Schmidt 1962:36, 79, and 158. According to Schmidt (1962:79), the *l ~ d* alternation in Georgian may point to an earlier lateral. If this suggestion is indeed correct, the Kartvelian data may provide evidence for a third (voiced) lateralized affricate in Proto-Nostratic, which means that the Proto-Nostratic form may have been **tʰhidʒ-* (~ **tʰhedʒ-*) instead.

613. Proto-Nostratic 1st singular personal pronoun stem *ʔa- (~ *ʔə-), *ʔi- (~ *ʔe-)
‘I, me’:

No doubt originally the same as the deictic particles *ʔa-, *ʔi- listed below.

- A. Proto-Afrasian *ʔa- 1st singular personal pronoun prefix: Proto-Semitic *ʔa- 1st singular personal pronoun prefix > Classical Arabic ʔa-; Šheri / Jibbāli e-, ə-, Ø-; Mehri ə-; Akkadian a-; Hebrew ʔe-/ʔā- [-ʔ/-ʔ]; Aramaic ʔi-; Ugaritic ā-/ī-; Geez / Ethiopic ʔə- [ʔ-]; Amharic ə-. - C. (?) Chukchi-Kamchatkan: Chukchi *i-* ~ *e-* in (predicative forms): *-iyəm* ~ *-eyəm* ‘I’ (the shorter form *yəm* is used as an independent personal pronoun ‘I’), *-iyət* ~ *-eyət* ‘you’ (the shorter form *yət* is used as an independent personal pronoun ‘you’). Greenberg 2000:78—80. Fortescue (2005:146—147) reconstructs Proto-Chukchi-Kamchatkan **kəm* ‘I’ and (2005:142—143) **kəð* ‘you’.

Sumerian *a-a_A* ‘I’.

Note: The Chukchi forms indicate that we are dealing with what was originally a deictic particle here inasmuch as the same patterning is found in both the first and second person predicative pronoun stems. Moreover, it is the proximate deictic form **ʔi-* (~ **ʔe-*) that is represented in Chukchi-Kamchatkan as opposed to the distant form **ʔa-* (~ **ʔə-*) found in Afrasian (the Indo-European forms are phonologically ambiguous). This seems to indicate that independent developments were involved in each branch, using the same basic elements.

Möller 1911:64; Dolgopolsky 1984:89—90 and 94; Bomhard—Kerns 1994: 567, no. 433; Greenberg 2000:77—81.

614. Proto-Nostratic demonstrative stems (originally deictic particles):

Proximate: **ʔi-* (~ **ʔe-*) ‘this’;
 Intermediate: **ʔu-* (~ **ʔo-*) ‘that’;
 Distant: **ʔa-* (~ **ʔə-*) ‘that yonder, that over there’

Note: These stems regularly combined with other deictic particles: **ʔa/i/u+na-*, **ʔa/i/u+ša-*, **ʔa/i/u+ma-*, **ʔa/i/u+t^ha-*, **ʔa/i/u+k^ha-*, **ʔa/i/u+ya-*, etc.

- A. Afrasian: For Proto-Southern Cushitic, Ehret (1980:50) reconstructs the following suffixes: (a) **-i* nearness marker, (b) **-a* farness marker, (c) **-o* marker of reference (indefinite distance):

- a) Proto-Southern Cushitic **-i* nearness marker > Iraqw *-i* in *wi/ri/ti* ‘this’ (m./f.); Burunge *-i* in *ki/ti* ‘this’ (m./f.), *-i-* in *tiʔi* ‘here’; Alagwa *-i* in *wi/ti* ‘this’ (m./f.); Ma’a *i-* in *ilaʔi* ‘this direction’, *iʔi* ‘here’.
 b) Proto-Southern Cushitic **-a* farness marker > Iraqw *-a* in *qa* ‘that’, *da* ‘that aforementioned’; Burunge *-a* in *kaʔa/taʔa* ‘that’ (m./f.), *taʔi* ‘there’; Ma’a *-a* in *twaʔi* ‘there’.

- c) Proto-Southern Cushitic *-o marker of reference (indefinite distance) > Iraqw -o in *wolro/to* ‘this being talked about’ (m./f./n.); Alagwa -o in *qo* ‘that’; K’wadza -o in -*uko* masculine gender marker, -*eto*, -*ito* feminine gender marker.

North Cushitic: Beja / Beḍawye *ʔün* ‘this’. Reinisch 1895:20—21.

Proto-Agaw base *ʔə+n- ‘this’ > Bilin *ʔana* ‘this’; Xamir *ən/ənin/ənyän*, (f.) *ənčän* ‘this’; Kemant *ən/əndän* ‘this’; Awngi / Awiya *ən* ‘this’. Appleyard 2006:136; Reinisch 1887:32—33 (*en, in*).

- B. Proto-Dravidian (a) **ǎ* distant demonstrative stem (Burrow—Emeneau 1984:1—3, no. 1; Krishnamurti 2003:253—258 and 390 **aH* ‘that’), (b) **ĩ* proximate demonstrative stem (Burrow—Emeneau 1984:38—40, no. 410; Krishnamurti 2003:253—258 and 390 **iH* ‘this’), and (c) **ũ* intermediate demonstrative stem (Burrow—Emeneau 1984:54—55, no. 557; Krishnamurti 2003:253—258 and 391 **uH* ‘yonder, not too distant’). Krishnamurti derives these stems from deictic bases and notes that they carry gender and number and are inflected for case. Finally, he notes that time (‘now, then, when’) and place (‘here, there, where’) adverbs are also derived from these deictic bases. Similar usage is found in other Nostratic languages. Examples (this is but a small sampling):
- a) Proto-Dravidian **ǎ* distant demonstrative stem: Tamil *a* demonstrative base expressing the remoter person or thing; prefixed to nouns to express remoteness; Malayalam *a, ā* ‘that, yonder’; Kota *a-* distant from the speaker in space or time; Toda *a-* distant from speaker in space or time; Kannaḍa *a-* remote demonstrative base; Kui *a-* ‘that over there’; Kuwi (adj.) *ā* ‘that most remote’; Kuṛux *a-* ‘that most remote’.
- b) Proto-Dravidian **ĩ* proximate demonstrative stem: Tamil *i* demonstrative base expressing the nearer or proximate person or thing; prefixed to nouns to express nearness; Malayalam *i, ī* ‘this’; Kota *i-* demonstrative base expressing nearness to the speaker; Maṇḍa *ī* ‘this’; Toda *i-* demonstrative base expressing nearness to the speaker; Kannaḍa *i-* proximate demonstrative base.
- c) Proto-Dravidian **ũ* intermediate demonstrative stem: Tamil *u* demonstrative base expressing a person, place, or thing occupying an intermediate position, neither far nor near, and meaning yonder or occupying a position near the person or persons spoken to; demonstrative particle before nouns expressing intermediate position or position near the person or persons spoken to; Kannaḍa *u-* base indicating intermediate place, quantity, or time; Kuwi *ũ* (adj.) ‘that’ (intermediate).

- C. a) Proto-Kartvelian **a*- proximate demonstrative stem: Georgian *a*-; Mingrelian *a*-; Laz (*h*)*a*-; Svan *a*-. Klimov 1964:41 **a*- and 1998:1 **a*- pronominal stem, proximal. Proto-Kartvelian **a-ma*- ‘that, this’: Georgian *a-ma*-, *a-m*- ‘that, this’; Mingrelian *a-mu*- ‘that, this’; Laz (*h*)*a-mu*- ‘that, this’; Svan *a-m(a)*- ‘this’, *a-me* ‘here’. Klimov 1964:44 **a-ma*- 1998:2 **a-ma*- ‘that, this’. Proto-Kartvelian **a-ša*- deictic stem: Georgian *a-se* ‘so’; Mingrelian [*a-š-*]; Laz [*a-š-*]; Svan *a-š* ‘so’. Klimov 1964:46 **a-s_I*- and 1998:4 **a-s_I*- deictic stem. Proto-Kartvelian **a-k*- ‘here’: Georgian *a-k* ‘here’; Mingrelian *ak*, *tak*, *atak*- ‘here’; Laz *a-k*, *a-ko* ‘here’. Klimov 1964:46 **a-k*- and 1998:4 **a-k*- ‘here’.
- b) Proto-Kartvelian **e*- demonstrative stem: Georgian *e*-; Mingrelian *e*-; Laz (*h*)*e*-; Svan *e*-. At the present time, it usually occurs as a bound demonstrative element (cf. Georgian *e-s* ‘so’, *-e-g* ‘this; he, she, it’; [dial.] *e-ma*-; etc.; Mingrelian *e-na*-; *e-ši* ‘so’; Laz *he-a*-; *he-s*; *e-še* ‘so, there’; Svan [*e-ž-*] in *e-ži*, *e-že*, *e-žä* ‘he, she, it; that’; *e-š* ‘so’); however, note Laz *he* in *he bigate...* ‘with that stick...’. Klimov 1964:77 **e*-, 78 **e-g*-, 80 **e-s_I*-, and 80 **e-k*- ‘there’; 1998:45 **e*- pronominal element, 45 **e-g*- pronominal stem, and 47 **e-s_I*- pronominal stem.
- c) Proto-Kartvelian **i*- distant demonstrative stem: Georgian *i*-; Mingrelian *i*-; Laz (*h*)*i*-; Svan *i*-. Klimov 1964:99 **i*- and 1998:80 **i*- deictic stem (denoting remote objects in contrast to **a*-). Proto-Kartvelian **i-ma*- distant demonstrative stem: Georgian *i-ma*-; Mingrelian *i-mu*-; Laz (*h*)*i-mu*-; Svan [*i-m-*]. Klimov 1964:101—102 **i-ma*- and 1998:81 **i-ma*- a pronominal stem of demonstrative semantics (in contrast to **a-ma*-, it denotes remote objects). Proto-Kartvelian **i-š-* deictic element: Georgian *i-s*- ‘that; he’; Mingrelian [*i-š-*] in *iš-o*, *viš-o* ‘there’; Laz [(*h*)*i-š-*] in (*h*)*iš-o* ‘this way, over there’. Klimov 1964:102—103 **i-s_I*- and 1998:82 **i-s_I*- deictic element. Proto-Kartvelian **i-k*- ‘there, over there’: Georgian *i-k(a)* ‘there, over there’; Mingrelian *i-k* ‘there, over there’; Laz (*h*)*i-k* ‘there, over there’. Klimov 1964:104 **i-k*- and 1998:83 **i-k*- ‘there, over there’.

Note: The Nostratic pattern * γa - (distant) ~ * γi - (proximate) was changed to **a*- (proximate) ~ **i*- (distant) in Kartvelian.

Starostin—Dybo—Mudrak (2003:310) reconstruct Proto-Altaiic **ap’a* ‘father’. However, such a reconstruction cannot account for the *-b-* found in the Mongolian forms cited above, which point, instead, to Proto-Altaiic **aba* ‘father’. It is better to assume two separate forms at the Proto-Altaiic level: **aba* ~ **ap^ha* ‘father’, the first of which was the ancestor of the Mongolian words for ‘father’, the second of which was the ancestor of the (Manchu-)Tungus and Turkic words. Starostin—Dybo—Mudrak cite the following forms from (Manchu-)Tungus and Turkic: Proto-Tungus **apa* ‘grandfather, uncle (elder brother of father, mother)’ > Negidal *apa*

- ‘grandfather, uncle (elder brother of father, mother)’; Nanay / Gold (reduplicated) (Naikhinsk) *papa*, (Bikin) *fafa* ‘grandfather, uncle (elder brother of father, mother)’. Proto-Turkic **apa* (**appa*) ‘father’ > Old Turkic (Orkhon, Old Uighur) *apa* ‘ancestors’; Karakhanide Turkic *apa* ‘father, bear; ancestor’; Turkish *aba* ‘father’; Azerbaijani (dial.) *aba* ‘father’; Turkmenian (dial.) *aba* ‘father’; Tatar (dial.) *aba* ‘father’; Bashkir (dial.) *apa* ‘father’; Kirghiz *aba* ‘father’; Sary-Uighur *awa* ‘father’; Oyrot (Mountain Altai) *aba* ‘father, bear’; Tuva *ava* ‘father’; Chuvash *oba* ‘bear’.
- F. Proto-Chukchi-Kamchatkan **æpæ* ‘grandfather’ (?) or ‘any older male relative’ (?): Chukchi *apajjən*, (Southern) *epe*, *epapə* ‘grandpa’ (children’s word); Kerek *apappij* ‘grandfather’, *appa* ‘daddy’, *appakku* ‘parents’; Koryak *apappo* ‘uncle’, *appa* ‘daddy’ (children’s word); Alyutor *apapa* ‘daddy’; Kamchadal / Itelmen (Southern) *apac* ‘father’. Fortescue 2005: 36—37.
- G. Proto-Gilyak / Nivkh **apak* ‘uncle’: Amur *apak* ‘uncle’; North Sakhalin *apák* ‘relative’. Fortescue 2016:14—15.
- H. Proto-Eskimo **ap(p)a* ‘grandfather’: Central Alaskan Yupik *apa(q)*, *appa* ‘grandfather’; Alutiiq Alaskan Yupik *apa*, *apaaq* ‘grandfather’; Naukan Siberian Yupik *apa*, *apaya* ‘grandfather’; Central Siberian Yupik *apa* ‘grandfather’; Sirenik *apa* ‘grandfather’; Seward Peninsula Inuit *ava* ‘grandfather’; Western Canadian Inuit *aappak* ‘father’; North Alaskan Inuit *aapa* ‘father’. 622. Proto-Nostratic root **ʔak^h*- (~ **ʔəkh^h*-):

(vb.) **ʔak^h*- ‘to be evil, wicked, bad; to hurt, to harm’;

(n.) **ʔak^h-a* ‘evil, wickedness, harm’

- A. Afrasian: Proto-Semitic **ʔak-ay-* ‘(vb.) to be evil, wicked, bad; to hurt, to harm; (n.) evil, wickedness, harm’ > Geez / Ethiopic *ʔakaya* [አክዮ], *ʔakya* [አክዮ] ‘to be bad, evil, wicked’, *ʔaʔakaya* [አአክዮ] ‘to make bad, to make evil, to do harm, to treat badly, to afflict, to deprave, to pervert, to corrupt’, *taʔakaya* [ተአክዮ] ‘to be bad, to be hurtful’, *ʔakkuy* [አክ-ይ] (f. *ʔakkīt* [አክ.ት]) ‘bad, wicked, villainous, evil, noxious, vile’; Tigre *ʔaka* ‘to be bad, evil; to deteriorate’; Tigrinya *ʔakäyä* ‘to be bad, evil’. Semitic loans in: Bilin *ʔekáy* ‘evil’; Beja / Beḍawye *ʔaka* ‘harm, mischief’. Reinisch 1895:12. D. Cohen 1970— :18; Leslau 1987:17.
- B. Dravidian: Tamil *akaṭu* ‘wickedness’; Kannaḍa *agaḍu* ‘viciousness, savageness, meanness’; Telugu *agaḍu* ‘blame, exposure, fault’. Burrow—Emeneau 1984:3, no. 4.
- C. Proto-Indo-European **ʔak^h-* ‘evil, pain, trouble, misfortune’: Sanskrit *ākam* ‘unhappiness, pain, trouble’; Avestan *akō* ‘bad’; Farsi *āk-* ‘insult, misfortune’. Mayrhofer 1956—1980.I:14. Pokorny (1959:23) reconstructs Proto-Indo-European **ak^u-* ‘to harm, to hurt, to injure, to damage, to wrong’ (?) on the basis of a comparison of the Indo-Iranian forms cited above plus several alleged Greek cognates (such as, for example, ἀπάτη ‘trick, fraud, deceit’). However, according to Frisk (1970—1973.I:118) and Chantraine (1968—1980.I:95), the Greek forms cited by Pokorny have no known cognates in other Indo-European daughter languages and should, therefore, be removed from the comparison.
- D. Proto-Gilyak / Nivkh **aki-* ‘bad’: Amur *aki-dʷ* ‘bad’; North Sakhalin *aki-s* ‘bad’; East Sakhalin *aki-d* ‘bad’; South Sakhalin *aki-nd* ‘bad’. Fortescue 2016:166.

623. Proto-Nostratic root **ʔak^h-* (~ **ʔak^h-*):
(vb.) **ʔak^h-* ‘to dig’;
(n.) **ʔak^h-a* ‘that which is dug: digging, ditch, trench, hole; that which is used to dig: carving tool, chisel, cutter, gouge’
- A. Proto-Afrasian **ʔak-* ‘to dig’ (> ‘to plow, to till’): Proto-Semitic **ʔak-ar-* ‘to till’, **ʔikkar-* ‘farmer’ > Arabic *ʔakara* ‘to plow, to till, to cultivate the land’, *ʔakkār* ‘plowman’; Akkadian *ikkaru* ‘plowman, farm worker, farmer’; Hebrew *ʔikkār* [קָרַר] ‘plowman, farm worker’; Aramaic *ʔikkārā* ‘plowman, farm worker’; Mandaic *ʔkr* ‘to plow, to till, to cultivate’. D. Cohen 1970— :19; Klein 1987:27 (Klein considers Hebrew *ʔikkār* [קָרַר] to be a loan from Akkadian). Egyptian *ʔkr* name of the earth-god. Hannig 1995:16; Faulkner 1962:6; Erman—Grapow 1921:4 and 1926—1963.1:22; Gardiner 1957:550. Orël—Stolbova 1995:8, no. 26, **ʔakür-* ‘to till’ and 20, no. 70, **ʔekar-* ‘farmer’.

- B. Dravidian: Tamil *akar* ‘(vb.) to excavate, to dig out, to pluck out (as eye), to uproot; (n.) moat, tank, reservoir’, *akari* ‘moat’; Malayalam *akaruka*, *akiruka* ‘to dig out, to excavate’, *akir*, *akari* ‘moat, ditch, trench’, *akil*, *akil* ‘moat, earth wall’; Kannada *agar* (*agard-*), *agur* (*agurd-*) ‘to dig’, *agar* ‘what has been dug’, *agarte* ‘digging, pit, ditch’, *agarata*, *agarate* ‘digging, ditch, moat’, *agalte* ‘ditch, moat’, *agi*, *age* ‘to dig, to burrow, to make a hole in the ground’; Tuḷu *agary*, *agalū* ‘ditch, trench, moat’, *agate* ‘overturning the soil by spade’; Telugu *agaḍḍa* ‘ditch, moat, trench’; Kolami *agul-* (*agult-*) ‘to dig’; Naiki (of Chanda) *agul-/agl-* ‘to dig’, *agulmur* ‘digging’; Gadba *adg-*, *arg-* ‘to dig’. Burrow—Emeneau 1984:4, no. 11.
- C. Proto-Indo-European *ʔokʰ- ‘(vb.) to dig; (n.) furrow’: Hittite (acc. sg.) *ak-ka-a-la-an*, *ag-ga-la-an* ‘furrow’. Perhaps also Greek ὄγμος ‘furrow’, if from *ōk-μo-ç. 628. Proto-Nostratic root **ʔal-* (~ **ʔəl-*) (perhaps also **ʔel-*, **ʔul-*):
 (vb.) **ʔal-* ‘to be not so-and-so or such-and-such’;
 (n.) **ʔal-a* ‘nothing’

Originally a negative verb stem meaning ‘to be not so-and-so or such-and-such’ — later used in some branches as a negative particle.

- A. Afrasian: Proto-Semitic **ʔal-/ʔul-* (< **ʔəl-*) element of negation > Akkadian *ūl* ‘not’; Ugaritic *āl* ‘not’; Hebrew *ʔal* [ʔʕ] (negative particle) ‘certainly not’, (as prefix) ‘not, non-, un-’, (n.) ‘nothing’ (Job 24:25); Phoenician *ʔl* element of negation; Arabic *lā* (negative particle) ‘not’, (with apoc. expressing negative impvtv.) ‘no!’; Sabaeen *ʔl* (negative particle) ‘not, no one’; Ḥarsūsi *ʔel* ‘not’; Šḥeri / Jibbāli *ʔəl* ‘not’; Mehri *ʔal* ‘not’; Geez / Ethiopic *ʔal-* [ḫḌ-] element of negation in *ʔalbə-* [ḫḌ-ḏ-], *ʔalbo* [ḫḌḏ]; Tigre *ʔalä-* in *ʔalä-bu* ‘there is not’; Amharic *al-* used to express a negative verb in the perfect. D. Cohen 1970— :19, no. 3, prohibitive particle; Klein 1987:28; Leslau 1987:17 and 18; Zammit 2002:363. Berber: Kabyle *ala* ‘no’. Central Cushitic: negative element *-lā* in: Bilin *ʔillā* ‘no’; Awngi / Awiya *əlla* ‘no’. Appleyard 2006:105; Reinisch 1887:26, 32, and 250. Militarëv 2012:80 Proto-Afrasian **ʔa/ul-*.
- B. Proto-Dravidian **al-* ‘to be not so-and-so’: Tamil *al-* ‘to be not so-and-so’; Malayalam *alla* ‘is not that, is not thus’; Kolami *ala-* ‘to be not so-and-so’; Kannada *alla* ‘to be not so-and-so, to be not fit or proper’; Koḍagu *alla* ‘to be not so-and-so’; Malto *-l-* negative morpheme; Brahui *all-* base of past negative tenses of *anning* ‘to be’, *ala*, *alavā* ‘certainly not, not a bit of it’. Burrow—Emeneau 1984:22, no. 234; Krishnamurti 2003:354—356 Proto-South Dravidian **al-* ‘to be not’.
- C. Indo-European: Hittite *li-e* element used with the present indicative to express a negative command. The Hittite form is isolated within Indo-European. Many scholars take it to be from Proto-Indo-European **ne* (cf. Puhvel 1984— .5:74—77), but see Koekhorst 2008b:523.
- D. Proto-Uralic **elä* imperative of the negative auxiliary verb (cf. Collinder 1977:26). Marcantonio (2002:239) describes the patterning in Finnish as follows: “A negative verbal form is used in Finnish also in the Imperative, as shown by the pair *lue* ‘read’ vs *älä lue* ‘do=not read’ (2nd Person Singular). The negative form *älä* is often compared with the equivalent Yukaghir *el* ~ *ele*. Equivalent negative verbs and related isomorphic constructions are found in the majority of the Tungusic languages (*e-* ~ *ä-*), in Mongolian (*e-se*) (UEW 68; SSA 100) and in Dravidian.” Rédei (1986—1988:68—70) treats the negative verb **e-* and the imperative **elä*

together, as do many others, including Collinder and Tailleur. As noted by Greenberg (2000:214), these two forms are so closely intertwined, often through suppletion, that it is difficult to distinguish one from the other. In the closely-related Yukaghir, all verbs except *le-* ‘to be; to live, to become’ form the negative by means of a prefix *el-* (cf. Greenberg 2000:214—215). Clearly, we are dealing with two separate forms here. The first is the Proto-Nostratic negative particle **ʔe* ‘no, not’, and the second is the negative verb *ʔal-* (~ **ʔəl-*) ‘to be not so-and-so’. The latter is to be distinguished from the Uralic verb **elä-* ‘to live, to be’ (cf. Rédei 1986—1988:73; Collinder 1955:10 and 1977:31). Greenberg’s (2000:215) analysis of the situation is as follows: “As we have just seen, the Yukaghir verb ‘to be’ is *l’e*, a form that has cognates in other Eurasiatic languages. The theory tentatively suggested to account for this and other intricate facts is that there was a Eurasiatic negative verb **e(i)* that, when combined with the positive verb ‘to be’ *le*, formed a negative existential verb **e-le* that in some instances lost either its initial or final vowel.” Contrary to Greenberg, the Proto-Nostratic verb under discussion here must be reconstructed as **ʔil-* (~ **ʔel-*) ‘to live, to be alive; to be, to exist’ (cf. Illič-Svityč 1965:341 *жить*¹ ‘to live’: **elʌ*), not **le*. To complicate matters further, there may have also been a separate Proto-Nostratic negative particle **li* (~ **le*) ‘no, not’ as well as a separate verb stem **liʔ-* (~ **leʔ-*) ‘to become’. The relationship among these forms is extremely complex and not yet fully understood.

- E. Proto-Altaiic **ule* (~ *-i*) negative particle: Proto-Mongolian **ülü-* negative element preceding verbs > Written Mongolian *ülü*; Khalkha *ül*; Buriat *üle*; Kalmyk *üle*; Ordos *üle*, *ülü*; Moghol *la*, *lü*, *le*; Dagur *ul*, *ule*; Dongxiang *ulie*; Shira-Yughur *lə*; Monguor *li*, *li*. Poppe 1955:287, 288, 289, 290, and 291; Starostin—Dybo—Mudrak 2003:1493 **ule* (~ *-i*) negative particle.
- F. Chukchi-Kamchatkan: According to Greenberg (2000:216): “In the Koryak group reflexes of **ele* form sentence negations or are equivalent to English ‘no!’, a natural use for a negative existential. Examples are Palana Koryak *elle* and Kerek *ala* ‘not.’ Kerek has lost its vowel harmony system through merger so that *a* is the expected reflex of **e*. Aliutor has gone through similar phonetic changes and has *al*, *alla* ‘no, not’. In addition, for prohibitives, Kerek uses the imperative of a negative auxiliary verb *illa*, which follows the negative infinitive...” Fortescue (2005:31) reconstructs Proto-Chukchi-Kamchatkan **æl(læ)* ‘not’: Chukchi *etlə* ‘not’; Kerek *ala* ‘not’; Koryak [*elvelkin* ‘not’]; Alyutor *alla* ‘not’ (Palana *el(le)* ‘not’); Kamchadal / Itelmen *il-* in: *il-puvakax* ‘don’t threaten!’, *il-masys* ‘don’t hinder!’.
- G. Gilyak / Nivkh: Greenberg (2000:215) compares the Gilyak / Nivkh verb stem *ali-* ‘to be unable’, “which may be considered to represent the full form of the negative existential **ele*.” Proto-Gilyak / Nivkh **ali-* ‘to not manage’: Amur *jali-dʷ* ‘to not manage to complete’; East Sakhalin *jali-d* ‘to not manage, to miss (goal)’; South Sakhalin *jari-nd* ‘unable’. Fortescue 2016:11.

Sumerian: *li* negative particle: ‘not, un-’.

640. Proto-Nostratic root **ʔap^h-* (~ **ʔap^h-*):

- (vb.) **ʔap^h-* ‘to be more, over, above, extra, superior; to surpass’;
 (n.) **ʔap^h-a* ‘that which is more, over, above, extra, superior’; (adj.) ‘many, more, extra, additional, numerous, teeming, superior’
 (particle) **ʔap^h-* ‘also, moreover, besides’

Note: The *CVC*-patterning shows that this stem could not originally have been a particle, though this is how it is preserved in Semitic and the other Nostratic daughter languages. Though the original meaning is uncertain, we may speculate that it may have been something like '(vb.) to be more, over, above, extra, superior; to surpass; (n.) that which is more, over, above, extra, superior; (adj.) many, more, extra, additional, numerous, teeming, superior'.

- A. Afrasian: Proto-Semitic *ʔapa 'also, and also' > Ugaritic *āp* 'also'; Hebrew *ʔaφ* [פֶּאֶף] 'also, and also, and even'; Syriac *ʔāφ* 'also'; Phoenician *ʔp* 'also, even'; Palmyrene *ʔp* 'also, even'; Arabic *fā* 'then, and then, and so thus, thence'; Sabaeen *f-* 'and, so'. Klein 1987:45; Tomback 1978:27; Zammit 2002:314. The original meaning may be preserved in Akkadian (adj. f. pl.) *apātu* (*abātu*, *epātu*) (Old Babylonian *a/epiātum*) 'numerous, teeming (as epithet of human beings)'. Berber: Tuareg *uf* 'to be better, to be superior', *suf* 'to prefer', *tūfūt* 'superiority in goodness'; Ghadames *sif* 'to prefer, to choose'; Mزاب *if* 'to surpass, to exceed, to be better'; Wargla *if* 'to surpass, to be better than', *tifət* 'superiority, preeminence'; Tamazight *af*, *if* 'to surpass, to be better than'; Tashelhiyt / Shilha *af* 'to surpass, to be better'; Riff *af* 'to surpass, to be better'; Kabyle *if* 'to surpass, to be better than'; Chaouia *af* 'to be better (than)'; Zenaga *uft* 'to be better'.
- B. Proto-Dravidian **yā-* interrogative stem: ‘who?, which?, what?’: Kannada *yā-*, *ā-*, *ē-*, *e-* interrogative base; Malayalam *yāvan/ēvan*, *yāval/ēval*, *yāvar/ēvar/yār/ār* ‘who?’, *yā/yātu/ētu/ēn* ‘what?’; Tamil *yā*, *yāvai* ‘what or which things?’, *ēvan* ‘who?’, *ēṇ* ‘why?, what?, how?’. Krishnamurti 2003:256—258 **yaH-/*yāH-* interrogative stem; Burrow—Emeneau 1984:465—467, no. 5151.
- C. Kartvelian: Svan (Upper Bal) (interrogative) *jār* ‘who?’, (relative) *jerwāj* ‘who’, (indefinite) *jer* ‘somebody, something’, *jerē* ‘someone, somebody’, *jerwāle* ‘anybody’.
- D. Proto-Indo-European **yo-* relative pronoun stem: Greek *ὅς, ἧ, ὅ* ‘which?’, Phrygian *ιός* ‘which; this’; Sanskrit *yá-h* ‘which’. Greenberg 2000:225—227; Pokorny 1959:283 **io-* ‘who, which’; Walde 1927—1932.I:98 **io-*; Mann 1984—1987:452 **ios*, **iā* relative pronoun; Gamkrelidze—Ivanov 1984.I:387 **ios/*io-t[h]* and 1995.I:235, I:339 **yos/*yo-th* relative pronoun; Mallory—Adams 1997:457 **iós/*iéh_a/*iód* ‘who, what, that’; Boisacq 1950:721 **io-s*, **iā*, **io-d*; Frisk 1970—1973.II:434 **ios*, **iā*, **iod*; Hofmann 1966:241 **ios*, **iā*, **iod*; Chantraine 1968—1980.II:831 **yo-*; Beekes 2010.II:1117 **h₁i-o-*. According to Szemerényi (1996:210), among others, **yo-* is to be derived from the anaphoric stem **i-*. However, Greenberg has successfully refuted this view.
- E. Uralic: Proto-Finno-Ugrian relative and indefinite pronoun **yo-* ‘who, which’: Finnish *jo-* in *joka* ‘who, which’, *joku* ‘someone, anyone’, *jos* ‘when’; Lapp / Saami *juokkē* ‘each, every’; Mordvin *ju-* in *juza toza* ‘to and fro, back and forth’; Cheremis / Mari (Western) *juž*, (Eastern) *južō* ‘someone, anyone’. Greenberg 2000:227; Joki 1973:264; Rédei 1986—1988:637 **jo*.
- F. Proto-Altaic **yā-* interrogative stem: ‘who?, which?, what?’: Manchu-Tungus: Manchu *ya* ‘which?, what?’, *yaba* ‘where?’, *yade* ‘where?, whither?, to whom?’; Evenki *ēma* (< **yāma*) ‘what kind?’, *ēdu* (< **yādu*) ‘why?, for what?’. Mongolian: Written Mongolian *yaγun* ‘what?’, *yambar* ‘which?, what kind?’; Dagur *yō* ‘what?’; Moghol *yan* ‘what?, which?’, *yem* ~ *yema* ‘what?’; Ordos *yū* ‘what?’; Buriat *yūṅ* ‘which?’. Greenberg 2000:227; Poppe 1955:126, 226, 229, 230 and 1960:32, 33; Street 1974:29 **yā-* ‘to do what?; who, what’. Starostin—Dybo—Mudrak (2003:754) derive the Manchu-Tungus forms cited above from Proto-Altaic **k^a(j)* ‘who?’ (interrogative pronoun), while they (2003:2034) derive the Mongolian forms from Proto-Altaic **ŋ[iV]* ‘what?, who?’ (interrogative pronoun). In view of the data from other Nostratic languages, it seems more likely that a Proto-Altaic interrogative stem **yā-* needs to be reconstructed here to account for the Tungus and Mongolian forms. Proto-Altaic **k^ha(y)*, then, was the source of Proto-Tungus **χai* but not Proto-Tungus **yā-*. This agrees with the traditional etymology as opposed to what Starostin—Dybo—Mudrak propose.

- D. Proto-Gilyak / Nivkh **ja(nəŋ)* ‘how’: Amur *janut / janur* ‘how’ (West Sakhalin Amur *janḡur* ‘how’, *janko* ‘where’); North Sakhalin *janagut* ‘how’; East Sakhalin *jan’ř / janř* ‘how’, *janəḡ* ‘why’. Fortescue 2016:81.

Fortescue—Jacobson—Kaplan 1994:119.

(?) Sumerian *us* ‘to break or burst open’.

Buck 1949:4.48 *egg*. Dolgopolsky 1998:60, no. 72, **ʔ[a|o]h|χi* or **ʔuh|χi* ‘egg’ (or ‘white of egg’) and 2008, no. 98, **ʔuXi* ‘egg’; Bomhard 1999a:60 **ʔaw-ḥ-* ‘egg’ (or ‘white of egg’). Dolgopolsky has proposed a very attractive etymology. However, it must be noted that Arabic *ʔāḥ* ‘eggwhite, albumen’ is isolated within Semitic. Moreover, even though the Proto-Indo-European form is traditionally reconstructed as **ōμiom* ‘egg’ (cf. Pokorny 1959:783—784; Mann 1984—1987:897—898), no single reconstruction can account for all of the forms found in the Indo-European daughter languages (cf. Walde 1927—1932.I:21—22 for discussion; see also Buck 1949:4.48; Kilday 2017; Schindler

1969; Zair 2011). Accordingly, there are difficulties with this etymology. If this is a valid etymology, it would imply that the Proto-Indo-European form is to be reconstructed as $*_{2,ou}u_{2,2}iom$ ‘egg’, with short vowel in the first syllable and a laryngeal ($*_{2,2}$ [= $*_{hh}$]) between $*u$ and $*i$ (the long vowel found in the first syllable of the forms attested in several of the Indo-European daughter languages would then be due to compensatory lengthening following the loss of this laryngeal). There may have been a non-apophonic $*o$ (original, or inherited, $*o$) in the first syllable, in which case the Proto-Nostratic form would have been $*_{2ow-h}$. Reconstructing a medial laryngeal ($*_{2,2}$ [= $*_{hh}$]) would also account for the Germanic developments (cf. Jasanoff 1978a:85; Lehmann 1952:44, §4.44d; Lindeman 1964:112—114, §10.2). $*_{2ow}h_{2,2}yo-m$ (traditional $*_{2,ou}u_{2,2}iom$) ‘egg’ cannot, as is often assumed, be a derivative of the common Proto-Indo-European word for ‘bird’, which requires an initial a -coloring laryngeal (preserved in Armenian [cf. Winter 1965a:102 and 107]): $*_{hh}h_{2,2}w-i-s$ [$*_{hh}h_{2,2}w-i-s$], $*_{hh}w-éy-s$ (cf. Pokorny 1959:86 $*_{auei-}$; Mallory—Adams 1997:66 $*_{hauei-}$ [nom. $*_{haéuis}$, gen. $*_{haúéis}$] > Armenian *hav* ‘bird, hen, chicken’ (cf. Hübschmann 1897:465); Latin *avis* ‘a bird’ (De Vaan 2008:65—66 $*_{h_{2,2}eu-i-}$); Umbrian (acc.) *avif* ‘bird’; Sanskrit (nom. sg.) *vī-h*, (Rigveda) *vé-h* ‘a bird’ (Mayrhofer 1956—1980.III:265—266 $*_{2,2}éui-s$, $*_{2,2}úéi-s$); etc.

701. Proto-Nostratic root **her-* and/or **hor-*:

(vb.) **her-* and/or **hor-* ‘to escape, to flee, to run away’;

(n.) **her-a* and/or **hor-a* ‘escape, flight’; (adj.) ‘escaped, liberated, freed’

- A. Proto-Afrasian **her-*, **hor-* ‘to escape, to flee, to run away’: Proto-Semitic **har-ab-* ‘to escape, to flee, to run away’ > Akkadian *arbu* ‘fugitive, runaway’; Arabic *haraba* ‘to flee, to escape, to desert, to run away, to elope; to help to escape, to force to flee, to put to flight; to liberate, to free (a prisoner); to smuggle’, *harab* ‘flight, escape, getaway; desertion; elopement’, *hurūb* ‘flight’, *harbān* ‘fugitive, runaway, on the run; a runaway, a fugitive, a refugee’, *hārib* ‘fugitive, runaway, on the run; a runaway, a fugitive, a refugee; deserter’; Sabaeen *hrb* ‘to flee’; Ḥarsūsi *herōb* ‘to put to flight, to smuggle’; Šḥeri / Jibbāli *ohūrb* ‘to smuggle, to run away (from prison)’; Mehri *hōrəb* ‘to smuggle, to put to flight’; Tigre *harbä* ‘to flee’. D. Cohen 1970— :447; Zammit 2002:417. Ehret 1995:

385, no. 789, **her-/hor-* ‘to go rapidly on foot’; Ehret also posits Proto-Cushitic **horr-/herr-* ‘to go on foot’ (Proto-East Cushitic ‘to run away’), but he does not give examples.

- B. Proto-Indo-European **her-* [**har-*]/**hor-/h₂r-* ‘(vb.) to liberate, to set free; (adj.) free’: Hittite *a-ra-a-u-(wa-)aš* ‘free’, (1st sg. pres.) *a-ra-wa-aḥ-ḥi* ‘to set free’; Lycian *arawa* ‘free’, *arawā* ‘exempt from tax’, Ἐρεῦας *erewa-* ‘free(city)’. Tischler 1977— :53—55; Puhvel 1984— .1/2:119—121. Puhvel’s rejection notwithstanding, the most convincing Indo-European cognate remains Lithuanian *árvas* ‘free’ (cf. Gamkrelidze—Ivanov 1995.I: 397—398 **arw-* and I:781 **arwo-* ‘free agriculturalist’). Fraenkel 1962—1965.I:16.
- C. Proto-Eskimo **arullar-* ‘to leave’: Alutiiq Alaskan Yupik *arulaXtə-* ‘to run away’; Naukan Siberian Yupik *arulaXquq* ‘gathered greens’; Central Siberian Yupik *arulaqə-* ‘to leave’, *arulaXqur-* ‘to go and gather greens’; Sirenik *arəlar-* ‘to leave’, *arəlarət(ə)-* ‘to take away’; Seward Peninsula Inuit *aulari-* ‘to leave’; North Alaskan Inuit *aullaq-* ‘to leave’; Western Canadian Inuit *aullaq-* ‘to leave’; Eastern Canadian Inuit *aula(q)-* ‘to leave’; Greenlandic Inuit *aattar-* ‘to leave’. Fortescue—Jacobson—Kaplan 1994:45.

Buck 1949:10.51 flee; 11.34 release; 19.44 free (adj.). Bomhard—Kerns 1994:585, no. 455.

(vb.) *ħac'- 'to pick, to pluck';

(n.) *ħac'-a 'the act of picking, plucking'; (adj.) 'picked, plucked'

- A. Proto-Afrasian *ħac'- 'to pick, to pluck': Proto-Semitic *ħac'-ad- 'to harvest, to reap' > Akkadian *eṣēdu* 'to harvest'; Imperial Aramaic *ħṣd* 'to harvest'; Biblical Aramaic *ħṣaḏ* 'to cut, to mow', *ħṣāḏā* 'crop, harvest-time'; Arabic *ħaṣada* 'to harvest, to reap, to mow', *ħaṣīd* 'crop, harvest, yield', *ħaṣad* 'mown grain'. Murtonen 1989:193; Klein 1987:228. (?) Egyptian *ħd-t* 'a kind of plant'. Hannig 1995:575; Erman—Grapow 1926—1923.3:211. Proto-East Cushitic *ħad₁- 'to reap' > Burji *hat*'- 'to reap'; Galla / Oromo *hatt*'-aw- 'to sweep'; Dobase *hat*'- 'to hoe, to clean'; Kambata *hat*'iid- 'to reap, to cut crops', *hat*'iidi-je(e)ccut 'harvest-time'. Sasse 1982:93; Hudson 1989:46.
- B. Dravidian: Kota *ec-* (*ec-*) 'to pick (berries, fruit)'; Konḡa *es-* 'to play on *ṣoyla* or any stringed instrument'; Pengo *ec-* 'to pluck'; Manḡa *eh-* 'to pluck'; Kui *espa-* (*est-*) 'to pluck'; Kuwi *eh-* (*est-*) 'to pluck (fruit)'. Burrow—Emeneau 1984:77, no. 779.
- C. Proto-Indo-European *ħhet'- [*ħhat'-] 'crop, grain': Latin *ador* 'a species of grain, spelt'; Gothic *atisk* 'grain, grain-field'; Old English *edisc* 'enclosure, park; pasture'; Dutch *esch* 'cultivated fields of a village'; Old High German *ezzisc* 'seed' (New High German *Esch*); Armenian *hat* 'grain'; (?) 704. Proto-Nostratic root **hag-* (~ **hæg-*):

(vb.) **hag-* ‘to cover over, to hide, to conceal, to obscure, to overshadow’;
(n.) **hag-a* ‘mist, darkness, cloudy weather’; (adj.) ‘misty, dark, cloudy’

- A. Proto-Afrasian **hag-* (vb.) to cover over, to hide, to conceal, to obscure, to overshadow; (adj.) misty, dark, cloudy; (n.) mist, darkness, cloudy weather’: Proto-Semitic **hag-ab-* ‘to cover, to hide, to obscure’ > Arabic *hağaba* ‘to veil, to cover, to shelter, to seclude, to hide, to conceal, to obscure, to overshadow’; Hebrew *hāyāb* [חַיָּב] ‘locust’ (originally ‘locusts covering the sky’); Šheri / Jibbāli *hógób* ‘to outline the shape of a projected structure’, *hótgəb* ‘to wrap and tie cloth around one’s knees and sit cross-legged’; Mehri *həgūb* ‘to outline the shape of a structure (house, pen, etc.) in stones and branches’. Murtonen 1989:174; Klein 1987:207; Zammit 2002:133. Proto-East Cushitic **hagay-* ‘rainy season’ > Kambata *haguu(ha)* ‘dry season’; Burji *hagáy-ee* ‘rainy season’; Saho *hagay* ‘rainy season’; Afar *haagay-* ‘summer’; Galla / Oromo *hag-ay-y-a* ‘wet season’; Somali *hagaa* ‘dry season’; Gidole *haakay-t* ‘rainy season’; Hadiyya *hageyye* ‘rainy season’; Gollango *hakay-te* ‘rainy season’. (Cushitic loans in Ethiopian Semitic: Geez / Ethiopic *hagāy* [ሐጋይ], *hagāy* [ሐጋይ] ‘summer, dry season [January—March]’, [denominative] *hagaya* [ሐገዩ] ‘to spend the summer, to become summer’, *hagayāwi* [ሐገዮዊ] ‘pertaining to summer’; Tigre *hagay* ‘dry season’; Amharic *hagay*, *agay* ‘dry season’ [cf. Leslau 1987:228].) Sasse 1982:89; Hudson 1989:120. (?) Proto-East Cushitic **hagoog-* ‘to cover over’ > Galla / Oromo *hagoog-ad/t-* ‘to cover’; Saho *agoog-* ‘to be covered with cloths, to be draped in garments’; Somali *hagog* ‘cloth draped over the head’; Rendille *ogog-* ‘to cover’. Sasse (1979:39) reconstructs Proto-East Cushitic **hagoog-*; however, considering the more specialized meaning of the Saho and Somali forms, they may be loans, perhaps from Galla / Oromo.

- B. Proto-Indo-European **h₂egh^h-lu-* [**h₂hag^h-lu-*] ‘mist, darkness, cloudy weather’: Greek ἀγλῶς ‘mist, gloom, darkness’; Armenian *aljalj*, *aljamuljk^h* ‘darkness, obscurity’; Old Prussian *aglo* (*u*-stem) ‘rain’. Hakola 2000:27, no. 58, **ennz* ‘sign, omen’ — Hakola compares the Uralic forms cited above with Tamil *eṇṇu* (*eṇṇi-*) ‘to think, to consider, to determine, to esteem, to conjecture, to count, to reckon, to compute, to set a price upon’, etc. However, the original meaning of the Uralic forms was more

likely to have been something like ‘to beware of, to notice, to see’ (cf. Buck 1949:12.84 sign [sb.] and 22.47 omen), which would place them here instead of with Proto-Nostratic root *ʕeŋ- ‘to think, to consider’.

759. Proto-Nostratic root *ʕeŋ-:

(vb.) *ʕeŋ- ‘to think, to consider’;

(n.) *ʕeŋ-a ‘thought, idea, notion, concept, intention, deliberation’

- A. Afrasian: Proto-Semitic *ʕan-ay- ‘to mean, to intend’ > Arabic ʕanā ‘to mean, to signify; to concern, to refer to’, maʕnan ‘sense, meaning, signification, import; concept, notion, idea, thought’, ʕināya ‘concern; care, solicitude, providence; care(fulness), painstaking, meticulousness; heed, notice, regard, attention; interest’; Ḥarsūsi meʕna ‘meaning’; Mehri hānō ‘to decide, to intend’, mānē ‘example; intention, intent, meaning’; Šheri / Jibbāli aʕni ‘to mean’, maʕné ‘intention, meaning; example’. Murtonen (1989:322—323) also compares the following: Hebrew ʕānāh [אָנָה] ‘to answer, to respond’; Aramaic ʕanā ‘to answer, to respond’; Ugaritic ʕny ‘to respond, to reply’, mʕn ‘response, reply’ (cf. Gordon 1965:458, no. 1883); Palmyrene ʕnh ‘to answer, to respond’. Klein (1987:476), however, does not compare the Arabic and South Arabian forms with Hebrew ʕānāh [אָנָה].
- B. Dravidian: Tamil eŋŋu (eŋŋi-) ‘to think, to consider, to determine, to esteem, to conjecture, to count, to reckon, to compute, to set a price upon’, eŋ ‘thought, intention, deliberation, esteem, calculation, mathematics, number’, eŋŋam ‘thought, idea, respect, deliberation, anxiety, mathematics’, eŋŋar, eŋŋalar ‘mathematicians’, eŋŋal ‘intention, counting, deliberation’, eŋŋikkai ‘numbering, esteem, reverence’, ēŋi ‘number’; Malayalam eŋ ‘number, thought’, eŋŋam ‘number, counting’, eŋŋuka ‘to count, to number, to esteem, to relate’, eŋŋikka ‘(vb.) to get counted, to account for; (n.) counting’; Toda öŋ- (öŋy-) ‘to count’, öŋm ‘counting, numbers’; Kannaḍa eŋike, eŋŋike ‘counting, number, thinking, observation’, eŋisu, eŋasu, eŋusu, eŋŋisu ‘to add together, to enumerate, to count, to estimate, to appreciate, to consider, to think, to plan, to compare’, eŋŋu ‘to count, to think’; Koḍagu eŋŋ- (eŋŋi-) ‘to say, to tell’; Tuḷu eŋŋuni ‘to count, to think, to presume, to expect’, eŋŋige, eŋike, eŋe, eŋke ‘calculation, estimation’; Telugu ennu ‘to count, to reckon, to think, to believe, to esteem, to care for, to criticize’, ennika ‘counting, number, esteem, regard, opinion, hope’, encu ‘to count, to reckon, to enumerate, to think, to consider, to believe, to judge, to esteem’. - C. (?) Indo-European: Tocharian A/B *aik-* 'to know, to recognize'; B *aišamo* 'wise', *aišamñe* 'wisdom', *aiši* 'knowing', *aišaumye* '(n.) wise person, sage; (adj.) wise'. The traditional comparison of the above Tocharian forms with Gothic *aigan* 'to have', etc. (cf. Adams 1999:101—102; Van

Windekens 1976—1982.I:139—140) should accordingly be abandoned. Also to be abandoned is Mann’s (1984—1987:6) suggestion that Tocharian *aik-* may be from a putative Proto-Indo-European **aiǵiō* ‘to show, to tell, to declare’ and related to Gothic *af-aikan* ‘to deny’, Latin *aiō* ‘to affirm, to say, to assert, to state’, etc. Thus, it appears that Tocharian *aik-* is isolated within Indo-European.

771. Proto-Nostratic root **xam-* (~ **xəm-*):

(vb.) **xam-* ‘to be wild, fierce, brave, strong, manly’;

(n.) **xam-a* ‘a male (human or animal)’

Extended form (Dravidian and Indo-European):

(vb.) **xam-V-d-* ‘to be wild, fierce, brave, strong, manly’;

(n.) **xam-d-a* ‘a male (human or animal)’ (**xam-d-* > **xan-d-*)

- A. Afrasian: Egyptian *ḥm* ‘(to be) wild (of animals)’. Hannig 1995:599; Faulkner 1962:190. (?) Highland East Cushitic: Burji *ham?-anée* ‘big’. Sasse 1982:91; Hudson 1989:8 and 196.

- B. Dravidian: Parji *enḍka* ‘young male pig’; Pengo *andren* ‘male, man’; Maṇḍa *andren* ‘male, man’; Kui *andra* ‘a male animal or bird; male’; Kuṛux *andra* ‘male (said only of animals)’, *andya* ‘fierce, unmanageable (of bulls, bullocks, and male buffaloes), haughty, overbearing (of men)’; Malto *andya* ‘a bull’. Burrow—Emeneau 1984:509, no. 7. Dravidian loanword in Sanskrit *aṇḍīra-h* ‘male, man; strong’.
- C. Indo-European: Greek ἄνθρωπος ‘man (used both as a generic term and of individuals)’, (Mycenaean) *a-to-ro-qa* (ant^hrōk^wos) ‘man’, ἀνθρώπειος, ἀνθρώπινος, ἀνθρωπικός ‘human’, ἀνθρωπισμός ‘humanity’. Boisacq 1950:63; Chantraine 1968—1980.I:90—91; Hofmann 1966:19; Beekes 2010.I:106 (probably substrate origin); Frisk 1970—1973.I:110—111. Semantic development as in Dravidian, cited above. Notes: (1) Found only in Greek. (2) ἄνθρωπος appears to be a compound < pre-Greek *and^hro-+ *(H)ok^w-o-. The meaning of *(H)ok^w-o- is not clear. If it is ultimately a derivative of the Proto-Indo-European root *Hok^wh- ‘to see’, as some have claimed, the original meaning may have been something like ‘having the look, appearance, or characteristics of a man, like a man’ (cf. Greek ὄψις ‘the look or appearance of a person or thing, his or its aspect’, ὄψανον ‘appearance’).

Buck 1949:2.1 man (human being); 2.23 male; 3.12 male (adj.).

773. Proto-Nostratic root **xaŋ-* (~ **xəŋ-*):

(vb.) **xaŋ-* ‘to lift, to raise; to rise, to go upward, to ascend’;

(n.) **xaŋ-a* ‘that which is most prominent, foremost, visible, or noticeable’;

(particle) **xaŋ-* ‘on top of, over, above’

Extended form:

(n.) **xaŋ-th-a* ‘the most prominent or foremost (person or thing), front, front part’

- A. Afrasian: Proto-Highland East Cushitic **han-* ‘over, above, on (top of)’ > Gedeo / Darasa *hana* ‘over, above’; Hadiyya *hana* ‘over, above’, *hane* ‘top’; Sidamo *aana* ‘over, above’, *aaná* ‘on (top of)’. Hudson 1989:109. The following Semitic forms probably belong here as well (see below): Proto-Semitic **xan-at-* ‘(vb.) to stick out, to project, to protrude; (n.) that which is most prominent, foremost, visible, or noticeable’ > Mehri *xəntāy* ‘front part of a camel’; Ḥarsūsi *xenī* ‘one of the fore-teats of a camel’; Šheri / Jibbāli *xanī* ‘front, front part of anything’ (also *šxənī* ‘to come out, away from; to get out’, *xunī* ‘outside’, *xanīn* ‘out, absent’; *axnī* ‘to take out, to take off; to evacuate the bowels; to be full to overflowing; to go out in the spring’). Arabic *ḥunṭūl* ‘long horn or penis’. Arabic *ḥinšir*, *ḥinšar* ‘little finger or toe’.
- B. [Dravidian: Tamil *aŋ* ‘upper part’, *aŋa* ‘to lift the head’, *aŋar* ‘to rise, to move upwards’, *aŋavu* (*aŋavi-*) ‘to go upward, to ascend’, *aŋŋal* ‘greatness, exaltation, superiority, great man, king, god’, *aŋŋā* ‘to look upward, to gape, to hold the head erect’; Malayalam *aŋŋa* ‘upwards, above’, *aŋŋal* ‘high, God, esp. - D. Proto-Gilyak / Nivkh **an-(ə)k(i)* ‘earlier’, (converb affix) **-an-ke* ‘before’, (postposition) **-an-k* ‘in front of, before’: Amur *ənk* ‘earlier, before’; East Sakhalin *anar* ‘earlier’; South Sakhalin *anəki* ‘earlier’. Fortescue 2016:14 and 176 (table of affixes).

Buck 1949:10.21 rise (vb.); 10.22 raise, lift; 12.31 high; 12.33 top; 12.41 right; 12.48 south. Bomhard—Kerns 1994:553—554, no. 413. Note: the Dravidian and Altaic forms are phonologically ambiguous — they may belong with Proto-Nostratic **ʕaŋ-* (~ **ʕəŋ-*) ‘(n.) upper part; (particle) up, above’ instead.

774. Proto-Nostratic root **xaŋ-* (~ **xəŋ-*):

Extended form:

(n.) **xaŋ-th-a* ‘the most prominent or foremost (person or thing), front, front part’

Derivative of:

(vb.) **xaŋ-* ‘to lift, to raise; to rise, to go upward, to ascend’;

(n.) **xaŋ-a* ‘that which is most prominent, foremost, visible, or noticeable’;

(particle) **xaŋ-* ‘on top of, over, above’

- A. Afrasian: Egyptian *hnt* ‘face, front part’, *hnt* ‘in front of, among, from’, *hnt* ‘to ascend, to rise (the Nile)’, (adv.) *hntw* ‘before, earlier’, *hnt, hnty* ‘nose, face’, *hnty* ‘who or which is in front of (of place), who is at the head of, foremost, pre-eminent in, principal (of degree), protruding (of shape)’; Coptic *šant* [ϣⲁⲛⲧ] ‘nose’. Erman—Grapow 1921:129—130 and 1926—1963.3:302—306; Gardiner 1957:585; Hannig 1995:607—608; Faulkner 1962:194; Vycichl 1983:254. Note: Dolgopolsky (2002:45—46 and 2008, no. 1875) compares the following South Arabian forms with the Egyptian forms cited here: Mehri *xəntāy* ‘front part of a camel’; Ḥarsūsi *xenīl* ‘one of the fore-teats of a camel’; Šheri / Jibbāli *xantī* ‘front, front part of anything’ (also *šxənīl* ‘to come out, away from; to get out’, *xunt* ‘outside’, *xantūn* ‘out, absent’; *axnīl* ‘to take out, to take off; to evacuate the bowels; to be full to overflowing; to go out in the spring’). These cannot be

separated from Arabic *ḥuntūl* ‘long horn or penis’. The original meaning was probably something like ‘that which is most prominent, foremost, visible, or noticeable’. The Proto-Semitic ancestor may be reconstructed **xan-at*’- ‘to stick out, to project, to protrude’, that is, root **xan-* with *-at*’- extension. That the root is to be reconstructed as **xan-* to which various extensions have been added in Semitic proper is shown by the related Arabic *ḥinšir*, *ḥinšar* ‘little finger or toe’, itself from earlier **xan-ac*’-. Thus, the Semitic forms can be compared, but not directly with Egyptian *ḥnt* ‘face, front part’ as Dolgopolsky has attempted to do.

- B. Proto-Indo-European **h₁h₂ent^h-s* [**h₁h₂ant^h-s*] ‘front, front part’, **h₁h₂ent^hi* [**h₁h₂ant^hi*] ‘in front of, before’: Hittite *ḥa-an-za* ‘front, front part’, *ḥa-an-ti* ‘in front of, before’, *ḥa-an-te-iz-zi-iš* ‘first, foremost’; Luwian (nom. sg.) *ḥa-an-te-le-eš* ‘first, foremost’, (acc. sg.) *ḥa-an-da-wa-te-en* ‘leader, chief’; Lycian (3rd sg. pret.) *χṽte-wete* ‘to lead, to direct’, *χṽte-wata-* ‘leader, chief’; Sanskrit *ánti* ‘before’, *ánta-h* ‘end, limit, boundary’, *ántya-h* ‘last (in time, place, or order)’; Pāli *antika-* ‘near’; Sindhi (f.) *andī* ‘edge, edge of a web of cloth as left in weaving’; Kashmiri *and* ‘edge, limit’; Marathi *āt* ‘as far as’, *āṭī* ‘at the end of, after, on’; Greek *ἀντί* ‘opposite’, *ἄντα* ‘over, against, face to face’; Latin *ante* ‘before’; Oscan *ant* ‘till’; Gothic *and* ‘along, throughout, towards’, *andeis* ‘end’; Old Icelandic (prefix) *and-* ‘opposite, against, towards’, *endi*, *endir* ‘end’, *endr* ‘in times past, formerly’, *enda* ‘to end, to bring to an end’; Old English (prefix) *and-*, *ond-* ‘opposite, against, towards’, *ende* ‘end, limit, border’; Old Frisian *enda* ‘end’; Old Saxon (prefix) *and-*, *ant-* ‘opposite, against, towards’, *endi* ‘end’; Dutch *einde* ‘end’; Old High German (prefix) *ant-*, *int-*, *ent-* ‘opposite, against, towards’ (New High German *ant-*, *ent-*), *anti*, *enti* ‘end’ (New High German *Ende*); Lithuanian *añt* (earlier *antà*) ‘on, upon’; Tocharian A *ānt*, B *ānte* ‘surface, forehead’. Adams (1999:14 and 2013:15) has shown that Tocharian A *āmpi*, B *antapi* ~ *āntpi* ‘both’ probably belong here as well, being derived from Proto-Indo-European **h₂hent^h-b^ho-* [h₂hanth^h-b^ho-*] (Adams writes **h₂ent-bho-*). On the basis of the Tocharian forms, which are particularly archaic, Greek ἄμφω ‘both’ and Latin *ambō* ‘both’ must now be derived as follows: **h₂hem-b^ho-* [**h₂ham-b^ho-*] < **h₂hent^h-b^ho-* [**h₂hanth^h-b^ho-*], with assimilation of original **-nth-* to **-m-* before **-b^ho-* (cf. Beekes 2010.I:96 **h₂(e)nt-b^hoh₁*; De Vaan 2008:37—38 **h₂(e)nt-b^hoH*).

775. Proto-Nostratic root **xat-* (~ **xət-*):

- (vb.) **xat-* ‘to cut into, to hollow out, to engrave, to prick, to pierce’;
 (n.) **xat-a* ‘slice, carving, engraving, engraved line, incision’

- A. Proto-Afrasian **xat-* ‘to cut into, to hollow out, to engrave, to prick, to pierce’: Proto-Semitic **xat’-at’-* ‘to cut into, to hollow out, to engrave, to carve’ > Arabic *ḥaṭṭa* ‘to carve, to engrave, to inscribe, to draw or trace a line, to write’; Akkadian *ḥaṭāṭu* ‘to make a ditch, to excavate, to dredge a river’, *ḥiṭṭatu* ‘trench; foundation pit’; Sabaean *ḥiṭṭ* ‘to fix the boundaries of a piece of land’; Ḥarsūsi *xṭāṭ* ‘to make signs on the ground by the road to guide travelers’, *xaṭṭ* ‘letter, line’; Šheri / Jibbāli *xetṭ* ‘to write, to make signs on the ground to point out a route’; Mehri *xəṭ* ‘to make signs on the ground to point out (a route)’. Zammit 2002:163. Orël—Stolbova 1995:294, no. 1341, **ḥaṭ-* ‘to dig’ and 302, no. 1380, **ḥuṭ-* ‘to dig, to scratch’ (connected with **ḥaṭ-* ‘to dig’).
- B. Elamo-Dravidian: Achaemenid Elamite *at-tu-* ‘to excavate, to dig’, *at-ti* ‘a kind of tool’, perhaps ‘shovel’ or ‘hoe’.
- C. Kartvelian: Svan *xt’ūr-* ‘to cut into pieces, to slice, to carve’.
- D. Proto-Indo-European **ḥhet’-* [**ḥhat’-*] ‘to cut into, to hollow out, to engrave, to prick, to pierce’: Armenian *hatanem* ‘to cut’, *hat* ‘piece, cut, slice’; Hittite (3rd sg. pres.) *ḥa-at-zi*, *ḥa-at-ta-i*, *ḥa-at-ta-a-i*, *ḥa-ad-da-i*; *ḥa-az-zi-zi*, *ḥa-az-zi-az-zi* ‘to make a hole (in), to pierce, to prick, to stab, to slash, to perforate, to penetrate, to stick (as a means of killing), to hit (a target), to strike (especially a musical instrument), to engrave (a tablet)’, (1st sg. pres.) *ḥa-at-ta-ra-a-mi* ‘to prick, to incise, to engrave, to inscribe’, (nom.-acc. sg.) *ḥa-at-tal-la-an* ‘club, mace’, (nom.-acc. sg.) *ḥa-at-ta-ra-a[n]* ‘prick, awl’, (nom. sg.) *ḥa-at-tal-ki-iš-na-aš* ‘thorn-bush’, (3rd sg. pres.) *ḥa-at-ra-a-iz-zi* ‘to write, to send written word (about), to report, to order, to dispatch’; Hieroglyphic Luwian *ha-tu+ra/i-à-s* ‘letter’, (imptv.) *ha-tu+ra/i+à* ‘write!’; Luwian (3rd sg. pret.) *ḥa-at-ta-ri-it-ta* ‘to prick, to pierce’, (acc. sg.) *ḥa-at-ta-ra-an* ‘prick’; Lycian *χttadi* ‘to hurt, to damage’, *χdrñna* (?) ‘inscription’ (?); Avestan *aḍu* ‘water-course, brook, canal’. Pokorny 1959:4 **ad(u)-*, **ad-ro-* ‘water-course’; Kloekhorst 2008b:330—332, 332, 333—334, and 335—336; Puhvel 1984— .3:248—255, 3:255—256, 3:256—257, 3:263—265, and 3:269—274; Tischler 1977— :226—227. Though the comparison of Armenian *hatanem* with the Anatolian forms is semantically flawless, there are problems with the phonology (cf. Puhvel 1984— .3:254), since double writing of the dental stop in Hittite points to original **-tʰ-*, while the Armenian form points to original **-t’-*. However, double writing of medial stops in Hittite can also indicate the former presence of a laryngeal (see Chapter 5 for details) as in (nom. sg.) *me-ik-ki-iš* ‘large’, which is to be derived from earlier **mek’-* plus the suffix **-Hi-* > **mek’Hi-* > the attested Hittite *me-ik-ki-iš*. Thus, comparison of Armenian *hatanem* with the Anatolian forms having medial double writing can be maintained if we derive the Anatolian forms from earlier **ḥhet’H-* [**ḥhat’H-*], which would yield Hittite *ḥatta-* as the regular outcome (cf. Bomhard 1992d:5—11 and 2000:35—46, especially 44—45). Support for this interpretation may be found in Hittite *ḥatrai-*, which has

consistent single writing. Thus, it is possible to envision a pre-Proto-Anatolian root **hhet'-* [**hhat'-*], which was then extended by two separate suffixes in Proto-Anatolian proper: (A) **hhet'-Ha-* [**hhat'-Ha-*], yielding Hittite *hatta-* upon loss of the medial laryngeal, and (B) **hhet'-ra-* [**hhat'-ra-*], yielding Hittite *hatra-*. Stem (A) was further extended by a suffix *-ra-*, giving the attested agent noun *hattara-* 'prick, awl', which, in turn, served as the basis of the denominative verb *hattarai-*. Other derivatives of stem (A) are *hattatta-* 'club, mace' and *hattalkešna-* 'thorn-bush'. The agent noun **hatra-*, from stem (B) and from which the denominative verb *hatrai-* is derived, is unattested.

(vb.) **γor-V-b-* ‘to leave, to go away, to depart; to separate; to abandon’;

(n.) **γor-b-a* ‘leaving, departure; separation; abandonment’

- A. Afrasian: Proto-Semitic **γar-ab-* ‘to leave, to go away, to depart’ > Arabic *ḡaraba* ‘to go away, to depart, to absent (oneself), to withdraw (from), to leave (someone, something); to go to a foreign country; to expel from the homeland, to banish, to exile’, *ḡarba-t* ‘removal, departure’, *ḡurba-t* ‘absence from one’s homeland; separation from one’s native country, banishment, exile; life, or place, away from home’; Mehri *əḡtəṛōb* ‘to be abroad, away from home’, *ḡərbēt* ‘strange place, unknown place’; Šheri / Jibbāli *aḡtérēb* ‘to be abroad, away from home’, *ḡarbēt* ‘strange, unknown place; abroad’. Perhaps also Punic *ʿrbt* ‘desolation’ (?) in *kl ʿrbt* ‘the voice of desolation’ (interpretation highly uncertain) (cf. Hoftijzer—Jongeling 1995:887).
- B. Dravidian: Gondi *ori-* ‘to move aside’, *vorke* ‘aside’; Tamil *oruvu* (*oruvi-*) ‘to abandon, to renounce, to pass over, to escape, to be excepted’, *oruvu*, *orūu*, *orūutal* ‘leaving, separation, renunciation’. Burrow—Emeneau 1984: 95, no. 993.
- C. Proto-Indo-European **ǵhorb^h-* (with non-apophonic *-o-*) ‘to be or become separated, abandoned, bereft’, **ǵhorb^h-o-s* ‘(n.) orphan, servant; (adj.) bereft, abandoned, deprived (of)’: Sanskrit *ārbha-ḥ* ‘little, small; child’;

Burrow—Emeneau 1984:46, no. 474; Krishnamurti 2003:46 **īr/*ir-*, 97 **īr*: **ir-u*, 159—160 **īr/*ir-V-*, 197 **īr/*ir-V-*, and 395 **īr/*ir-V-*; Caldwell 1913:327. Note: original initial **y-* was lost in the Dravidian daughter languages except in Old Tamil, where it is found before **ā* in about thirty words (cf. Krishnamurti 2003:142—143, §4.5.4.2; Zvelebil 1970:159—160). Consequently, we can envision the following phonetic developments in Pre-Proto-Dravidian: **yor-* > **yīr-* > **īr-* (with a vowel change similar to what is found in Mingrelian *žir-*, *žar-* cited below).

- B. Proto-Kartvelian **yor-* ‘two’: Georgian *or-*, *vor-* ‘two’; Mingrelian *žir-*, *žar-* ‘two’; Laz *žu(r)-*, *žu(r)-*, *jur-* ‘two’; Svan *jōri*, *jori*, *jerbi* ‘two’. (vb.) **waǰ-* 'to flow';

(n.) **waǰ-a* 'running water'

- A. Proto-Afrasian **waǰ-* 'to flow': Semitic: Arabic *wazaba* 'to flow (water)', *mīzāb* 'drain pipe, drain; gutter, sewer; roof gutter'. D. Cohen 1970— : 515. Arabic *wazaġa* 'to make water in jets (said especially of a she-camel which sprays its urine while walking along)', *wazaġ* 'shower'. D. Cohen 1970— :517—518. Egyptian *wzš* 'to urinate', *wzšt* 'urine'. Gardiner 1957:562; Hannig 1995:217; Faulkner 1962:69; Erman—Grapow 1921:40 and 1926—1963.1:357, 1:358. Note: Orël—Stolbova (1995:530, no. 2543) reconstruct Proto-Afrasian **wuĉ-* 'urine' on the basis of the Egyptian forms cited above and several East Chadic forms. Jungraithmayr—Ibriszimow (1994.I:192), however, reconstruct Proto-East Chadic **wicē*

‘urine’, which cannot possibly be connected phonetically with the above Egyptian forms. Therefore, the Chadic forms are not included here.

- B. Dravidian: Tamil *vaci* ‘rain, water’; Kannaḍa *basi, bose* ‘to drip, to drop, to trickle, to ooze, to flow; to pour off water from boiled rice, etc., by inclining the vessel, to strain’, *basu* ‘oozing’; Tuḷu *basabasa* ‘gushing, flowing in a stream’, *bassa* ‘overflowing’. Collinder 1955:105, 1960:413 *wel’ə-, and 1977:119; Rédei 1986—1988:566—567 *wed₃-; Sammallahti 1988:551 *wilä- ‘to kill’. I favor Collinder’s and Sammallahti’s reconstructions over the one proposed by Rédei. Illič-Svityč (1965:367) reconstructs Proto-Uralic *w/e/la.

Buck 1949:4.75 die; dead; death; 4.85 wound (sb.); 11.27 destroy. Bomhard—Kerns 1994:629, no. 507; Illič-Svityč 1965:367 *wel₁ ‘to slay, to fight’ (‘сражать[ся]’) — Illič-Svityč also includes Altaic material under this etymology. However, the Altaic material appears to go better with Proto-Nostratic *wal- (~ *wəl-) ‘to crush, to grind, to wear out; to rub, to press; to be worn out, weak; to fade, to wither, to waste away’ (cf. Proto-Altaic *ōli- ‘to be weak from hunger, to starve to death; to die, to fade, to wither’). Forms meaning ‘to kill’ in the Altaic daughter languages (such as Turkish *öldür-* ‘to kill’, for example) are clearly secondary developments.

829. Proto-Nostratic root *wel^v-:

(vb.) *wel^v- ‘to be open, to be vacant’;

(n.) *wel^v-a ‘open space, open land, field, meadow’

- A. Dravidian: Tamil *veli* ‘(vb.) to be open or public; to be vacant, empty; (n.) open space, outside, plain, space, intervening space, gap, room, openness, plainness, publicity’, *velippu* ‘outside, open space, enclosed space’, *veliyār* ‘outsiders, strangers’; Malayalam *veli* ‘open field; notoriety; outside’, *veliccam* ‘publicity’; Telugu *veli* ‘the outside, exterior, excommunication; outside, external’, *velalu* ‘to go or come out, to start’, *velalucu* ‘to send out’, *velupala* ‘the outside, exterior; outside, external’, *vellaḍi* ‘open space; publicity; openness’, *veliparacu*, *velipuccu* ‘to make public or known’, *velārincu*, *velār(u)cu* ‘to send or drive out, to make public’; Kannada *beḷavāra* ‘an outcaste’; Parji *valip-* (*valit-*) ‘to expel, to drive away’; Koṇḍa *veli* ‘outside’; Kuwi *velli kīnai* ‘to excommunicate’. 844. Proto-Nostratic indefinite pronoun stem **ma-* (~ **mǝ-*), **mi-* (~ **me-*), **mu-* (~ **mo-*) ‘one, someone, somebody, anyone, anybody; other, another’:

Note: This may originally have been a demonstrative stem (as suggested by Illič-Svityč), with three degrees of distance:

Proximate: **ma-* (~ **mǝ-*) ‘this’;

Intermediate: **mi-* (~ **me-*) ‘that’;

Distant: **mu-* (~ **mo-*) ‘that yonder’

As in the stems:

Proximate: **k^ha-* (~ **k^hǝ-*) ‘this’;

**t^ha-* (~ **t^hǝ-*) ‘this’;

Intermediate: **k^hi-* (~ **k^he-*) ‘that’;

**t^hi-* (~ **t^he-*) ‘that’;

Distant: **k^hu-* (~ **k^ho-*) ‘that yonder’

**t^hu-* (~ **t^ho-*) ‘that yonder’

- A. Afrasian: Ehret (1995:300, no. 568) reconstructs a Proto-Afrasian indefinite pronoun stem **m-* ‘one, someone, somebody’ (cf. Ugaritic *mn* ‘any, a certain’; Arabic *man* ‘he/she/those who, the one who; those who’; Egyptian *mn* ‘someone, so-and-so’). According to Lipiński (1997:330), “indefinite pronouns strictly speaking do not exist in Semitic. The forms used as a kind of indefinite pronouns are based on the interrogative pronoun” (see also Moscati 1964:115). Instead of being derived from the interrogative pronoun, as is commonly assumed, the Semitic forms may indeed be relics of an old indefinite (< demonstrative) stem as proposed by Ehret.
- B. Proto-Kartvelian **a-ma-* ‘this, that’, **ma-* pronominal stem of the third person: ‘this, he; this one, that one’: Georgian *ama-/am-* ‘this, that’, *ma-* ‘this, he; this one, that one’; Mingrelian *amu-* ‘this, that’, *mu-* ‘this, he; this one, that one’; Laz (*h*)*amu-* ‘this, that’, *mu-* ‘this, he; this one, that one’; Svan *am(a)-* ‘this, that’. Klimov 1964:44 **a-ma-*, 124 **ma-* and 1998:2 **a-ma-* ‘this, that’, 112—113 **ma-* pronominal stem of the third person; Fähnrich—Sardshweladse 1995:226 **ma-*; Fähnrich 2007:276 **ma-*.
- C. (?) Indo-European: Welsh *y^{ma}* (poetical *y^{man}*) ‘here’; Breton *ama*, *amañ*, *-ma*, *-mañ* ‘here’, (Vannetais) *ama*, *amann*, *amenn* ‘here’; Cornish *y^{ma}*, *omma*, *-ma*, *-man* ‘here’. Morris Jones 1913:433; Lewis—Pedersen 1937: 221. Note: Only preserved in relic forms in Celtic.

- D. Uralic: Proto-Finno-Ugrian **mu* ‘other, another’ > Finnish *muu* ‘(somebody, something) else; other, another’; Estonian *muu* ‘other, something (or somebody) else’; Lapp / Saami (Ume) *mubbe* ‘one (of two); the other; another, other; (the) second’ (contains the suffix of the comparative); Votyak / Udmurt (derivative) *myd, möd* ‘other’. Collinder 1955:100 and 1977:115; Rédei 1986—1988:281—282 **mu*. Yukaghir (Southern / Kolyma) (interjection) *ma, ma?* ‘here it is’, *mə* (affirmative marker) ‘here it is, here you are’, (Northern / Tundra) (interjection) *ma* ‘here it is’, (focus marker) *me(r)*-. Nikolaeva 2006:255 and 261. Probably also: Yukaghir (Southern / Kolyma) *migi(də)*- ‘here’, (Northern / Tundra) *migi*- ‘here’. Nikolaeva 2006:268.
- E. Altaic: Common Turkic (**mū/*mō* >) **bū/*bō* ‘this’ > Middle Kipchak *bu* ‘this’; Chagatay *bu* ‘this’; Turkish *bu* ‘this’; Azerbaijani *bu* ‘this’; Turkmenian *bu* ‘this’ (oblique *mun-*); Tatar *bu* ‘this’; Kazakh *bul* ‘this’; Noghay *bu* ‘this’; Kirghiz *bul* ‘this’; Uzbek *bu* ‘this’; Yakut *bu* ‘this’. Menges 1968b:121—122; Róna-Tas 1998:74; Décsy 1998:61. Examples from Johanson—Csató 1998. Mongolian *mön* deictic particle serving as a demonstrative pronoun, adjective, adverb, and copula: ‘just this one; certainly, surely, really’.

Sumerian *man, mìn* ‘other, another’.

Illič-Svityč 1971—1984.II:70—71, no. 303, **mu* demonstrative pronoun: ‘this, that’; Bomhard—Kerns 1994:675—676, no. 555; Nafiqoff 2003:47—49 **mu*; Dolgopolsky 2008, no. 1510, **mu[wV]* ‘this, that’; Fortescue 1998:155.

845. Proto-Nostratic (nursery word) (n.) **ma(a)* ‘mother, mommy’, (reduplicated) **mam(m)a*, **mema* ‘mother; (mother’s) breast, milk’; used as a verb, the meaning was probably ‘to suckle, to nurse; to suck (the breast)’ (as noted by Watkins 2000:50: “[a] linguistic near-universal found in many of the world’s languages, often in reduplicated form”; see also Jakobson 1971[1960]):

Starostin—Dybo—Mudrak 2003:927 **m̄jolo* ‘(vb.) to fill; (adj.) full, thick’. (?) Proto-Altaic **milt^{he}* (~-i) ‘(vb.) to fill; (adj.) full’: Proto-Tungus **milte-* ‘full, whole’ > Evenki *milt̄r̄r̄* ‘full, whole’; Orok *milte-milte* ‘full, whole’. Proto-Mongolian **melteyi-* ‘to fill, to overflow’ > Written Mongolian *melteyi-* ‘to be full to overflowing’; Khalkha *meltiy-* ‘to fill, to overflow’; Buriat *melti-* ‘to fill, to overflow’; Kalmyk *meltā-* ‘to fill, to overflow’. Starostin—Dybo—Mudrak 2003:917 **milt^e* (~-i) ‘(vb.) to fill; (adj.) full’. Starostin—Dybo—Mudrak note: “The root is very similar to **m̄jolo* ‘full, fill’ and may indeed be derived: **m̄jol-tⁱ*. Such an explanation, however, would involve a metatony in Japanese and borrowing in T(ungus)-M(anchu) (*milte-* < Mongolian *melte-*), so we prefer to separate the two roots for the time being.” Note: while the Altaic material fits perfectly semantically here, there are problems with the phonology.

Semantically, the Tungus forms are a perfect match with those from the other Nostratic languages cited here. However, the root vowel is a problem. Perhaps, we are dealing with secondary developments within Tungus itself. In any case, the Altaic etymology proposed by Starostin—Dybo—Mudrak (2003:913) is not convincing.

Note: I have followed Kloekhorst (2008b:577—578) in assigning the meanings ‘to disappear, to vanish’ to the Hittite verb cited above and reinterpreted the meaning of the Proto-Indo-European verb as ‘to perish’ to accommodate the revised meaning of the Hittite form. I have not, however,

changed the meaning of the Proto-Indo-European noun, which I have left as ‘death’.

It is perhaps best to agree with Vycichl (1984:126—127) that “[Egyptian *mw*] has correspondents in the Semitic languages but not in the other Hamitic languages”. This means that the Proto-Afrasian root **maʔ-* ‘water’ reconstructed, for example, by Orël—Stolbova (1995:368—369, no. 1699) on the basis of data from the other Afrasian languages is to be seen as a parallel, though unrelated, form.

892. Proto-Nostratic first person singular **mi* (~ **me*) ‘I, me’, first person plural (inclusive) **ma* (~ **mə*) ‘we, us’:

Note: In Afrasian and Dravidian, first person singular **mi* and first person plural (inclusive) **ma* have been mostly lost. For an overview of the personal pronouns in Afrasian, cf. Diakonoff 1988:70—79 and Lipiński 1997:297—311 (emphasis on Semitic); for Elamo-Dravidian, cf. McAlpin 1981:112—

117; for Dravidian, cf. Krishnamurti 2003:244—253, Steever 1998a:21—23, and Zvelebil 1977:40—52.

- A. Afrasian: This stem appears only in Chadic as an independent pronoun: Hausa (pl.) *maa* ‘we’, (indirect object pl.) *manà* ‘us, to us, for us’, (pl.) *muu* ‘we, us, our’, (past tense subj. pl.) *mun* ‘we’, (continuous tense subj. pl.) *munàa* ‘we’, (indirect object sg.) *mini* ‘me, to me, for me’; Kotoko *mi* ‘we, us’; Mandara *ma* ‘we, us’; Musgu (sg.) *mu* ‘I, me’, (pl.) *mi* ‘we, us’; Bole *mu* ‘we, us’. It also serves as the basis of the first singular verbal suffix in part of Highland East Cushitic: cf. the perfect endings in Hadiyya: *-ummo*, Kambata: *-oommi*, and Sidamo: *-ummo*. In Burji and Gedeo / Darasa, on the other hand, the perfect suffixes are *-anni* and *-enne* respectively, which are based upon the first person stem **na*.
- B. Proto-Dravidian first plural suffix **-m* in: (a) first person plural exclusive **yā-m-* (obl. **yā-m-*) and (b) first person plural inclusive **ñā-m-* (obl. **ñā-m(m)-*): (a) Tamil *yām* ‘we’; Kota *a-m* ‘we’; Kannaḍa *ām* ‘we’; Telugu *ēmu* ‘we’; Kolami *a-m* ‘we’; Naikṛi *ām* ‘we’; Parji *ām* ‘we’; Gadba (Ollari) *ām* ‘we’; Maṇḍa *ām* ‘we’; Kuṛux *ēm* ‘we’; Malto *ém* ‘we’; etc. (cf. Burrow—Emeneau 1984:467—468, no. 5154); (b) Tamil *nām* ‘we’ (inclusive); Malayalam *nām* ‘we’ (inclusive); Kuṛux *nām* ‘we’ (inclusive); Malto *nám* ‘we’ (inclusive); etc. (cf. Burrow—Emeneau 1984:322, no. 3647). It also occurs as the first plural suffix in finite verbs: **-ṽm* > Tamil *-mu*, *-mi* first plural exclusive suffix, *-amu* first plural inclusive suffix; Kui *-amu*, *-ami* first plural exclusive suffix; Kuwi *-amu*, *-omi* first plural exclusive suffix; Kuṛux *-m* first plural exclusive suffix; Malto *-im*, *-em*, *-om* first plural exclusive suffix; Parji *-am*, *-um*, *-om*, *-m* first plural exclusive suffix; Kolami *-um*, *-am*, *-m* first plural exclusive suffix, *-am* first plural inclusive suffix; etc. Krishnamurti 2003:246—248 and 308—312. Finally, it is found in the alternative forms of the first plural exclusive pronoun in: Telugu (nom. pl.) *mēmu* ‘we’, (obl. pl.) *mamm-*, *mā-* ‘us’; Gondi (dial.) (nom. pl.) *mamm-āṭ*, *mā-ṭ*, *mām-aṭ*, *mamm-oṭ*, *mamo-o*, *mar-at*, *mamm-a*, *mā-m* ‘we’, (obl. pl.) *mā-* ‘us’; Koṇḍa (nom. pl.) *māp* ‘we’, (obl. pl.) *mā-* ‘us’; Kui (nom. pl.) *māmu* ‘we’, (obl. pl.) *mā-* ‘us’; Kuwi (nom. pl.) *māmu* ‘we’, (obl. pl.) *mā-* ‘us’; Pengo (obl. pl.) *maṅg-*, *mā-* ‘us’. Krishnamurti 2003:247.
- C. Proto-Kartvelian **me-*, **men-* first person personal pronoun stem: Georgian *me-*, *men-*, *mena-* ‘I’; Mingrelian *ma-* ‘I’; Zan *ma*, *man* ‘I’; Svan *mi-* ‘I’. It occurs in Georgian *m-* first person singular verb prefix (objective conjugation) and is also found in Svan as the first person personal formant (objective) *m-* (cf. Tuite 1997:23). Schmidt 1962:123 **me* ‘I’; Klimov 1964:132 **me(n)* and 1998:119 **men* ‘I’; Fähnrich—Sardshweladse 1995:223—224 **m-* first person verb prefix, and 233—234 **me-* ‘I’; Fähnrich 2007:273 **m-* and 284 **me-*.

Starostin—Dybo—Mudrak (2003:342) note: “An alternation **bi* / **mi-ne-* (sing.); **ba* / **mju-n-* (plur.) should be reconstructed”. In Turkic, **-m* occurs as the first person singular personal marker of the subject in the verb and as possessive in the noun (cf. Dolgopolsky 1984:77). Similar suffixes are found in the Tungus languages — first person possessive suffixes: (sg.) **-m*, (pl.) **-m* plus plural marker (exclusive), with variation between *m-*, *b-*, and *w-* in the individual daughter languages (cf. Sinor 1988:726).

Fortescue 2005:179; Mudrak 1989b:102 **mur*, **murx-* ‘we’. Proto-Chukchi-Kamchatkan suffix **-m* in the first person singular independent personal pronoun **kə-m* ‘I’: Chukchi *γəm* ‘I’ (in predication: *-iyəm ~ -eyəm*); Kerek *umju* ‘I’; Koryak *γəmmo* ‘I’; Alyutor *γəmmə* (Palana *γəmmə*) ‘I’; Kamchadal / Itelmen *kəm(m)a* ‘I’; *kəm(m)an* ‘my’. Proto-Gilyak / Nivkh **mirn* or **mern* ‘we’ (inclusive): Amur first person plural *mer* ‘we’ (inclusive) (West Sakhalin Amur *meř* ‘we’ [inclusive]); North Sakhalin *mir* ‘we’ (inclusive); East Sakhalin *mi(ř)n* ‘we’ (inclusive); South Sakhalin *miřn* ‘we’ (inclusive). Gruzdeva 1998:25—26; Fortescue 2016:105. Proto-Gilyak / Nivkh **mengin* (dual) ‘we two’: Amur *megi* (dual) ‘we two’ (West Sakhalin Amur *mergu*, *megi* [dual] ‘we two’); North Sakhalin *memak* (dual) ‘we two’; East Sakhalin *mej* (dual) ‘we two’; South Sakhalin *mej* (dual) ‘we two’. Gruzdeva 1998:25—26; Fortescue 2016:103. Note: Fortescue considers **mengin* ‘we two’ to be a derivative of **men* / **menj* ‘of two people’ and comitative **-kin*.
- I. Eskimo-Aleut: Eskimo: perhaps preserved in Sirenik *məŋa* ‘I’. In Aleut, **-m(V)* is found in the affixed first person plural forms: (Central) *-mas*, (Eastern and Western) *-man*.
- J. Etruscan *mi* ‘I’, *mini* ‘me’.

Sumerian (Emesal) *ma(-e)*, *me-a*, *me-e* ‘I’. According to earlier theories, the first plural pronominal suffix was *-me-*, but Thomsen (1987:148) points out that *-me-* is used as a dative element only, in the meaning ‘for us’. She considers *-me-* to be a case element rather than a pronominal element. However, both its form and meaning indicate that *-me-* should be included here. The first plural possessive suffix is *-me* ‘our’.

893. Proto-Nostratic root *miʔ- (~ *meʔ-):

(vb.) *miʔ- ‘to cut’;

(n.) *miʔ-a ‘cutting instrument: knife’ (later also ‘sickle, scythe’)

- A. Afrasian: Egyptian *mʒ* phonetic interpretation of the hieroglyph that represents a sickle, *mʒ* ‘sickle-shaped end of a sacred boat’ (nautical term), (obsolete) *mʒz* ‘knife’. Hannig 1995:313 and 321; Erman—Grapow 1926—1963.2:6 and 2:31; Gardiner 1957:567. Central Chadic: Bachama *má* ‘to cut’; Logone *miiyo* ‘knife’. Jungraithmayr—Ibrizimow 1994.II:97.
- B. Proto-Indo-European *meʔ- (> *mē-) ‘to mow, to reap’: Greek ἀμάω ‘to reap’, ἄμητος ‘harvest’; Old English *māwan* ‘to mow’, *māþ* ‘the act of mowing; hay-harvest’; Old Frisian *mēa* ‘to mow’; Middle Low German *mei(g)en* ‘to mow’; Dutch *maaien* ‘to mow’; Old High German *māen* ‘to mow, to cut, to reap’ (New High German *māhen*). Pokorny 1959:703 *mē- ‘to mow’; Walde 1927—1932.II:259 *mē-; Mann 1984—1987:747 *mējō (*mājō) ‘to mow’; Watkins 1985:39 *mē- (contracted from *meʔ-) and 2000:52 *mē- ‘to cut down grass or grain with a sickle or scythe’ (oldest form *₂meʔ₁-, contracted to *₂mē-); Gamkrelidze—Ivanov 1984.II:691 *meH(i)- and 1995.I:597 *meH(i)- ‘(vb.) to ripen, to harvest; (n.) time of ripening harvest’; Mallory—Adams 1997:258 *_h₂meh₁- ‘to mow’; Beekes 1969:43 *_h₂meh₁-/*_h₂emh₁- and 2010.I:84 *_h₂meh₁-; Chantraine 1968—1980.I:72; Frisk 1970—1973.I:88; Orël 2003:269 Proto-Germanic *mēanan; Kroonen 2013:360 Proto-Germanic *mēan- ‘to mow’; Onions 1966:594; Klein 1971:479 *mē-, *mā- ‘to mow’; Kluge—Mitzka 1967:453—454; Kluge—Seebold 1989:455. Note: According to Puhvel (1984— .3:69—75), Hittite (gen. sg.) *ḫa-me-eš-ḫa-aš* ‘spring(-summer)’ does not belong here. He cautiously supports Goetze’s suggestion that it may originally have been a compound: **ḫant-wešḫa-* ‘front-spring’, which was shortened to the attested form as follows: **ḫan-wešḫa-* > **ḫamwešḫa-* > *ḫam(m)ešḫa-*. Puhvel notes that a similar construction is found in Italian *primavera* ‘spring’. Though Kloekhorst (2008b:279—281) supports Sturtevant’s proposal that Hittite *ḫam(m)ešḫa-* ‘spring’ is related to the forms listed above, the fact remains that spring is not the season during which crops are harvested, the use of the Sumerogram Ú.BAR₈ ‘harvest’ notwithstanding. Rather, spring is the season during which crops are planted. Thus, it seems prudent to exclude Hittite *ḫam(m)ešḫa-* here.
- C. Altaic: Proto-Tungus *mū- (< *mūy-) ‘to cut’ > Evenki *mī-* ‘to cut’; Lamut / Even *mī-ne-* ‘to cut’; Negidal *mī-* ‘to cut’; Manchu *mei-le-* ‘to carve up, to dissect (a carcass), to cut off, to cut out’, *mei-te-* ‘to cut off, to cut in two, to excise’; Ulch *ḡui-* ‘to cut’; Orok *mī-* ‘to cut’; Nanay / Gold *mui-* ‘to cut’;

Oroch *mi-* ‘to cut’; Udihe *mi-ne-* ‘to chop (with an axe)’. Starostin—Dybo—Mudrak 2003:949 **mūjV* ‘to cut, to tear’.

894. Proto-Nostratic root **mig-* (~ **meg-*):

(vb.) **mig-* ‘to give’;

(n.) **mig-a* ‘gift’

- A. Afrasian: Proto-Semitic **mag-an-* ‘to deliver, to offer’ > Akkadian *magannu* ‘gift, present’; Amorite *mgn* ‘to present, to donate’; Hebrew (piel.) *miggēn* [ʔʕʕ] ‘to deliver up, to deliver, to give’; Post-Biblical Hebrew *maggān* [ʔʕʕ] ‘gift, present’; Phoenician *mgn* ‘to deliver, to offer’; Ugaritic *mgn* ‘to beseech (with gifts)’; Jewish Palestinian Aramaic *maggān* ‘(undeserved) gift, grace’; Arabic *maġġān* ‘free, free of charge, gratuitous’ (Aramaic loan). Murtonen 1989:253; Klein 1987:316. The Semitic forms are usually taken to be loans from Sanskrit (cf. Murtonen 1989:253). However, O’Connor (1989:25—32) has persuasively argued against Sanskrit origin.
- B. Proto-Indo-European **megh-* ‘to give’: Sanskrit *mámhate* (< **me-mgh-*) ‘to give, to grant, to bestow’, *maghá-h* ‘gift, reward, bounty, wealth, power’; Avestan *maga-* ‘gift, grace’. Mayrhofer 1956—1980.II:537—538 and II:545—546.

895. Proto-Nostratic root **miḥ-* (~ **meh-*):

(vb.) **miḥ-* ‘to measure, to mark off’;

(n.) **miḥ-a* ‘measure, measurement’

- A. Afrasian: Egyptian *mḥ* a linear measure: ‘cubit, forearm’; Coptic *mahe* [𓄎𓄏𓄐] ‘ell, cubit’. Erman—Grapow 1921:68 and 1926—1963.2:120; Hannig 1995:353; Gardiner 1957:569; Faulkner 1962:113; Černý 1976:99; Vycichl 1983:129.

911. Proto-Nostratic first person singular personal pronoun *na (~ *nə) ‘I, me’:

Note: On the basis of Dravidian (and possibly Altaic), the original form of this stem may have been **ŋa* (~ **ŋə*), but this is not certain. Sumerian [Emegir] *ĝá.e* [= /*ŋa*-/] ‘I’ supports such a reconstruction as well.

- A. Proto-Afrasian **nV* first person singular personal pronoun: ‘I, me’: Semitic: first person verb suffix: Akkadian *-ni*; Hebrew *-nī* [ʾnī]; Syriac *-n*; Ugaritic *-n*; Arabic *-nī*; Geez *-ni* [-**ḏ**]; etc. (cf. Moscati 1964:106, §13.14). Chadic independent pronoun: Hausa *ni* ‘I, me’; Ngizim *na(a)* ‘I’; Mubi *ni* ‘I’. Ongota *naa-ku/na* ‘for me, to me’, *s-ine* ‘my’ (cf. Fleming 2002b:50). Ehret (1995:362 and 363) reconstructs the following first person pronouns for Proto-Afrasian: **ʔan*-/**ʔin*- or **an*-/**in*- ‘I’, **ʔann*-/**ʔinn*- or **ann*-/**inn*- ‘we’ (= **ʔan*-/**ʔin*- or **an*-/**in*- + old Afrasian pl. in **-n*). The following first person singular independent personal pronouns are found in the Afrasian daughter languages: Semitic: Arabic *ʔanā* ‘I’; Sabaeen *ʔn* ‘I’; Hebrew *ʔānī* [ʾnī], *ʔānōxī* [ʾnōxī] ‘I’; Syriac *ʔenā* ‘I’; Eblaite *ʔanna* ‘I’; Old Babylonian *anāku* ‘I’; Ugaritic *án*, *ánk* ‘I’; Geez / Ethiopic *ʔana* [**አነ**] ‘I’; Tigrinya *ʔanā* ‘I’; Tigre *ʔana* ‘I’; Amharic *əne* ‘I’. Moscati 1964:102, §13.1; Lipiński 1997:298—299; Stempel 1999:82; Zammit 2002:80. Egyptian *ink* ‘I’; Coptic *anok* [**ΑΝΟΚ**] ‘I’. Erman—Grapow 1921:15 and 1926—1963.1:101; Hannig 1995:79—80; Faulkner 1962:24; Gardiner 1957:53, §64, and 554; Černý 1976:9; Vycichl 1983:12. Berber: Tuareg *nək* ‘I, me’; Ghadames *nəc*, *nəccan* ‘me’; Mzab *nəc*, *nəcci*, *nəccin* ‘me’; Kabyle *nəkk*, *nəkki*, *nəkkini* ‘me’; Tamazight *nəkk*, *nəç* ‘me’. East Cushitic: Burji *áni* ‘I’; Gedeo / Darasa *ani* ‘I’; Saho-Afar *an-u* ‘I’; Hadiyya *ani* ‘I’; Kambata *ani* ‘I’; Sidamo *ane*, *ani* ‘I’; Bayso *an-i*, *an-a*, *an-ni* ‘I’; Rendille *an(i)* ‘I’; Galla / Oromo *an(i)* ‘I’; Dullay *an-o* ‘I’. Sasse 1982:26; Hudson 1989:83. Central Cushitic: Bilin *ʔan* ‘I’; Xamir *an* ‘I’; Kemant *an* ‘I’; Awngi / Awiya *án/áni* ‘I’. Appleyard 2006:87. Beja / Beḏawye *ʔane* ‘I’. Reinisch 1895:20. Southern Cushitic: Alagwa *an*, *ana* ‘I’; Ma’a *áni* ‘I’; Iraqw *an*, *ani* ‘I’; Burunge *an*, *ana* ‘I’; Dahalo *ʔányi* ‘I’. Ehret 1980:283. Ongota *naa-ku/na* ‘for me, to me’, *s-ine* ‘my’ (cf. Fleming 2002b:50). Chadic independent pronoun: Hausa *ni* ‘I, me’; Ngizim *na(a)* ‘I’; Mubi *ni* ‘I’.
- B. Proto-Dravidian first person singular stem **ñā-n-* and the first singular suffix **-n* in: first person singular **yā-n-* (obl. **yā-n-*), alternative first

- person singular **ñā-n-* (obl. **ñā-n-*, also **ñā-*): Tamil *yāñ*, *ñāñ* ‘I’; Malayalam *ñān* ‘I’; Kota *a-n* ‘I’; Toda *o-n* ‘I’; Kannaḍa *ān*, *nān* ‘I’; Koḍagu *na-nī*, *na-* ‘I’; Tuḷu *yānu*, *yēnu* ‘I’; Telugu *ēnu*, *nēnu* ‘I’; Kolami *a-n* ‘I’; Naikṛi *ān* ‘I’; Parji *ān* ‘I’; Gadba *ān* ‘I’; Gondī *anā*, (emphatic) *annā*, *nannā*, *nanā*, *nana* ‘I’; Koṇḍa *nān(u)* ‘I’; Pengo *ān/āney* ‘I’; Maṇḍa *ān* ‘I’; Kui *ānu*, *nānu* ‘I’; Kuwi *nānū* ‘I’; Kuṛux *ēn* ‘I’; Malto *én* ‘I’; Brahui *ī* ‘I’. Burrow—Emeneau 1984:468, no. 5160. It also occurs as the first singular suffix in finite verbs *-*ñ* > Old Malayalam *-ēn*, *-an*; Iruḷa *-e/-en*; Kota *-ē(n)*; Toda *-en*, *-in*, *-n*; Old Tamil *-ēñ*, *-añ*; Kannaḍa *-eM*; Telugu *-nu*, *-ni*; Koṇḍa *-a*; Kui *-enu*; Kuwi *-ni*; Pengo *-aṅ*; Kolami *-un*, *-n*, *-an*; Naikṛi *-un*, *-n*, *-an*; Parji *-on*, *-en*, *-an*, *-in*, *-n*; Gadba *-an*, *-on*, *-en*, *-n*; Kuṛux *-n*; Malto *-in*, *-en*, *-on*. Krishnamurti 2003:244—245 and 308—312.
- C. Indo-European: Tocharian B first singular (nom.) *ñäs/ñis* ‘I’, Tocharian A *nās* (nom. m.)/*ñuk* (nom. f.). Initial *ñ-* may be derived from earlier **ñ(ā-)* (ultimately < **n-i-* ?). Indo-Europeanists have been at a loss about how to account for the Tocharian forms (cf. Adams 1999:265—266), and most of the explanations offered to date have been makeshift at best. Assuming that Tocharian has preserved an original **n(-i)-*, which has been lost elsewhere within Indo-European, may be a simpler explanation. This is quite speculative, however.
- D. Altaic: In Mongolian, besides **min-*, there is an alternative stem **na-ma-*, which serves as a base for the oblique cases of the first person personal pronoun: Middle Mongolian *namay*, *nadur* ~ *nada*; Dagur *namda*, *nada*; Monguor *ndā*; Moghol *nanda*; Ordos *namādu*, *nada*; Khalkha *nad-*, *namay(g)*; Buriat *namda*, *namā(yi)*; Kalmyk *nan-*, *namā(g)*. Poppe 1955:209—212. Poppe notes that the origin of this stem is not clear, but he mentions the fact that **na-* is identical with Korean *na* ‘I’. Starostin—Dybo—Mudrak 2003:1024 reconstruct Proto-Altaic **ṅa* first person pronoun. They note: “The root serves as oblique stem in Mong[olian], which may have been its original function...”
- E. Proto-Gilyak / Nivkh independent first person singular personal pronoun **nvi* ‘I’: Amur *nvi* ‘I’; North Sakhalin *nvi* ‘I’; East Sakhalin *nvi* ‘I’; South Sakhalin *nvi* ‘I’. Gruzdeva 1998:25; Fortescue 2016:114—115.

Sumerian: In Emegir, the first singular (subject) is *ḡá.e* (= /ṅa-/) ‘I’. This may belong here if we assume that the original form contained an initial velar nasal, which was retained in Sumerian, having been replaced by a dental nasal in Nostratic (except perhaps in Dravidian and Altaic).

Chukchi-Kamchatkan: Proto-Chukotian **ŋan* (or **ŋæn*) ‘that (over there)’ > Chukchi *ŋaan-qen* ‘that (visible but distant)’, *ŋan* (deictic particle) ‘over there’, (loc.) *ŋenku/yenku* ‘there’, *ŋanqo(re)* ‘to here, this way’ (= *ŋaanqo(re)* ‘from there?’), *ŋenri(lə)* ‘to there (far from the speaker)’; Kerek *ŋaan-in(a)* ‘that’, *ŋannəku* ‘there’, *ŋanci* ‘to there’; Koryak *ŋajen* ‘that’, *ŋanko* ‘there, then’, *ŋakəje* ‘to there’, *ŋanqo* ‘from there, since then’, *ŋano* (deictic) ‘there’; Alyutor *ŋan-in* (Palana *ŋan-en*) ‘that’. Fortescue 2005:193. Note: initial *ŋ-* in these and the following forms instead of the expected *n-* is problematic. Proto-Chukotian **ŋun* ‘over there’ > Chukchi *ŋun-qin* ‘that off to the side from the speaker’, *ŋoonko* ‘there (far off)’, *ŋoon-en-qac* ‘on the far side’, *ŋuunri*, *ŋoonri* ‘to over there’; Koryak *ŋonək* ‘over there’, *ŋunin-* ‘that one (away from the speaker)’; Alyutor *ŋoon* ‘over there’, (Palana) *ŋonk* ‘there, then’, *ŋoonək* ‘there (far away)’, *ŋoontij* ‘to over there’, *ŋonin* ‘that (far) over there’. Fortescue 2005:199; Mudrak 1989b:97 **ŋu-* ‘that’. Proto-Chukchi-Kamchatkan **ŋut* ‘this (here)’: Chukchi *ŋot-qen* ‘this’, *ŋoot* ‘(just) there’, *ŋotə* ‘over there (behind or to the side of the speaker)’, *ŋotən-qən*, *ŋoten-qan* ‘that (behind the speaker but ahead of the addressee)’; Kerek *uccin*, *uccaj*, *uttəX?annu* ‘this’; Koryak *wuccin* ‘this’, *woto(qun)* ‘here you are’, *woto*, *wotənno* ‘this’ (pl. *wotəccu*); Alyutor *wuttin(a)* ‘this’; Kamchadal / Itelmen *nux* ‘here/there you are’, *nuxqene* ‘here’. Fortescue 2005:199—200; according to Fortescue, the forms with initial *u-* in Kerek and *wu-* in Koryak and Alyutor are derived from **yu-*. Proto-Chukchi-Kamchatkan

**ɣutku* ‘here’ (locative case of **ɣut*): Chukchi *ɣutku* ‘here’, *ɣotqo(rə)* ‘from here’; Kerek *uttaku* ‘here’; Koryak *wutku* ‘here’, *wotkaj* ‘to here’, *wotqo* ‘from here’; Alyutor *ɣutku* (Palana *wutəkku*) ‘here’; Kamchadal / Itelmen *ɣuʔn* ‘here’. Fortescue 2005:200.

914. Proto-Nostratic interrogative-relative particle **na-* (~ **nə-*):

- A. Proto-Afrasian **na-* interrogative-relative particle: Semitic: Geez / Ethiopic *-nu* [-ɲ] interrogative particle; Amharic *-nə* interrogative particle; Ancient Harari *-n* in *mist-n* ‘how much?’. East Cushitic: Burji *-na* positive affirmative copula; Sidamo *-ni* interrogative copula; Gedeo / Darasa *-n* positive affirmative copula. Sasse 1982:150. Central Cushitic: Bilin *-n* interrogative particle. Reinisch 1887:279. Proto-Omotic **oon* ‘who?’ > Gemu (nom.-acc.) *oon+i/a* ‘who?’, (pl.) *oon+anta*; Kullo (acc.) *oni+n* ‘whom?’; Welaitta (subject/object) *oon+i/oon+a* ‘who?’. Note also the Mao (Hozo) interrogative stem *na* ‘when?’. Bender 2000:197 and 230. Ongota *na* ‘what?’, *neeni* ‘what?, why?’, *niike* ‘what?’. Fleming 2002b:61.
- B. Proto-Indo-European interrogative particles **ǵan-*, **-ne*: Latin *an* particle indicating alternative answers, *-nē* interrogative enclitic particle; Gothic *an* interrogative particle indicating uncertainty of speaker. Pokorny 1959:37 **an* demonstrative particle; Walde 1927—1932.I:56 **an*; Watkins 1985:2 **an* demonstrative particle; Mann 1984—1987:21 **an* sentence particle: ‘if, whether’, 829 **-nē* reinforcing particle in some pronouns and adverbs; Walde—Hofmann 1965—1972.I:44 and II:150 **nē* (ablaut variant **nē*); Ernout—Meillet 1979:30—31 **an* and 433—434; Lehmann 1986:30; Feist 1939:41; Krause 1968:207; De Vaan 2008:40—41 and 403. Lindsay (1894:605) elaborates: “In class. Latin *-nē* is the general interrogative particle, while *nonnē* is limited to questions which expect an affirmative, *num* to those which expect a negative, answer.” Further on (1894:605—606), Lindsay notes: “*-Ne* is probably I[ndo-]Eur[opean] **nē* (Zend *-na* appended to Interrogatives, e.g. *kas-nā* ‘who then?’; cf. O[ld] H[igh] G[erman] *na weist tu na*, ‘nescisne?’)...” Finally (1894:606), Lindsay derives Latin *an* from the pronominal stem found in Lithuanian *añs* ‘that’, Old Church Slavic *onъ* ‘that’. As noted by Lehmann (1986:30): Gothic *an* is “[n]ot related to Gk *ǻv*, a modal ptc; this rather from *εἰ κάv* ← *κεv*, wrongly divided as *εἰκ ἄv*; similarly Hom *οὐκ ἄv* ← **ου κάv*...” (cf. also Chantraine 1968—1980. I:82).
- C. Proto-Altaiic **ɣ[iV]* interrogative pronoun: ‘what?, who?’: Proto-Tungus **ɣū* ‘who?’ > Evenki *ɣī, nī* ‘who?’; Lamut / Even *nī, ɣī* ‘who?’; Negidal *nī*,

ŋi ‘who?’; Manchu *we* ‘who?’ (*webe* ‘whom?’); Ulch *ŋui, ui* ‘who?’; Orok *ŋui* ‘who?’; Nanay / Gold *ui* ‘who?’; Oroch *ŋi* ‘who?’; Udihe *nī* ‘who?’; Solon *nīχē* ‘who?’. Proto-Turkic **nē*- ‘what; what?’ > Old Turkic (Orkhon, Old Uighur) *ne* ‘what; what?’; Karakhanide Turkic *ne* ‘what; what?’; Turkish *ne, neme* ‘what?; what, whatever, how’, *nerē* ‘what place?, what part?’, *nekadar* ‘how much?’; Gagauz *ne* ‘what; what?’; Azerbaijani *nā* ‘what; what?’; Turkmenian *nā, nāmā* ‘what; what?’; Uzbek *ne* ‘what; what?’; Uighur *nā* ‘what; what?’; Karaim *ne* ‘what; what?’; Tatar *ni, nerse* ‘what; what?’; Bashkir *ni, nāmā* ‘what; what?’; Kirghiz *ne, neme* ‘what; what?’; Kazakh *ne* ‘what; what?’; Noghay *ne* ‘what; what?’; Oyrot (Mountain Altai) *ne, neme* ‘what; what?’; Chuvash *məʷn* (metathesis from **ne-me*) ‘what; what?’. Starostin—Dybo—Mudrak 2003:1034 **ŋ[iV]* ‘what?, who?’ (interrogative pronoun). Proto-Turkic **nē*- ‘what; what?’ and its derivatives are likely to be archaisms since no other native forms in Turkic begin with *n-* (cf. Johanson 1998a:31). Róna-Tas (1998:74), on the other hand, remarks that “[i]t is unlikely that Old Turkic *ne* ‘what’ reflects a Proto-Turkic form, since it would be the only native Turkic word with initial *n*”. Décsy (1998:117) lists the following Old Turkic forms beginning with *n*: *nā* ‘what; what?’, *nāčā* ‘how many?’, *nāčük* ‘how?’, *nāčükläti* ‘why?’, *nägü* ‘what sort?’, *nägüdä* ‘due to’, *nägül* ‘how?’, *nägülüg* ‘how?’, *nälük* ‘really?, or what?’, *nāmā* ‘whatever’, *nāmān* ‘wie?, wie!’, *nān* ‘not the least’, *nānčā* ‘according to’, *nāŋäyü* ‘special’, *nätäg* ‘just as’.

- D. Chukchi-Kamchatkan: Proto-Chukotian **naqam* ‘however’ > Chukchi *naqam* ‘but, however’; Kerek *jaqam* ‘but, however’; Koryak *naqam* ‘but, however’; Alyutor *naqam* ‘right away, only’; Kamchadal / Itelmen (Sedanka) *jaq* ‘however’. Fortescue 2005:186.
- E. Proto-Gilyak / Nivkh **nar* ‘who’: Amur *aŋ* ‘who’ (according to Fortescue 2016:111, “probably from **narŋa* with focal interrogative affix **-ŋa*”) (West Sakhalin Amur *aŋ(ŋ)a* ‘who’); North Sakhalin *nař / narata* ‘who’; East Sakhalin *nař / nar* ‘who’, *nařčij* ‘anyone, no one’; South Sakhalin *nat* ‘who’. Gruzdeva 1998:28; Fortescue 2016:111.
- F. Proto-Eskimo **na-* ‘where’: Alutiiq Alaskan Yupik *na-* ‘where’; Central Alaskan Yupik *na-* ‘where’; Naukan Siberian Yupik *na-* ‘where’; Central Siberian Yupik *na-* ‘which’; Sirenik *na-* ‘where’; Seward Peninsula Inuit *na-* ‘where’; North Alaskan Inuit *na-* ‘where’; Western Canadian Inuit *na-* ‘where’; Eastern Canadian Inuit *na-* ‘where’; Greenlandic Inuit (North / Polar Greenlandic) *na-* ‘where’. Fortescue—Jacobson—Kaplan 1994:204. Proto-Eskimo **nallir* ‘which’: Alutiiq Alaskan Yupik *naliq* ‘which (of them)’; Central Alaskan Yupik *naliq* ‘which (of them)’; Naukan Siberian Yupik *naliq* ‘which (of them)’; Central Siberian Yupik *naliq* ‘which (of them)’; Sirenik *nacaX* ‘which’; Seward Peninsula Inuit *nalliq* ‘which’; North Alaskan Inuit *nalli(q)* ‘which’; Western Canadian Inuit *nalliat* ‘which of many’; Eastern Canadian Inuit *nalli(q)* ‘which’; Greenlandic Inuit (North / Polar Greenlandic) *nalliq* ‘which’. Fortescue—Jacobson—Kaplan 1994:204. Proto-Eskimo **nayu* and **na(C)uŋ* ‘where (is it)’:

Central Alaskan Yupik *nauwa*, *nauxa* ‘where’; Naukan Siberian Yupik *naa* ‘where’; Central Siberian Yupik *naayu* ‘where is it?’; Seward Peninsula Inuit *nauŋ* ‘where have you come from?’; North Alaskan Inuit *nauŋ* ‘where’; Western Canadian Inuit *nauk* ‘where’; Eastern Canadian Inuit *nauk* ‘where’; Greenlandic Inuit *naak* ‘where’. Fortescue—Jacobson—Kaplan 1994:204. Proto-Yupik-Sirenik **natə* ‘which (part)’ > Alutiiq Alaskan Yupik *natə* ‘what part’; Central Alaskan Yupik *natə* ‘what part’; Central Siberian Yupik *natə* ‘where’; Sirenik *natəlyuX* ‘which’, *natu* ‘where’. Fortescue—Jacobson—Kaplan 1994:204.

- G. Etruscan relative pronoun *an* (*ana*, *ane*, *anc*, *ancn*, *ananc*) ‘who, which’ (also ‘he, she, this, that’). Bonfante—Bonfante 2002:214. Perhaps also found in *nac* ‘how, as, because, since’.

Sumerian *a-na* ‘what?’. *a-na* can also be used as an indefinite or relative pronoun (cf. Thomsen 1987:75). Note also the indefinite pronoun (animate and inanimate) *na-me* ‘anyone, anything; (with negative verb) no one, nothing’ (cf. Thomsen 1987:78).

Dolgopolsky 2008, no. 1633, **ŋ[U]* (1) ‘thing’, (2) ‘what?’; Greenberg 2000:232—234, §64. Interrogative N.

915. Proto-Nostratic negative/prohibitive particle **na* (~ **nə*), **ni* (~ **ne*), **nu* (~ **no*) ‘no, not’:
- A. Afrasian: Egyptian *n*, *nn*, *ny*, *nw* negative particle: ‘not’; Coptic *n-* [n-] negative particle. Hannig 1995:387—389; Faulkner 1962:125 and 134; Gardiner 1957:572 and 574; Erman—Grapow 1921:76 and 1926—1963.2:195; Vycichl 1983:135; Černý 1976:103. A negative *n* is also found in Omotic (cf. Note: Terms such as Latin *nāvia* ‘trough’, Welsh *noe* ‘large bowl’, etc. are secondary derivatives. The original meaning was ‘boat’, later applied in several daughter languages to things ‘shaped like a boat’ (as in Bihari *nāw* ‘feeding trough’ [< *nāwá* ‘boat’; cf. *nāw*, *naiyā* ‘boat’]). A relationship between terms for ‘boat’ and ‘trough, vessel, pot, bowl, etc.’ is not uncommon and is found, for example, in Dravidian: cf. Parji *ōḍa* ‘boat, trough’ (cf. Burrow—Emeneau 1984:99, no. 1039); Malayalam *kalam* ‘pot, vessel, ship’ (cf. Burrow—Emeneau 1984:122, no. 1305); Tamil *vaḷḷam* ‘a dish for use in eating or drinking, hour-glass, a measure of capacity, a measure of grain, a boat made of the trunk of a tree, canoe’ (cf. Burrow—Emeneau 1984:480, no. 5315). See also Buck (1949:10.83 boat) for Indo-European terms. For the derivation of terms for ‘boat’ from ‘to come, to go, to journey, to travel, etc.’, cf. Tamil *kaṭattu* (*kaṭatti-*) ‘(vb.) to cause to go, to drive, to transport, to pass (as time); (n.) boat’, extended form of *kaṭa* ‘to pass through, to traverse, to cross, to exceed, to excel, to win, to overcome, to transgress; to go, to proceed, to pass (as time, water, clouds, etc.)’ (cf. Burrow—Emeneau 1984:104, no. 1109). Note also Buck’s (1949:10.36 sail [vb.]) comments: “The verbs for ‘sail’ are partly from the same root that is widespread also in those for ‘float’ and ‘swim’ (cf. 10.34). Others are deriv[atives] of nouns for ‘sail’, ‘ship’, or ‘sea’. Some are words for ‘row’ extended to ‘travel by water, sail’, and some are general words for ‘travel, go’, used for ‘sail’.” Derivation from ‘to travel, to go’ parallels what is found in Egyptian *n^ʿi* ‘to come, to go, to arrive, to journey, to travel (by boat), to sail’, cited above.

930. Proto-Nostratic second person personal pronoun stem **ni* (~ **ne*) and/or **na* (~ **nə*) ‘you’:

- A. Afrasian: Proto-Omotic **ne* ‘you’ > Zayse second singular (subject) *né(j)* ‘you’, bound form *-n*; Bench / Gimira (subject) *nen* ‘you’, (oblique) *ni*; Yemsa / Janjero *ne* ‘you’; etc. Bender (2000:196) reconstructs a Proto-Omotic second person singular independent personal pronoun **ne* ‘you’. Bender (2000:197) implies, however, that there may have been a reversal of the Afrasian **n* (first person) ~ **t* (second person) pattern to **t* (first person) ~ **n* (second person) in Omotic. But note the patterning in Elamite (below).
- B. Elamo-Dravidian: Elamite: The possessive pronouns of the second series, or the possessive pronouns proper in Royal Achaemenid Elamite were: (1st person sg.) *-ta*, (2nd person sg.) *-ni*, (3rd person sg.) *-e* (cf. Khačikjan 1998:26—27). Middle Elamite second person singular personal pronoun (nom. sg.) *ni* ~ *nu* ‘you, thou’ (Old Elamite *ni*), (pl.) *num*, *numi* ‘you’. The Proto-Dravidian second person personal pronouns, singular and plural, may be reconstructed as follows:
- (a) Singular **nīn*-: Tamil *nī* ‘you’; Malayalam *nī* ‘you’ (obl. *nin(n)*-); Kota *nī* ‘you’; Toda *nī* ‘you’; Kannaḍa *nīm*, *nīn(u)* ‘you’; Koḍagu *nī-nī/ni* ‘you’; Telugu *nīvu* ‘you’; Kolami *nī-v* ‘you’; Naikṛi *nīv* ‘you’;

- Koṇḍa *n̄n* ‘you’; Kuwi *n̄nū* ‘you’; Kuṛux *n̄n* ‘you’; Malto *n̄n* ‘you’; Brahui *n̄i* ‘you’;
- (b) Plural **n̄m-*: Tamil *n̄m*, *n̄r*, *n̄yir*, *n̄vir*, *n̄nkaḷ* ‘you’; Malayalam *n̄nnaḷ* ‘you’; Kota *ni-m* ‘you’; Toda *n̄im* ‘you’; Kannaḍa *n̄m*, *n̄vu*, *n̄ngaḷ* ‘you’; Koḍagu *niṅga* ‘you’; Kolami *ni-r* ‘you’; Naikṛi *n̄r* ‘you’; Kuṛux *n̄m* ‘you’; Malto *n̄im* ‘you’; Brahui *num* ‘you’.

Krishnamurti 2003:249—252 (sg.) **n̄n-*, (pl.) **n̄m-*; Burrow—Emeneau 1984:327, no. 3684, and 328, no. 3688. McAlpin (1981:114—115) reconstructs the Proto-Elamo-Dravidian second person independent personal pronoun singular as **ni* ‘you, thou’ and the second person possessive clitic as **-ni*. For the second person personal pronoun plural, he reconstructs Proto-Elamo-Dravidian **nim*.

- C. Uralic: Greenberg (2000:76—77) notes that there is some evidence for a second person personal pronoun *n-* in Uralic, especially in Ob-Ugric. However, as he rightly points out, this evidence is extremely controversial and has been variously explained by specialists. As noted by Marcantonio (2002:226): “...the Possessive endings of the 2nd Singular in Vogul and Ostyak differ, yet again, from those of Hungarian and other U[ralic] languages; in fact, Vogul and Ostyak have the ending *-(V)n* and not *-t* as reconstructed for P[roto]-U[ralic]. Compare Hun[garian] *ház-a-d* vs Finn[ish] *talo-si* ‘your house’ vs Vog[ul] *ula-n* ‘bow-your’ (Keresztes 1998: 411). Several connections have been proposed for *-(V)n* (compare for example Sinor 1988: 733; Hajdú 1966: 132-3). Among these connections, one may consider that of the formant *-n-* in P[roto]-Samoyed. As Janhunen puts it (1998: 471):

From the Proto-Uralic point of view, one of the most interesting features is that the second-person singular predicative ending seems to have been *-n* in proto-Samoyedic, as opposed to **-t* in most sub-branches of Finno-Ugric.

According to Collinder (1965a: 134), there might have been two words to indicate ‘you’: **-t* and **-n*; ...”

- D. Altaic: Starostin—Dybo—Mudrak (2003:959) reconstruct Proto-Altaic **na* ‘thou’ on the basis of: (a) Proto-Turkic **-ŋ* an ending of the second person > Old Turkic (Orkhon, Old Uighur) *-ŋ*; Karakhanide Turkic *-ŋ*; Turkish *-n*; Gagauz *-n*; Azerbaijani *-n*; Turkmenian *-ŋ*; Uzbek *-ŋ*; Uighur *-ŋ*; Karaim *-n*, *-y*; Tatar *-ŋ*; Bashkir *-ŋ*; Kirghiz *-ŋ*; Kazakh *-ŋ*; Noghay *-ŋ*; Oyrot (Mountain Altai) *-ŋ*; Yakut *-ŋ*; Tuva *-ŋ*; Chuvash *-n*; (b) Proto-Japanese **na* ‘thou’ > Old Japanese *na* ‘thou’; (c) Proto-Korean **nə* ‘thou’ > Middle Korean *nə* ‘thou’ (for Modern Korean, cf. Sohn 1999:207). They note: “Velarization in Turkic is not quite clear and probably secondary (perhaps a fusion with the attributive **-k’i*). The root is widely used only in the Kor[ean]-J[apanese] area, and its original function (to judge from the

O[ld] J[apanese] opposition of *si* and *na*) was probably limited to the oblique stem of the suppletive 2nd p[erson] paradigm.”

Greenberg 2000:76—77.

(vb.) *lab- ‘to eat greedily, to lap (up), to suck milk’;

- (n.) **lab-a* ‘eating, sucking’
 Possibly related to or derived from:
 (vb.) **lab-* ‘to take hold of, to grasp’;
 (n.) **lab-a* ‘taking, grasping’

Assuming semantic development from ‘to grasp with the teeth’ > ‘to eat greedily’ as in Proto-Tungus **laba-da-*, cited below.

- A. Proto-Afrasian **lab-* ‘to eat much, to suck milk’: Proto-Semitic **lab-an-* ‘to eat much, to suck milk’ > Arabic *labana* ‘to eat much, to suck milk’, *laban* ‘milk’, *labān* ‘breast’, *libān* ‘sucking, nursing’. Proto-Semitic **lab-ay-* ‘to eat much’ > Arabic (inf.) *laby* ‘to eat much’. Zammit 2002: 364—365. Highland East Cushitic: Kambata *laaba* ‘udder’. Hudson 1989: 330. [Ehret 1995:397, no. 808, **lib-* ‘to lap’.]
- B. Proto-Altaic **labV-* (~ *-p-*) ‘to eat greedily’: Proto-Tungus **lebge-* ‘to eat greedily’ > Negidal *lebge-* ‘to eat greedily’; Ulch *legbe-* ‘to eat greedily’; Nanay / Gold *legbeči-* ‘to eat greedily’; Udihe *legbe-* ‘to eat greedily’. Proto-Mongolian **labsi-* ‘to eat greedily’ > Mongolian *labsi-* ‘to eat greedily, to champ’; Khalkha *lawši-* ‘to eat greedily’. Starostin—Dybo—Mudrak 2003:869 **lebV-* (~ *-p-*) ‘to eat greedily’ (Starostin—Dybo—Mudrak also note Proto-Tungus **labada-* ‘to grasp with the teeth’). As opposed to Starostin—Dybo—Mudrak, I would reconstruct Proto-Altaic **labV-* and assume vowel assimilation in Tungus. The original vowel was preserved in Proto-Tungus **laba-da-* ‘to grasp with the teeth’ (cf. Solon *lawā-dā-* ‘to grasp with the teeth’).

944. Proto-Nostratic root **lag-* (~ **lǝg-*):
 (vb.) **lag-* ‘to put, place, lay, or set down’;
 (n.) **lag-a* ‘the act of putting, placing, laying, or setting down’
- A. Proto-Afrasian **lag-* ‘to put, place, lay, or set down’: Egyptian *ʒg* (< **lg*) ‘to plant, to cause to grow or sprout’. Hannig 1995:16; Erman—Grapow 1926—1963.1:22. Central Chadic: Bachama *laga* ‘to plant’. Carnochan 1975:465. Semantic development as in Kartvelian. Perhaps also: Highland East Cushitic: Sidamo *lagaaw-* ‘to descend, to go down’. Hudson 1989: 382.
- B. Proto-Kartvelian **lag-/lg-* ‘to put, to plant’, (past ptc.) **na-rg-* (< **na-lg-*) ‘planted’: Georgian *lag-* ‘to put, to place, to set, to lay’, *rg-* ‘to plant’, *narg-* ‘planted’; Mingrelian *rg-* ‘to plant’, *norg-* ‘seedling, sapling’; Laz *rg-* ‘to plant’; Svan *laž-/lǝž-*: *li-lǝž-eni* ‘to plant something; to attach, to fasten’. Klimov 1964:118—119 **lag-/lg-* and 1998:106 **lag-* ‘to plant’ (according to Klimov, “[t]he variant *rg-* derives from the zero grade of the

stem *lg-*”), 138 **na-rg-* ‘planted’, 155 **rg-* ‘to plant’; Fähnrich—Sardshweladse 1995:280—281 **rg-*; Schmidt 1962:129; Gamkrelidze—Ivanov 1984.II:877 **lag-/lg-* and 1995.I:774 **lag-/lg-* ‘to put, to lay; to plant’; Fähnrich 1994:234 and 2007:342 **rg-*. Fähnrich 2007:263 gives Proto-Kartvelian **lag-* ‘place, region’: Georgian *a-lag-i* ‘place, region’; Svan *lag-a* ‘route, way, direction’.

APPENDIX:
LANGUAGE CONTACT

In Chapter 13 of this book, I propose that “[t]he unified Nostratic parent language may be dated to between 15,000 to 12,000 BCE, that is, at the end of the last Ice Age — it was located in the Fertile Crescent just south of the Caucasus...” In our joint monograph, *The Nostratic Macrofamily: A Study in Distant Linguistic Relationship*, John C. Kerns proposed the exact same location (“the Fertile Crescent just south of the Caucasus” [Bomhard—Kerns 1994:155]). In his 1998 book, *The Nostratic Hypothesis and Linguistic Paleontology*, Aaron Dolgopolsky also places the homeland in the same general area (cf. Dolgopolsky 1998:26). As can be seen, Kerns, Dolgopolsky, and I are essentially in agreement about the location of the homeland of the speakers of the Nostratic parent language. If the scenario we are proposing is correct, we would expect to find evidence of prehistoric contact between Nostratic and non-Nostratic neighboring languages. A good place to look for such evidence would be the Northwest and Northeast Caucasian languages. Not only are languages of these families still extant, there are good reasons to believe that, in ancient times, they covered a considerably wider geographic area than they do at present. For example, the Hurrian language (along with the closely-related Urartian), which was located in the northeastern Zagros-Taurus corner of the “hilly flanks” of Mesopotamia, may have belonged to the Northeast Caucasian language family (cf. Diakonoff—Starostin 1996). Likewise, Hattic, which was located in central Anatolia, has been claimed by some to be an ancient Northwest Caucasian language (cf. Diakonoff 1990:63; Chirikba 1996a). We may note in passing that, according to Nikolayev—Starostin (1994), the Northwest and Northeast Caucasian language families are related. Together, they form a larger North Caucasian super-family.

A comparison of the vocabularies of the North Caucasian languages and the Nostratic languages shows that there is indeed evidence of very ancient contact between North Caucasian and Nostratic. The evidence that I have gathered is listed in this Appendix (the Circassian material is from Kuipers 1975; the Abkhaz material is from Chirikba 1996b; the Proto-North Caucasian material is from Nikolayev—Starostin 1994). The evidence presented here is especially significant in that it independently corroborates the Proto-Nostratic reconstructions I have proposed as opposed to those of Illič-Svityč and Dolgopolsky.

1. Proto-Nostratic root **baʃ-* (~ **bəʃ-*):
(vb.) **baʃ-* ‘to pour’;
(n.) **baʃ-a* ‘torrent, outpour’

Proto-North Caucasian **bVHV* ‘big, many’ (cf. Nikolayev—Starostin 1994: 316—317).

Proto-Circassian **ba* ‘much’ (cf. Kuipers 1975:11).

3. Proto-Nostratic (n.) **baba* ‘father’ (nursery word):

Proto-North Caucasian **babajV* ‘father, grandfather’ (a nursery word) (cf. Nikolayev—Starostin 1994:286; Chirikba 1996b:13).

24. Proto-Nostratic root (Eurasianic only) **ban-* (~ **bən-*):
 (vb.) **ban-* ‘to cut, to strike’;
 (n.) **ban-a* ‘cut, wound’

Proto-Circassian **ban(a)* ‘to fight’ (cf. Kuipers 1975:12).

29. Proto-Nostratic **bar-* (~ **bər-*):
 (vb.) **bar-* ‘to be thick, bushy, shaggy; to be coarse, rough, harsh’
 (n.) **bar-a* ‘roughness, coarseness, harshness; thickness, shagginess’; (adj.)
 ‘rough, harsh, coarse; thick, shaggy, bushy’
 Derivative of:
 (vb.) **bar-* ‘to swell, to puff up, to expand’;
 (n.) **bar-a* ‘swelling, bulge, increase’

Proto-North Caucasian **barḱwǎ* ‘rough skin’: (cf. Starostin—Nikolayev 1994:288).

40. Proto-Nostratic root **bay-* (~ **bəy-*):
 (vb.) **bay-* ‘to apportion, to divide into shares, to distribute, to allot, to share’;
 (n.) **bay-a* ‘portion, share’

Proto-Circassian **bayə* ‘rich’ (cf. Kuipers 1975:12). Note: This may be a loan from Turkic.

48. Proto-Nostratic (n.) **bin-a*, **ban-a* ‘younger relative: (m.) younger brother, younger son; (f.) younger sister, younger daughter’:

Proto-Circassian **bənə* ‘(children of) family’ (cf. Kuipers 1975:12).

49. Proto-Nostratic root **bir-* (~ **ber-*):
 (vb.) **bir-* ‘to swell, to rise, to grow’;
 (n.) **bir-a* ‘largeness, greatness, height, tallness’
 Extended form:
 (vb.) **bir-V-g-* ‘to be high’;
 (n.) **bir-g-a* ‘height, high place’; (adj.) ‘high, tall, lofty’

Proto-North Caucasian **bīrčV* (~ *-ē-*, *-ī-*) ‘rich, honorable’ (cf. Nikolayev—Starostin 1994:305).

56. Proto-Nostratic (n.) **bor^y-a* ‘a dark color’; (adj.) ‘dark, dark-colored’:

Proto-North Caucasian **būrV* (~ -*ō-*) ‘grey, brown’ (cf. Nikolayev—Starostin 1994:313—314). Note: This may be a borrowing.

58. Proto-Nostratic (n.) **bud-a* ‘lowest part or region (of anything)’:

Proto-North Caucasian **bVdV* ‘side’ (cf. Starostin—Nikolayev 1994:315—316).

64. Proto-Nostratic (n.) **bul-a* (~ **bol-a*) ‘penis, testicle(s)’:

Derivative of:

(vb.) **bul-* ‘to swell, to expand, to spread out, to overflow; to puff up, to inflate’;

(n.) **bul-a* ‘large quantity or amount; expansion, spread, inflation; puff, blow’

Proto-North Caucasian **bilV* (~ -*l-*) ‘penis’ (cf. Nikolayev—Starostin 1994:307).

119. Proto-Nostratic root **phir-* (~ **pher-*):

(vb.) **phir-* ‘to bring forth, to bear fruit’;

(n.) **phir-a* ‘birth, issue, offspring, descendant, fruit’

Proto-North Caucasian **pīrqwĀ* ‘a kind of fruit’ (cf. Nikolayev—Starostin 1994:873—874).

120. Proto-Nostratic root **phir-* (~ **pher-*):

(vb.) **phir-* ‘to move swiftly, to hasten, to be in a hurry, to be greatly agitated; to flutter, to fly, to flee’;

(n.) **phir-a* ‘flying, flight, fleeing’

Proto-North Caucasian **pirV* ‘(vb.) to fly; (n.) flight’ (cf. Nikolayev—Starostin 1994:874—875; Chirikba 1996b:21—22).

123. Proto-Nostratic root **hitʹy-* (~ **hetʹy-*):

(vb.) **hitʹy-* ‘to give birth to’;

(n.) **hitʹy-a* ‘genitals (male or female); birth, origin’

Proto-North Caucasian **pūti*/**būti* ‘genitals (mostly female)’ (cf. Nikolayev—Starostin 1994:876—877).

138. Proto-Nostratic root **huw-* (~ **how-*):

(vb.) **huw-* ‘to puff, to blow, to exhale; to puff up, to inflate’;

(n.) **huw-a* ‘a puff, the act of blowing, breath’

Proto-North Caucasian **pūHV* ‘(vb.) to blow; (n.) blowing’ (onomatopoeic root) (cf. Nikolayev—Starostin 1994:875).

144. Proto-Nostratic (n.) **da-* ‘mother, sister’; (reduplicated) (n.) **da-da-* ‘mother, sister’ (nursery words):

Proto-North Caucasian **dājV/*dādājV* ‘father; mother’ (a common North Caucasian nursery word) (cf. Nikolayev—Starostin 1994:397—398; Chirikba 1996b:29—30).

156. Proto-Nostratic root (?) **daw-* (~ **dəw-*):
 (vb.) **daw-* ‘to sound, to resound, to make a noise’;
 (n.) **daw-a* ‘sound, noise’

Proto-North Caucasian **dωǎnʔV* ‘a kind of musical instrument’ (cf. Nikolayev—Starostin 1994:406—407).

182. Proto-Nostratic (n.) **dur-a* ‘goat, sheep, ram’ (perhaps originally ‘horned animal’):

Proto-North Caucasian **dVrǰwV* ‘he-goat’ (cf. Nikolayev—Starostin 1994:403).

183. Proto-Nostratic root **duw-* (~ **dow-*):
 (vb.) **duw-* ‘to blow about, to fly about, to scatter; to be blown, strewn, or scattered about’;
 (n.) **duw-a* ‘anything blown, sprinkled, scattered, or strewn about: smoke, steam, vapor; rain, shower, drizzle, raindrops; dust’; (adj.) ‘blown about, sprinkled, scattered, strewn’

Proto-North Caucasian **dwiHV* ‘wind’ (cf. Nikolayev—Starostin 1994:407).

184. Proto-Nostratic demonstrative stems:
 Proximate: **thā-* (~ **thə-*) ‘this’;
 Intermediate: **thi-* (~ **the-*) ‘that’;
 Distant: **thu-* (~ **tho-*) ‘that yonder’

Proto-North Caucasian **tV* ‘that’ (demonstrative pronoun) (cf. Nikolayev—Starostin 1994:990—991).

232. Proto-Nostratic root **t’aw-* (~ **t’əw-*):
 (vb.) **t’aw-* ‘to hit, to strike’;
 (n.) **t’aw-a* ‘stroke, blow, injury, harm, damage’

Proto-Circassian **t’awə* ‘to bump (one’s head)’ (cf. Kuipers 1975:18).

243. Proto-Nostratic root **t’uʔw-* (~ **t’oʔw-*):
 (vb.) **t’uʔw-* ‘to separate, divide, or split into two parts; to cut in half’;

(n.) **t'u²w-a* ‘separation or division into two; two halves’
(used as the base for the numeral ‘two’ in Indo-European and Altaic)

Proto-Northwest Caucasian **tqo* ‘two’ (cf. Colarusso 1981.I:538 **t'q'ù-* and 1992:45 **t'q'o*; Kuipers 1975:19 Proto-Circassian **Tq^o(a)*). Note: Nikolayev—Starostin (1994:924) reconstruct Proto-North Caucasian **qHwā* ‘two’, West Caucasian **tqI:^wA* ‘two’. However, they note: “The PWC form has a prefixed dental; this may be an innovation, but may also reflect the common NC state (**tqHwā* with simplification of the initial cluster in PEC).”

253. Proto-Nostratic indefinite pronoun stem **dvi-* (~ **dve-*) ‘this one, that one’:

Proto-North Caucasian **ʒi* ‘self, oneself’ (cf. Nikolayev—Starostin 1994:1102—1103).

266. Proto-Nostratic root **t'yal-* (~ **t'yəl-*) and/or **t'yil-* (~ **t'yel-*):
(vb.) **t'yal-* and/or **t'yil-* ‘to overshadow, to cover over, to make dark’;
(n.) **t'yal-a* and/or **t'yil-a* ‘shade, shadow; covering; darkness’

Proto-North Caucasian **č̣lχwV* ‘looming, haze; fumes’ (cf. Nikolayev—Starostin 1994:379).

291. Proto-Nostratic root **s^yuw-* (~ **s^yow-*):
(vb.) **s^yuw-* ‘to be proper, fitting, suitable, appropriate, good, well, fine, beautiful’;
(n.) **s^yuw-a* ‘propriety, suitability, appropriateness’; (adj.) ‘proper, fitting, suitable, appropriate’

Proto-Circassian **s'^o(a)* ‘good’, **s'^oəs'a* ‘beneficent, benefit, good deed’, **s'^oəč'a* ‘gratitude’ (cf. Kuipers 1975:32—33).

326. Proto-Nostratic 3rd person pronoun stem **si-* (~ **se-*) ‘he, she, it; him, her; they, them’; 3rd person possessive suffix **-si* (~ **-se*) ‘his, her, its; their’:

Proto-North Caucasian **sāj* interrogative pronoun: ‘what?’ — originally used only as an oblique base (Nikolayev—Starostin 1994:958).

330. Proto-Nostratic (n.) **žag^w-a* ‘a small tree, a bush or shrub’:

Proto-North Caucasian **žāgV* ‘a kind of shrub’ (cf. Nikolayev—Starostin 1994:1105).

339. Proto-Nostratic (n.) **č'am-a* ‘reed, grass’:

Proto-North Caucasian *čāmhV ‘a kind of plant’ (cf. Nikolayev—Starostin 1994:383).

340. Proto-Nostratic root *č'ik'- (~ *č'ek'-):
 (vb.) *č'ik'- ‘to be small’;
 (n.) *č'ik'-a ‘small things’; (adj.) ‘small’

Proto-North Caucasian *čākū / *čākū ‘young (of animals), boy’; West Caucasian *čəkʷə ‘young boy, youngster; small’ (cf. Nikolayev—Starostin 1994:382—383).

342. Proto-Nostratic demonstrative pronoun stem *ša- (~ *šə-) ‘this, that’:

Proto-North Caucasian *šī interrogative pronoun stem: ‘who?, what?’; West Caucasian *šə (~ *š:-) ‘how?’ (cf. Nikolayev—Starostin 1994:986).

345. Proto-Nostratic root *šaw- (~ *šəw-):
 (vb.) *šaw- ‘to sigh, to pant, to gasp, to breathe deeply’;
 (n.) *šaw-a ‘breath, sigh’

Related to:

- (vb.) *šaw- ‘to sleep, to rest’;
 (n.) *šaw-a ‘sleep, slumber, rest’

Proto-North Caucasian *šīhwV ‘(n.) breath; (v.) to breathe’ (cf. Nikolayev—Starostin 1994:961—962). Note also: Proto-North Caucasian *šīwīV ‘whistle; reed-pipe’ (cf. Nikolayev—Starostin 1994:984).

350. Proto-Nostratic root *gaʔ- (~ *gəʔ-):
 (vb.) *gaʔ- ‘to go, to leave, to depart; to leave behind, to abandon, to forsake’;
 (n.) *gaʔ-a ‘abandonment, lack, want, need, deprivation, loss, deficit’; (adj.) ‘abandoned, forsaken, left behind; wanting, lacking, deprived of’

- Proto-North Caucasian **qēmiV* ‘palm of the hand, handful’ (cf. Nikolayev—Starostin 1994:888).
432. Proto-Nostratic root **k^hat^h-* (~ **k^hət^h-*):
 (vb.) **k^hat^h-* ‘to plait, to weave, to twist’;
 (n.) **k^hat^h-a* ‘that which is plaited, woven, twisted: mat, net, knot’
 Derivative:
 (n.) **k^hat^h-a* ‘rag’
- (?) Proto-Circassian **k^hat^hə* ‘sheep-shed’ (cf. Kuipers 1975:49). Assuming semantic development as in Old Church Slavic *kotъcb* ‘pen, coop’.
440. Proto-Nostratic root **k^hay-*:
 (vb.) **k^hay-* ‘to scoop out’;
 (n.) **k^hay-a* ‘spoon, ladle’
 Extended form:
 (vb.) **k^hay-V-w-* ‘to dig’;
 (n.) **k^hay-w-a* ‘cave, pit, hollow’
- Proto-Circassian **k^həya* or **k^hayə* ‘tub’ (cf. Kuipers 1975:49).

Semantics as in: Proto-Kartvelian **q'wil-* ‘shoulder bone, shoulder blade; arm’: Georgian *q'vl-iv-i* ‘shoulder blade’; Mingrelian *ʔvil-e* ‘bone, arm’; Laz *q'vil-i*, *ʔil-i* ‘bone’. Klimov 1964:211—212 **q̇wl-iw-* and 1998:242 **q̇wl-iw-*; Schmidt 1962:141; Fähnrich—Sardshweladse 1995:415 **q̇wil-*; Fähnrich 2007:516 **q̇wil-*.

594. Proto-Nostratic root (Eurasian only) **q'watʰh-* (~ **q'wəʰh-*):(vb.) **q'watʰh-* ‘to say, to speak, to call’;(n.) **q'watʰh-a* ‘call, invocation, invitation, summons’

Proto-Circassian **q̇'atha* ‘to tell, to report; to announce, to make known’ (cf. Kuipers 1975:73).

602. Proto-Nostratic root **tʰay-* (~ **tʰəy-*):
 (vb.) **tʰay-* ‘to grow old, to turn gray (hair)’;
 (n.) **tʰay-a* ‘old age, gray hair’

Proto-North Caucasian **ləjV* ‘time, day’ (cf. Nikolayev—Starostin 1994:766).

610. Proto-Nostratic root **tʰil-* (~ **tʰel-*):
 (vb.) **tʰil-* ‘to be bent, curved, round’;
 (n.) **tʰil-a* ‘bent, curved, round thing or object’; (adj.) ‘bent, curved, round’

Proto-North Caucasian **ləj/lij* ‘ear (of corn)’ (cf. Nikolayev—Starostin 1994:779).

614. Proto-Nostratic demonstrative stems (originally deictic particles):
 Proximate: **ʔi-* (~ **ʔe-*) ‘this’;
 Intermediate: **ʔu-* (~ **ʔo-*) ‘that’;
 Distant: **ʔa-* (~ **ʔə-*) ‘that yonder, that over there’

Proto-North Caucasian **ʔi* ‘this’ (a common Proto-North Caucasian demonstrative stem, in the majority of languages used for near deixis) (cf. Nikolayev—Starostin 1994:214—215), **ʔə* ‘that’ (this demonstrative stem is mostly used for far deixis) (cf. Nikolayev—Starostin 1994:218—219), **ʔu* (~ **hu*) ‘that’ (cf. Nikolayev—Starostin 1994:222).

Proto-Abkhaz demonstrative pronoun: **a* ‘this’ (used only in compounds) (cf. Chirikba 1996b:1).

616. Proto-Nostratic (n.) **ʔab(b)a* ~ **ʔapʰ(pʰ)a* ‘father, forefather’ (nursery word):

Proto-North Caucasian **ʔəbV(j)V* ‘father’ (a nursery word) (cf. Nikolayev—Starostin 1994:217; Chirikba 1996b:1 **abá*).

621. Proto-Nostratic root **ʔakʰ-* (~ **ʔəkh-*):
 (vb.) **ʔakʰ-* ‘to eat’;
 (n.) **ʔakʰ-a* ‘food, meal; fodder, feed, morsel’

(?) Proto-North Caucasian **ʔikwVn* ‘to eat’ (cf. Nikolayev—Starostin 1994:207).

636. Proto-Nostratic (n.) **ʔanʷa* ‘mother, aunt’ (nursery word):
 Note also:
 (n.) **ʔenʷa* ‘mother, elder sister’

Proto-North Caucasian **ʔānV(j)V* ‘mother’ (cf. Nikolayev—Starostin 1994:201—202; Chirikba 1996b:9).

652. Proto-Nostratic root **ʔay-* (~ **ʔəy-*):

(vb.) **ʔay-* ‘to go, to proceed’;

(n.) **ʔay-a* ‘journey’

Note also:

(vb.) **ʔiy-* ‘to come, to go’;

(n.) **ʔiy-a* ‘approach, arrival; path, way’

Proto-Abkhaz **jə* ‘to come, to go’ (cf. Chirikba 1996b:126).

664. Proto-Nostratic (n.) **ʔer-a* ‘earth, ground’:

Proto-North Caucasian **ʔārV* ‘plain’ (cf. Nikolayev—Starostin 1994:202).

669. Proto-Nostratic root **ʔil-* (~ **ʔel-*):

(vb.) **ʔil-* ‘to see, to know’;

(n.) **ʔil-a* ‘eye’

Proto-North Caucasian **ʔiLV* ‘to look’ (cf. Nikolayev—Starostin 1994:209).

703. Proto-Nostratic root **ħag-* (~ **ħəg-*):

(vb.) **ħag-* ‘to be pressed or weighed down; to be oppressed; to be vexed, distressed, disheartened, afflicted, troubled’;

(n.) **ħag-a* ‘trouble, affliction, oppression, distress, grief, sadness’

Proto-North Caucasian *=*HäGwVn* ‘to tremble, to be afraid’ (cf. Nikolayev—Starostin 1994:553—554).

724. Proto-Nostratic root **ħar-* (~ **ħər-*):

(vb.) **ħar-* ‘to scratch, to scrape’ (> ‘to plow’);

(n.) **ħar-a* ‘scraping, scratching’

Proto-North Caucasian *=*HarxVr* (~ -*ə-*, -*λ-*) ‘to sweep’ (cf. Nikolayev—Starostin 1994:548). Note also: Proto-North Caucasian **HěrxwA* / **HěwxwA* ‘to comb, to scratch, to scrape’ (cf. Nikolayev—Starostin 1994:562).

731. Proto-Nostratic root **ħaw-* (~ **ħəw-*):

(vb.) **ħaw-* ‘to swell, to increase’;

(n.) **ħaw-a* ‘swelling, increase, growth; great number or amount’

Proto-North Caucasian **HāwayV* ‘to swell’ (cf. Nikolayev—Starostin 1994:549—550).

757. Proto-Nostratic root **ʕath-* (~ **ʕəth-*):

(vb.) **ʕath-* ‘to move, to proceed, to advance (in years)’;

(n.) **ʕath-a* ‘maturity, old age; advance’; (adj.) ‘mature, old; advanced’

Proto-North Caucasian $*=\bar{a}tV$ ‘to move, to go, to come’ (cf. Nikolayev—Starostin 1994:423).

783. Proto-Nostratic root $*\gamma il-$ ($\sim * \gamma el-$):
 (vb.) $*\gamma il-$ ‘to bear, to give birth, to beget (of humans)’;
 (n.) $*\gamma il-a$ ‘child, youth, young person’; (adj.) ‘young, immature’

Proto-North Caucasian $*HV\lambda U$ ‘to bear, to give birth; to create’ (cf. Nikolayev—Starostin 1994:614 $*HV\lambda U$ ‘to bear, to give birth; to create’).

791. Proto-Nostratic 1st person personal pronoun stem $*wa-$ ($\sim *w\bar{a}-$) ‘I, me; we us’:

Nakh $*waj$ ‘we (incl.)’ (listed under Proto-North Caucasian $*\mu\bar{o}$ ‘thou’) (cf. Nikolayev—Starostin 1994:1014—1015).

801. Proto-Nostratic root $*wal-$ ($\sim *w\bar{a}l-$):
 (vb.) $*wal-$ ‘to flow, to wet, to moisten’;
 (n.) $*wal-a$ ‘flow, trickle; wetness, moisture, dampness’; (adj.) ‘wet, damp’

Proto-Circassian $*wala$ ‘cloud’ (cf. Kuipers 1975:96). Assuming semantic development as in Old English *weolcen*, *wolc*, *wolcen* ‘cloud’; Old Frisian *wolken*, *wulken* ‘cloud’; Old Saxon *wolkan* ‘cloud’; Dutch *wolk* ‘cloud’; Old High German *wolchan*, *wolkan* ‘cloud’ (New High German *Wolke*).

804. Proto-Nostratic root $*wal^y-$ ($\sim *w\bar{a}l^y-$):
 (vb.) $*wal^y-$ ‘to turn, to roll, to revolve’;
 (n.) $*wal^y-a$ ‘circle, circumference; turn, rotation’; (adj.) ‘round’

Proto-Circassian $*wala$ ‘to totter, to reel; to wave, to undulate’ (cf. Kuipers 1975:86).

807. Proto-Nostratic root $*wan-$ ($\sim *w\bar{a}n-$):
 (vb.) $*wan-$ ‘to stay, to remain’;
 (n.) $*wan-a$ ‘abode, dwelling’

Proto-Circassian $*w\bar{a}na$ ‘house’ (cf. Kuipers 1975:86).

813. Proto-Nostratic root $*war-$ ($\sim *w\bar{a}r-$):
 (vb.) $*war-$ ‘to look, to watch out for, to observe, to care for’;
 (n.) $*war-a$ ‘watch, vigil, guardianship, care; watchman, guard, keeper, warder’

Proto-North Caucasian $*\bar{z}werV$ ‘look, sight’ (cf. Nikolayev—Starostin 1994: 248—249).

816. Proto-Nostratic root **war-* (~ **wər-*):

(vb.) **war-* ‘to raise, to elevate, to grow, to increase’;

(n.) **war-a* ‘uppermost, highest, or topmost part’

Proto-North Caucasian **wǎrte* ‘top’ (cf. Nikolayev—Starostin 1994:1039).

Note: This may be an Iranian or Indo-Iranian loan.

Proto-Circassian **warq:ə* ‘nobleman’ (cf. Kuipers 1975:87).

821. Proto-Nostratic root **waš-* (~ **wəš-*):

(vb.) **waš-* ‘to add (to), to augment, to increase, to heap up’;

(n.) **waš-a* ‘augmentation, increase, addition, increment’; (adj.) ‘increased, augmented, heaped up, filled, full’

Proto-Circassian **wəša* ‘to stuff, to fill’ (cf. Kuipers 1975:85).

829. Proto-Nostratic root **welʷ-*:

(vb.) **welʷ-* ‘to be open, to be vacant’;

(n.) **welʷ-a* ‘open space, open land, field, meadow’

Proto-North Caucasian **wǎlʷwV* ‘mountain pasture’ (cf. Nikolayev—Starostin 1994:1055—1056).

835. Proto-Nostratic (n.) **wir-a* ‘a kind of tree: aspen, alder, poplar, or the like’:

Proto-North Caucasian **wǎrxi* ‘a kind of foliage tree’ (cf. Nikolayev—Starostin 1994:230—231).

844. Proto-Nostratic indefinite pronoun stem **ma-* (~ **mə-*), **mi-* (~ **me-*), **mu-* (~ **mo-*) ‘one, someone, somebody, anyone, anybody; other, another’:

Note: This may originally have been a demonstrative stem, with three degrees of distance:

Proximate: **ma-* (~ **mə-*) ‘this’;

Intermediate: **mi-* (~ **me-*) ‘that’;

Distant: **mu-* (~ **mo-*) ‘that yonder’

Proto-North Caucasian **mV* demonstrative pronoun (cf. Nikolayev—Starostin 1994:842—843).

Proto-Circassian **mə* ‘this’ (cf. Kuipers 1975:87). Proto-Circassian **maw* ‘thither, that’ (cf. Kuipers 1975:88).

845. Proto-Nostratic (nursery word) (n.) **ma(a)* ‘mother, mommy’, (reduplicated) **mam(m)a*, **mem[e]* ‘mother; (mother’s) breast, milk’; used as a verb, the

meaning was probably ‘to suckle, to nurse; to suck (the breast)’ (as noted by Watkins 2000:50: “[a] linguistic near-universal found in many of the world’s languages, often in reduplicated form”; see also Jakobson 1971[1960]):

Proto-North Caucasian **māmV* ‘teat, nipple; pimple’ (cf. Nikolayev—Starostin 1994:806—807).

846. Proto-Nostratic negative/prohibitive particle **ma(?)-* (~ **mə(?)-*) ‘no, not’:

Proto-North Caucasian **ma* (~ *-ə*) prohibitive particle (cf. Nikolayev—Starostin 1994:797).

Proto-Circassian **mə* negative prefix (cf. Kuipers 1975:87).

858. Proto-Nostratic (n.) **mal-a* ‘hill, mountain’:

Proto-North Caucasian *malšwV* ‘slope; muzzle, face’ (cf. Nikolayev—Starostin 1994:894—795).

874. Proto-Nostratic (n.) **man^v-a* ‘progenitor, begetter, man, male; penis’:

Derivative of:

(vb.) **man^v-* ‘to lust after, to desire passionately, to copulate with, to have sexual intercourse, to beget’;

(n.) **man^v-a* ‘ardent desire, passion, lust’

Proto-North Caucasian **mVñxV* ‘male, man’ (cf. Nikolayev—Starostin 1994:840).

Proto-Circassian **mana* ‘penis’ (cf. Kuipers 1975:89).

878. Proto-Nostratic (n.) **mar-a* ‘(young) man, male (human or animal)’:

Proto-North Caucasian **mōrLV* ‘male’ (cf. Nikolayev—Starostin 1994:830—831). According to Nikolayev—Starostin, “an important social term, not borrowed (as sometimes supposed) from Indo-Aryan.”

887. Proto-Nostratic root **mat’-* (~ **mət’-*):

(vb.) **mat’-* ‘to stretch, to expand, to lengthen, to draw out, to measure out’;

(n.) **mat’-a* ‘measure, measurement, amount; extent, limit’

Proto-North Caucasian **mīṭwi* (~ *-ē*) ‘growth, excrescence’ (cf. Nikolayev—Starostin 1994:823).

891. Proto-Nostratic interrogative pronoun stem **mi-* (~ **me-*) ‘who?, which?, what?’, relative pronoun stem **ma-* (~ **mə-*) ‘who, which, what’:

Proto-North Caucasian **mV* interrogative stem (cf. Nikolayev—Starostin 1994: 843).

898. Proto-Nostratic root **mir-* (~ **mer-*):
 (vb.) **mir-* ‘to stab, to pierce, to wound, to cause pain’;
 (n.) **mir-a* ‘wound, pain’

Proto-North Caucasian **mirć(w)Ē* ‘knife, sickle’ (cf. Nikolayev—Starostin 1994:822—823).

907. Proto-Nostratic (Eurasian only) (n.) **mur-a* ‘mulberry, blackberry’:

Proto-North Caucasian **mer(?)V* ‘a kind of berry’ (cf. Nikolayev—Starostin 1994:804—805).

911. Proto-Nostratic first person singular personal pronoun **na* (~ **nə*) ‘I, me’:

Note: On the basis of Dravidian (and possibly Altaic), the original form of this stem may have been **ŋa* (~ **ŋə*), but this is not certain. Sumerian [Emegir] *ĝá.e* [= /ŋa-/] ‘I’ supports such a reconstruction as well.

912. Proto-Nostratic first person plural exclusive personal pronoun **na* (~ **nə*) ‘we, us’:

Proto-North Caucasian **nř* ‘I’ (possibly originally a collective plural pronoun: cf. Proto-Dargwa **nu-s:a* ‘we’ [exclusive], **nu-x:a* ‘we’ [inclusive]) (cf. Nikolayev—Starostin 1994:855).

913. Proto-Nostratic deictic particle **na* (~ **nə*), **ni* (~ **ne*) ‘this, that’:

Proto-North Caucasian **nV* ‘this, that’ (a demonstrative stem) (cf. Nikolayev—Starostin 1994:858).

935. Proto-Nostratic (n.) **nus^y-a* ‘woman, female; any female connected by marriage: wife, bride, sister-in-law, daughter-in-law’:

Derivative of:

(vb.) **nus^y-* ‘to be small, minute, soft, weak, delicate’;

(n.) **nus^y-a* ‘smallness, insufficiency, decrease, diminishment’; (adj.) ‘small, minute, soft, weak, delicate’

Proto-North Caucasian **nřsA* (~ *-ř-*) ‘daughter-in-law’ (cf. Nikolayev—Starostin 1994:856—857). Note: According to Tuite—Schulze (1998), the North Caucasian terms are loans from Indo-European; cf. Proto-Indo-European **(s)nuso-s* ‘daughter-in-law’.

Proto-Circassian **nəsa* ‘(father’s) brother’s wife, daughter-in-law’ (cf. Kuipers 1975:89).

975. Proto-Nostratic root **rum-* (~ **rom-*):
 (vb.) **rum-* ‘to grow or become dark; to darken’;
 (n.) **rum-a* ‘darkness, night; twilight, dusk’; (adj.) ‘dark’

Proto-North Caucasian **rVmǎĀ* ‘night, evening’ (cf. Nikolayev—Starostin 1994:955—956).

I strongly suspect that most, if not all, of the Northwest Caucasian (Abkhaz and Circassian) evidence cited in this Appendix dates from the period when the speakers of Proto-Indo-European were in contact with speakers of Proto-Northwest Caucasian, as discussed in Chapter 13, §13.2, and Chapter 21 of this book and does not go back to the period of contact between Proto-Nostratic and Proto-North Caucasian. This is indicated, for example, by forms such as Proto-Circassian **q’atʰa* ‘to tell, to report; to announce, to make known’ (no. 594 above), which was clearly borrowed from Proto-Indo-European after it had lost the earlier palatalized alveolars but before it had lost the postvelars (see Chapter 4, Appendix, for details on the prehistoric development of the Proto-Indo-European phonological system). The matches between Proto-North Caucasian and Proto-Nostratic, on the other hand, go back much further in time. Though not all of the matches are perfect, as a group, they are extremely suggestive.

Besides the Northwest and Northeast Caucasian languages, another place to look for possible evidence of language contact is Sumerian. The Sumerian evidence is abundant and is included in the individual Nostratic etymologies. As noted at the end of Chapter 15, “... the evidence seems to indicate that Sumerian ... is distantly related to Nostratic.” Thus, the Sumerian situation is a bit different from that involving the Northwest and Northeast Caucasian languages, which points to contact rather than relationship, though ultimate relationship should not be ruled out at an even deeper time depth. The investigation of deeper relationship, however, lies beyond the scope of this book.

PART TWO: COMPARATIVE MORPHOLOGY

16. Nostratic Morphology I: The Evidence	371
16.1. Introduction	371
16.2. General Comment	371
I. Pronominal, Anaphoric, and Deictic Stems	372
16.3. First Person Singular <i>*mi</i> (~ <i>*me</i>), First Person Plural (Inclusive) <i>*ma</i> (~ <i>*mā</i>)	372
16.4. First Person <i>*k^ha</i> (~ <i>*k^hā</i>)	375
16.5. First Person <i>*h^a</i> (~ <i>*h^ā</i>)	378
16.6. First Person Singular <i>*na</i> (~ <i>*nā</i>)	379
16.7. First Person Plural Exclusive <i>*na</i> (~ <i>*nā</i>)	381
16.8. First Person (Postnominal Possessive/Preverbal Agentive) <i>*ḡiya</i>	382
16.9. Second Person <i>*thi</i> (~ <i>*thā</i>), (Oblique Forms) <i>*th^a</i> (~ <i>*th^ā</i>)	383
16.10. Second Person <i>*si</i> (~ <i>*se</i>)	386
16.11. Second Person <i>*ni</i> (~ <i>*ne</i>) and/or <i>*na</i> (~ <i>*nā</i>)	387
16.12. Pronominal Stem of Unclear Deictic Function <i>*-gi</i> (~ <i>*-ge</i>)	388
16.13. Deictic Particle (A) <i>*ḡa</i> (~ <i>*ḡā</i>) (Distant), (B) <i>*ḡi</i> (~ <i>*ḡe</i>) (Proximate), and (C) <i>*ḡu</i> (~ <i>*ḡo</i>) (Intermediate)	389
16.14. Deictic Particle (A) <i>*k^ha</i> (~ <i>*k^hā</i>) (Proximate), (B) <i>*k^hu</i> (~ <i>*k^ho</i>) (Distant), and (C) <i>*k^hi</i> (~ <i>*k^he</i>) (Intermediate)	393
16.15. Deictic Particle (A) <i>*th^a</i> (~ <i>*th^ā</i>) (Proximate), (B) <i>*th^u</i> (~ <i>*th^o</i>) (Distant), and (C) <i>*thⁱ</i> (~ <i>*th^e</i>) (Intermediate)	395
16.16. Deictic Particle <i>*š^a</i> (~ <i>*š^ā</i>)	397
16.17. Anaphoric Pronoun Stem <i>*si</i> (~ <i>*se</i>)	398
16.18. Deictic Particle <i>*na</i> (~ <i>*nā</i>), <i>*ni</i> (~ <i>*ne</i>)	400
16.19. Deictic Particle <i>*v^ha</i> (~ <i>*v^hā</i>)	401
II. Dual and Plural Markers	401
16.20. Dual <i>*k^hi(-nV)</i>	401

16.21.	Plural <i>*-t^ha</i>	403
16.22.	Plural <i>*-ri</i>	406
16.23.	Plural <i>*-k^hu</i>	407
16.24.	Plural <i>*-s^ya</i>	408
16.25.	Plural/Collective <i>*-la</i>	409
16.26.	Plural <i>*-nV</i>	411
III. Relational Markers		413
16.27.	Direct Object <i>*-ma, *-na</i>	413
16.28.	Genitive <i>*-nu</i>	416
16.29.	Locative <i>*-ni</i>	419
16.30.	Dative <i>*-na</i>	422
16.31.	Directive <i>*-k^ha</i>	423
16.32.	Locative <i>*-ma</i> (variant <i>*-mi</i>) and Locative <i>*-bi</i>	424
16.33.	Directive(-Locative) <i>*-ri</i>	427
16.34.	Locative <i>*-i</i>	429
16.35.	Comitative-Locative Particle <i>*-da</i>	429
16.36.	Oblique <i>*-t^ha</i>	431
16.37.	Possessive <i>*-lV</i>	433
IV. Derivational Suffixes		434
16.38.	Nominalizer <i>*-r-</i>	434
16.39.	Nominalizer <i>*-m-</i>	436
16.40.	Nominalizer <i>*-y-</i>	440
16.41.	Nominalizer <i>*-t^h-</i>	443
